the U.S. copyright on this publication was renewed.]**

***Risking his own life force to cure a
patient's psychosis, Dr. Robert Bruno learns
of the true individualism of human minds!***

The sanitarium was never quiet. Even when night brought comparative stillness, there was an anticipatory tension in the air—for cyclic mental disorders are as inevitable, though not as regular, as the swing of a merry-go-round.

Earlier that evening Gregson, in Ward 13, had moved into the downswing of his manic-depressive curve, and there had been trouble. Before the orderlies could buckle him into a restraining jacket, he had managed to break the arm of a “frozen” catatonic patient, who had made no sound even as the bone snapped.

Under apomorphine, Gregson subsided. After a few days he would be at the bottom of his psychic curve, dumb, motionless, and disinterested. Nothing would be able to rouse him then, for a while.

Dr. Robert Bruno, Chief of Staff, waited till the nurse had gone out with the no longer sterile hypodermic. Then he nodded at the orderly.

“All right. Prepare the patient. I want him in Surgery Three in half an hour.”

He went out into the corridor, a tall, quiet man with cool blue eyes and firm lips. Dr. Kenneth Morrissey was waiting for him. The younger man looked troubled.

“Surgery, Doctor?”

“Come on,” Bruno said. “We’ve got to get ready. How’s Wheeler?”

“Simple fracture of the radius, I think. I’m having plates made.”

“Turn him over to one of the other doctors,” Bruno suggested. “I need your help.” He used his key on the locked door. “Gregson’s in good shape for the experiment.”

Morrissey didn’t answer. Bruno laughed a little.

“What’s bothering you, Ken?”

“It’s the word experiment,” Morrissey said.

“Pentothal narcosynthesis was an experiment when they first tried it. So is this—empathy surrogate. If there’s a risk, I’ll be taking it, not Gregson.”

“You can’t be sure.”

They stepped into the elevator.

“I *am* sure,” Bruno said, with odd emphasis. “That’s been my rule all my life. I make sure. I’ve got to *be* sure before I undertake anything new. This experiment can’t possibly fail. I don’t run risks with patients.”

“Well—”

“Come in here.” Bruno led the way from the elevator to an examination room. “I want a final check-up. Try my blood-pressure.” He stripped off his white coat and deftly wound the pneumatic rubber around his arm.

“I’ve explained the whole situation to Gregson’s wife.” Bruno went on as Morrissey squeezed the bulb. “She’s signed the authorization papers. She knows it’s the only chance to cure Gregson. After all, Ken, the man’s been insane for seven years. Cerebral deterioration’s beginning to set in.”

“Cellular, you mean? Um-m. I’m not worried about that. Blood-pressure okay. Heart—”

Morrissey picked up a stethoscope. After a while he nodded.

“A physician hasn’t any right to be afraid of the dark,” Bruno said.

“A physician isn’t charting unmapped territory,” Morrissey said abruptly. “You can dissect a cadaver, but you can’t do that to the psyche. As a psychiatrist you should be the first to admit that we don’t know all there is to know about the mind. Would you take a transfusion from a meningitis patient?”

Bruno chuckled. “Witchcraft, Ken—pure witchcraft! The germ theory of psychosis! Afraid I’ll catch Gregson’s insanity? I hate to disillusion you, but episodic disorders aren’t contagious.”

“Just because you can’t see a bug doesn’t mean it isn’t there,” Morrissey growled. “What about a filterable virus? A few years ago nobody could conceive of liquid life.”

“Next you’ll be going back to Elizabethan times and talking about spleen and humors.” Bruno resumed his shirt and coat. He sobered. “In a way, though, this *is* a transfusion. The only type of transfusion possible. I’ll admit no one knows all there is to know about psychoses. Nobody knows

what makes a man think, either. But that's where physics is beginning to meet medicine. Witchcraft and medicine isolated digitalin when they met. And scientists are beginning to know the nature of thought—an electronic pattern of energy.”

“Empirical!”

“Compare not the brain, but the mind itself, to a uranium pile,” Bruno said. “The potentialities for atomic explosion are in the mind because you can't make a high-specialized colloid for thinking without approaching the danger level. It's the price humans pay for being *homo sapiens*. In a uranium pile you've got boron-steel bars as dampers, to absorb the neutrons before they can get out of control. In the mind, those dampers are purely psychic, naturally—but they're what keep a man sane.”

“You can prove anything by symbolism,” Morrissey said sourly. “And you can't stick bars of boron-steel in Gregson's skull.”

“Yes, I can,” Bruno said. “In effect.”

“But those dampers are—*ideas*! Thoughts! You can't—”

“What is a thought?” Bruno asked.

Morrissey grimaced and followed the Chief of Staff out.

“You can chart a thought on the encephalograph—” he said stubbornly.

“Because it's a radiation. What causes that radiation? Energy emitted by certain electronic patterns. What causes electronic patterns? The basic physical structure of matter. What causes uranium to throw off neutrons under special conditions? Same answer. If an uranium pile starts to get out of control, you can damp it, if you move fast, with boron or cadmium.”

“If you move fast. Why use Gregson? He's been insane for years.”

“If he'd been insane for only a week, we couldn't prove it was the empathy surrogate that cured him. You're just arguing to dodge the responsibility. If you don't want to help me, I'll get somebody else.”

“It would take weeks to train another man,” Morrissey said. “No, I'll operate. Only—have you thought of the possible effect on your own mind?”

“Certainly,” Bruno said. “Why the devil do you suppose I’ve been running exhaustive psychological tests on myself? I’m completely oriented, I’m so normal that my mind must be full of boron dampers.” He paused at the door of his office. “Barbara’s here. I’ll meet you in Surgery.”

Morrissey’s shoulders slumped. Bruno smiled slightly and opened the door. His wife was sitting on a leather couch, idly turning the pages of a psychiatric review.

“Studying?” Bruno said. “Want a job as a nurse?”

“Hello, darling,” she said, tossing the magazine aside.

She came toward him quickly. She was small and dark and, Bruno thought academically, extremely pretty. Then his thoughts stopped being academic as he kissed her.

“What’s up?”

“You’re doing that operation tonight, aren’t you? I wanted to wish you luck.”

“How’d you know?”

“Bob,” she said, “we’ve been married long enough so I can read your mind a little. I don’t know what the operation is, but I know it’s important. So—for luck!”

She kissed him again. Then, with a smile and a nod, she slipped out and was gone. Dr. Robert Bruno sighed, not unhappily, and sat behind his desk. He used the annunciator to check the sanitarium’s routine, made certain everything was running smoothly, and clicked his tongue with satisfaction.

Now—the experiment....

Surgery Three had some new equipment for the experiment. Bruno’s collaborator, Andrew Parsons, the atomic physicist, was there, small and untidy, with a scowling, wrinkled face that looked incongruous under the surgeon’s cap. There was to be no real surgery; trepanning wasn’t necessary, but aseptic precautions were taken as a matter of course.

The anesthetist and two other nurses stood ready, and Morrissey, in his white gown, seemed to have forgotten his worry and had settled down to his usual quiet competence. Gregson was on one of the tables, already prepped and unconscious. Intravenous anesthesia would presently supplement the apomorphine in his system, as it would also be administered to Bruno himself.

Ferguson and Dale, two other doctors, were present. At worst quick cerebral surgery might be necessary, if anything went badly amiss. But nothing could, Bruno thought. Nothing could.

He glanced at the sleek, shining machines, with their attachments and registering dials. Not medical equipment, of course. They were in Parsons' line; he had planned and built them. But the idea had been Bruno's to begin with, and Bruno's psychiatric knowledge had complemented Parsons' technology. Two branches of science had met, and the result would be—a specific for insanity.

Two spots on Bruno's head had been shaved clean. Parsons carefully affixed electrodes, which were already in place on Gregson's skull.

"Remember," Parsons said, "you should be as relaxed as possible."

"You took no sedative, Doctor," Morrissey said.

"I don't need one. The anesthetic will be enough."

The nurses moved with silent competence about the table. The emergency oxygen apparatus was tested. The adrenalin was checked; the sterilizer steamed on its table. Bruno emptied his mind and relaxed as a nurse swabbed his arm with alcohol.

Superimposure of the electronic mental matrix of sanity ... psychic rapport ... the pattern of his sanity-dampers would be fixed unalterably in the twisted, warped mind of the manic-depressive.

He felt the sting of the needle. Automatically he began counting. One. Two. Three....

He opened his eyes. The face of Morrissey, intent and abstracted, hung over him. Beyond Morrissey was the bright ceiling fluorescent, glaring down with a brilliance that made Bruno blink. His arm stung slightly but otherwise there were no after effects.

“Can you hear me, Doctor?” Morrissey said.

Bruno nodded. “Yes. I’m awake now.” His tongue was a little thick. That was natural. “Gregson?”

But Morrissey’s face was growing smaller. No, it was receding. The ceiling light shrank. *He was falling—*

He shot down with blinding rapidity. White walls rushed up past him. Morrissey’s face receded to a shining dot far above. It grew darker as he fell. Winds screamed, and there was a slow, gradually increasing thundering like an echo resounding from the floor of this monstrous abyss.

Down and down, faster and faster, with the white walls fading to gray and to black, till he was blind, till he was deafened with that roaring echo.

Visibility returned. Everything was out of focus. He blinked, swallowed, and made out the rectangular shape of a bedside screen. There was something else, white and irregular.

“Are you awake, Doctor?”

“Hello, Harwood,” Bruno said to the nurse. “How long have I been out?”

“About two hours. I’ll call Dr. Morrissey.”

She stepped out of the room. Bruno flexed his muscles experimentally. He felt all right. Not even a headache. His vision was normal now. He instinctively reached for his wrist and began counting the pulse. Through the window he could see the slow motion of a branch, the leaves fluttering in a gentle wind. Footsteps sounded.

“Congratulations,” Morrissey said, coming to the bed. “Gregson’s in shock, but he’s already beginning to come out of it. No prognosis yet, but I’ll bet a cookie you’ve done it.”

Bruno let out his breath in a long sigh. “You think so?”

Morrissey laughed. “Don’t tell me you weren’t sure!”

“I’m always sure,” Bruno said. “Just the same, confirmation’s always pleasant. I’m thirsty as the devil. Get me some ice, Ken, will you?”

“All right.” Morrissey leaned out of the door and called the nurse. Then he came back and lowered the Venetian blind. “Sun in your eyes. That better?”

How do you feel, or need I ask?"

"Quite normal. No ill effects at all. Say, you'd better notify Barbara I'm alive."

"I already have. She's coming over. Meanwhile, Parsons is outside. Want to see him?"

"Sure."

The physicist must have been near the door, for he appeared almost instantly.

"I'll have to depend on you now," he said. "Psychiatric examinations are out of my line, but Dr. Morrissey tells me we've apparently succeeded."

"We can't be sure yet," Bruno said cautiously, reaching for cracked ice. "I'm keeping my fingers crossed."

"How do you feel?"

"If there's a healthier specimen in this hospital than Dr. Bruno," Morrissey said, "I've yet to hear of it. I'll be back. I've got to check a patient." He went out.

Bruno lay back on his pillow.

"I'll be up and around tomorrow," he said, "and I'll want to make some tests on Gregson then. Meanwhile, I'll relax—for a change. One good thing about this place; the routine's so perfect that you can unhitch yourself completely and let yourself rest, if you want to. A dependable staff."

The Venetian blind clattered in the wind. Parsons grunted and went toward it, taking hold of the cord.

He raised the blind and stood there, his back to Bruno. But it was dark outside the window.

"The sun was in my eyes," Bruno said. "Wait a minute! That was only a little while ago. Parsons, something's wrong!"

"What?" Parsons asked, without turning.

“Morrissey said I was unconscious for only two hours. And I took anesthesia at half-past nine. At night! But the sun was shining in that window when I woke up, a few minutes ago!”

“It’s night now,” Parsons said.

“It can’t be. Get Morrissey. I want to—”

But Parsons suddenly leaned forward and opened the window. Then he jumped out and vanished.

“*Morrissey!*” Bruno shouted.

Morrissey came in. He didn’t look at Bruno. He walked quickly across the room and jumped out of the window into the darkness.

Ferguson and Dale entered, still in their operating gowns. They followed Morrissey through the window.

Bruno hoisted himself up. Three nurses came through the door. An intern and an orderly followed. Then others.

In nightmare procession the staff filed into Bruno’s room. In deadly silence they walked to the window and jumped out.

The blankets slipped down from Bruno’s body. He saw them sail slowly toward the window—

The bed was tilting! No—the room itself was turning, revolving, till Bruno clung frantically to the head-board while gravity dragged him inexorably toward a window that now gaped directly below him.

The bed fell. It spilled Bruno out. He saw the oblong of the window opening like a mouth to swallow him. He plunged through into utter blackness, into an echoing, roaring hell of night and thunder....

“Oh, good heavens!” Bruno moaned. “What a dream! Morrissey, get me a sedative!”

The psychiatrist laughed. “You’ve had a dream-within-a-dream before, haven’t you, Doctor? It sounds unnerving, but now you’ve told me all about it. The catharsis is better than a barbiturate.”

“I suppose so.” Bruno lay back in the bed.

This wasn't the room he had dreamed about. It was much larger, and outside the windows was normal darkness. Morrissey had said that the anesthetic had lasted for several hours.

"Anyway, I'm jittery," Bruno said.

"I didn't know you had any nerves.... Here, Harwood." Morrissey turned to the nurse and scribbled down a few symbols on a pad. "There. We'll get your sedative. Don't you want to know about Gregson?"

"I'd forgotten about him completely," Bruno acknowledged. "Can you tell anything definite yet?"

"We caught him on the downcurve of the depressive cycle, remember? Well, he isn't talking yet, but there's a touch of euphoria. The elation will wear off. One thing, you've broken the cycle. His mind isn't adjusted yet to those—damper bars you put in 'em, but off-hand, I'd say it looks pretty good."

"What does Parsons think?"

"He's immersed in calculations. Said he'd be around to see you as soon as you woke up. Here's that sedative."

Bruno accepted the capsules from the nurse and washed them down with water.

"Thanks. I'd rather rest a bit. I must have unconsciously piled up quite a lot of tension."

"So I gather," Morrissey said drily. "Well, here's the bell-cord. Anything else?"

"Just rest." Bruno hesitated. "Oh—one thing." He extended his arm. "Pinch it."

Morrissey stared and chuckled.

"Still not sure you're awake? I can assure you you are, Doctor. I'm not going to jump out of the window. And it's still night, you'll notice."

When Bruno didn't move, Morrissey pinched up a fold of the other's forearm between thumb and finger.

"Ouch!" Bruno said. "Thanks."

"Any time," Morrissey said cheerfully. "Get some rest now. I'll be back."

He went out with the nurse. Bruno blew out his breath and let his gaze wander around the room. Everything looked perfectly solid and normal. No black, thundering abyss lurked under the floor. An unpleasant dream!

He reached for pad and pencil and made careful notes on the curious double-delusion before he let himself relax. Then he felt the sedative creeping slowly along his nerves, a warm, pleasant sensation that he was glad to encourage. He didn't want to think. Later would be time enough. The empathy surrogate experiment, Gregson, the physicist Parsons, Barbara—later!

He drowsed. It seemed only a moment before he opened his eyes to see sunlight beyond the window. Brief panic touched him, then he looked at his wrist-watch and was reassured to see that it said eleven o'clock. He could hear the muffled sounds of the ordinary hospital routine going on outside door and window. Presently, feeling refreshed, he got up and dressed.

In Nurse Harwood's office he telephoned Morrissey, exchanged brief greetings, and then went to his own office to shower and shave.

He telephoned Barbara.

"Hello, there," she said. "Morrissey notified me you were doing all right. So I thought I'd wait till you woke up."

"I'm awake now. Suppose I come over to the house for lunch?"

"Swell. I'll be waiting."

"Half an hour, then?"

"Half an hour. I'm glad you called, Bob. I was worried."

"You needn't have been."

"Was your experiment a success?"

"Can't tell yet. Keep your fingers crossed."

Ten minutes later Bruno's fingers were still crossed as he examined Gregson. Parsons and Morrissey were present. The physicist kept making notes, but Morrissey stood silent and watchful.

There was very little to be seen as yet. Gregson lay in his bed, the shaved spots on his head white against the dark hair, his features relaxed and peaceful. The typical anxiety expression was gone. Bruno opened the man's eyes and flashed his light into them. Contraction of the pupils seemed normal.

"Can you hear me, Gregson?"

Gregson's lips moved. But he said nothing.

"It's all right. You're feeling fine, aren't you? You're not worried about anything, are you?"

"Headache," Gregson said. "Bad headache."

"We'll give you something for that. Now try to sleep."

Outside, in the corridor, Bruno tried hard to repress his exultation. Parsons blinked at him, scowling.

"Can you tell anything yet?"

Bruno checked himself. "No. It's too soon. But—"

"The manic-depressive phase is passed," Morrissey put in. "He seems rational. And he hasn't been for three years."

"Those damper bars—" Bruno smiled. "Well, we'll have to wait and see. We can't write up a report yet. He's certainly oriented. We'll give him a chance to rest. More tests later. I don't want to jump the gun."

But with Barbara he let himself be more enthusiastic.

"We've done it, Barbara! Found a specific for insanity."

She leaned across the table to pour coffee.

"I thought there were so many types of psychosis that the treatment varied considerably."

"Well, that's true, but we've never got to the real basis of the trouble before. You can cure a cold by rest therapy, force fluids and aspirin, but cold

vaccine gets directly to the root of the trouble. Some types of insanity have been thought incurable, but tetanus was incurable till we got a vaccine for it. The empathy surrogate therapy is the lowest common denominator. It works on the electronic structure of the mind, and unless there's physical deterioration, as in advanced paresis, our treatment should work beautifully."

"So that's what you were working on," Barbara said. "Bob, you don't know how glad I am that it's successful."

"Well—we hope. We're almost sure. But—"

"You can take a vacation now? You've been working so hard!"

"A few more weeks, and I'll be ready. I've got to collate my notes. I can't run out on Parsons at this stage. But very soon, I promise."

He looked up to see her smile. Suddenly he stiffened. Her smile was broadening, stretching, the lower lip dropping till all her teeth showed. The lower lids of her eyes hung ... stretched....

Her nose lengthened.

Her eyes slowly crawled out of their sockets and lengthened on dreadful stalks down her cheeks.

She melted down and out of sight beneath the table.

The table began to sink.

And now everything around him was melting. Under him the chair became plastic and then fluid. The floor was a bowl, and the walls were dripping down into it, into a shining whirlpool at the center.

He slipped helplessly along that slope till the pool engulfed him, in a chaos of thunder and confusion and sickening horror.

The winds bellowed.... The empty drop closed around him.... He fell in darkness....

This time, when he woke, he wasn't sure. The panic had not left him. He learned, later, that he had been semi-delirious for eight days, and only Morrissey's unceasing attention had kept him reasonably quiet. Then there were weeks of convalescence, and a vacation, and it seemed a long time before he came back from Florida, tanned and healthy, to resume his duties.

Even then, though, there was the fear.

When he drove toward the blocky buildings of the sanitarium he felt a touch of it brush him. He reached for Barbara's hand, and felt some comfort in the assurance of her nearness. She had been helpful, too, though she had not understood.

Every day after that, when he left her, there was a fleeting apprehension lest he never see her again. To forget the uncertainty of his footing, the ground that was no longer absolutely solid, he plunged into the hospital's routine. And gradually, after more weeks, the terror began to leave him.

Gregson had been cured. He was still under precautionary observation, but all traces of his psychosis seemed to have vanished. There were still minor neuroses, the natural result of the past six years of abnormal restraint, but they were disappearing under proper therapy. The empathy surrogate treatment was successful. Yet, for a while, Bruno refused to attempt more experiments.

Parsons was displeased. He was anxious to chart a graph on the process, and one trial did not provide enough evidence. Bruno kept putting the physicist off with promises. It eventually ended in a minor spat which Morrissey halted by pointing out that Dr. Robert Bruno was, technically, his own patient, and was not yet ready for further research on the dangerous subject.

Parsons, furious, went off. Bruno followed Morrissey into the latter's office and sat down in one of the more comfortable chairs. It was mid-afternoon, and beyond the windows the drowsy hum of summer made a peaceful counterpoint to the conversation.

"Cigarette, Ken?"

"Thanks.... Look, Bob." The two men had drawn closer together in the last weeks. Morrissey no longer addressed his Chief of Staff with the former

“Doctor.” “I’ve been collating the facts of your case, and I think I’ve got at the root of the trouble. Do you want to hear my diagnosis?”

“Candidly, I don’t,” Bruno said, closing his eyes and inhaling smoke. “I’d prefer to forget it. But I know I can’t. That would be psychically ruinous.”

“You had a cyclic self-containing dream—I suppose you could call it that. You dreamed you were dreaming you were dreaming. You know what your trouble is?”

“Well?”

“You’re not sure you’re awake now.”

“Oh, I’m sure enough,” Bruno said. “Most of the time.”

“You’ve got to be sure all the time. Or else make yourself believe that it doesn’t matter whether you’re dreaming or waking.”

“Doesn’t matter! Ken! To know that everything may melt away under my feet at any time, and to think that doesn’t matter! That’s impossible!”

“Then you’ve got to be sure you’re awake. Those hallucinations you had are over. Weeks have passed.”

“Hallucinatory time is elastic and subjective.”

“It’s a defense mechanism—you know that, I suppose?”

“Defense against what?”

Morrissey moistened his lips. “Remember, I’m the psychiatrist and you’re the patient. You were psychoanalyzed when you studied psychiatry, but you didn’t get all the devils out of your subconscious. Hang it, Bob, you know very well that most psychiatrists take up the work because they’re attracted to it for pathological reasons—neuroses of their own. Why did you always insist that you were so utterly sure of everything?”

“I always made sure.”

“Compensation. To allow for a basic unsureness and insecurity in your own makeup. Consciously you were sure the empathy surrogate treatment would work, but your unconscious mind wasn’t so certain. You never let yourself know that, though. But it came out under stress—the therapy itself.”

“Go on,” Bruno said slowly.

Morrissey tapped the papers on his desk.

“I know my diagnosis is pretty accurate, but you can decide that for yourself. You can tell, perhaps, better than I can. The frontiers of the mind are *terra incognita*. Your simile of a uranium pile was better than you’d realized. When critical mass is approached, there’s danger. And the damper bars in your own mind—what did Parsons’ machine do to them?”

“I am quite sane,” Bruno said. “I think.”

“Sure you are, now. You’re getting over that explosion. You’d been building up an anxiety neurosis, and the therapy made it blow off. Just how, I don’t understand. The electronic patterns of the mind aren’t in my field. All I know is that the experiment with Gregson removed the safety blocks from your mind, and you lost control for a while. Thus the hallucinations, which simply followed the path of least resistance. Point One: You’re afraid of insecurity and unsureness, and you always have been. Thus your dream follows a familiarly symbolic pattern. At any time the sureness of waking may vanish. Point Two: As long as you think you’re dreaming, you’re dodging responsibility!”

“Good Lord, Ken!” Bruno said. “I just want to be sure I’m awake!”

“And there’s absolutely no way you can be sure of that,” Morrissey said. “The conviction must come from your own mind and be subjective. No objective proof is possible. Otherwise, if you fail to convince yourself, the anxiety neurosis will grow back into a psychosis, and—” He shrugged.

“It sounds logical,” Bruno said. “I’m beginning to see it pretty clearly. I think, perhaps, this clarification is what I needed.”

“Do you think you’re dreaming now?”

“Not at the moment—certainly.”

“Swell,” Morrissey said. “Because the conglobulation of the psych between the forever and upstriding kaleeno bystixing forinder saan—”

Bruno jumped up. “Ken!” he said, dry-throated. “Stop it!”

“Fylixar catween baleeza—”

“*Stop it!*”

“BYZINDERKONA REPSTILLING AND ALWAYS ALWAYS ALWAYS NEVER KNOWING NEVER KNOWING NEVER KNOWING—”

The words came out in great whirling shining globes. They raced past Bruno’s head with a screaming hiss. They bombarded him. They carried him back into a thundering, windy abyss of blackness and terror.

Morrissey stepped back from the bed and asked:

Dr. Robert Bruno managed to nod.

“Good,” Morrissey said. “You were out for about three hours. But everything’s going nicely. You’ll be up and around pretty soon. There’s plenty to be done. Barbara wants to see you—and Parsons.”

“Ken,” Bruno said, “wait a minute. Am I awake now? I mean, really awake?”

Morrissey stared and grinned.

“Sure,” he said. “I can guarantee that.”

But Bruno did not answer. His gaze moved to the windows, to the solidity of the walls and ceiling, to the reality of his own hands and arms.

Never knowing?

He looked at Morrissey, waiting for Morrissey to vanish, and the black pit to open again beneath him.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
