Pictures Don't Lie

By KATHERINE MacLEAN

Illustrated by MARTIN SCHNEIDER

**[Transcriber's Note: This etext was produced from
Galaxy Science Fiction August 1951.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

across the horizon, bombers stood ready at airfields, guarding the world against possible treachery from the first alien ship ever to land from space.

"Do you know anything about their home planet?" asked the man from *Herald*.

The *Times* man stood with the others, listening absently, thinking of questions, but reserving them. Joseph R. Nathen, the thin young man with the straight black hair and the tired lines on his face, was being treated with respect by his interviewers. He was obviously on edge, and they did not want to harry him with too many questions to answer at once. They wanted to keep his good will. Tomorrow he would be one of the biggest celebrities ever to appear in headlines.

"No, nothing directly."

"Any ideas or deductions?" *Herald* persisted.

"Their world must be Earth-like to them," the weary-looking young man answered uncertainly. "The environment evolves the animal. But only in relative terms, of course." He looked at them with a quick glance and then looked away evasively, his lank black hair beginning to cling to his forehead with sweat. "That doesn't necessarily mean anything."

"Earth-like," muttered a reporter, writing it down as if he had noticed nothing more in the reply.

The *Times* man glanced at the *Herald*, wondering if he had noticed, and received a quick glance in exchange.

The *Herald* asked Nathen, "You think they are dangerous, then?"

It was the kind of question, assuming much, which usually broke reticence and brought forth quick facts—when it hit the mark. They all knew of the military precautions, although they were not supposed to know.

The question missed. Nathen glanced out the window vaguely. "No, I wouldn't say so."

"You think they are friendly, then?" said the *Herald*, equally positive on the opposite tack.

A fleeting smile touched Nathen's lips. "Those I know are."

There was no lead in this direction, and they had to get the basic facts of the story before the ship came. The *Times* asked, "What led up to your contacting them?"

Nathen answered after a hesitation. "Static. Radio static. The Army told you my job, didn't they?"

The Army had told them nothing at all. The officer who had conducted them in for the interview stood glowering watchfully, as if he objected by instinct to telling anything to the public.

Nathen glanced at him doubtfully. "My job is radio decoder for the Department of Military Intelligence. I use a directional pickup, tune in on foreign bands, record any scrambled or coded messages I hear, and build automatic decoders and descramblers for all the basic scramble patterns."

The officer cleared his throat, but said nothing.

The reporters smiled, noting that down.

Security regulations had changed since arms inspection had been legalized by the U.N. Complete information being the only public security against secret rearmament, spying and prying had come to seem a public service. Its aura had changed. It was good public relations to admit to it.

Nathen continued, "I started directing the pickup at stars in my spare time. There's radio noise from stars, you know. Just stuff that sounds like spatter static, and an occasional squawk. People have been listening to it for a long time, and researching, trying to work out why stellar radiation on those bands comes in such jagged bursts. It didn't seem natural."

He paused and smiled uncertainly, aware that the next thing he would say was the thing that would make him famous—an idea that had come to him while he listened—an idea as simple and as perfect as the one that came to Newton when he saw the apple fall.

"I decided it wasn't natural. I tried decoding it."

Hurriedly he tried to explain it away and make it seem obvious. "You see, there's an old intelligence trick, speeding up a message on a record until it sounds just like that, a short squawk of static, and then broadcasting it. Undergrounds use it. I'd heard that kind of screech before."

"You mean they broadcast at us in code?" asked the *News*.

"It's not exactly code. All you need to do is record it and slow it down. They're not broadcasting at us. If a star has planets, inhabited planets, and there is broadcasting between them, they would send it on a tight beam to save power." He looked for comprehension. "You know, like a spotlight. Theoretically, a tight beam can go on forever without losing power. But aiming would be difficult from planet to planet. You can't expect a beam to stay on target, over such distances, more than a few seconds at a time. So they'd naturally compress each message into a short half-second or one-second-length package and send it a few hundred times in one long blast to make sure it is picked up during the instant the beam swings across the target."

He was talking slowly and carefully, remembering that this explanation was for the newspapers. "When a stray beam swings through our section of space, there's a sharp peak in noise level from that direction. The beams are swinging to follow their own planets at home, and the distance between there and here exaggerates the speed of swing tremendously, so we wouldn't pick up more than a bip as it passes."

"How do you account for the number of squawks coming in?" the *Times* asked. "Do stellar systems rotate on the plane of the Galaxy?" It was a private question; he spoke impulsively from interest and excitement.

The radio decoder grinned, the lines of strain vanishing from his face for a moment. "Maybe we're intercepting everybody's telephone calls, and the whole Galaxy is swarming with races that spend all day yacking at each other over the radio. Maybe the human type is standard model."

"It would take something like that," the *Times* agreed. They smiled at each other.

The *News* asked, "How did you happen to pick up television instead of voices?"

"Not by accident," Nathen explained patiently. "I'd recognized a scanning pattern, and I wanted pictures. Pictures are understandable in any language."

Near the interviewers, a Senator paced back and forth, muttering his memorized speech of welcome and nervously glancing out the wide streaming windows into the gray sleeting rain.

Opposite the windows of the long room was a small raised platform flanked by the tall shapes of TV cameras and sound pickups on booms, and darkened floodlights, arranged and ready for the Senator to make his speech of welcome to the aliens and the world. A shabby radio sending set stood beside it without a case to conceal its parts, two cathode television tubes flickering nakedly on one side and the speaker humming on the other. A vertical panel of dials and knobs jutted up before them and a small hand-mike sat ready on the table before the panel. It was connected to a boxlike, expensively cased piece of equipment with "Radio Lab, U.S. Property" stenciled on it.

"I recorded a couple of package screeches from Sagittarius and began working on them," Nathen added. "It took a couple of months to find the synchronizing signals and set the scanners close enough to the right time to even get a pattern. When I showed the pattern to the Department, they gave me full time to work on it, and an assistant to help. It took eight months to pick out the color bands, and assign them the right colors, to get anything intelligible on the screen."

The shabby-looking mess of exposed parts was the original receiver that they had labored over for ten months, adjusting and readjusting to reduce the maddening rippling plaids of unsynchronized color scanners to some kind of sane picture.

"Trial and error," said Nathen, "but it came out all right. The wide band-spread of the squawks had suggested color TV from the beginning."

He walked over and touched the set. The speaker bipped slightly and the gray screen flickered with a flash of color at the touch. The set was awake and sensitive, tuned to receive from the great interstellar spaceship which now circled the atmosphere.

"We wondered why there were so many bands, but when we got the set working, and started recording and playing everything that came in, we found we'd tapped something like a lending library line. It was all fiction, plays."

Between the pauses in Nathen's voice, the *Times* found himself unconsciously listening for the sound of roaring, swiftly approaching rocket jets.

The *Post* asked, "How did you contact the spaceship?"

"I scanned and recorded a film copy of *Rite of Spring*, the Disney-Stravinsky combination, and sent it back along the same line we were receiving from. Just testing. It wouldn't get there for a good number of years, if it got there at all, but I thought it would please the library to get a new record in.

"Two weeks later, when we caught and slowed a new batch of recordings, we found an answer. It was obviously meant for us. It was a flash of the Disney being played to a large audience, and then the audience sitting and waiting before a blank screen. The signal was very clear and loud. We'd intercepted a spaceship. They were asking for an encore, you see. They liked the film and wanted more...."

He smiled at them in sudden thought. "You can see them for yourself. It's all right down the hall where the linguists are working on the automatic translator."

The listening officer frowned and cleared his throat, and the thin young man turned to him quickly. "No security reason why they should not see the broadcasts, is there? Perhaps you should show them." He said to the reporters reassuringly, "It's right down the hall. You will be informed the moment the spaceship approaches."

The interview was very definitely over. The lank-haired, nervous young man turned away and seated himself at the radio set while the officer swallowed his objections and showed them dourly down the hall to a closed door.

They opened it and fumbled into a darkened room crowded with empty folding chairs, dominated by a glowing bright screen. The door closed behind them, bringing total darkness.

There was the sound of reporters fumbling their way into seats around him, but the *Times* man remained standing, aware of an enormous surprise, as if he had been asleep and wakened to find himself in the wrong country.

The bright colors of the double image seemed the only real thing in the darkened room. Even blurred as they were, he could see that the action was subtly different, the shapes subtly not right.

He was looking at aliens.

The impression was of two humans disguised, humans moving oddly, half-dancing, half-crippled. Carefully, afraid the images would go away, he reached up to his breast pocket, took out his polarized glasses, rotated one lens at right angles to the other and put them on.

Immediately, the two beings came into sharp focus, real and solid, and the screen became a wide, illusively near window through which he watched them.

They were conversing with each other in a gray-walled room, discussing something with restrained excitement. The large man in the green tunic closed his purple eyes for an instant at something the other said, and grimaced, making a motion with his fingers as if shoving something away from him.

Mellerdrummer.

The second, smaller, with yellowish-green eyes, stepped closer, talking more rapidly in a lower voice. The first stood very still, not trying to interrupt.

Obviously, the proposal was some advantageous treachery, and he wanted to be persuaded. The *Times* groped for a chair and sat down.

Perhaps gesture is universal; desire and aversion, a leaning forward or a leaning back, tension, relaxation. Perhaps these actors were masters. The scenes changed, a corridor, a parklike place in what he began to realize was a spaceship, a lecture room. There were others talking and working, speaking to the man in the green tunic, and never was it unclear what was happening or how they felt.

They talked a flowing language with many short vowels and shifts of pitch, and they gestured in the heat of talk, their hands moving with an odd lagging difference of motion, not slow, but somehow drifting.

He ignored the language, but after a time the difference in motion began to arouse his interest. Something in the way they walked....

With an effort he pulled his mind from the plot and forced his attention to the physical difference. Brown hair in short silky crew cuts, varied eye colors, the colors showing clearly because their irises were very large, their round eyes set very widely apart in tapering light-brown faces. Their necks and shoulders were thick in a way that would indicate unusual strength for a human, but their wrists were narrow and their fingers long and thin and delicate.

There seemed to be more than the usual number of fingers.

Since he came in, a machine had been whirring and a voice muttering beside him. He called his attention from counting their fingers and looked around. Beside him sat an alert-looking man wearing earphones, watching and listening with hawklike concentration. Beside him was a tall streamlined box. From the screen came the sound of the alien language. The man abruptly flipped a switch on the box, muttered a word into a small hand-microphone and flipped the switch back with nervous rapidity.

He reminded the *Times* man of the earphoned interpreters at the UN. The machine was probably a vocal translator and the mutterer a linguist adding to its vocabulary. Near the screen were two other linguists taking notes.

The *Times* remembered the Senator pacing in the observatory room, rehearsing his speech of welcome. The speech would not be just the empty pompous gesture he had expected. It would be translated mechanically and understood by the aliens.

On the other side of the glowing window that was the stereo screen, the large protagonist in the green tunic was speaking to a pilot in a gray uniform. They stood in a brightly lit canary-yellow control room in a spaceship.

The *Times* tried to pick up the thread of the plot. Already he was interested in the fate of the hero, and liked him. That was the effect of good acting, probably, for part of the art of acting is to win affection from the audience, and this actor might be the matinee idol of whole solar systems.

Controlled tension, betraying itself by a jerk of the hands, a too-quick answer to a question. The uniformed one, not suspicious, turned his back, busying himself at some task involving a map lit with glowing red points, his motions sharing the same fluid dragging grace of the others, as if they were underwater, or on a slow motion film. The other was watching a switch, a switch set into a panel, moving closer to it, talking casually—background music coming and rising in thin chords of tension.

There was a closeup of the alien's face watching the switch, and the *Times* noted that his ears were symmetrically half-circles, almost perfect with no earholes visible. The voice of the uniformed one answered, a brief word in a preoccupied deep voice. His back was still turned. The other glanced at the switch, moving closer to it, talking casually, the switch coming closer and closer stereoscopically. It was in reach, filling the screen. His hand came into view, darting out, closed over the switch—

There was a sharp clap of sound and his hand opened in a frozen shape of pain. Beyond him, as his gaze swung up, stood the figure of the uniformed officer, unmoving, a weapon rigid in his hand, in the startled position in which he had turned and fired, watching with widening eyes as the man in the green tunic swayed and fell.

The tableau held, the uniformed one drooping, looking down at his hand holding the weapon which had killed, and music began to build in from the background. Just for an instant, the room and the things within it flashed

into one of those bewildering color changes which were the bane of color television, and switched to a color negative of itself, a green man standing in a violet control room, looking down at the body of a green man in a red tunic. It held for less than a second; then the color band alternator fell back into phase and the colors reversed to normal.

Another uniformed man came and took the weapon from the limp hand of the other, who began to explain dejectedly in a low voice while the music mounted and covered his words and the screen slowly went blank, like a window that slowly filmed over with gray fog.

The music faded.

In the dark, someone clapped appreciatively.

The earphoned man beside the *Times* shifted his earphones back from his ears and spoke briskly. "I can't get any more. Either of you want a replay?"

There was a short silence until the linguist nearest the set said, "I guess we've squeezed that one dry. Let's run the tape where Nathen and that ship radio boy are kidding around CQing and tuning their beams in closer. I have a hunch the boy is talking routine ham talk and giving the old radio count—one-two-three-testing."

There was some fumbling in the semi-dark and then the screen came to life again.

It showed a flash of an audience sitting before a screen and gave a clipped chord of some familiar symphony. "Crazy about Stravinsky and Mozart," remarked the earphoned linguist to the *Times*, resettling his earphones. "Can't stand Gershwin. Can you beat that?" He turned his attention back to the screen as the right sequence came on.

The *Post*, who was sitting just in front of him, turned to the *Times* and said, "Funny how much they look like people." He was writing, making notes to telephone his report. "What color hair did that character have?"

"I didn't notice." He wondered if he should remind the reporter that Nathen had said he assigned the color bands on guess, choosing the colors that gave

the most plausible images. The guests, when they arrived, could turn out to be bright green with blue hair. Only the gradations of color in the picture were sure, only the similarities and contrasts, the relationship of one color to another.

From the screen came the sound of the alien language again. This race averaged deeper voices than human. He liked deep voices. Could he write that?

No, there was something wrong with that, too. How had Nathen established the right sound-track pitch? Was it a matter of taking the modulation as it came in, or some sort of hetrodyning up and down by trial and error? Probably.

It might be safer to assume that Nathen had simply preferred deep voices.

As he sat there, doubting, an uneasiness he had seen in Nathen came back to add to his own uncertainty, and he remembered just how close that uneasiness had come to something that looked like restrained fear.

"What I don't get is why he went to all the trouble of picking up TV shows instead of just contacting them," the *News* complained. "They're good shows, but what's the point?"

"Maybe so we'd get to learn their language too," said the *Herald*.

On the screen now was the obviously unstaged and genuine scene of a young alien working over a bank of apparatus. He turned and waved and opened his mouth in the comical O shape which the *Times* was beginning to recognize as their equivalent of a smile, then went back to trying to explain something about the equipment, in elaborate awkward gestures and carefully mouthed words.

The *Times* got up quietly, went out into the bright white stone corridor and walked back the way he had come, thoughtfully folding his stereo glasses and putting them away.

No one stopped him. Secrecy restrictions were ambiguous here. The reticence of the Army seemed more a matter of habit, mere reflex, from the fact that it had all originated in the Intelligence Department, than any reasoned policy of keeping the landing a secret.

The main room was more crowded than he had left it. The TV camera and sound crew stood near their apparatus, the Senator had found a chair and was reading, and at the far end of the room eight men were grouped in a circle of chairs, arguing something with impassioned concentration. The *Times* recognized a few he knew personally, eminent names in science, workers in field theory.

A stray phrase reached him: "—reference to the universal constants as ratio —" It was probably a discussion of ways of converting formulas from one mathematics to another for a rapid exchange of information.

They had reason to be intent, aware of the flood of insights that novel viewpoints could bring, if they could grasp them. He would have liked to go over and listen, but there was too little time left before the spaceship was due, and he had a question to ask.

The hand-rigged transceiver was still humming, tuned to the sending band of the circling ship, and the young man who had started it all was sitting on the edge of the TV platform with his chin resting in one hand. He did not look up as the *Times* approached, but it was the indifference of preoccupation, not discourtesy.

The *Times* sat down on the edge of the platform beside him and took out a pack of cigarettes, then remembered the coming TV broadcast and the ban on smoking. He put them away, thoughtfully watching the diminishing rain spray against the streaming windows.

"What's wrong?" he asked.

Nathen showed that he was aware and friendly by a slight motion of his head.

"You tell me."

"Hunch," said the *Times* man. "Sheer hunch. Everything sailing along too smoothly, everyone taking too much for granted."

Nathen relaxed slightly. "I'm still listening."

"Something about the way they move...."

Nathen shifted to glance at him.

"That's bothered me, too."

"Are you sure they're adjusted to the right speed?"

Nathen clenched his hands out in front of him and looked at them consideringly. "I don't know. When I turn the tape faster, they're all rushing, and you begin to wonder why their clothes don't stream behind them, why the doors close so quickly and yet you can't hear them slam, why things fall so fast. If I turn it slower, they all seem to be swimming." He gave the *Times* a considering sidewise glance. "Didn't catch the name."

Country-bred guy, thought the *Times*. "Jacob Luke, *Times*," he said, extending his hand.

Nathen gave the hand a quick, hard grip, identifying the name. "Sunday Science Section editor. I read it. Surprised to meet you here."

"Likewise." The *Times* smiled. "Look, have you gone into this rationally, with formulas?" He found a pencil in his pocket. "Obviously there's something wrong with our judgment of their weight-to-speed-to-momentum ratio. Maybe it's something simple like low gravity aboard ship, with magnetic shoes. Maybe they *are* floating slightly."

"Why worry?" Nathen cut in. "I don't see any reason to try to figure it out now." He laughed and shoved back his black hair nervously. "We'll see them in twenty minutes."

"Will we?" asked the *Times* slowly.

There was a silence while the Senator turned a page of his magazine with a slight crackling of paper, and the scientists argued at the other end of the room. Nathen pushed at his lank black hair again, as if it were trying to fall forward in front of his eyes and keep him from seeing.

"Sure." The young man laughed suddenly, talked rapidly. "Sure we'll see them. Why shouldn't we, with all the government ready with welcome speeches, the whole Army turned out and hiding over the hill, reporters all around, newsreel cameras—everything set up to broadcast the landing to

the world. The President himself shaking hands with me and waiting in Washington—"

He came to the truth without pausing for breath.

He said, "Hell, no, they won't get here. There's some mistake somewhere. Something's wrong. I should have told the brasshats yesterday when I started adding it up. Don't know why I didn't say anything. Scared, I guess. Too much top rank around here. Lost my nerve."

He clutched the *Times* man's sleeve. "Look. I don't know what—"

A green light flashed on the sending-receiving set. Nathen didn't look at it, but he stopped talking.

The loudspeaker on the set broke into a voice speaking in the alien's language. The Senator started and looked nervously at it, straightening his tie. The voice stopped.

Nathen turned and looked at the loudspeaker. His worry seemed to be gone.

"What is it?" the *Times* asked anxiously.

"He says they've slowed enough to enter the atmosphere now. They'll be here in five to ten minutes, I guess. That's Bud. He's all excited. He says holy smoke, what a murky-looking planet we live on." Nathen smiled. "Kidding."

The *Times* was puzzled. "What does he mean, murky? It can't be raining over much territory on Earth." Outside, the rain was slowing and bright blue patches of sky were shining through breaks in the cloud blanket, glittering blue light from the drops that ran down the windows. He tried to think of an explanation. "Maybe they're trying to land on Venus." The thought was ridiculous, he knew. The spaceship was following Nathen's sending beam. It couldn't miss Earth. "Bud" had to be kidding.

The green light glowed on the set again, and they stopped speaking, waiting for the message to be recorded, slowed and replayed. The cathode screen came to life suddenly with a picture of the young man sitting at his sending-

set, his back turned, watching a screen at one side which showed a glimpse of a huge dark plain approaching. As the ship plunged down toward it, the illusion of solidity melted into a boiling turbulence of black clouds. They expanded in an inky swirl, looked huge for an instant, and then blackness swallowed the screen. The young alien swung around to face the camera, speaking a few words as he moved, made the O of a smile again, then flipped the switch and the screen went gray.

Nathen's voice was suddenly toneless and strained. "He said something like break out the drinks, here they come."

"The atmosphere doesn't look like that," the *Times* said at random, knowing he was saying something too obvious even to think about. "Not Earth's atmosphere."

Some people drifted up. "What did they say?"

"Entering the atmosphere, ought to be landing in five or ten minutes," Nathen told them.

A ripple of heightened excitement ran through the room. Cameramen began adjusting the lens angles again, turning on the mike and checking it, turning on the floodlights. The scientists rose and stood near the window, still talking. The reporters trooped in from the hall and went to the windows to watch for the great event. The three linguists came in, trundling a large wheeled box that was the mechanical translator, supervising while it was hitched into the sound broadcasting system.

"Landing where?" the *Times* asked Nathen brutally. "Why don't you do something?"

"Tell me what to do and I'll do it," Nathen said quietly, not moving.

It was not sarcasm. Jacob Luke of the *Times* looked sidewise at the strained whiteness of his face, and moderated his tone. "Can't you contact them?"

"Not while they're landing."

"What now?" The *Times* took out a pack of cigarettes, remembered the rule against smoking, and put it back.

"We just wait." Nathen leaned his elbow on one knee and his chin in his hand.

They waited.

All the people in the room were waiting. There was no more conversation. A bald man of the scientist group was automatically buffing his fingernails over and over and inspecting them without seeing them, another absently polished his glasses, held them up to the light, put them on, and then a moment later took them off and began polishing again. The television crew concentrated on their jobs, moving quietly and efficiently, with perfectionist care, minutely arranging things which did not need to be arranged, checking things that had already been checked.

This was to be one of the great moments of human history, and they were all trying to forget that fact and remain impassive and wrapped up in the problems of their jobs as good specialists should.

After an interminable age the *Times* consulted his watch. Three minutes had passed. He tried holding his breath a moment, listening for a distant approaching thunder of jets. There was no sound.

The sun came out from behind the clouds and lit up the field like a great spotlight on an empty stage.

Abruptly the green light shone on the set again, indicating that a squawk message had been received. The recorder recorded it, slowed it and fed it back to the speaker. It clicked and the sound was very loud in the still, tense room.

The screen remained gray, but Bud's voice spoke a few words in the alien language. He stopped, the speaker clicked and the light went out. When it was plain that nothing more would occur and no announcement was to be made of what was said, the people in the room turned back to the windows, talk picked up again.

Somebody told a joke and laughed alone.

One of the linguists remained turned toward the loudspeaker, then looked at the widening patches of blue sky showing out the window, his expression puzzled. He had understood.

"It's dark," the thin Intelligence Department decoder translated, low-voiced, to the man from the *Times*. "Your atmosphere is *thick*. That's precisely what Bud said."

Another three minutes. The *Times* caught himself about to light a cigarette and swore silently, blowing the match out and putting the cigarette back into its package. He listened for the sound of the rocket jets. It was time for the landing, yet he heard no blasts.

The green light came on in the transceiver.

Message in.

Instinctively he came to his feet. Nathen abruptly was standing beside him. Then the message came in the voice he was coming to think of as Bud. It spoke and paused. Suddenly the *Times* knew.

"We've landed." Nathen whispered the words.

The wind blew across the open spaces of white concrete and damp soil that was the empty airfield, swaying the wet, shiny grass. The people in the room looked out, listening for the roar of jets, looking for the silver bulk of a spaceship in the sky.

Nathen moved, seating himself at the transmitter, switching it on to warm up, checking and balancing dials. Jacob Luke of the *Times* moved softly to stand behind his right shoulder, hoping he could be useful. Nathen made a half motion of his head, as if to glance back at him, unhooked two of the earphone sets hanging on the side of the tall streamlined box that was the automatic translator, plugged them in and handed one back over his shoulder to the *Times* man.

The voice began to come from the speaker again.

Hastily, Jacob Luke fitted the earphones over his ears. He fancied he could hear Bud's voice tremble. For a moment it was just Bud's voice speaking the alien language, and then, very distant and clear in his earphones, he heard the recorded voice of the linguist say an English word, then a mechanical click and another clear word in the voice of one of the other translators, then another as the alien's voice flowed from the loudspeaker, the cool single words barely audible, overlapping and blending with it like translating thought, skipping unfamiliar words, yet quite astonishingly clear.

"Radar shows no buildings or civilization near. The atmosphere around us registers as thick as glue. Tremendous gas pressure, low gravity, no light at all. You didn't describe it like this. Where are you, Joe? This isn't some kind of trick, is it?" Bud hesitated, was prompted by a deeper official voice and jerked out the words.

"If it is a trick, we are ready to repel attack."

The linguist stood listening. He whitened slowly and beckoned the other linguists over to him and whispered to them.

Joseph Nathen looked at them with unwarranted bitter hostility while he picked up the hand-mike, plugging it into the translator. "Joe calling," he said quietly into it in clear, slow English. "No trick. We don't know where you are. I am trying to get a direction fix from your signal. Describe your surroundings to us if at all possible."

Nearby, the floodlights blazed steadily on the television platform, ready for the official welcome of the aliens to Earth. The television channels of the world had been alerted to set aside their scheduled programs for an unscheduled great event. In the long room the people waited, listening for the swelling sound of rocket jets.

This time, after the light came on, there was a long delay. The speaker sputtered, and sputtered again, building to a steady scratching they could barely sense as a dim voice. It came through in a few tinny words and then wavered back to inaudibility. The machine translated in their earphones.

"Tried ... seemed ... repair...." Suddenly it came in clearly. "Can't tell if the auxiliary blew, too. Will try it. We might pick you up clearly on the next try. I have the volume down. Where is the landing port? Repeat. Where is the landing port? Where are you?"

Nathen put down the hand-mike and carefully set a dial on the recording box, and flipped a switch, speaking over his shoulder. "This sets it to repeat what I said the last time. It keeps repeating." Then he sat with unnatural stillness, his head still half turned, as if he had suddenly caught a glimpse of answer and was trying with no success whatever to grasp it.

The green warning light cut in, the recording clicked and the playback of Bud's face and voice appeared on the screen.

"We heard a few words, Joe, and then the receiver blew again. We're adjusting a viewing screen to pick up the long waves that go through the murk and convert them to visible light. We'll be able to see out soon. The engineer says that something is wrong with the stern jets, and the captain has had me broadcast a help call to our nearest space base." He made the mouth O of a grin. "The message won't reach it for some years. I trust you, Joe, but get us out of here, will you?—They're buzzing that the screen is finally ready. Hold everything."

The screen went gray, and the green light went off.

The *Times* considered the lag required for the help call, the speaking and recording of the message just received, the time needed to reconvert a viewing screen.

"They work fast." He shifted uneasily, and added at random, "Something wrong with the time factor. All wrong. They work *too* fast."

The green light came on again immediately. Nathen half turned to him, sliding his words hastily into the gap of time as the message was recorded and slowed. "They're close enough for our transmission power to blow their receiver."

If it was on Earth, why the darkness around the ship? "Maybe they see in the high ultra-violet—the atmosphere is opaque to that band," the *Times* suggested hastily as the speaker began to talk in the young extraterrestrial's voice.

It was shaking now. "Stand by for the description."

They tensed, waiting. The *Times* brought a map of the state before his mind's eye.

"A half circle of cliffs around the horizon. A wide muddy lake swarming with swimming things. Huge, strange white foliage all around the ship and incredibly huge pulpy monsters attacking and eating each other on all sides.

We almost landed in the lake, right on the soft edge. The mud can't hold the ship's weight, and we're sinking. The engineer says we might be able to blast free, but the tubes are mud-clogged and might blow up the ship. When can you reach us?"

The *Times* thought vaguely of the Carboniferous Era. Nathen obviously had seen something he had not.

"Where are they?" the *Times* asked him quietly.

Nathen pointed to the antenna position indicators. The *Times* let his eyes follow the converging imaginary lines of focus out the window to the sunlit airfield, the empty airfield, the drying concrete and green waving grass where the lines met.

Where the lines met. The spaceship was there!

The fear of something unknown gripped him suddenly.

The spaceship was broadcasting again. "*Where are you? Answer if possible! We are sinking! Where are you?*"

He saw that Nathen knew. "What is it?" the *Times* asked hoarsely. "Are they in another dimension or the past or on another world or what?"

Nathen was smiling bitterly, and Jacob Luke remembered that the young man had a friend in that spaceship. "My guess is that they evolved on a high-gravity planet, with a thin atmosphere, near a blue-white star. Sure they see in the ultra-violet range. Our sun is abnormally small and dim and yellow. Our atmosphere is so thick, it screens out ultra-violet." He laughed harshly. "A good joke on us, the weird place we evolved in, the thing it did to us!"

"Where are you?" called the alien spaceship. "Hurry, please! We're sinking!"

The decoder slowed his tumbled, frightened words and looked up into the *Times'* face for understanding. "We'll rescue them," he said quietly. "You were right about the time factor, right about them moving at a different

speed. I misunderstood. This business about squawk coding, speeding for better transmission to counteract beam waver—I was wrong."

"What do you mean?"

"They don't speed up their broadcasts."

"They don't—?"

Suddenly, in his mind's eye, the *Times* began to see again the play he had just seen—but the actors were moving at blurring speed, the words jerking out in a fluting, dizzying stream, thoughts and decisions passing with unfollowable rapidity, rippling faces in a twisting blur of expressions, doors slamming wildly, shatteringly, as the actors leaped in and out of rooms.

No—faster, faster—he wasn't visualizing it as rapidly as it was, an hour of talk and action in one almost instantaneous "squawk," a narrow peak of "noise" interfering with a single word in an Earth broadcast! Faster—faster—it was impossible. Matter could not stand such stress—inertia—momentum—abrupt weight.

It was insane. "Why?" he asked. "How?"

Nathen laughed again harshly, reaching for the mike. "Get them out? There isn't a lake or river within hundreds of miles from here!"

A shiver of unreality went down the *Times'* spine. Automatically and inanely, he found himself delving in his pocket for a cigarette while he tried to grasp what had happened. "Where are they, then? Why can't we see their spaceship?"

Nathen switched the microphone on in a gesture that showed the bitterness of his disappointment.

"We'll need a magnifying glass for that."

*** END OF THE PROJECT GUTENBERG EBOOK PICTURES DON'T
LIE ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
