THE WINDS OF IF - A Complete Novel by A. Bertram Chandler

The Project Gutenberg eBook of Boarding party

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

Title: Boarding party

Author: Robert F. Young

Illustrator: Virgil Finlay

Release date: December 4, 2023 [eBook #72310]

Language: English

Original publication: New York, NY: Ziff-Davis Publishing Company, 1963

Other information and formats: www.gutenberg.org/ebooks/72310

Credits: Greg Weeks, Mary Meehan and the Online Distributed Proofreading Team at <http://www.pgdp.net>

*** START OF THE PROJECT GUTENBERG EBOOK BOARDING
PARTY ***

*The fey Mr. Young continues his scholarly researches
in the scientific origins of our myth and legend
with this tale of an agile—and avaricious—one-man*

BOARDING PARTY

By ROBERT F. YOUNG

Illustrated by FINLAY

**[Transcriber's Note: This etext was produced from
Amazing Stories September 1963
Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

(Translator's note: *The original of the following report was recently acquired by the Terran Industrial Library through the Interstellar Historical Exchange Society, into whose illustrious fold the member nations of the Terran Economic Bloc have at last been admitted. The narrative is of primary interest to the library officials because it provides unequivocal proof that, long before the Interstellar Economic Community took official cognizance of our existence, several articles of Community Commerce found their way into our culture. To the layman, however, the narrative is of primary interest because it provides an intriguing parallel to a narrative of an altogether different nature.*)

TO: Interstellar Nurseries, Frimm 4

FROM: Captain of the Greenship *Uxurient*, Urtz 2

SUBJECT(S): (1) Why the *Uxurient* put in to an out-of-bounds system during the Frimm 4-Urtz 2 run; (2) how a boarding party of one gained the greendeck and made off with a Uterium 5 snirk bird, a toy friddlefork, and two containers of yellow trading disks; (3) why the *Uxurient's* flexible ship-to-ground capillary tube is ten exids shorter than it used to be.

(1)

Why the Uxurient put in to an Out-of-Bounds System during the Frimm 4-Urtz 2 Run

Two light-cycles out from Frimm 4, the first shoots of the yumquat trees broke through the greendeck precisely on schedule. A little over a light-cycle farther out I noticed during one of my periodic inspections that the young leaves were beginning to turn yellow, and subsequent tests of several greendeck soil samples revealed an acute deficiency of mineral elements D-2 and Z-1, plus an advanced aridity. I immediately retired to the greenship's subdeck, where I found the contents of the soil-solution vat to be at a

shockingly low level. An analysis of the contents indicated a near-total absence of mineral elements D-2 and Z-1.

Further investigations have since convinced me that the responsibility for this critical shortage rests upon the shoulders of none other than Ur-Lon-Ho-Lee, Interstellar Nurseries' senior shipping clerk, but at the time, the yumquat-tree shipment pre-empted my attention to the exclusion of all other matters. If the trees were to be allowed to shoot up at the usual accelerated growth rate and were to be delivered in satisfactory sapling stage to the Urtz 2 customer who had ordered them, I had but one course of action open to me: to put in to the nearest system, find a planet with a soil rich in moisture and rich in mineral elements D-2 and Z-1, and replenish the soil-solution vat by means of the *Uxurient's* ship-to-ground capillary tube. Fortunately, there happened to be a system in the vicinity of the *Uxurient's* present position, but unfortunately it happened to be one of the many systems that are out-of-bounds to Interstellar Economic Community ships. Before coming to a decision, then, I had to weigh the importance of my mission against the risk of causing "a substantial interference in the normal evolution of an extra-Community culture"—a possibility that is always present when a Community ship is forced to enter an out-of-bounds system. I decided that it was my responsibility both to the customer and to the company to run this risk, and proceeded to put in to the system at once.

I wasted no time on the outer worlds, knowing from experience that such worlds rarely yield anything in the way of flora and hence could not possibly possess the kind of soil I needed, but arrowed in to the orbital regions of the first four. Perceiving at once that Four would not serve my purpose, I continued on to Three. Three turned out to be a Frimm 4-type planet in all respects save its slightly smaller size; it also turned out to be the reason for the system's having been placed out-of-bounds. I was not surprised: One seldom finds soil of the type employed by Frimm 4 nurseries without finding intelligent life in the immediate vicinity. In this instance, I used the term "intelligent life" in its broadest sense, for the several civilizations I transchecked at random revealed technologies not far removed from the paleolithic stage, and in one case, in the very midst of it.

On several of the land masses I detected scattered deposits of the soil-type I needed, and I could have replenished the *Uxurient's* soil-solution vat from any of them. However, I chose an unusually rich one on a large island near the major land mass, reasoning that the less time I consumed in the operation, the less chance there would be of my occasioning "a substantial interference in the normal evolution of an extra-Community culture". This particular deposit bordered a small community of scattered, thatch-roofed dwellings, and abounded in trees similar to the yumquat species. After activating the *Uxurient's* ventral camouflage-unit, I brought the greenship down to about two hundred mirids, gravved it into position above the edge of the forest, and opened the capillary-tube lock. I timed my maneuver to coincide with the passing of the dusk belt, but, reluctant to attract any more attention than was absolutely necessary, I waited through most of the ensuing night phase before lowering the capillary tube. Unfortunately, I erred somewhat in my calculations, and the tube's rhizomorphous feeding system, owing partially to the rather strong wind that had sprung up during the night phase, entered the soil much closer to one of the native dwellings than I had intended should be the case; however, dawn being near at hand, I lacked sufficient time to recoil and relocate the device, so I left it where it was. I was not particularly worried: the natives' superstitious fear of the tube would probably preclude their approaching it closely enough for them to be able to damage it, and if their superstitious fear of the tube itself was not strong enough to make them keep their distance, their fear of the "low-lying cloud" from which the tube depended should be.

My mind at ease in this respect then, I reduced the opacity of the hull's upper hemisphere to complete transparency so that the greendeck would benefit from the rays of the system's sun, after which I retired to the subdeck to check on the first influx of nutrients into the soil-solution vat. The length of the capillary tube prohibited any immediate change in the solution-level, so while I waited, I busied myself checking the tubes that run down to the vat from the section of the greendeck where the upper extremities of the capillary tube are affixed. Next, I checked the outgoing tubes that feed the greendeck soil. By the time I finished, the level had begun to rise.

I waited till it rose above the halfway mark, then I took a sample and ran an analysis. The result delighted me: the D-2 and Z-1 mineral element content

had quadrupled! If the rapidity with which the vat was filling continued, I would be able to disengage the capillary tube, recoil it, and be on my way before the next night phase.

I lingered for a while longer, watching the level climb. Finally, remembering that I had not eaten since before my discovery of the soil deficiency, I left the vat-room, picked up three lliaka hind quarters in the meat-compartment, attached them to my belt, and proceeded up the ramp to the greendeck. The thought of the fine steaks which the quarters would yield made me realize how truly hungry I was, and I set off across the greendeck toward my distant living quarters with quickened steps. As I walked, the sight of the arid soil stretching away in every direction afflicted me with melancholy, even though I knew that the deplorable condition was well on its way toward being corrected. The leaves of the baby yumquat trees, I saw to my dismay, had more than merely yellowed: they had shriveled too. And so scrawny were the little shoots that, had I not known that they were there, I might very well have walked in their midst and have been unaware of their existence. Indeed, the greendeck, awash now with bright morning sunlight, had more of the aspect of a desert than it did an aspect of a thriving oasis where plants are grown during shipment. I submit that my bringing the *Uxurient* in to an out-of-bounds system was more than merely justified: it was in keeping with the highest ideals that govern man in his relationship to plant-life.

(2)

How a Boarding Party of One gained the Greendeck and made off with a Uterium 5 Snirk Bird, a Toy Friddlefork, and Two Containers of Yellow Trading Disks.

Arriving at my living quarters, I removed my greendeck fatigues and laid them upon the arms of the rack beside the entrance, wondering as I always do on such occasions how Ho-Hat-Li-Tum, the company's morale manager, could have fallen for so blatantly whimsical an appointment as a clothes rack in the form of a life-size woman. Granted, greenship pilots lead lonely lives, but tell me this: how can the mere act of their laying their outer

garments upon the outstretched arms of a brainless, speechless, feelingless mannequin in the least alleviate their loneliness? If Ho-Hat-Li-Tum were really concerned about the morale of the greenship pilots, he would spurn such halfway measures and concentrate his energies on getting the regulation that forbids pilots to take their wives into space with them rescinded.

To continue: Once in my living quarters, I proceeded directly to the galley where I cut two large steaks from one of the Iliaka hindquarters. Placing the steaks upon the grill to sear, I got a loaf of bread and decanter of wine out of the provision closet, after which I set the table. When the steaks were done, I placed them on a large platter and sat down to eat. It was at this point that I received a very definite impression that I was being watched.

I looked around the galley. Other than myself, of course, no one was there, and certainly the various cupboards were much too small to harbor a secret onlooker. A secret onlooker indeed! Angry with myself, I put the matter from my mind, concluding that the condition of the yumquat trees had depressed me to a greater extent than I had realized, and that I had fallen prey to preposterous imaginings. I wish now that I had been less eager to ascribe what proved to be a perfectly valid psychosensory perception to my emotional letdown.

I ate ravenously, devouring both of the steaks and the entire loaf of bread. Afterward, a feeling of peace and good will stole over me, and on an impulse I called the Uterium 5 snirk bird down from its perch above the galley doorway and persuaded it by means of a crust of bread to perch upon my forefinger. Despite the large and ovoid xanthous droppings which these birds sporadically deposit on chairs, tables and floors, they make wonderful pets, and I envied the particular customer who was to receive this one—a tiny, bright-eyed female—as a partial bonus for his yumquat-tree order. The other components of his bonus—the toy friddlefork and the two containers of yellow trading disks—stood on a shelf just behind me, and reaching around and procuring them, I set them on the table before me. Such evidence of largess invariably renews my faith in the company, and on long runs I often get out customer bonuses and speculate on the munificence of a concern such as ours. Thus I speculated now—but not for long. I had not slept for nearly two zodal periods and was far more tired than I realized,

and to complicate matters, the heavy meal which I had just consumed had had a soporific effect upon me. Almost before I knew it, I dozed off.

I believe that my first appraisal that the previously mentioned psychosensory perception had not been illusory after all was the creak of one of the cupboard doors. Unfortunately, this appraisal was on the unconscious, rather than the conscious, level, and failed to arouse me from my stupor. It took the hysterical cackling of the Uterium 5 snirk bird, a few moments later, to bring me back to true awareness, and by that time, it was too late. The tiny man who had shinned up the table leg and seized the snirk bird, the two containers of yellow trading disks, and the toy friddlefork had already regained the deck and was running toward the doorway. In the process of climbing back down, he must have bumped the toy friddlefork and accidentally activated its tonal unit, for it was bleating away insistently as he bore it away. Indeed, so insistent were its cries that one would have thought that it expected me to come after it and succor it.

Incredulously, I got to my feet. I saw then that the thief was not a man, but a boy—the tiniest boy that I have ever seen in my whole life. Assuming his stature to be average, it is unlikely that even a full-grown adult of his species would come any higher than a Frimm 4's citizen's knee-cap!

I called after him, uttering my name in as gentle a tone of voice as I could manage and assuring him that if he would return the articles he had stolen no harm would come to him. He only ran the faster, and fairly streaked through the galley doorway, down the entrance corridor, and out onto the greendeck. I had no choice but to set off in pursuit, and this I did, naively believing that I could overtake him easily. In this I erred indeed. Never have I ever seen anyone run so fast. Why, there were times when I could have sworn that his feet weren't even touching the deck!

As I lumbered along in his wake, I wondered how he could conceivably have gotten on board. Had he climbed the capillary tube? This didn't seem possible in view of the *Uxurient's* altitude and in view of his diminutiveness, but I could think of no other answer. There was no need for me to, I saw presently: that he had climbed up the tube was unequivocally

demonstrated by the ease and the celerity with which he now began to climb down it.

(3)

Why the Uxurient's Flexible Ship-to-Ground Capillary Tube is now Ten Exids Shorter than It used to be

Loath to give up the chase, I started climbing down the tube myself. This is not as difficult as one would at first imagine—as I myself had imagined, in fact, prior to making the attempt. The branch-like protuberances that absorb the sunlight and transmute it into the energy required for the capillary-action provide numerous hand- and footholds, and had it not been for the almost gale-force wind that had developed, my descent would have been relatively easy. Even with the wind, I found myself in no great danger, and I have no doubt but what I would have reached the ground in due course had I not underestimated the resourcefulness—and the blood-thirstiness—of my youthful quarry. He kept calling out repeatedly at the top of his voice, but I did not suspect what he was up to until, halfway down, I paused and looked below me. I was just in time to see a woman run out of the thatch-roofed dwelling near which the tube had rooted itself and hand him a small object the very moment his feet touched the ground.

I deduced from the shards of sunlight that the object threw off that it was a cutting tool of some kind. I was not long left in doubt in any event, for no sooner did the boy have it in his possession than he began to wield it. A series of thuds was borne upward by the wind, and with each thud, the tube gave a convulsive shudder. I had seen unattached ship-to-ground capillary tubes at the mercy of the wind before, and I knew the danger that confronted me. Consequently I began climbing back up toward the *Uxurient* at once. While I will not attempt to deny that I was frightened, I would like to point out that it wasn't so much my predicament that frightened me, but the cold-blooded attitude of the young savage below me. He thought that by severing the tube he could bring it crashing to the ground, and the ferocity and the frequency of his blows testified to the eagerness with which he awaited my destruction.

It was his very attitude, I believe, that gave me the strength and the determination to gain the *Uxurient* after the tube broke free and began lashing wildly back and forth. For a long while I lay gasping on the greendeck; then, when my breath came back, I recoiled the tube, secured the tube-lock, and lifted into space. The soil-solution vat was not as full as I would have wished, but by careful rationing I knew that I could make its contents suffice. Whether I could or not, I wanted no more part of the world I had just left. I never want to see the place again.

I would like to append a word in my defense. While it is true that I was instrumental in exposing an extra-Community culture to a technology far beyond its ken, it must be remembered that all such cultures are flexible in nature and can absorb the seemingly inexplicable with the utmost equanimity. They achieve this quite simply by identifying the unfamiliar with the familiar, and by ascribing those phenomena which happen to be beyond their experience to the workings of magic. Far from having an adverse effect, the present instance will, I am sure, provide the basis for a colorful legend. No doubt the legend will acquire a more satisfying ending, and unquestionably the boy's exploits will be exaggerated. As regards the Uterium 5 snirk bird, the toy friddlefork, and the two containers of yellow trading disks, you may be sure that the young rascal had already identified them with objects with which he was familiar (and which he coveted) before he left the galley cupboard in which he was hiding. If he had not done so, he would not have stolen them. In any case, I am not unduly bitter about their loss, even though I must make that loss good. The measure of a Frimm 4 citizen's true worth is the quantity of his magnanimity; hence I hope that both the boy and the woman—probably his mother—live happily ever after.

THE END

*** END OF THE PROJECT GUTENBERG EBOOK BOARDING
PARTY ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
