WEIGHT ***

Wait for Weight

By JACK McKENTY

Sometimes the best incentive is to tell a man that success will throw him out of a job!

Illustrated by SIBLEY

When Dr. Allport Brinton's alarm clock sounded, it brought madness. It was very clever; it not only rang chimes of amazing penetrating power, it turned on all the lights in the room, closed the window, and started his bath water running. But this morning it was not appreciated. In fact, as Dr. Brinton got

out of bed, he silently called down evil on the technician who had built it for him.

The "off" switch was on the wall farthest away from his bed and was controlled by a hairtrigger combination dial that couldn't be operated by anyone not fully awake. Dr. Brinton fumbled for a while, then gave up and started looking for his bedroom slippers. They had apparently crawled away during the night.

He padded into his bathroom barefoot. He was about to see what a hot bath would do for what he had already diagnosed as a histamine headache when the alarm clock, having decided that anyone who could sleep through ten minutes of chiming was unwakable, stopped chiming, turned off the lights, opened the window, and let all the water out.

Dr. Brinton was walking back toward the light switch when he tripped on his bedroom slippers and fell back into bed. No further invitation was necessary; he slept till noon.

Dr. Brinton unmistakably had a hangover. Considering the party he had attended the night before, it was not surprising. Actually, it was remarkable that he had been able to get out of bed at all. During the fourteen years that the Rocket Research Station had been in operation, the parties that were held every time another test flight resulted in failure had grown from a few

drinks in somebody's room to a mammoth bust-up that left the whole place partially paralyzed for days afterward.

First as chief chemist, and later as director of the Station, Dr. Brinton had attended every one of the scores of parties during every one of the fourteen years. It spoke well for his endurance to say that he was back at his office at one o'clock. Some people didn't make it until the next day.

His secretary, who didn't drink, was one of very few who were at work on time. She walked into his office and stood in front of his desk, tapping her foot. Her facial expression showed that she thought people who got drunk at parties were amoral, degenerate, and entirely unfit for administrative positions. Dr. Brinton, who had been mentally comparing the relative merits of Prussic acid and hanging as pain relievers, sat up straight to prove that he was moral, alert, and ready for any problem that might come up. His secretary sniffed to indicate that she didn't believe him. Dr. Brinton dropped his eyes to admit that maybe he wasn't at his best at the moment, but it was only a temporary condition, and by tomorrow he would be okay.

"In two minutes you'll wish you were dead," said his secretary. "Read this."

She handed him a letter. He read it and his knuckles cracked as he gripped the arms of his chair.

"Senator MacNeill coming to visit *here*?" he cried in alarm. Though his voice was squeaky, he was surprised to hear it at all. "Get me a line to Washington, our top priority, Audrey at the Naval Department."

The call was put through.

"Commander Audrey? This is Brinton at the Station. Joe MacNeill is coming to visit us. Can you head him off?..."

"Yes, I know, but he's on one of his economy drives. We just did a test yesterday and if he inspects this place now, we won't get enough money to build a pinball machine. Delay him a week, anyway...."

"Well, try. I'll arrange a tour for him as best I can, but if he doesn't come, I'll be much happier. Let me know as soon as possible. Fine. Good-by."

He scribbled a memo and carried it out to his secretary. "Copy of this to all department heads, right away. Phone the commissary and have them get all the decorations taken down in the dining room. Tell them to lay in some steaks for tomorrow. Phone Harry Sparling in Public Relations—alert him V.V.I.P. tomorrow, extra-special tour including all our movies on the subject. I'm going over to the Fuels Department."

Dr. Ferber, head of Fuels, met Dr. Brinton at the door of his lab.

"I just got your memo," he said. "Is that budget-butcher really coming down here?"

Dr. Brinton nodded his head gently. "I'm afraid so. I came over to see what kind of show we can put on for him."

"We have some samples to run on the indoor motors. There are a couple of loads left for the acceleration sled. And I suppose if we work all night we could get a sergeant-major ready, but if he's on an economy drive that might be too elaborate. Just a view of everybody pouring stuff from one test-tube to another might be best."

"Do the samples and run the sled once," Dr. Brinton said. "That should provide enough fire and noise. The rest of it will have to be fast talk. I think I'll go home to bed."

Dr. Brinton considered himself a methodical man. He had bacon and eggs every morning for breakfast. He always took a vitamin pill with his afternoon coffee. And he was used to exactly eight hours sleep. It was this last habit that caused him to wake up that night at midnight; he had gone to bed at four that afternoon and habit is a hard thing to break. At first he thought it was morning, but a glance at his watch hanging on its illuminated pedestal corrected that.

He grunted, rolled over, and waited for sleep to overtake him again. Nothing happened. He turned and stared at the ceiling for a while. Still nothing; he had not felt so wide awake for a long time. Then he was struck by one of the flashes of inspiration that had made him famous—he would raid the refrigerator.

Downstairs, he found that his son Eric had anticipated him by two minutes, and was busy setting the table with cheese, pickles, ice cream, peanut butter, and everything else necessary to keep a sixteen-year-old boy operating at peak efficiency. A pile of books on the table indicated that he had just finished his homework. Dr. Brinton was pleased that his son had worked so late, but the choice of food made him shudder. He rummaged in the refrigerator himself, found a cold pork chop that Eric had somehow overlooked, and bore it to the table in triumph.

"We were dealt a blow today," he said, between mouthfuls.

"Oh?" said Eric, on guard in case it was about his school work.

"Received word that Senator MacNeill is coming here tomorrow. No, today—it's after midnight."

"Oh." It was an "oh" of relief. A senator couldn't be nearly as troublesome as a teacher.

"Don't say 'oh' like that. He'll probably close the Station tight and we'll all be out of work. You don't realize, it, but money has been getting harder and harder to cadge for this place. We're practically running only the Fuels department now."

He got up, threw the bone from his pork chop into a garbage pail, washed his hands at the sink, and sat down again.

He continued, "Wait till he finds out about those four reactor rockets that are cooling off on the Moon, waiting for us to get there. I can hear him scream, 'Five million dollars each! Each full of precious equipment, to say

nothing of invaluable fissionable material!" And then this place gets shut down."

Eric had a suggestion. "Give him the old routine about how we have to get men to the Moon or the Russians will do it first and use all the equipment we've sent there without even thanking us."

"Umm," said his father, considering. He shook his head finally. "His answer to that is why send good money after bad. No. I just hope he feels better after a steak dinner. Either that or the wings fall off his plane." He smiled wistfully at the thought. "Oh, well," he said, "let's go to bed."

They went their separate ways, but only Eric went to bed. His father entered the library, sat down, got his pipe going, and began to reread *How to Win Friends and Influence People*.

The next day saw Dr. Brinton contemplate suicide, homicide, and voting Republican, though not necessarily in that order. The Senator had viewed their most inspiring onward-and-upward movies and merely asked how much they cost to make. He had eaten a huge steak at the commissary, and then inspected the garbage cans for waste. His visits to various departments had been marred by his lack of interest in anything except the number of men employed by each and their average salaries, though he did comment that they all looked hung-over. In the Fuels Department, he had walked out on the demonstrations, interrupting some actual experiments that were going on outside the test room.

Dr. Brinton was now riding in the back of a jeep, explaining to the Senator that nuclear rockets were not too efficient, and the shielding necessary to make them safe for men weighed more than their payload. The Senator noted down the word "inefficient."

A loudspeaker on a pole a little farther down the road interrupted the explanation. "Twenty-five, twenty-five, twenty-five," it shouted. "Five-nine, eighteen. Five-nine, eighteen. Seventy-three, ten-eight." It began to repeat the message.

The driver, who had slowed while they listened to the message, turned the jeep around and sped them back the other way.

"What in Heaven's name was that?" asked the Senator, who was busy hanging on.

"Twenty-five means emergency," shouted Dr. Brinton. "Five and nine is fire and explosion in the Fuels Department, which is eighteen. Seventy-three is my call number and ten-eight means they want me to get there in a hurry."

For the first time, the Senator looked impressed. Then he grew angry again when his hat blew off and the driver wouldn't stop to go back and get it. The jeep took a shortcut across the concrete fence, and left tire marks in the grass in front of the Fuels Department. Dr. Brinton jumped out and ran into the building, leaving the Senator to argue with the driver about going back for the hat.

The lab outside the test room was dusty and littered with broken glass. Two technicians were receiving first aid for minor cuts, but everyone else seemed to be in an almost holiday mood.

Dr. Ferber saw Dr. Brinton standing in the doorway and came over to him immediately.

"That telephone operator gets too excited," he said. "There's no fire, and I think it was an implosion, not an explosion. Wrecked our new pressure catalyzer. Harrison's gone to hospital and the two you see are hurt, but none of it's very serious. I suppose Butcher Boy is going to put this down in his little notebook, too."

"If you are referring to me," said the Senator's voice behind them, "I most certainly am going to make a note of it. And I suggest you both start advertising for other jobs."

Brinton had been indulging in a pleasant little fantasy in which he had cut Senator MacNeill up into twenty-eight pieces, placed them in aluminum cans, and made them radioactive in the Station pile. He was smiling at the

newsreel cameras, about to fire the first Senator-powered spaceship in the history of mankind, when his alarm clock, which had maliciously been waiting for just such an opportunity, spoiled his dream by waking him up.

That was how the next day started. It continued in the same vein when, in a fit of petulance, he strode into his clothes closet and kicked the alarm control box, barefoot. He was working the combination dial for the third or fourth time when he noticed that his feet were getting wet. His kick must have jammed some relays in the control box; the bath water was overflowing. Since the box was sealed to prevent him from fooling with it, he had had to prevent a flood by limping downstairs and pulling the master switch.

With no electricity, his breakfast consisted of cold fruit juice, cold cereal, and cold milk. When he got to his office, he ordered a pot of coffee and made out a requisition for a pipe wrench. If it ever happened again, he was going to shut the water off instead.

His secretary came in with the coffee and poured him a cup.

"I have some letters for you to sign," she said brightly, to cheer him up. Dr. Brinton drank his coffee. "Our new filing system is working very well," she added, pouring him another cup. The doctor's face relaxed a little, but it was because the snow bank in his stomach was beginning to melt. His secretary played her trump. "And somebody from the Fuels Department phoned and said something was passing the yellow line and might make the blue."

She was never sure afterward whether Dr. Brinton had gone around his desk, or over it. She had blinked and by the time her eyes were open again, he was gone.

Dr. Brinton found a crowd in the indoor test lab, chuckling over the line being drawn by a differential analyzer. He elbowed his way to the front, looked himself, and began a little dance of impatience. The analyzer was connected with linkages to the test stand where a tiny rocket motor was thrusting out a hot blue pencil of flame. The results from the analyzer were plotted as range capability against time on a piece of graph paper which had four curved colored lines overprinted on it. The curved lines were marked in succession: "Earth," "Moon," "Moon" and "Earth."

If the first Earth line, colored red, was passed, the fuel under test could power a rocket to leave Earth, carrying men with it. If the yellow line—the first Moon line—was reached, the rocket could theoretically land men on the Moon. Several rockets, carrying dummy loads, had already tried and failed: their fuels, though the best available, barely reached the yellow line when under test.

The blue—second—Moon line was calculated to indicate an escape from, the Moon without refueling, and the last line, in green, was a theoretical powered landing back on Earth.

The pen of the analyzer had already passed the blue line and was more than halfway to the green!

"This the stuff that was left in the catalyzer after the explosion yesterday!" Dr. Ferber shouted to Dr. Brinton over the roar from the little engine. "It looked as if it would burn, so I tested it. Jackpot!"

"What is it?" asked Dr. Brinton.

"Supposed to be an artificial base for a *perfume*!"

The last word seemed louder because the test rocket just then ran out of fuel and grew silent. The tracing of the pen stopped a fraction short of the green line.

Dr. Ferber continued in his normal voice while he busied himself with the connections of the engine: "We didn't have anything to do to put on a show for MacNeill yesterday, so I told the lads to carry on with experiments of their own. It was Harrison who made this stuff. He was cut by flying glass and landed in the hospital. I phoned there this morning and found the damn fool doctor took his appendix out. Said he figured he might as well while Harrison was in there. He's still under the anesthetic and we won't be able to ask him anything for several hours."

"Doesn't matter," said Dr. Brinton. "We know it works; we have to find out why it works. Got any left? We'll analyze it."

The next few hours saw Dr. Brinton rapidly become a bitter and disillusioned man.

When a qualitative test informed them that the presence of nitrogen meant they were going to have to use an even longer and more laborious process than the ordinary one, he uttered a few sentences that made a couple of nearby German exchange students wonder if perhaps they hadn't a portion missed in the English language learning.

When he found that he had forgotten his pipe at home, and the analysis required too much of their attention to allow him to go home and get it, he quoted a paragraph or two that earned him the undivided attention of everyone in the lab.

But when he took the results over to a calculator and worked them out to carbon 281.6% he had barely started the prologue when frustration overtook him and he subsided, speechless. He was at a loss to say or do anything except mumble that 281.6% was impossible.

Dr. Ferber came over and took the paper with the results from him. Everyone in the lab watched while he checked the calculations patiently.

A delegation minutely checked the apparatus the two doctors had used; it was faultless. One person even went so far as to cast a suspicious look at the big automatic micro-balance standing on its pedestal in the center of the room. He weighed a piece of paper, wrote his name on it in pencil and reweighed it. The difference was satisfactory. For a few moments, they all just stood and looked at each other. Then the whole lot of them set to work.

A junior technician headed for the spectrograph, came back in three minutes with a freshly developed spectral photograph and a puzzled look. He spent some time comparing both of them with the illustrations in a manual entitled *Structural Formulae as Indicated by Spectral Groupings*.

The two German exchange students made a few tries at finding the class of compound. They soon were deep in a technical discussion in their own

language, the only recognizable words being "biuret," "dumkopf," and "damn."

A senior research-chemist tried crystalizing some and invented an entirely new swear word.

With four helpers, Dr. Brinton and Dr. Ferber redid the combustion analysis in slightly less than twice the time it would have taken only one of them. Of course they were assured of accuracy; each step was checked at least twice by everyone.

The result was still carbon 281.6%.

Dr. Brinton escaped the ensuing mental paralysis since he had already been through the experience once. He went over and began to study the figures written in on the side of the spectral photograph. Out of little more than idle curiosity, he compared the ratios of the rough quantitative estimate found spectrographically with the more accurate but impossible answer of the combustion micro-analysis.

While he was doing the necessary figuring, he listened sympathetically to the technician. The young man was complaining bitterly about things in general, and chemistry in particular. Chemical reference books came in for a special roasting, because: "either that lousy book is incomplete, or this structural formula is out of this world."

That did it.

Brinton got out a scratch pad and drew a little diagram.

Then he went to talk to Dr. Ferber.

"Would it be possible that Harrison started with a multi-ringed phenol?" he asked. Dr. Ferber nodded. Dr. Brinton showed him the drawing. "Does that remind you of any geometrical figure?"

Dr. Ferber looked. There was a pause, then his eyes lit up.

"Of course," he said. "Since formulae are usually drawn in one plane, I doubt if anyone ever noticed that before. And when it comes under stress by

compression, it's only natural that it should fold." He paused and looked at the calendar, "Four weeks?" he asked.

"That'll do fine," said Dr. Brinton. "I'll arrange the details. You look after the fuel. Harrison can give us the details of this one, but there are probably any number of fuels based on this principal. Some will be even more efficient, too."

He excused himself, went to a phone, and asked for a Washington number. The call was answered.

"Hello, Senator MacNeill?" he said. "How would you like to be guest of honor at a party?"

Brinton peered through the ring of reporters over to the head table where Senator MacNeill was speaking, and speaking, and speaking.

"He's on his home state," Dr. Brinton said. "About half an hour to go. Now, gentlemen, you were asking about the new fuel. You all received press handouts containing the information. You will probably receive copies of the Senator's speech. And the broadcast from our first men on the Moon went out over several networks hours ago. It seems to me that you have enough for several stories."

One of the reporters asked bewilderedly, "What is a tesseract? I read the handout twice and I still don't understand."

"A mathematician would be better qualified to explain," said Dr. Brinton, "but I'll try. A tesseract is a fourth dimensional cube. A line has one dimension, a square has two, a cube has three, and a tesseract has four. A cube can be unfolded into six squares, and a tesseract unfolds to eight cubes. The new fuel had a molecular structure resembling an unfolded tesseract. When pressure is applied, it folds up into a tesseract so that it takes up less room and relieves the pressure.

"The practical application is that we can get eight pounds of it into a one pound can. The other seven pounds of it are riding around in the fourth

dimension. As soon as it starts to burn, the structure is destroyed, so that it comes back out of the fourth dimension. Several people have assured me that it can't work. They're probably right, except that it does. Oh, I'll be back in a minute."

He went over to another group and spoke to one of its members. The man addressed nodded his head and left. Dr. Brinton returned.

"If there are no more questions, I suggest we do some serious drinking. I am now out of a job and I want to celebrate."

Promptly at seven-thirty, a relay clicked and the alarm clock went into its usual daily routine with the chimes, window, lights, and bath water.

Dr. Brinton woke up enough to reach out a lazy arm and flip a newly installed toggle switch beside his bed. Everything returned to normal. The light and the chimes both faded away, the window reopened, and a soft gurgling came from the bathroom.

A slight gurgling also came from the bed, where Dr. Brinton, with a happy little smile on his face, had gone peacefully back to sleep, perfectly satisfied that he had worked himself into unemployment by finding the fuel that would power spaceships to—and from—any part of the Solar System.

—JACK McKENTY

Transcriber's Note

*** END OF THE PROJECT GUTENBERG EBOOK WAIT FOR
WEIGHT ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
