*** START OF THE PROJECT GUTENBERG EBOOK FIRTH'S
WORLD ***

FIRTH'S WORLD

BY IRVING COX, JR.

*His world was Utopia inhabited only by
wealthy, brilliant, creative, ambitious people;
it was the ultimate in freedom, exempt from
taxes, social problems, petty responsibilities....*

**[Transcriber's Note: This etext was produced from
Worlds of If Science Fiction, May 1955.
Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

Let him go. It's quite safe to leave us. I want to talk to him.

Sit over there, Chris, where you can be comfortable.

A paradox, isn't it? You were taught we may never go back. Now I've authorized the building of the rocket. From your point of view you were justified in trying to destroy it. I'm violating the regulations; you weren't. But time changes the shape of the truth, Chris; it isn't static. No one had the insight, then, to grasp the insanity of John Firth's dream. People hated Firth or envied him; but no one called him mad.

John Firth was an industrialist; yet far more than that, too—politician, scientist, financier, even an artist of sorts. There was nothing he couldn't do; and few things he didn't do superbly well. That accounts for his philosophy. He never understood his own superiority. He honestly believed that all men could achieve what he had, if they set their minds to it.

"Lazy, incompetent fools!" he would say. "The world's full of them. And they've elected a government of fools, taxing me to support the others."

As billionaires go, John Firth was very young. Six months after World Government became an established reality, Earth ships began to explore the skies; and in less than a year Mars, Venus and the Earth had formed a planetary confederacy.

A new feeling came to men when the burden of war-fear was lifted from their minds. Men were free—free for the first time in centuries. Their full energies were channeled into invention, exploration, experiment. The Earth was like a frontier town: booming, uproarious, lusty, dynamic—but with a social conscience: poverty and deprivation for none and unlimited opportunity for all. For Man—that abstract symbol of mass humanity—it was the best of all possible worlds. Yet there were misfits; John Firth was one of them.

"We're coddling people," he said. "We're teaching them to live on charity, on government hand-outs—and I'm expected to pay for it all. Cut them

loose; let them sink or swim for themselves. If some of them don't survive—well, they won't; that's all. We'd be a stronger people if we could rid ourselves of the leeches."

He was a man of the new age,—stubbornly holding to ideas from the old.

And then the Stranger came to see him. We don't know who the Stranger was or where he came from. A force of evil, perhaps—the symbol of Satan refurbished and streamlined to fit the concepts of the modern world.

"I've been reading your political pamphlets, Mr. Firth," the Stranger said. "You hold rather—rather fascinating views."

"Now that I'm suitably flattered," Firth answered, "may I ask what particular form of hand-out you want?"

"None. I've something for sale." The Stranger took a pamphlet out of his pocket. "But tell me this, first: do you honestly believe what you've written here?"

"Every word of it. If I could find my sort of world anywhere in the universe, I'd pull up stakes in a minute and—"

"You can create your own world, Mr. Firth."

"Do you suppose I haven't tried? In every election I back my candidates with all I have—prestige, propaganda, money. It does no good. The fools prefer to be governed by other fools, like themselves."

"I didn't mean here, Mr. Firth." The Stranger smiled as he lit a cigarette. "You see, my friend, I have a world for sale—a brand new world."

"One of the asteroids?" Firth laughed bitterly. "I could have done that years ago. They're too close to the commercial orbits. How long would it be before one of our ships found the place? Then I'd be right back in the system again—and a laughing stock as well."

"This is a planetoid beyond Pluto. It'll be generations before any of our ships—"

"A frozen world? No thanks!"

"Only on the surface. It's a hollow sphere, with a granite crust half a mile thick. Inside there's a suggestion of passageways and caverns, which may

have been made artificially. Perhaps this was an outpost of a race which lived and died billions of years before our time."

"An archeological gold mine!"

"But Science pays so little, Mr. Firth. I'm interested in cash, not prestige."

"Why should I pay you anything? You've told me where it is and what it is. I can find it for myself."

The Stranger laughed. "I said beyond Pluto; that covers a lot of space, Mr. Firth." He paused for a moment. "My price is the stock in your Martian mines. Convert the rest of your holdings into any form of wealth that seems convenient and usable. In your case, Mr. Firth, you *can* take it with you—to your own world. Think of it! No taxes; no social problems; no unfortunate masses to prey on your conscience; no government but your own."

That was the beginning of the dream. The seed of the idea grew in John Firth's mind until it over-shadowed everything else. It became an obsession, driving him so that he had no peace.

During the course of a year Firth and the Stranger imported and installed the machinery to make the sphere livable: hydroponic tanks, air machines, gravitators, electric generators and an Atomic Power Core. In the crust of the planetoid they found enough fissionable material to keep Firth's world running for an eternity. They laid out the decorative landscaping, planned the living quarters, the laboratories, the amusement hall and the university.

It is interesting to speculate how much the Stranger contributed to the scheme; and it is an ironic speculation, for as soon as the larger idea took shape in Firth's mind, his only logical course was to murder the Stranger.

Firth could allow no outsider to know of the planetoid. To him it had become far more than a means of personal escape. It was to be an archive for the survival of John Firth's ideas, for the survival of civilization itself. John Firth believed that sincerely.

Firth's world—that magnificent dream which was like a holy crusade—was founded on murder, deception and greed. The reasoning of fanaticism

engenders its own kind of ruthlessness. As soon as John Firth had disposed of the Stranger, he began to select his colonists. Men who by his definition, were not fools. He had to make his choice very carefully. If he misjudged his candidate and his proposition was rejected, Firth had given away his secret. Any man who refused him had to die. Murder was Firth's only guarantee of silence.

But he made few mistakes. John Firth was a good judge of men—his kind of men. All of them were wealthy, ambitious, brilliant. Nearly three hundred men and women were recruited.

They came here to escape; the record tells us that until we gag over the repetition. But to escape what? Taxes they resented unanimously, and restrictions on their freedom. They placed a value on the ownership of property that we can no longer understand. But, if you read the record closely, all that becomes superfluous. The thing they wanted to escape was responsibility. Responsibility to their fellow men.

Physically, Firth's world was a paradise. It still is. Yet the dissolution began before the last colonist had arrived. Here they had assembled their wealth—in terms of machines, comforts, books, art treasures, amusements, laboratory equipment. They were entirely free from the burden of taxation. But, somehow, their wealth lost its meaning.

They claimed they had not withdrawn from the world in order to hibernate and decay among their luxuries. They wanted freedom in order to create, to invent, to experiment as they pleased. And they had that in Firth's world: a maximum opportunity for the development of individual initiative. For a short time they turned out a wonderful assortment of new gadgets and new machines, but slowly their industry ground to a stop.

If they had faced the truth then—but they were far too human to admit the failure of the dream. Instead, they found a scapegoat. John Firth has left us a record of a conversation he had with Adam Boetz; it is typical of their thinking at the time.

Boetz, as you may know, was one of the outstanding physicists of his day; he had created and built Atomic Cores, Incorporated, until it was the largest power company in the Confederation.

John Firth met Boetz one morning on the golf course in the recreation cavern.

"Adam!" Firth cried, with his usual, boisterous good-humor. "I never thought I'd find you out here at this time of day."

"Why not?" The physicist shrugged. "I'm tired, Firth. I had to do my four hour shift in the light plant last night. Maybe I'll feel like working in the lab tomorrow—and maybe not. I'm scheduled for a shift in hydroponics then."

"The shifts are short, Adam, and—"

"Still too long for me. I'm not used to so much physical labor." The physicist's lips curled in a sneer. "So very democratic, isn't it, Firth? Back home I hired men to do that kind of work for me."

Firth clapped him heartily on the back. "But we have other compensations, Adam. Four hours out of twenty-four is a small price to pay for freedom."

"Twenty-eight hours a week. Remember the new labor law the Earth government put into effect before we left? It proscribed a maximum work week of twenty-five hours for every man. We came here to escape restrictions, but we've saddled ourselves with more hours of manual labor than the least skilled laborer has to do on Earth. Firth! I'm not a manual laborer; neither is anyone else you've brought here."

"Do you want to go back?"

"What answer can I make to that? We're executives, Firth; but here we're a brain without a body. We can formulate the orders, but we've neither arms nor legs to carry them out."

"In other words, you're saying we should import a labor force to do our basic work for us?"

"Why not?"

"They're the fools, Adam, the incompetents! On Earth they were the millstones around our necks—envying us, hating us, building a prison for us with their laws and their regulations."

"All very true, Adam, where the government is in their hands. But we could keep them under control."

After that John Firth heard the same complaint from the others, over and over. They said they could not take advantage of their freedom because of the chores they had to do to keep Firth's world functioning.

Firth called a meeting of the colonists. It was the closest approximation to a government they had; government itself was one of the things they wanted to escape. They unanimously agreed that a labor force had to be recruited, and they settled upon one hundred and fifty as the necessary number, half of them to be women. Working eight hours a day, such a force could perform the work of Firth's world, yet the colonists would outnumber them two-to-one and the labor force would not be large enough to constitute a threat.

"We'll insist that they marry, of course," Adam Boetz said, "and each couple will provide us with two children, so that we shall always have a stabilized labor supply."

"We're talking," one of the women whispered, "as if we were buying cattle!"

"We are."

"But how can you recruit men and women under these conditions? What inducement can you possibly offer them?"

Firth smiled. "When we find the people who meet our specifications, they'll come; don't worry. In the days of the sailing ships the technique was called shanghaiing."

"What specifications, Mr. Firth?"

"They must be young, strong, healthy, single—"

"And low-level morons," Adam Boetz cut in. "Imbeciles won't give us any trouble later on."

To his other crimes, John Firth then added kidnapping; the end justified the means. He was creating a world and that world would save civilization. I doubt that his conscience ever troubled him.

Within two years the second group of colonists was established in Firth's world. Apparently they made an easy adjustment to their new environment. We have no record of complaints or protests. They were docile, obedient people. They took orders well; they liked to be told what to do; they needed very little supervision.

The first colonists were entirely free, then, of any sort of work-responsibility. For a while they went back to work in their laboratories or in the university—inventing, exploring, accumulating their store of knowledge. In imperceptible stages, however, their interest lagged, their production came to a halt again. This time they had no excuse, no scapegoat.

We can assume that some of them faced the truth squarely and honestly, yet they had chosen Firth's world and there was no way to turn back. We find only one actual hint of their despondency, in a diary page written by an unknown woman.

Karl stayed home again to-day. He has nearly finished the design for his machine, but he has no more enthusiasm to complete it. I know how he feels; I can't go on with my painting, either. We have no purpose, no goal to achieve. We sit isolated in space, counting over the wealth of our talent and ability; but we can make no use of it. I wish I knew how many of the others think as I do, but I'm afraid to ask.

The key to understanding them, is that last sentence. Perhaps they all felt her disillusionment, but they had to pretend. Firth's world couldn't be at fault. If they were dissatisfied, it was because of a failure within themselves. At all costs, the flaw had to be hidden from their neighbors.

Their first labor trouble was a welcome interlude in the creeping boredom. The docile labor battalion suddenly discovered they were being overworked. Just what they could have done in Firth's world with shorter hours, no one knows. They staged a spotty, amateurish strike; speakers made reference to the labor laws applicable on the Earth and demanded better pay. To what end, it's hard for us to say. If the first colonists had turned over all their wealth, the workers would have had no more use for it.

John Firth was unusually alarmed by the threatened strike. He reacted with excessive violence and the other colonists followed his lead. Three of the leaders of the uprising were executed; others were brutally whipped. The Outlaw Pit was built then. Thereafter, at the first hint of any dissatisfaction, workers were condemned to it.

The violence taught the workers resentment. Silently, sullenly they passed on their hatred to their children. The aristocracy created the revolution, and nurtured it; for it would have made no real difference if they had surrendered entirely to the strikers' demands.

The children of the first colonists made no pretense of using Firth's world to advance knowledge, invention or art. They were hedonists, bred to luxury, supported by slaves.

The slaves, for their part, felt no emotion but hatred. From their parents they learned that the aristocracy had violated the labor law. The children knew nothing about the law or the distant Earth where it applied, but it was held in deep and sacred reverence.

The laboratories and the university stood empty; only the recreation cavern held any interest for the new aristocracy. A change took place among the slaves too. Their parents had been hand-picked morons. But neither brilliant achievement nor the moronic mind is hereditary. Most of the workers' children had an average intelligence; one or two would have been classified as geniuses. To their hatred the second generation joined intelligence, and Firth's world was ready to blow apart.

They struck the light plant first. Sudden and unexpected violence surged through the dark, stone-walled corridors.

John Firth led a band of men against the enemy. But his attack failed and the workers seized the Atomic Power Core—the heart of our world. If they shut down the reactors, they would stifle not only our lights, but the gravitators and the air machines as well; they would kill us all.

The workers knew that. They were willing to risk suicide. Every bargaining counter was on their side. It was John Firth who surrendered.

Firth's world died then. In the bitter depths of the Pit, John Firth remembered what Adam Boetz had said to him so many years before,

"We've become a brain without a body. We can formulate the orders, but we've neither arms nor legs to carry them out.

Suddenly John Firth understood the fallacy of his fanaticism. A society was like a living body, an integrated organism of many members. No one could function without the others. No man—no group of men—could create an isolate world. The social equation seemed as clear to Firth as the simplest sum in arithmetic. Each man was a part of a functioning social unit which included them all. Each man's talent, whether it was the plodding docility of a moron or the brilliance of genius, belonged to all men.

In the meantime, the workers found that they could not run Firth's world alone, either. They gloried in forbidden luxuries until they were satiated. Shortly they became as indolent as the aristocracy had been; and the food supply was nearly exhausted.

The treaty they made was direct and to the point: the two groups agreed to live in equality, sharing the burden of the labor and the accumulated wealth of knowledge. The treaty was made when you were a child; we have perfected the technique of co-operation within one generation. We're ready, now, to go back to Earth.

You'll be with us? Fine, Chris!

No. Please, no apologies. I understand why you intended to destroy our ship; others have attempted it, too. No harm was done. You're free,—entirely free ...

... The Organizer waited until he was alone in the office. Then, with trembling, aging hands, he took the log book out of the safe and slowly made another entry:

Chris was the last, I think. He accepted the lie, just as most of the others have. When they return to Earth, they will be sound men with whole minds. For them Firth's world will always stand as a symbol of man's highest achievement in co-operation. May this sham, in some small way, expiate the crime and the folly of my arrogant delusion.

John Firth's head dropped on his arm and his shoulders shook; but the sobs were sobs of relief. Chris was saved; Chris would go back. That mattered very much—for Chris was his grandson.

*** END OF THE PROJECT GUTENBERG EBOOK FIRTH'S WORLD

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
