A Close Shave

—but in
comfort with
a Durham-

Duplex Razor Safety, the razor which enables you
to shave with the barber's diagonal stroke without
fear of cutting yourself. As a gift to a man friend
nothing is more appreciated. Soldiers at home and
abroad will delight in an outfit.

DURHAM - DUPLEX

RAZOR SAFETY

The interchangeable
double-edged blades
will last a campaign and
always give an easy
shave under the most
trying conditions.

Complete Outfits—

10/6 and 21/- (as
shown).

Player's Navy Cut

**Tobacco and Cigarettes
FOR THE TROOPS.**

From all quarters we hear the same simple
request:

"SEND US TOBACCO AND
CIGARETTES"

TROOPS AT HOME (Duty Paid)

It would be well if those wishing to
send Tobacco or Cigarettes to our
soldiers would remember those still in
Great Britain. There are thousands of
Regulars and Territorials awaiting
orders and in sending a present now
you are assured of reaching your man.

Supplies may be obtained from the
usual trade sources and we shall be
glad to furnish any information on
application.

TROOPS AT THE FRONT (Duty Free)

Working Model with one Blade, 2/6.

Exchangeable free.

Booklet post free from **DURHAM-DUPLEX
RAZOR Co., Ltd., 27w, Church St., Sheffield.**

John Player & Sons, Nottingham, will (through the Proprietors for Export, The British-American Tobacco Co., Ltd.) be pleased to arrange for supplies of these world-renowned Brands to be forwarded to the Front at Duty Free Rates.

**JOHN PLAYER & SONS,
Castle Tobacco Factory, Nottingham.**
P.438 Branch of The Imperial Tobacco
Co. (of Gt. Britain & Ireland), Ltd.

AS USED IN THE GERMAN TRENCHES: A GERMAN BAND PLAYING
ON THE MARCH DURING THE WAR.

THE GREAT WAR.

Our gracious Sovereign—more so even than his deceased father, who had also a conspicuous gift that way—has ever shown a singular felicity in voicing the sentiments of his people, but never more so than when he sent this message to Sir John French: "The splendid pluck, spirit, and endurance shown by my troops in the desperate fighting which has continued for so many days against vastly superior forces fills me with admiration." That sovereign message to his heroic soldiers—such as his ancestor Henry V. might have addressed to his 10,000 long-enduring conquerors on the night of Agincourt—was nobly supplemented by this passage from the following day's Speech from the Throne: "My Navy and Army continue, throughout the area of conflict, to maintain in full measure their glorious traditions. We watch and follow their steadfastness and valour with thankfulness and pride, and there is, throughout my Empire, a fixed determination to secure, at whatever sacrifice, the triumph of our arms and the vindication of our cause."

COMMANDER
OF THE BRITISH
CRUISER WHICH
"IMPRISONED"
THE
"KÖNIGSBERG":
CAPTAIN
SIDNEY R.
DRURY-LOWE,
R.N.

The Admiralty
stated on Nov. 11,
"This search
resulted on Oct. 30
in the 'Königsberg'
being discovered

COMMANDER
OF THE
AUSTRALIAN
CRUISER WHICH
DESTROYED
THE "EMDEN"
CAPTAIN JOHN
C.T. GLOSSOP
R.N.

Captain Glossop
received the
following message
from the First Lord
of the Admiralty
"Warmest

by H.M.S. 'Chatham' (Captain Sidney R. Drury-Lowe, R.N.) hiding in shoal water about six miles up the Rufigi Ritter.... (German East Africa) ... She is now imprisoned, and unable to do any further harm."—[Photo. by Elliott and Fry.]

congratulations on the brilliant entry of the Australian Navy into the war and the signal service rendered to the Allied cause and to peaceful commerce by the destruction of the 'Emden.'"

Photograph by b. Lafayette.

ONE OF THE VESSELS CONCERNED IN "THE LARGE COMBINED OPERATION" AGAINST THE "EMDEN" H.M.A.S. "MELBOURNE."

While it fell to H.M.A.S. "Sydney" to bring the "Emden" to action, another vessel of the Australian Navy, the "Melbourne," also joined in the pursuit. The Admiralty stated that a "large combined operation by fast cruisers against the 'Emden' has been for some time in progress. In this search, which covered an immense area, the British cruisers have been aided by French, Russian, and Japanese vessels working in harmony. H.M.A.S. 'Melbourne' and 'Sydney' were also included in these movements."

Photograph by Sport and General.

At whatever sacrifice! And that promises to be terrible. For what will be the sacrifice entailed by two years of war—to put its duration at a moderate estimate—if our casualties in life and limb alone (compared with which our millions of money are as nothing) amounted, according to an official statement in Parliament, to about 57,000 of all ranks up to the end of October and it is believed that 10,000 at least must be added for the first ten days of November? Of course, by far the larger portion of those casualties are "wounded," of whom, according to one of the Netley authorities, nine in ten a

[Continued overleaf]

This historical black and white photograph depicts a rural scene. On the left, a man dressed in a dark, long-sleeved coat stands near a simple wooden structure with a thick thatched roof. To his right, a deep earthen pit or well is visible, with a wooden frame over its entrance. Above this opening, a sign reads "DOUCHES" in bold letters, with smaller text "à l'eau glacée" on the left and "et Café" on the right. In the upper right corner, another individual is bent over, pouring liquid from a container into a large wooden tub. The background shows more of these rustic buildings and a flat landscape under a pale sky.

Much has been said of the elaborate character of the German entrenchments and of the British genius for comfort developed in our own lines, but it is doubtful whether anything done by either side in that direction has surpassed

the *chef-d'oeuvre* of an ingenious French engineer shown in our illustration. At one point in the French trenches not seven hundred yards from those of the enemy, and within two miles of the German artillery, he constructed an up-to-date bathing establishment, with a heating apparatus and a shower-bath! The apartment was fitted with a stove, benches, clothes-pegs, and curtains; an adjoining the *salle de douches*, or shower-bath room, was fitted up a *salle de coiffure*. There was even talk of enlivening the bathing hour with music and topical revue.

4—THE ILLUSTRATED WAR NEWS, NOV. 18, 1914.

SIMILAR TO THE KAISER'S AERIAL BODYGUARD: A ZEPPELIN WITH A GUN ON TOP FIRING AT HOSTILE AEROPLANES—A GERMAN PICTURE.

It was stated recently that two Zeppelins, armed with machine-guns, circle continually on guard above the Kaiser's private apartments in his headquarters at Coblenz.

It must be remembered, too, that the casualties referred to—being confined to "the western area of the war"—do not include our losses at sea, which comprise few "wounded" and no "missing." At sea it is either neck or nothing, sink or swim: a modern battleship, if holed and exploded, like the *Good Hope* and the *Monmouth* off the coast of Chile, going to the bottom, and most of her crew with her, like Kempfenfelt's oaken *Royal George*—

Brave Kempfenfelt is gone,

His victories are o'er;

And he and his eight hundred

Will plough the waves no more.

Thus if our casualties at sea, which are mainly of one kind only, be added up, they will probably be found to exceed our deaths on land, which are always much less numerous than other kinds of losses; yet the mortality of our

battlefields has been mournful enough, especially among officers—where the death percentage has been higher than in any other war we ever waged.

On the other hand, the Germans have had to pay a fearful price for the death-toll they have exacted of us and our Allies, seeing that, according to their own official admission, their casualties to the end of September amounted to over 500,000 for the Prussian army alone, while the corresponding figures for Bavaria, Würtemberg, Baden, and other States have to be added; so that the estimate of Mr. Hilaire Belloc that the total losses of the Germans up to date must be somewhere near a million and three-quarters men would appear to be not very far out.

Well now, supposing that the war were to last for two years, it follows that, at the same rate of loss, the German casualties would amount to 12,250,000, which is almost unthinkable. Its very destructiveness should tend to shorten the duration of this terrible war. As Mr. Asquith said at the opening of Parliament, in a curiously cryptic and significant passage: "The war may last long. I doubt myself if it will last as long as many people originally predicted." God grant that this may be so!

But in the meantime there are no signs of any abatement of fury on the part of the Imperial Hun of Berlin, who stamps, and struts, and rages like Pistol on the field of Agincourt; and "Bid him prepare, for I will cut his throat!" is ever the burden of his objurgations. How different from the calm, serene, dignified utterances of our own gracious Sovereign and the despatches of his Generals are the minatory rantings of the Kaiser, his von Klucks, and his Crown Princes of Bavaria, with their vicious appeals to the worst passions of their soldiers against the English as the most bitterly hated of all their foes!

[Continued overleaf.]

HE WAS A MAN: FIELD-MARSHALL EARL ROBERTS, THE WORLD-FAMOUS SOLDIER, WHO DIED AT SIR JOHN FRENCH'S HEADQUARTERS.

Full of years and honours, Lord Roberts has met death upon the Field of Honour as surely as though he had died fighting at the head of the brave soldiers whom he loved so well. To enumerate his qualities: indomitable courage, keen intelligence, broad humanity, is to gild refined gold. At the call of duty he visited the Army and the Indian soldiers in France, despite his eighty-two years; there he caught a chill and passed peacefully away. The message to Lady Roberts by Field-Marshal Sir John French will find a universal echo: "...Your grief is shared by us who mourn the loss of a much loved chief ... It seems a fitter ending to the life of so great a soldier that he should have passed away in the midst of the troops he loved so well and within the sound of the guns."

6—THE ILLUSTRATED WAR NEWS, NOV. 18, 1914.

Most bitterly hated, but at the same time most formidable—as the Germans themselves now generally admit, and hence all those tears of rage—*hinc illa*

lacrymae. Even when the Prussian Guards—not to speak of the vaunted Brandenburgers and Bavarians—can make no impression on the British lines in Belgium, it should at last break in upon the German General Staff that they are somewhat out in their calculations. The word "contemptible" is never used now in relation to Sir John French's army, and it will be used still less when this army shall have been reinforced by the million of men apart altogether from the Territorials which are now under training to supplement it, while a further million has now, in turn, been asked for and will be cheerfully raised, with the help of the additional vote of credit for £250,000,000—which was just about the cost of the Boer War, and £25,000,000 more than the French indemnity of 1870—which will be willingly granted by Parliament for the conduct of a war that is said to be costing us about £7,000,000 a week. When a young man throws all his soul into his training and ardently wants to become a soldier, his progress will be at least three times as quick as that of the dull, driven conscript; and that is why Lord Kitchener has told us that the new million-man'd army which popularly bears his name, though it might just as well be called after the King—has already been making a wonderful advance towards field-efficiency.

THE "NIGER'S" CAPTAIN, WHO STAYED ON THE BRIDGE TO THE LAST THOUGH BADLY WOUNDED: LIEUT. COMMANDER A.I. MUIR.

When the "Niger" was torpedoed, Captain Muir was on the bridge and was severely injured by the explosion, but remained at his post till every officer and man had left the ship. He was taken ashore at Deal in a boat and had to be placed in hospital.—*[Photo. by Russell.]*

SUNK BY A GERMAN SUBMARINE IN THE DOWNS: H.M.S. "NIGER."

The English writer of one of the many war-books now before the public—"The German Army From Within," by one who has served in it as an officer, tells us that he calculates one of our "Tommies" to be at least equal to three "Hans Wursts"; and when the personal equation is taken into account—the value of individual character and initiative—the estimate will not seem to be exaggerated. In fact, it has been proved to be correct by the opinion of all our best judges in the field itself, as well as by the results of

The "Niger," a torpedo-gunboat of 810 tons, built in 1892, was torpedoed by a German submarine while lying off Deal about noon on the 11th, and foundered. The Admiralty stated: "All the officers and 77 of the men were saved; two of the men are severely and two slightly injured. It is thought there was no loss of life."—[Photo. by L.N.A.]

the fighting when the odds against us have been invariably three to one, in spite of which we have always managed not only to maintain our ground, but also to encroach on that of our antagonists.

Hence it follows that a so-called "Kitchener" army of a million men ought to have for us a military value of at least three millions as against the German:—the more so since their best first-line troops have already been used up, and replaced with beardless boys and most corpulent greybeards. This is not a fanciful description; it corresponds with the reports sent home by "Eye Witness" at Headquarters and other reliable observers; while there is an absolute consensus of statement that our soldiers enjoy a commissariat system which is at once the admiration of their French friends and the sheer envy and despair of their German foes. The fact alone that our men are better found and better fed than the enemy gives them an advantage over and above their three to-one equivalent of the individual kind.

[Continued overleaf]

A WAIST-DEEP SHELL-HOLE IN A BELGIAN STREET: IN A WAR-WRECKED WEST FLANDERS TOWNSHIP

The devastating effect of shell-fire on human habitations is brought out with an appealing effect by the photograph which we give above of the scene in one of the ill-fated Belgian townships on the frontier of West Flanders. Wrecked and ruined houses with their walls leaning over and tottering, about to fall in ruin, and the heaps of littered *débris* in the street tell a fearful tale of what the havoc from a bombardment by heavy projectiles means for the hapless inhabitants of the place. The tremendous force of the impact with which the shells crash down is shown at the same time by the man seen in the foreground of the photograph standing up to the waist in one of the gaping cavities in the ground that the shells make where they strike. In some of the houses they smash through from roof to cellar.—[*Photo. by Illus. Bureau.*]

TOURING IN GERMANY WITH THE PRINCE OF WALES: THE LATE MAJOR CADOGAN, THE PRINCE'S EQUERRY, WHO HAS BEEN KILLED IN ACTION.

Major the Hon. William Cadogan, son of Earl Cadogan, and Equerry to the Prince of Wales, was killed while commanding the 10th Hussars in place of the Colonel, who had been wounded. Major Cadogan had been sharing in the work of the infantry in the trenches. He served in South Africa, and last year accompanied the Prince of Wales, who travelled as the "Earl of Chester," on a visit to Germany, where our photograph was taken.—[*Photograph by Illus. Bureau.*]

Besides, they have sources of inspiration—have our "Tommies"—denied to their Teutonic antagonists. General von Kluck, Commander of the First German Army, has described a visit of the dread War Lord to the line of the Aisne "behind the line of fire"; and the "Hochs" with which he was greeted by a Prussian Grenadier regiment. But what are those guttural "Hochs" compared with the ringing cheers which were evoked by the presence of Lord Roberts on the occasion of his last visit to his old comrades-in-arms of the Indian Army, now confronting those Prussian

Grenadiers on the line of the Yser? When Lord Roberts was made a Peer, after his march from Cabul to Candahar, he chose as his heraldic supporters a Gurkha and a Gordon Highlander, who had done so much to help him on to victory; and it is pretty certain that he would have desired no more congenial and appropriate manner of death than he has found, at the age of eighty-two as an inspiring visitor to the lines of the gallant troops of all kinds whom he himself had so often led to victory. It has been said that no man can be called happy until his death, and certainly no one was ever more felicitous in the manner of his end than the veteran hero, the blameless "Bayard" of the British Army, who has well been called one of Ireland's greatest Englishmen.

Yet his name will continue to serve as an inspiration to the Army which adored him; and doubtless his last moments were soothed by the thought that the soldiers whom he so fervently loved had just added to their laurels by the brave repulse on the Yser of two Brigades, or a Division, of the boasted Prussian Guards, forming the very flower and kernel of the Kaiser's army. And news also must have reached the conqueror of Paardeburg and Pretoria:

that the German-prompted and German-paid rebellion against the Union on which he had laid the foundation-stone—not with the trowel of an architect but with the sword of a soldier—was collapsing under the well-directed blow of such an Imperial patriot and statesman as General Botha, proud to wear the uniform of the hero of Candahar.

Thus the last hours of our veteran Field-Marshal must have been consoled with the reflection that, in spite of the fact of all his warnings and his exhortations having fallen on deaf ears, victory was gilding our arms, as well as those of our Allies, all round; and that the loss of two of our cruisers off the coast of Chile had been more than offsetted by the destruction of the notorious commerce-destroyer *Emden* in the seas of Sumatra and the cornering of the equally elusive *Königsberg* among the palm-trees of an East African lagoon—fit incident for the pages of Captain Marryat or Mr. George Henty, beloved of the boy-devourers of stirring adventure books.

During the last week two rivers have again formed the main scenes of action in the far-extended theatre of war—one the Yser, in Belgium, where the advance of the Germans on Calais has been "stone-walled" by the Allies; and the other on the Vistula, in Poland, where the Russians, by sheer force of numbers and superior strategy, made very considerable progress in their march on Berlin; so that, on the whole, the horoscope remained most favourable to the Allies and the ultimate attainment of their Common object.

THE VICTORIOUS RUSSIAN CAVALRY IN ACTION: A CHARGE BY
THE GALLANT FORCE WHICH CROSSED THE CARPATHIANS INTO
HUNGARY.

In the recent victorious operations of the Russian Army the cavalry have taken a conspicuous part. The Headquarters announcement from Petrograd of November 10 said: "To the east of Neidenburg near the station of Muschaken (in East Prussia, about two miles from the frontier), Russian cavalry defeated a German detachment which was guarding the railway, captured transport, and blew up two bridges over the railway. On the 8th inst. our cavalry forced on of the enemy's cavalry divisions, which was supported by a battalion of rifles to retreat towards Kalisz (near the border of German Poland)." The above drawing shows an engagement in Hungary between an Austro-Hungarian force and a body of Russian cavalry who had crossed the Carpathians from Galicia.

IN CAPTURED DIXMUDE: THE
CHURCH OF ST. JEAN AFTER
BOMBARDMENT.

WRECKED BY GERMAN SHELL-
FIRE: THE CHURCH OF ST. JEAN
DIXMUDE.

Dixmude, after a comparative lull since it was first bombarded by the Germans, recently became once more the objective of a fierce attack and fell into the enemy's hands. The afternoon *communiqué* issued in Paris on November 11 said: "At the end of the day (*i.e.*, the 10th) the Germans have succeeded in taking possession of Dixmude. We are still holding on to the outskirts of this village, on the canal from Nieuport to Ypres, which has been strongly occupied. The struggle has been very fierce at these points." The latest French *communiqué* issued the same night said: "The enemy throughout the day continued his effort of yesterday without achieving any fresh results.... He made vain attempts to debouch from Dixmude on the left bank of the Yser."—
[Photo. by Newspaper Illustrations.]

THE LITTLE BELGIAN TOWN TAKEN BY THE GERMANS AFTER THREE WEEKS: DIXMUDE—THE HOTEL DE VILLE AND CHURCH TOWER.

Although the Germans undoubtedly scored a slight success by their occupation of Dixmude, they did so at enormous cost. It was reported from Amsterdam on the 11th that 4000 Germans severely wounded in the fighting round Dixmude had reached Liège. Dixmude was for three weeks gallantly defended by French Marines. The town is now little more than a heap of ruins. As our photographs show, the fine old church of St. Jean has been almost completely wrecked, and the Hotel de Ville has suffered great damage. It has been pointed out that the military value of Dixmude to the Germans is not very great, as it does not form part of the Allies' defensive line, but was held as a bridge-head on the east bank of the Yser.—[*Photo. by Newspaper Illustrations.*]

AFTER BOMBARDMENT BY "AN INFURIATED GERMAN ARMY CORPS": THE RUINS OF THE MAIN STREET OF DIXMUDE.

Dixmude, on the Yser, suffered terribly during the earlier stages of the great battle in West Flanders. It was stated on October 27 that French Marine holding the town had withstood a continuous attack lasting forty hours, at the end of which the place was in ruins. Mr. E. Ashmead Bartlett, who visited Dixmude on October 21, wrote (in the "Telegraph"): "The town is not very big, and what it looked like before the bombardment I cannot say.... An infuriated German army corps were concentrating the fire of all the field gun and heavy howitzers on it at the same time. There was not an inch that was not being swept by shells. There was not a house, as far as I could see, which had escaped destruction."—[*Photo. by Newspaper Illustrations.*]

WRECKED IN THE MODERN, AND GREATER, BATTLE OF THE
DUNES: IN THE RUINS OF THE FIFTEENTH-CENTURY CHURCH AT
NIEUPOORT.

Some idea of the destruction wrought by German shells in Nieuport may be gathered from this photograph of the interior of the church, another example of the fact, pointed out under a drawing on another page, that the German gunners do not respect the House of God. The church at Nieuport, which dated from the fifteenth century, was restored in 1903, and its massive baroque tower, visible from afar, could be easily avoided by artillerymen capable of accurate aim and desirous of sparing a sacred building. Nieuport has at least twice before in history been the scene of conflict. In 1489 it made a stubborn resistance to an attack by the French, and near it, in July 1660, was fought the Battle of the Dunes between the Dutch and the Spaniards.—[*Photograph by Newspaper Illustrations.*]

BURSTING SHRAPNEL
MARKING THE GERMAN
"DOVE'S" TRACK: SHELLING A
TAUBE.

The bursting shrapnel marking the line of flight of that dread "steel dove," the Taube, comes from a new kind of anti-aircraft gun at the front. This weapon, generally used to fire a stream of shrapnel, also fires shells containing a composition for setting aircraft on fire, and its range-finder marks both the height of an aeroplane and its speed.—[Drawn by A. Forestier from a Sketch by H.C. Seppings Wright.]

BIPLANE FIGHTS BIPLANE: THE
FATE OF A VANQUISHED
GERMAN "AVIATIK."

We see here the *finale* of a fierce air fight near Rheims. A German "Aviatik" biplane passed overhead and a French biplane with a machine gun went at it. There was a hot contest until suddenly a French shot struck the "Aviatik's" motor. Taking fire instantly, the German craft fell blazing to the ground, where it burned to a cinder with its airmen.—[Drawn by Georges Scott from an Eyewitness's Sketch.]

"MISSING AND WOUNDED," AT BRUGES: STRICKEN BELGIANS IN
CHARGE OF GERMAN RED CROSS MEN.

The German base hospital for the troops in the coast battles and at Ypres was stationed at Bruges when our photograph was taken. The illustration shows two wounded Belgians—one who has just been lifted out from an ambulance wagon is on a stretcher; the other stands, a grimly picturesque, overcoated and "hooded" figure, in the centre. Among the group of soldiers are sailor-garbed men of the Marine brigade, brought to Flanders to aid in garrisoning Antwerp and hold the coast batteries near Ostend and Zeebrugge. For the time being, the entire city of Bruges, it is stated, has been converted into one immense hospital owing to the crowds of German wounded almost hourly arriving there, while trains with wounded soldiers are continually leaving for Germany.—[*Photo. by Record Press.*]

NOT EVEN THE DEAD LEFT IN PEACE! GERMAN SHELLS UNEARTH GRAVES AND SCATTER THEIR CONTENTS IN A VILLAGE CHURCHYARD.

In our last issue we gave a photograph of a Galician town bombarded by the Russians, proving that they carefully avoid the destruction of churches. The German gunners, on the contrary, show no respect for the House of God although their Emperor so often claims Divine approval. The havoc wrought by German shells in French and Belgian churches and cathedrals stand recorded in countless photographs and other illustrations, to form a permanent Indictment of Germany's methods of warfare that will make her name execrated by posterity. In the present instance not only the church itself was destroyed, but the very graves were torn open, and the bodies and bones of the desecrated dead flung from their places of rest—[Facsimile Drawing by H.C. Seppings Weight Special War Artist.]

A GERMAN SAW-EDGE BAYONET IN ACTUAL USE IN THE WAR:
WHEN THE GERMAN FLAG WAS PLANTED ON A CAPTURED
POSITION.

It has been pointed out by a Naval correspondent that the German bayonet of which one edge is a saw is not really quite the barbarous weapon it seems, but is similar to that carried by pioneers in British naval landing-parties, for use in sawing wood. The toothed edge, he mentions, is so far from the point that only by the rarest chance could it enter the body of an enemy. It would be interesting to know whether the two bayonets British and German—are exactly similar. Another account of the German weapon states that the saw edge begins only six inches from the point, quite near enough thereto, one would imagine, to "enter the body of an enemy." Inset is an enlargement of the German saw-bayonet—[*Photo. by L.N.A.*]

WHERE FRENCH SAILORS
FOUGHT AT DIXMUDE: NAVAL-
BRIGADE DEFENCES.

WHERE FRENCH SAILORS
FOUGHT AT DIXMUDE: THE
NAVAL DEFENCES-FRONT VIEW

Dixmude, the name of which little West Flanders town on the Yser all the world knows now, after being heroically defended against persistent night and-day attacks and bombardments at all hours, was taken by the reinforced Germans after a forty-hours renewed attack on November 11. The defenders however, held out in the outskirts of the town, and could not be dislodged. The post is not part of the Allied main line, but rather of value as a bridge head over the river. The French naval officer who sent the photographs shown above was one of the defenders until he had to withdraw wounded. When he was there Dixmude had been defended by 6000 French sailors, reinforced at the end of October by 1500 Algerian soldiers.

THE COWHERDS OF WAR: ARMED GERMAN MARINES ROUNDING
UP CATTLE FOR FOOD FOR THE ARMY IN THE FIELD.

One of War's "little ironies" finds illustration in our photograph. A great conflict such as that now being waged is full of contrasts: grins, pathetic sometimes not without a suggestion of humour. That the German Marine should be told off in a pretty rural district to round up cattle for food for the German troops is a case in point. The sleek and shapely kine which these sturdy fellows are commandeering plod peacefully along in happy ignorance of the fact that they are prisoners of war being led to their doom by an armed guard. If it were not for the significance of the weapons borne by the Marines the scene would be as purely pastoral as that immortalised by Gray. It suggests the "lowing herd"—with a difference.—[Photo. by Photopress.]

THE ATTACK ON THE "PEGASUS" BY THE "KÖNIGSBERG" (NOW
"IMPRISONED"): TRANSHIPPING WOUNDED TO THE HOSPITAL-
SHIP "GASCON."

The "Pegasus," an old and small cruiser, was attacked and disabled by the German cruiser "Königsberg" (recently trapped by the "Chatham" in an East African river), a modern ship of larger size and much heavier metal, at daybreak on September 20, while anchored in Zanzibar harbour to clean boilers. The "Königsberg" stole up during the night, sheltered behind an island off the shore and, easily outranging the guns of the "Pegasus," shelled her helpless opponent. After that the German ship drew off, leaving the "Pegasus" in a sinking condition and with 26 men killed and 53 wounded. Our photograph, which has just been received here, shows the "Pegasus" wounded being transhipped to the Union Castle liner "Gascon," serving as a hospital ship to take the injured to the Cape.

THE DUEL OF THE ARMED LINERS: THE SHATTERED BRIDGE OF
THE "CARMANIA" AFTER HER VICTORY OVER THE "CAP
TRAFALGAR."

The armed liner "Carmania," in her hour and a-half's fight of September 1, with the German armed liner "Cap Trafalgar," was hit by 73 of her opponent's shells, the splinters making, it is stated, some 380 holes all over the vessel. Offering so large a target to gun-fire as did the "Carmania"—a ship of great length, standing 60 feet out of the water—she was saved from suffering more damage by the seamanship of Captain Noel Grant, R.N., her Captain, who kept her end-on to the enemy. Our photograph of the navigating bridge of the "Carmania," with the engine-room telegraphs wrecked and fragments of metal strewn about, will give an idea of what those on board went through. It has just reached this country.—[*Photo. by Farrington Co.*]

THE GERMAN SCIENCE OF ARSON: INCENDIARY DISKS CARRIED BY THE KAISER'S SOLDIERS—A SPECIMEN BEFORE AND DURING IGNITION.

It is clear that the German incendiary outrages in Belgium and France were premeditated, and German scientists devised special apparatus for setting fire to buildings. Our informant, who bought some incendiary disks from a German soldier near Antwerp, states that every man carries twenty bags, each containing about 300 disks. Mr. Bertram Blount, the analyst, found the disk consist of nitro-cellulose, or gun-cotton. They may be lit, even when wet, with a match or cigarette-end, and burn for eleven or twelve seconds, emitting a strong five-inch flame, and entirely consuming themselves. The German throw them alight into houses. The photographs show (1) a bag of disks as supplied to German soldiers; (2) a disk burning; and (3) a disk, actual size before being used.

"BLACK MARIA'S" LITTLE BROTHER: ONE OF THE GERMAN 15-CENTIMETRE HEAVY POSITION-GUNS IN THE ACT OF FIRING.

The German heavy "batteries of position" are for the most part armed-with the 15 cm., or 6-inch howitzer, throwing a shell of 90 lb. with an approximate range of 6650 yards. The howitzer type of mobile heavy gun is much favoured for defensive work in both the German and the Austrian armies. The howitzer is capable of elevation up to 65 deg., the idea of this high elevation being, it is stated, to obtain a steep angle of descent for the shells at comparatively short ranges, in combination with a high remaining velocity so as to ensure the penetration of overhead cover. These howitzers are also employed in siege and fortress defence warfare. They have been used along the Aisne position as auxiliaries to the giant Krupp siege-howitzers.

CHARGING ON FOOT WITH THE LANCE: BENGAL LANCERS
ATTACK GERMAN TRENCHES.—From the Painting by R. Caton
Woodville. (left half)

Cavalry engaged in the Belgian frontier battles are fighting in all sorts of ways: repeatedly, for example, as infantrymen in the trenches. On occasion also, they have even charged on foot, with bayonet or with their lances. The Life Guards, according to a letter from the front, charged the German trenches the other day with bayonets. A squadron of French dragoons dismounted and crept through a wood on foot, surprising a German infantry company and overpowering them in close-quarter fight with lances and clubbed carbines (*continued*)

CHARGING ON FOOT WITH THE LANCE: BENGAL LANCERS
ATTACK GERMAN TRENCHES.—From the Painting by R. Caton
Woodville. (right half)

(*continued*) With lances, also, as our illustration shows, some of our Bengal cavalry, in action on foot, on October 24, at Ramscapelle, near the Yser recaptured the village from the Germans. Dismounting near by, they charged the enemy lance in hand, driving him from his trenches. Following up their success, they then forced their way into the village, smashing in doors and windows and storming house after house in spite of fierce resistance until assisted by other troops, they forced the enemy out, capturing guns and many prisoners. The action was particularly notable.

FOR GALLANTRY ON THE FIELD OF
HONOUR: A FRENCH OFFICER
RECEIVES THE ACCOLADE.

THE MUCH-DISCUSSED
IRON CROSS: A GERMAN
OFFICER DECORATED.

"Who gives quickly gives twice." That paraphrase of one of Napoleon's war maxims in regard to the conferring of distinctions won in battle as speedily as possible after the event, has been adopted by the nations engaged in the world-war. Recommendations for the "V.C." have been announced as having been laid before our authorities, many grants of the "D.S.O." and "D.C.M." have already been gazetted; and our French Allies have awarded the Legion of Honour to several officers and men. Our first photograph shows a French General publicly bestowing the accolade on a newly made Chevalier of the Legion of Honour. Our second shows a German Commander adorning a German officer with one of the innumerable Iron Crosses the Kaiser is sending round.—[Photos. by Alfieri.]

A HOLLOW SQUARE OF WRECKAGE: THE REMAINS OF A GERMAN
MOTOR-TRANSPORT CONVOY GROUPED ROUND THE SOLDIERS'
GRAVE.

There is something gruesomely appropriate in this photograph of the wreckage of a destroyed German motor-transport wagon train, or convoy grouped in a sort of hollow square about the graves of the officers and men involved in the destruction of their charge. The place is in the Argonn district, the tract of rough country, between the sources of the Aisne and the Meuse, through which the high road from Paris to Verdun passes. How catastrophe befell this particular German convoy we can guess. More than one of the enemy's transport trains, moving in this part of the country, are recorded to have fallen victims to long-range bombardments by the French artillery as the result of aeroplane reconnoitring activity—[*Photo. by Alfieri.*]

TELLING THE TALE IN
GERMANY!—PRINCE EITEL
FRITZ AS A DRUMMER.

Like his father and brothers, Prince Eitel Fritz, the Kaiser's second son, has received the Iron Cross. It has not been made known over here how the Prince won it. Our illustration, reproducing a picture from a German paper, may solve the difficulty. Says the legend: "The Prince seized the drum of a fallen soldier and led his troops, beating the charge."

TELLING THE TALE IN
GERMANY!—SEARCHING FOR
THE BRITISH FLEET.

One of the curious fictions about England now going round in Germany is one that Sir John Jellicoe's fleet keeps in hiding lest it should meet the German fleet. German war-ships, indeed, scour the North Sea at all hours to give the Grand Fleet battle! Our illustration from a serious painting published in a German paper, shows them at it.

TELLING THE TALE IN GERMANY!—A GERMAN BATTLE-PICTURE
SHOWING PRINCE HEINRICH OF BAVARIA LEADING A CAVALRY
ASSAULT.

Early in the war, the Kaiser commissioned various painters to produce battle pictures of German prowess. The royal house of Bavaria has apparently followed suit. More recently the Kaiser expressed a wish that the British might meet the Bavarians "just once" and his wish was gratified. In depicting a Bavarian cavalry fight with French dragoons, the Bavarian artist naturally represents the enemy as going down like nine-pins. Prince Heinrich, who figures in the drawing, is the only son of the late Prince Francis Joseph of Bavaria, first cousin of Prince Rupprecht, the Bavarian Crown Prince, who recently exhorted his troops to conquer "our most hated foe." He also highly extolled the Bavarian cavalry, who, he said, have fought "with the greatest fearlessness and extraordinary dash."

GERMANY'S EASTERN STRONGHOLD WHICH SUFFERED THE FATE
OF LIÉGE AND ANTWERP: MEN OF THE GERMAN GARRISON AT
TSING-TAU.

It is said that the German garrison at Tsing-tau, which surrendered to the Japanese and British on November 7, included five battalions of infantry, five battalions of marine artillery, one battalion of mechanics, and about 250 reservists. After the surrender of the garrison a number of German soldiers are said to have escaped in native boats, but were recaptured. The defences were under naval control. Tsing-tau was strongly fortified and had about 600 Krupp guns of various calibre. The photographs show men of the Third Sea Battalion. (1) On the march in Tsing-tau; (2) and (3) Entrenched with machine-gun. Our correspondent states that the photographs were taken since the siege began; otherwise the dark band round the helmet-covers might be taken for a manoeuvres badge.

SOME OF THE 2500 GERMANS CAPTURED AT TSING-TAU: MEN OF
THE THIRD SEA BATTALION WITH A MACHINE-GUN DURING THE
SIEGE.

At midnight on November 6—seven hours before the German garrison of Tsing-tau surrendered, the central fort was captured by the Japanese, who took 200 prisoners. The Germans had made great efforts to repair their batteries but the shell-fire from the Japanese guns was too heavy. After the central fort had fallen the Japanese captured at the point of the bayonet other forts and the strong field-works connecting them. It was stated that some 2300 German prisoners were taken when Tsing-tau surrendered. The German garrison, it is said, included four companies of seaman gunners, an equal force of Marines, some cavalry and field gunners, and a company of sappers. Probably the garrison increased after the war began, as Germans from all parts of China gathered at Tsing-tau for protection.

A ZEPPELIN BROUGHT DOWN: REMAINS OF ONE OF THE MUCH-DISCUSSED GERMAN AIR-SHIPS HIT AND DESTROYED NEAR BELFORT.

Considering the amount of discussion—not to say, in some quarters apprehension—to which the Zeppelins have given rise, singularly little has been heard of them so far during the war, and, apart from the Antwerp exploits, they have done practically no damage. On the other hand, several have been destroyed: the number has been variously estimated from two to six. One, said to be the "LZ10," was brought down in October at Grandvilliers, ten miles from Belfort. Our photographs show: (1) debris of the shattered framework; and (2) wreckage of the cars. Another Zeppelin was destroyed in October by the fire of Russian batteries near Warsaw, and its broken remains were taken to Petrograd to be examined. The British air-raid on Düsseldorf also accounted for one or possibly two.

BRITISH SOLDIERS AS CAVE-DWELLERS: THE UNDERGROUND,
SHELL-PROOF QUARTERS OF "A CERTAIN HIGHLAND REGIMENT"
AT THE FRONT.

The ground occupied by the British troops on the banks of the Aisne consisted, in many places, of steep hill-sides or cliffs penetrated like a rabbit warren with the workings of old stone-quarries. The officer who sends us the above interesting sketch writes: "This cave afforded shelter both from rain and 'Jack Johnsons' for several weeks to —, a certain Highland regiment. The cave consisted of three long passages capable of holding a whole battalion. I had two entrances, one of which is shown in the sketch. It was dark and dirty but with plenty of straw on the ground it made a fairly comfortable refuge. The sketch shows the part of the cave occupied by the officers and headquarters."—[*Facsimile Sketch by a British Officer.*]

**MEN OF "THE GALLANT ARMY AND NAVY OF JAPAN" WHO
CAPTURED TSING-TAU: JAPANESE TROOPS LANDING IN LAO-
SHAN BAY.**

After the fall of Tsing-tau on November 7 the Admiralty cabled to the Japanese Minister of Marine: "The Board of Admiralty send their heartiest congratulations to the gallant Army and Navy of Japan on the prosperous and brilliant issue of the operations which have resulted in the fall of Tsing-tau. The Japanese began the blockade on August 27, occupying some neighbouring islands as a base. Mine-sweeping was the first task, and then, on September 18, the Japanese troops landed safely at Lao-shan Bay. They fought with great valour and suffered considerable losses. Their casualties up to November 6 were given as 200 killed and 878 wounded. In the final assault they had 14 officers wounded and 426 men killed and wounded. The number of Germans captured was 2300.—[*Photo. by C.N.*]

WATCHED WITH INTEREST BY THEIR "GALLANT JAPANESE
COMRADES": BRITISH TROOPS LANDED TO CO-OPERATE AGAINST
TSING-TAU.

In his telegram to the Japanese Minister of War after the capture of Tsing-tau Lord Kitchener said: "Please accept my warmest congratulations on the success of the operations against Tsing-tau. Will you be so kind as to express my felicitations to the Japanese forces engaged? The British Army is proud to have been associated with its gallant Japanese comrades in this enterprise. The British force, under Brigadier-General N. Barnardiston, Commanding the Forces in North China, landed in Lao-shan Bay on September 24. Some Indian troops also took part in the fighting. The Emperor of Japan sent a message to the British force saying that he "deeply appreciates the brilliant deeds of the British Army and Navy co-operating with the Japanese."—
[Photo. by C.N.]

THE CHIEF GERMAN COMMERCE-RAIDER DESTROYED: WHERE THE "EMDEN" MET HER FATE; THE CRUISER; AND HER CAPTAIN.

Our first photograph shows where the "Emden" met her fate after landing party to destroy the wireless station, the pole of which is seen to the left centre of the photograph. The Cocos group are a British possession, and lie in the Indian Ocean, south-west of Sumatra. Our second photograph shows the "Emden," whose depredations have cost nearly two and a quarter million sterling. She was a light cruiser of 3350 tons and 25 knots speed, carrying ten 41-inch guns. Captain Karl von Müller, the "Emden's" Captain, who carried out his enterprises with a fine spirit of chivalry and daring which we acknowledge, was a native of Blankenburg, in Brunswick, and was formerly captain in the Hansa Line. He is a prisoner, unwounded, and keeps his sword.

THE DESTRUCTION OF THE "EMDEN" AND THE BOTTLING-UP OF
THE "KÖNIGSBERG": H.M.A.S. "SYDNEY" AND H.M.S. "CHATHAM."

H.M.S. "Sydney" (No. 1) caught the commerce-raiding "Emden" at Keeling, Cocos Island and forced a sharp action upon her, with the result that the German ship was driven ashore and burnt. The "Chatham" (No. 2) found the "Königsberg," the ship, it will be recalled, which attacked the "Pegasus," hiding in shoal water up the Rufigi River, German East Africa, with part of her crew entrenched on the banks. Unable to get at her, she bottled up the "Königsberg" by sinking colliers in the only navigable channel. The "Sydney" is a light cruiser of 5600 tons, launched, as was the "Chatham," in 1911. The "Chatham" was practically a sister ship of the "Sydney," but rather smaller displacing 5400 tons, The "Emden" was of 3650 tons; the "Königsberg" displaced 3400 tons.—[*Photos. by Symonds.*]

THE GERMAN TRENCH-MORTAR JUST INTRODUCED TO THE
BRITISH: A WEAPON WHICH THROWS A 187-LB. MINE-SHELL.

"In this quarter," says Eye-Witness of the fighting near Ypres on October 29 "we experienced ... the action of the 'minenwerfer,' or trench-mortar. This piece, though light enough to be wheeled by two men, throws a shell weighing 187 lbs. The spherical shell has a loose stem which is loaded into the bore and drops out in flight. It ranges about 350 yards at 45 deg. elevation. The shell is a thin-walled mine-shell containing a large charge and is intended to act with explosive effect, not splinter-effect." The diagram on the left shows one of the shells and its stem in their most up-to-date form; in the centre is the trench-mortar (its wheels off) with a shell in place; below this are three shells without their stems; on the right is a shell and its stem.

WHERE ANTI-AIRCRAFT GUNS ARE NOT: GERMAN MACHINE-GUNS, ON TEMPORARY MOUNTINGS, FOR USE AGAINST WAR-PLANES.

The Germans, according to paragraphs from their newspapers reprinted here sneer at the way London is guarding against hostile aircraft by mounting quick-firing guns and searchlights and putting out many street lamps. They are doing much the same themselves, however, in the cities nearest their western frontier. At Cologne, ever since August, there has been constant nervousness as to possible air-raids, and searchlights from elevated points in the city have swept the sky nightly, and machine-guns have been set up on tall buildings. At Düsseldorf when our airmen destroyed a Zeppelin, the aviator were fired at by machine-guns from all over the city. Our illustration shows German machine-guns in temporary use as anti-aircraft guns.—[*Photo. by Photopress.*]

FRENCH COLONIAL TROOPS WHOSE DARK COMPLEXIONS MAKE THEM "INVISIBLE" IN NIGHT ATTACKS! SENEGALESE ON THE DEFENSIVE AT PERVYSE.

Among the French Colonial troops, the Senegalese have done excellent work both on the Aisne and, more recently, in Belgium. Our photograph was taken near Pervyse, a village on the railway between Dixmunde and Nieupoort which has been the scene of many fierce encounters. In the Battle of the Aisne, when much night fighting took place, the Senegalese, it was reported whose dark complexions rendered their faces less visible, proved very useful and showed extraordinary daring. A favourite ruse was to send them forward at night, and when they had crawled near to the German lines, to turn powerful searchlights on the enemy, who, blinded by the glare, could not see whence the attack came. The Senegalese would then charge with the bayonet—*[Photo. by Newspaper Illustrations.]*

MARTIAL LAW IN EGYPT: EXAMINING PASSPORTS AT PORT SAID
SINCE TURKEY FORMALLY DECLARED WAR.

Martial Law was officially proclaimed by the British authorities in Egypt on November 2, as the first and immediate result of the outbreak of hostilities with Turkey. For some time before that, however, the authorities had been taking precautionary measures in consequence of the ubiquity and restless activity of the horde of German secret agents and spies known to be busily at work, seeking to spread sedition and disaffection among the natives. To prevent the transmission of military and other intelligence to Constantinople by their emissaries, severe restrictions have had to be imposed along the land frontiers and in particular at ports such as Alexandria, Port Said and Suez on all persons entering or leaving the country. All passports and credentials are subjected to a close scrutiny.—[*Photo. by C.N.*]

KING ALBERT'S FÊTE-DAY: THE ROYAL BELGIAN CHILDREN AT WESTMINSTER CATHEDRAL FOR THE SOLEMN MASS.

On Sunday, November 15, that brave soldier Albert King of the Belgians was thirty-nine, and a solemn Mass was celebrated at Westminster Cathedral. Cardinal Bourne assisted at the service, and the ceremonial was of a most impressive and ornate character, gorgeous vestments, beautiful music, and the gleam of many lights combining to make a *tout ensemble* that suggested some great occasion of national thanksgiving, as, indeed, it was. Scarlet and green were the brilliant colour-notes of the function. The celebrant of the Mass was Mgr. Canon Moyes, other dignitaries taking part in the service. Amongst the congregation were the children of the King of the Belgians—Prince Leopold, Duc de Brabant; Prince Charles, Comte de Flandre; and Princess Marie-José, of all of whom we give portraits.—[*Photo. by C.N.*]

THE KING AS GIVER OF WAR-MASCOTS: THE GOAT PRESENTED BY HIS MAJESTY TO THE 7TH ROYAL WELSH FUSILIERS.

The King recently presented the white goat shown in the above photograph to the 7th Battalion (Reserve) Royal Welsh Fusiliers, who, since they were raised, have been in training at Newtown, Montgomeryshire. The Welsh Fusiliers have always had a white goat as a mascot, drawn from the famous herd of Cashmere goats which also supplied the King's gift. The animal given by his Majesty to the new battalion was taken from Windsor to Newtown under escort, and was received at the station by two men of the 7th Royal Welsh Fusiliers, who stood with fixed bayonets. On the left in the photograph are Lady Magdalen Herbert, sister of the Earl of Powis, and the Earl's young daughter, Lady Hermione Herbert. On the right are Captains J.H. Addie and Oswald Davies.—[*Photo. by Griffiths.*]

"SIX GERMAN SHELLS TO EVERY FRENCH SOLDIER"—SHRAPNEL
AND HIGH-EXPLOSIVE BOMBS BURSTING IN THE OPEN: A
PANORAMIC PHOTOGRAPH TAKEN DURING A BATTLE IN THE
ARGONNE. (left half)

Nothing could give a better idea of shell-fire than the remarkable photograph here reproduced. It is a panoramic view of a German artillery bombardment of advancing infantry, and was taken in three sections, well within a hundred and fifty yards of some of the bursting shells. The locality of the battle is in the Argonne country between the Upper Aisne and the Meuse, where the French are having continuous and stiff fighting. Men of the French infantry keeping under cover in one of their advanced trenches are seen in the left foreground of the picture. The object of the actual fighting on the occasion was to keep apart the Third German army as it fell back towards prepared positions near the Meuse and a force of reinforcing troops coming up from the direction of Metz. "To impede the persistent advance of our —— corps," (continued, next page)

"SIX GERMAN SHELLS TO EVERY FRENCH SOLDIER"—SHRAPNEL AND HIGH-EXPLOSIVE BOMBS BURSTING IN THE OPEN: A PANORAMIC PHOTOGRAPH TAKEN DURING A BATTLE IN THE ARGONNE. (right half)

(continued from previous page) writes a French correspondent on the spot, the enemy resisted vigorously and with his heavy artillery. He treated us to shell with a veritable prodigality, but without causing us very serious losses. In the forward movement, led by the ——— infantry regiment, on an important position that had to be taken, practically every soldier engaged was saluted by six shells. There was, though, no 'shyness' among our men. They laughed and joked with one another as they quitted the trenches to move forward over the open. By the evening the enemy's position had been taken." Both ordinary shrapnel and high-explosive 15-c.m. shells from the German heavy position batteries of howitzers, which weapons the Germans prefer for such work although they also use guns of the same calibre, are seen bursting in front of the French troops.

HOME AFTER A GERMAN VISITATION: A ROOM IN A HOUSE AT
NIEUPORT AFTER A SHELL HAD BURST.

Nieuport has been badly damaged by the German bombardment, and it is said that half the houses in it appear to have been struck by shells, yet that it has not been so utterly ruined as some of the surrounding villages. The worst loss as regards buildings at Nieuport has been the destruction of the church, which, as many photographs show well, has been almost completely demolished. It was a fine specimen of one of the few stone churches found in that part of the country, with twelfth-century Gothic windows. The walls and pillars stand bare, the roof has gone, and half the tower, whose bells lie buried on the ground amid the wreckage. Desultory fighting continued at Nieuport after the main German attack shifted south to Ypres.—[*Photo. by C.N.*]

WHAT IT MEANS TO VILLAGERS TO HAVE GERMANS BILLETED
UPON THEM: MOTOR-CORPS OFFICERS ASLEEP IN A COTTAGE.

The inhabitants of those parts of France and Belgium which are still groaning under the German incubus are greatly to be pitied. Beyond the terrible agony inflicted by the invaders upon defenceless populations, in the form of executions and house-burnings and various forms of outrage, there is a great mass of less drastic but still intolerable misery to be borne by those unfortunate householders who are compelled to house and feed the soldiers of the enemy. Some idea of the nature of the infliction to which they are subjected can be gathered from such a drawing as that here reproduced. It shows some officers of the motor-corps of the Nineteenth German Army Corps asleep in a house upon which they have been billeted. The drawing is by a German artist.

AT YPRES, WITH THE BRITISH:
THE FRENCH NAVAL BRIGADE
CHARGING.

Much hard fighting on the Yser and elsewhere in West Flanders has fallen to the lot of the French bluejackets of the Naval Brigade, a strong force of whom were brought up from Brest to reinforce the Belgians in their defensive battles near the coast after the retreat from Antwerp. Attacking side by side with the British, they retook Ypres on October 13, and after that held Dixmude for weeks.

NEWS FROM THE FRONT: THE
KAISER'S BAD QUARTER OF AN
HOUR.

"The Kaiser," according to an American who was recently permitted to visit the Imperial headquarters in a "small city" on the Meuse, is a good deal altered in his appearance. "He wears a dirty green-grey uniform, and has an intense earnestness of expression that seemed to mirror the sternness of the times." He "lives in a little red-brick house such as one would rent in a London suburb for £50."

RELIABLE FUR COATS AT SPECIAL PRICES.

Designed and made
by our own Workers
PERFECT SHAPES.
RELIABLE SKINS.

NEW FUR COAT in Seal Musquash. An exact copy of an exclusive French Model, lined with rich French Brocade, with handsome Skunk Collar. *A New Zealand Baby reared on Glaxo—
The Food that Builds Bonnie Babies.*

Taken as a "night-cap" by Adults, Glaxo induces sound, healthy sleep.

Glaxo

The food that

"Builds Bonnie Babies"

*Awarded Gold Medal, International
Medical Congress Exhibition, 1913. By
Royal Appointment to the Court of Spain*

This is because Glaxo is enriched milk, made germ-free by the Glaxo Process, which also breaks down the nourishing curd of the milk into minute, easily digested particles. When mixed with boiling water, Glaxo at once forms a modified milk which is natural (not artificial) nourishment—a complete food for baby from birth.

While easily digestible, Glaxo is not pre-digested, and therefore promotes a healthy activity of the digestive organs without subjecting them to undue strain.

Ask your Doctor!

*** END OF THE PROJECT GUTENBERG EBOOK THE
ILLUSTRATED WAR NEWS, NUMBER 15, NOV. 18, 1914 ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the

collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with

this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official

version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.

- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES

EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a)

distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact

links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
