

A Little Book of Filipino Riddles

Frederick Starr

The background of the lower half of the cover is a solid blue color. Overlaid on this is a complex, abstract pattern of thick magenta lines. These lines form various geometric shapes, including triangles, squares, and rounded rectangles, some of which are interconnected to create a maze-like or architectural feel. The pattern is dense and covers the entire lower half of the cover.

The lower half of the book cover features a complex, abstract geometric pattern. It consists of various shapes including triangles, squares, and rounded rectangles, all outlined in bright pink. These shapes are arranged in a way that creates a sense of depth and movement, with some shapes appearing to overlap others. The background of this section is a solid blue color. The overall design is modern and visually striking.

Introduction

Although I had already inquired for them from Ilocano boys, my first actual knowledge of Filipino riddles was due to Mr. George T. Shoens, American teacher among the Bisayans. He had made a collection of some fifty Bisayan riddles and presented a brief paper regarding them at the Anthropological Conference held at Baguio, under my direction, on May 12–14, 1908. My own collection was

begun among Ilocano of Union Province from whom about two hundred examples were secured. Others were later secured from Pangasinan, Gaddang, Pampangan, Bisayan and Tagal sources. My informants have chiefly been school-boys, who spoke a little English; they wrote the text of riddle and answer in their native tongue and then we went over them carefully together to make an English translation and to get at the meaning. Many Filipinos know how to read and write their native language, although few have had actual instruction in doing so. There is no question that errors and inconsistencies exist in the spelling of these riddles, due to this lack of instruction and to the fact that the texts have been written by many different persons. I am myself not acquainted with any Malay language. I have tried to secure uniformity in spelling within the limits of each language but have no doubt overlooked many inconsistencies. The indulgence of competent critics is asked. It has been our intention throughout to adhere to the *old* orthography. Thus the initial *qu* and the final *ao* have been preferred.

The *word* for riddle varies with the population. In Ilocano it is *burburtia*, in Pangasinan *boniqueo*, in Tagal *bugtong*, in Gaddang ———, in Pampangan *bugtong*, in Bisayan *tugmahanon*.

Riddles are common to all mankind. They delighted the old Aryans and the ancient Greeks as they do the modern Hindu and the Bantu peoples of darkest Africa. Many writers have defined the riddle. Friedreich in his *Geschichte des*

Räthsels, says: “The riddle is an indirect presentation of an unknown object, in order that the ingenuity of the hearer or reader may be exercised in finding it out.... Wolf has given the following definition: the riddle is a play of wit, which endeavors to so present Page 6an object, by stating its characteristic features and peculiarities, as to adequately call it before the mind, without, however, actually naming it.”

The riddles of various Oriental peoples have already been collected and more or less adequately discussed by authors. Hebrew riddles occur in the Bible, the best known certainly being Samson's:

“Out of the eater came forth meat,
And out of the strong came forth sweetness.”

Arabic riddles are many and have been considerably studied; Persian riddles are well known; of Indian riddles at least one collection has been printed separately under the name *Lakshminatha upasaru*, a series of Kolarian riddles from Chota Nagpur has been printed as, also, an interesting article upon Behar riddles; Sanskrit riddles are numerous and have called for some attention from scholars; a few Gypsy riddles are known; two recent papers deal with Korean riddles. We know of but two references to Malayan riddles; one is Rizal, *Specimens of Tagal Folk-Lore*, the other is Sibree's paper upon the *Oratory, Songs, Legends, and Folk-Tales of the Malagasy*. This is no doubt an

incomplete bibliography but the field has been sadly neglected and even to secure [Page 7](#)this list has demanded much labor. It suffices to show how deeply the riddle is rooted in Oriental thought and indicates the probability that riddles were used in Malaysia long before European contact.

To what degree Filipino riddles are indigenous and original is an interesting but difficult question. So far as they are of European origin or influenced by European thought, they have come from or been influenced by Spain. Whatever comparison is made should chiefly, and primarily, be with Spanish riddles. But our available sources of information regarding Spanish riddles are not numerous. We have only Demofilo's *Collecion de enigmas y adivinanzas*, printed at Seville in 1880, and a series of five chap-books from Mexico, entitled *Del Pegueño Adivinadorcito*, and containing a total of three hundred and seven riddles. Filipino riddles deal largely with animals, plants and objects of local character; such must have been made in the Islands even if influenced by Spanish models and ideas. Some depend upon purely local customs and conditions—thus numbers [170](#), [237](#), etc., could only originate locally. Some, to which the answers are such words as egg, needle and thread, etc., (answers [Page 8](#)common to riddles in all European lands), may be due to outside influence and may still have some local or native touch or flavor, in their metaphors; thus No. [102](#) is actually our “Humpty Dumpty sat on a wall;” the Mexican form runs:

“Una arquita muy chiquita
tan blanca como la cal
todo lo saben abrir
pero ninguno cerrar.”

But the metaphor “the King's limebox” could only occur in a district of betel-chewing and is a native touch. Many of the Filipino riddles introduce the names of saints and, to that degree, evidence foreign influence; but even in such cases there may be local coloring; thus, calling rain-drops falling “rods,” “St. Joseph's rods cannot be counted,” could hardly be found outside of the tropics. Religious riddles, relating to beads, bells, church, crucifixes, are common enough and are necessarily due to outside influence, but even such sometimes show a non-European attitude of mind, metaphorical expression or form of thought.

Everywhere riddles vary in quality and value. Many are stupid things, crudely conceived and badly expressed. Only the exceptional is fine. Examine any page of one of our own riddle books [Page 9](#) and you may criticize almost every riddle upon it for view-point, or form, or flavor. We must not demand more from Filipino riddles than from our own. Some knowledge of local products, customs, conditions, is necessary for the understanding of their meaning; when understood, they are fully equal to ours in shrewdness, wit and expression. Krauss emphasizes the fact that everywhere riddles tend to coarseness and even to obscenity and discusses the reasons. What is true elsewhere is true here; a

considerable number of Filipino riddles are coarse; we have introduced them but emphasize the fact that any scientifically formed collection of German or English riddles would contain some quite as bad.

Probably few of our readers have considered the taxonomy of riddles. Friedreich offers a loose and unscientific classification as follows:

- I. The Question Riddle.
- II. The Simple Word Riddle (with seven sub-divisions).
- III. The Syllable Riddle or Charade.
- IV. The Letter Riddle.
 - 1. With reference to sound.
 - 2. With reference to form.
- V. Punctuation Riddles.
- VI. The Rebus.
- VII. Complex Riddles; combination of two or more simple types.
- VIII. Number Riddles.

Page 10

Several of these forms occur in our collection.

More scientific than Friedreich's work is Petsch's *Studien über das Volksrätsel*. His analysis and dissection of riddle forms best enable us to test the indigenous content of our Filipino riddles. He recognizes two fundamental riddle types. He says: "Two groups of riddles have long been distinguished in the collections, the true rhymed riddles and

the short ‘catch-questions’ expressed in prose. The difference is not only in form but in content. ‘True riddles’ have as purpose the describing of an object in veiled, thought-arousing, perhaps misleading, poetical clothing, which, from this presentation of its appearance, its source, its utility, etc., shall be recognized by the intelligence, i.e., can and shall be guessed. ‘Catch-questions,’ on the contrary, are not to be guessed, the questioner intending himself to give the solution; at their best they are intended to trick the hearer, and since their solution is impossible to the uninitiated are not ‘true riddles’ but false ones. Since I propose to divide the total riddle material of each single nation between these Page 11two great chief groups, may I not somewhat extend the scope of the latter, including some things which are rejected from most collections as having little to do with actual riddles—those questions which are generally insoluble and such tests of wisdom as appeal not to wit and understanding, but to knowledge—which are certainly not true riddles. Thus, in the group here characterized as ‘false’ different classes of things are brought together, the characteristics of which I shall investigate later.” It would be interesting to quote the author's discussion further. We can, however, only state that he recognizes three classes of “false riddles,” to which he gives the names “wisdom tests,” “life-ransoming riddles,” and “catch-questions.”

Of “true riddles” there is a vast variety of form and content. Most typical is the descriptive riddle of a single object to be guessed. In its complete and normal form Petsch claims that

such a riddle consists of five elements or parts. 1 Introduction; 2 denominative; 3 descriptive; 4 restraint or contrast; 5 conclusion. 1 and 5 are merely formal, trimmings; 2 and 3 are inherent and essential; 4 is common and adds vigor and interest. Such complete and “normal” riddles are rare in any language. Usually one or more of the five elements are lacking. It is only by such an analysis of riddle forms that a comparative study of riddles can be made. Any single riddle is best understood, by the constant holding before the mind this pattern framework and noting the degree of development of the case in hand.

The Filipinos themselves recognize several classes of riddles. An old Tagal lady told us there were three kinds:

- 1. *Alo-divino*: concerning God and divine things
- 2. *Alo-humano*: concerning persons
- 3. *Parabula*: all others

There is no science in this classification, which embodies considerable corrupted Spanish. Another informant recognizes six classes:

- 1. *Alo-divino*
- 2. *Historia-vino*: history of God and saints
- 3. *Alo-humano*
- 4. *Historia-mano*: history of persons.
- 5. *Karle-mano*: God and saints and persons together.
- 6. *Parabula* or *biniyabas*.

These names call for little comment and the classification they embody is of the loosest. The word *parabula* is Page 13 Spanish in source and equivalent to our parable; *biniyabas* is Tagal.

Some features of our riddles call for comment. Filipino riddles, in whatever language, are likely to be in poetical form. The commonest type is in two well-balanced, rhyming lines. Filipino versification is less exacting in its demand in rhyme than our own; it is sufficient if the final syllables contain the same vowel; thus Rizal says—*ayup* and *pagud*, *aval* and *alam*, rhyme. The commonest riddle verse contains five or seven, or six, syllables, thus:

Daluang balon
hindi malingon

or

Bahay ni San Gabriel
punong puno nang barel.

Just as in European riddles certain set phrases or sentences are found frequently at the beginning or end of the riddle. In Ilocano and Pangasinan a common introductory form is “What creature of God” or “What thing made by Lord God,” the expression in reality being equivalent to a simple “what.” These pious forms do not at all necessarily refer

either to animals or natural objects; thus, a boat or a house is just as good a “creature of God” as a fowl is. A common form of ending [Page 14](#) is “Tell it and I am yours,” “Guess it and I am your man.”

Quite analogous to calling inanimate or artificial things “creatures of God” is the personification of all sorts of things, animate and inanimate; thus, a rat is “an old man,” a dipper is “a boy.” Not infrequently the object or idea thus personified is given a title of respect; thus, “Corporal Black” is the night. Akin to personification is bold metaphor and association. In this there may or may not be some evident analogy; thus a crawfish is “a bird,” the banca or canoe is “rung” (like a bell.) Not uncommonly the word “house” is used of anything thought of as containing something; thus “Santa Ana's house,” “San Gabriel's house;” this use is particularly used in speaking of fruits. “Santa Ana's house is full of bullets” is rather pretty description for the papaya. The word “work” is often used for a thing made, or a manufactured article.

Saints' names are constantly introduced, generally in the possessive case; examples are “Santa Ana's house,” “Santa Maria's umbrella,” “San Jose's canes.” Less commonly the names of other Bible worthies occur; thus “Adam's hair.” There is not always any [Page 15](#) evident fitness in the selection of the Saint in the connection established. San Jose's connection with rain is suitable enough. One would need to know a good deal regarding local and popular

hagiography in order to see to what degree the selections are appropriate.

Sometimes words without meaning, or with no significance in the connection where they occur are used. These may serve merely to fill out a line or to meet the demands of metre. Such often appear to be names of the style of “Humpty Dumpty;” these may be phonetically happy, as similar ones often are in European riddles, fitting well with the word or idea to be called up. *Marabotania* is probably meaningless, merely for euphony. Place names with no real connection with the thought are frequently introduced, as Pantaleon, Mariveles. “*Guering-guering*” and “*Minimin*” are merely for sound.

Particularly interesting and curious are the *historia-vino* given in numbers [312](#)–[317](#). No doubt there are many such. Those here given were secured from one boy at Malolos. When first examined, I believed the boy had not understood what I was after. He assured me that they were *bugtong* and *bugtong* of the best and finest class. The idea in these Page 16 is to propound a statement in a paradoxical form, which calls for some reference to a bible story or teaching; the answer is not immediately clear and demands a commentary which is quite often subtle and ingenious. Friedreich gives examples of similar expository religious riddles from Europe.

A curious group are the relationship riddles, numbers [286](#)–[289](#), which closely resemble trick questions among

ourselves. The evidence of outside influence is here conclusive in the fact that the ideas and terms of relationship in them are purely European, in nowise reflecting the characteristic Malayan system and nomenclature.

Some of the riddles are distinctly stupid. "I let the sun shine on your father's back" seems to mean no more than that the house roof is exposed to the solar rays. It is doubtful whether this means much even in the original Tagal. Of course many of the riddles demand for their adequate understanding a knowledge of native customs, which the outsider rarely has. Thus, until one knows a common method of punishing naughty children, the riddle "I have a friend; I do not like to face him" means nothing. Perhaps the most difficult to adequately present are some plays Page 17 on words. These frequently need a considerable explanation. In some of these the parts of the word to guess are concealed in or are suggested by the form of the statement and one must extract them and combine them; such are "*iscopidor*" and "*sampaloc*." In others the play depends upon homophony, the same sound or word have different meanings. In yet a third class the answer is a smart Aleck sort of an affair, "How do you take a deer without net, dogs, spear, or other things for catching?" "Cooked." Most inane of all, but with plenty of analogues among ourselves, are those where the answer itself is introduced into the question with the intention to mislead; "Its skin is green and its flesh is red like a watermelon." "Watermelon."

Filipino riddles are mostly given out by young people. When several are gathered together they will question and answer; they are much in vogue when a young gentleman calls upon his sweetheart; among Tagals and Pampangans at least the chief occasion for giving *bugtong* is when a little group are watching at night beside a corpse. In propounding a riddle it is not uncommon to challenge attention by repeating as witty a rhyme, which is quite as often Page 18
coarse as witty. One Tagal example runs:

Bugtong co ka Piro!
Turan mo ka Baldo!
Pag hindi mo naturan
Hindi ca nang iwang;
Pag maturan mo
May tae ang puit mo.

I have a bugtong compadre P!
Guess it compadre B!
If you cannot guess it
You have not cleaned yourself;
If you do not guess it
You are dirty.

We have mentioned two references to Malay riddles. Of the eight given in Rizal's paper five have been given us by our informants. As Rizal's entire paper will be reprinted in another volume of this series we have not copied the other

three. Sibree's paper is important for comparison, since it presents matter drawn from the uttermost point of Malaysia, Madagascar, which has been unaffected by Spanish influence. Sibree's article is translated from a little book by another missionary, the Rev. Louis Dahle. Dahle's book is entitled *Specimens of Malayasy Folklore* and its material is presented in Malagasy [Page 19](#) only. Mr. Sibree translates twenty of his riddles. They are in character and flavor like many of the Filipino riddles. As Sibree does not give the native text and I have not seen Dahle's book, I cannot know whether they are rhymed. They are all of the type of true riddles to be guessed, descriptions wherein one or two characteristics or striking features are presented, either directly or figuratively. Examination of this little series deepens an impression already made by study of our own collection, namely, that the true riddles in our series are largely original Filipino while the insoluble riddles, the catches, the plays on words, are those where foreign influence is most evident. Although Sibree's article is easily accessible, we quote a few of these Malagasy examples for comparison.

“Cut and no wound seen?” “Water,” is our number [231](#).

“The mother says let us stand up, but the children say let us lie across?” “A ladder.” and “At night they come without being fetched and by day they are lost, without being stolen?” “The stars.” are quite in the style and spirit of Filipino riddles. Compare “Coarse rafia cloth outside and

white robe inside?” “Manioc root” with the “Poor Page
20outside; rich within,” “Langca” of the Ilocano.

The order of presentation of these riddles has been a considerable problem. To arrange them rigidly in Petsch's order of development might have been fairly satisfactory but would have rendered the finding of any desired riddle difficult. We have struck out a crude arrangement in alphabetical order of the English answers, with subdivisions under some general headings. The arrangement is not scientific nor completely developed, but it will perhaps work fairly well in practice. The original text is first given for riddle and answer; the English translation of both follows; then are given such explanation and comment as are necessary. When a riddle occurs in different languages, the text of the question is given in one, but the fact of its occurrence in others is indicated.

We are indebted to many for assistance. The list is too long for individual acknowledgment. To our original Ilocano helpers this little book is dedicated. To Messrs. George T. Shoens, Francisco A. Santos (Calumpit), Rufino Santos (Arayat) and Conrado Benitez (Pagsanghan), we are so deeply indebted that their names must be mentioned. To Page
21school boys in Agoo, San Fernando (Union), Malolos, Manila and Tayug, we owe many thanks. Would that the publication of this imperfect collection might lead to their greater interest in a neglected section of their folklore. Some Malay worker ought to perfect and complete the work here begun.

This volume is the first number of a series of little books which the undersigned plans to bring out under the general title of PHILIPPINE STUDIES. Each number will treat of a distinct and separate subject; each will be independent. The extent to which the series will be developed, will depend upon the reception given to it and the degree in which it appears to respond to a real need. Two numbers at any rate are already arranged and the second should appear within a year.

(Iloc.) Carabao

Four posts, one whip, two fans, and two bolos.
Carabao

4

Apat na tukod langit at isang pang hagupit.

(Tag.) Kalabao

Four earth posts, two air posts and whip.

Carabao

5

Saquey so torutoro duaray quepay-quepay a patiray
mansobsoblay.

(Pang.) Dueg

One pointing, two moving, four changing.

Carabao

The head points, the ears move, the legs change position.

6

Nu mat-tut-lud ay atanang udde; nu mat-tadag ay ibbafa.

(Gad.) Atu

If he sits down he is high; if he stands up he is low.

Dog

7

Adda maysa nga parsua ni Apo Dios nga adda uppat a
sacana, ipusna quen maysa nga ulona nga aoan ti imana.

(Iloc.) Caballo

There is one creature of our Lord God which has four legs
and a tail and one head; but it has no arms.

8

Carga nang carga ay ualang upa.

(Tag.) Babuy

Always working and no pay.

The pig

He is ever eating garbage and waste.

9

Eto na si “Nuno,” may sunong na guinto.

(Tag.) Babuy

Here comes “Nuno” with gold on his head.

Pig

The pig is a constant scavenger and frequents the space below latrines and privies; it is a common thing that his snout is yellow as result of his search.

10

Magmagna ni inam sangsangitam.

(Iloc.) Burias

While the mother is walking the child is crying.

A little pig

11

Adda maysa nga lacay gomogoyod ti oay.

(Iloc.) Bao

There is an old man, who always drags rattan.

Rat

i.e. his tail. Page 27

12

Kahoy cong Marigundong, na sangay ualang dahon.

(Tag.) Sungay

My tree in Marigundong (town in Cavite) has branches but no leaves.

Horn

The branching horn of a deer.

13

Maco ca quian, yacu naman ing quian.

(Pamp.) Ding bitis daring animal a tiapat a bitis nung

Away! let me have your place.

The forward legs of an animal

The hind feet tread in the prints of the forefeet.

Bell.

14

Nang hataken co ang baging nagkagulo ang matsing.
(Tag.) Batingao

When I pulled the vine the monkeys came around.
Bell

15

Tinugtog co ang bangca nagsilapit ang isda.
(Tag.) Campana sa misa Page 28

I rang the banca and the fishes came.
Bell

Banca is the canoe or boat; to strike it as with the pole is to ring it. People called to mass by the ringing bell are likened to fishes.

16

Togtoquec ti teppang agarayat ti bagsang
(Iloc.) Campana

I strike upon the washout and the *bagsang* come for help.
Bell

The curved side of the bell is compared to a washed out slope or curve of the bank; the *bagsang* are small fishes; the bell is the church bell—the little

fishes are the people.

17

Otin nen laquic Tapal ni baleuet ed corral managuis, ya agnaecal.

(Pang.) Campana

Tapal's ——— hanging within the corral is crying to get out.

Bell

Tapal is a nickname for an old man.

Betel.

(Iloc.) Mamabuyo

There are three ladies who went to mass; the dress of one was green, of another white, of the other red; when they came out together the dresses of all were red.

Betel

19

Nasatiyan pa nang kanyang ina, kinuha at pinapagasawa.

(Tag.) Ang bungang isinasama sa itso

Still in his mother's body was taken and made to marry.

Betel

The areca nut is first taken out of its covering before being united with the betel leaf and lime.

20

Bulong tiptipparo; puso balasang baro.

(Iloc.) Mama

A *tiptipparo* leaf; the heart, a young man and a young woman.

Betel

21

Papel a berde sinoratac ti purao Page 30quet intedco iti sangaili dina insubli.

(Iloc.) Gaoed

I wrote a green paper with white: I gave it to my visitor and he did not return it.

Betel-leaf

White lime is smeared upon the green leaf, which is then used to enwrap a bit of areca nut for chewing.

Birds.

(Iloc.) Arado

The father is bent over, the mother is bent back and the son
is bent forward.

Plow

This has reference to the different sticks, or pieces, of which the plow is composed.

383

Sa palacol nabuhay
at sa untog namatay.

(Tag.) Palayoc

Produced by hammering but destroyed by a jar.

Pot

Clay for pottery is prepared by pounding it with a light hammer; it is also beaten into shape in the process of giving it form.

384

Onion

400

Isda co sa Mariveles sapin-sapin ang caliskis.

(Tag.) Sile

My fish in Mariveles has manifold scales.

Pepper

Scales laid upon one another; the seeds of the pepper are flat and stacked against one another.

401

Mahanghang hindi naman paminta; maputi hindi naman papel; verde hindi naman suha; turang mong bigla.
(Tag.) Rabanos

It is sharp but not pepper; white but not paper; green but not shaddock; guess what that is.
Radish

402

Ang iloy naga camang ang bata naga pungco.
(Bis.) Calabaza

The mother creeps, and the son sits.
Squash

The mother is the vine; the child is the fruit. The riddle gains point, by suggesting [Page 128a](#) reversal of the natural conditions.

403

Ania iti parsua ni Apo Dios nga aoan ti matana aoan ti ngioatna quen aoan ti obetna quet mangan ti ladoc-ladoc?
(Iloc.) Tabungao

What creature of Lord God has no eyes, no mouth, no anus—and eats *ladoc-ladoc*?

A white squash

Ladoc-ladoc is rice flattened in the mortar by the blows of the pounder. The seeds of the *tabungao* resemble it.

404

Berdi ya balat, malutu ya laman anti mo ing pacuan.
(Pamp.) Pacuan

Its skin is green and its flesh is like a watermelon.
Watermelon

The riddle is poor, in that it introduces the answer as a term of comparison, in a way to mislead. Similar cases occur in other lands.

405

Verde ang balat pula ang laman espectorante cung turan.
(Tag.) Pacuan

Green skin, red meat, *espectorante* they call it.
Watermelon Page 129

(Bis.) Balod

It runs having no feet and it roars having no mouth.

Waves

Word plays.

408

Ania iti mainaganaan ari ditoy bagui?

(Iloc.) Aripoyot

What king (*ari*) do you name in your body?

Aripoyot

This is the great inner muscle of the upper leg.

409

Cung hindi lamang ang tatlong letra t, o, at s ay kinakain sana siya.

(Tag.) Asintos

But for the letters t o s we would be eating it.

(String)

The word *asintos* means string; dropping Page 130 the letters *tos* we have *asin* left, meaning salt.

410

Bugtong pasmiasa, puno at duloi may bunga.

(Tag.) Calamias

Bugtong pas“mias”a, whose trunk and branches have fruit.

Calamias

Bugtong is a riddle: the word pas“mias”a has no meaning. There is here a mere play on the sound of words. “Pas“mias”a suggests the answer.

411

Casano iti panangtiliu iti ugsa a di masapul iti silo, aso,
gayang, oen no a aniaman a paniliu?

(Iloc.) Urayec a maloto

How do you take a deer without net, dogs, spear, or other
things for catching?

Cooked

412

Laguiung tao, laguiung manuc, delana ning me tung a
yayup.

(Pamp.) Culassisi

The name of a man, the name of a chicken, were carried by
a bird.

Culas is a man's name; *sisi* the name of a chicken. Combined they make a
bird's name. Page 131

413

Indi sapat indi man tano apang, ang ngalan nia si “esco.”

(Bis.,—also Tag.) Escopidor, Escopeta.

Neither animal nor man but its name is “esco.”

Escopidor, Escopeta

A mere play on the words. *Esco* is a nickname for Francisco. The *escupidor* is a cuspidor, the *escopeta* a broom. The meaning of the words goes for nothing. The words are both of Spanish origin.

414

Macatu ti poonna, rugac iti ngo-duna.

(Iloc.) Macaturugac

Macatu = cloth

Rugac = old, rotten clothing

Cloth is the beginning; tatters the ending.

i.e. *Macatu* is the beginning, *rugac* the ending. The whole word means I am sleeping.

415

Salapi iti poona; ngao ti ngodona.

(Iloc.) Salapingao

(Fifty cents) *Salapi* is the beginning; () *ngao* the end.

Page 132

The *Salapingao* is a bird “like a swallow.”

416

Sinampal co bago inaloc.

(Tag.) Sampaloc

I slapped before I offered.

Sampaloc

There is simple word play here; the beginning and end of the riddle give the word S(in)ampal-oc. The Sampaloc is a fruit tree.

¹ A species of bambu; firm, slender and high.

² a flower.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution

is subject to the trademark license, especially commercial redistribution.

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS
WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project

Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not

located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, “Information about donations to the Project Gutenberg Literary Archive Foundation.”
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR

INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you ‘AS-IS’, WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this

agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of

donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility: www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new

eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
