PEARL ***

TEST FOR THE PEARL

By VASELEOS GARSON

**Together, the Earthman and the Jovian
outfought and outwitted the prison guards,
the Venusian jungle-hell, the cunning Chameleon
men. Together, they were invincible. But at
the Test for the Pearl they divided....**

**[Transcriber's Note: This etext was produced from
Planet Stories Fall 1947.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

Far off in the steaming Venusian jungle, a band of the Chameleon men halted, lifting their mottled faces in the direction of the sound. Closer in, a four-man jungle patrol of Earthmen broke as one man into a run along the trail, their swift-moving bodies swishing the clouds into ragged streamers.

At the edge of the viscous river circling the island an armed guard slipped on his infra-red glasses and began searching his area carefully, his special light traveling slowly along the river and its near and opposite banks.

On the island, only a few yards from the high, thick walls of the Interplanetary Prison, a patch of ground, approximately eight feet by five quivered once—and was still.

The deep-throated roar of the escape siren was thunderous. It carried for scores of miles through the steamy atmosphere of the planet, alerting both natives and Earthman patrols to a successful break from that most fabulous of prisons—The Hole.

Behind the oxygen mask he wore, lying under a foot of the thick spongy soil of the planet, Jarl Gare wiggled his itching body and chuckled.

He nudged Walk, the huge Jovian who lay beside him. "Don't get restless, now," he mumbled through the mask. "We have hours to wait. And somebody might spot this patch of ground if you keep wriggling."

The Jovian grunted, wriggled again, and then was quiet.

"Men have escaped from The Hole before," Jarl Gare muttered, "but they were always caught before they got to the pearl-beds. Walk's body and my brain will get us through."

He envisioned one of the huge Venusian pearls—so rare and so precious on Earth that it could buy a man's freedom, even from a murder charge.

Jarl Gare fell asleep, dreaming of a bauble as big as his head.

He was awakened by a nudge. "It is night," Walk grunted. "I smell it."

Gare worked one hand up through the spongy earth, poked a hole in it and wiped the mud from his mask's eye-piece.

"Right," he muttered. "It's time to go." He worked his head out of the ground and looked about.

There could be infra-red spotlights covering the very ground under which they lay. But they would have to take the chance.

His body made a sucking sound as he drew himself from the self-dug grave. He reached back in and tapped Waltk. The big Jovian virtually erupted from the ground, the weight nothing to his mighty thews.

Carefully they replaced the spongy earth. Then, with Jarl Gare in the lead, the pair walked upright, but quietly, to the great power-charged fence.

It went up twenty feet and down the same distance underground—Jarl Gare had learned this depth from a prisoner who had tried to dig his way out but failed and nearly drowned as liquid seeped into the hole he was digging.

The big Jovian, his thick-thewed body glimmering with sweat in the ground light, bent to pick up Jarl Gare's slight naked body.

"Wait," Jarl Gare warned. "We must wait until one of the river beasts start plunging."

The Jovian grunted. He waited, flexing the great shoulder and back muscles. Then he said suddenly, "I smell guards."

Jarl Gare's thin face jerked up at the seven foot figure of his companion. "Where?" he asked tensely.

The Jovian with a quick movement shoved Jarl Gare to the ground, dropped flat swiftly himself and wriggled away through the short grass.

Jarl Gare waited quietly. The big Jovian whose eyes, trained on his homeworld of darkness, penetrated the steamy fog of Venus almost as well as an infra-red lamp, would take care of the guards his nostrils had scented.

That was the way Jarl Gare had planned it. Waltk's strength, nearly a dozen times greater than that of an Earthling, his hearing developed to a tremendous acuity by the environment of his homeworld, and his eyesight were the tools of Jarl's brain.

If Waltk had had Jarl's brain, he could have won a Venusian pearl, but, while Nature had given him a marvelous machine for survival, she had only given him just enough brain to keep it operating.

His work would be done when they reached the Venusian pearl-beds. One glance at the bulky figure and the Venusians would know the weakness. But it did not matter if he lost. Jarl Gare would still win a pearl.

I have no weakness, Jarl grinned to himself, *except pride and the Venusians seek out physical or mental weakness—not a character weakness*. He remembered the oft-told tale of the Earthman whom the Venusians had frightened to death, but that was because he showed that fear physically.

Three years in The Hole and you either go raving mad or learn to mask every emotion.

Abruptly, Waltk was back. "There were two," he said, "Two no more."

"Did they have fog-piercers?" Jarl Gare asked.

"Yes," Waltk grunted. "I remembered what you said." He handed over a pair of glasses and the special light. "You would not need these. I see enough for both of us."

There was a muted splash from the river.

Waltk's great hands seized Jarl Gare about the waist and lifted him. "Three splashes—then heave," Jarl Gare said.

The next splash was louder, the second louder and longer and, when the third crashed into the night, Jarl Gare was flung as if from a catapult over the fence.

As his naked body struck the river, his mind exulted. It was perfect timing, the splash of the river beast drowning out his own.

Jarl Gare trod water, waiting. The Jovian's hurtling figure was a dark blotch against the fog. Jarl swallowed a deep breath of air before the splash of water from the Jovian's body struck him.

The two of them floated quietly, letting the river water grow sluggish again. The splashing of the beasts grew nearer. Jarl Gare heard the big Jovian breathing hoarsely. He said reassuringly, "They are harmless, Waltek. I've told you so a dozen times."

"I have never seen one of them," Waltek said hoarsely. "I fear nothing I have seen. You have only told me of them."

Only a few feet away, one of the river beasts suddenly lunged out of the water. Waltek squealed as the huge body loomed in the air over them, then landed between them, sending spray cascading over them.

Waltek struck out at the beast and then began to chuckle. Jarl Gare heard the chuckle through the echoes of the splash.

The beast was gone. "Look," said Waltek, holding up one hand. It held a blob of dripping flesh. "It is weak. I have seen it and I am unafraid."

For answer, Jarl Gare who had just donned the infra-red glasses, tapped Waltek on the shoulder and plunged under the water. He had sighted the ray of an infra-red light on the river.

Jarl Gare swam under water, moving with the current. He felt the movement of the water behind him and knew Waltek was following.

He angled for the far bank. On arrival he slid his head and eyes out carefully. The infra-red light was far up the river, following the jumping river beasts.

Without ripple or sound, Waltek broke the surface of the river.

Their two naked bodies glistening with the water, Jarl Gare and Waltek stepped out of the river and slid into the luxurious growth of the jungle.

One step in the climb to freedom and wealth had been accomplished! Jarl Gare chuckled, patting the mighty arms of his companion.

"Can you lead us in a straight line through the jungle if I give you a pointer?" Jarl Gare asked. He knew the answer—but he liked to preen his ego on the knowledge that his brain had evolved the plan. Waltek grunted.

"Look back at the Hole," Jarl Gare said.

The Jovian turned, his eyes intent. "I see it," he said.

"The high radio tower?" The Jovian, grunted. "The guard's barracks?" Again the Jovian grunted.

"Draw an imaginary line from the tower through the center of the barracks. Our path will extend along that line."

"Come," said Waltk. He led Jarl Gare back up the river, watching the tower. He halted finally, facing across the river, and then made an abrupt about-face.

He closed his eyes and stood tense, unmoving as minutes dripped past.

"I have it," he said.

Brains, chuckled Jarl Gare to himself. Use every weapon, every tool. But it was easy. Waltk was of a race which had developed for self-preservation the sense of taking a straight line between two points. In their vast world where landmarks were absent, it was a necessity.

Here on Venus that sense would lead Jarl Gare to freedom and wealth.

It was like a radio beam on the space lanes, but the Jovian needed no sending station. He was the station itself, able to orient himself if he went off course.

They started out through the jungle—naked and unarmed—aiming straight for the Venusian pearl-beds which, by Jarl Gare's estimate, lay three hundred miles north of the Hole. Three hundred miles between hell and heaven.

Waltk was tireless, his great body immune to the ravages of the sharp-edged undergrowth and the strangling vines. He had no need of a path. He made his own, guided by that unfailing sense of direction.

Jarl Gare slid along in the Jovian's wake, his passage cleared by the strength of his companion.

Jarl used his infra-red lamp sparingly, for fear Earth patrols might be wearing the special glasses and discover the beam.

The patrols were tough and relentless. They shot first and then asked questions.

Jarl used the lamp to reassure himself, even though Waltk grunted when anything out of the ordinary appeared, describing it to his companion.

Their first sleep came when Jarl Gare judged they had come almost a third of the distance to the pearl-beds. He suppressed the hunger pains in his belly by telling Waltk again the story of the Venusian pearls. They lay in a cradle of a great tree whose five great arms spread out from the trunk.

"I saw one once, Waltk," Jarl Gare said, and his voice was soft. "It was back on Earth, and it was the property of one of the richest men on Earth—Voltane, inventor of the force field that protects space cruisers from asteroids and space fragments. He gave half his wealth for it. And he was rated as worth four million credits."

"Two million credits for a jewel? He was a fool," Waltk said.

"Ah, but, Waltk, you should have seen it. He displayed it once a month in public. And the crowds that gathered.... It was gray, but it pulsed and throbbed as it were alive."

Waltk said seriously, "I did not know the pearls were gray. I had heard they were pink or red or orange. I never heard of a gray one."

"Nor had I," Jarl Gare nodded. "But there it was. It wasn't the color that attracted me, but the life force that seemed to throb within it."

"That day I decided I would have one—though I knew there were only four of them on Earth. But there was no way for me to get to Venus—"

"I know," said Waltk, "You have told me. You were Earthbound because you had been in Earth police custody too often. But you made a plan. Earthmen convicted of treason, murder and other high crimes were sent to The Hole. So you killed a man—"

"And was sent to the Hole. But for you, Waltk, my plan would have failed. I needed your strength—your instinct—your eyes. I promised you a pearl, too."

"You have already given it to me," Waltk said quietly. "Freedom from The Hole, if only for a while. Because you led me from the Hole, I will help you

until your quest is ended. I swear it."

Jarl Gare chuckled to himself. *The simple-minded brute! He thinks he's free. For the moment, sure, but when he meets the Venusians he's done. Good riddance. A tool should be discarded if there's no more use for it.*

The gentle touch of Walth's big hand on his shoulder awakened him. "The Chameleon men," Walth whispered.

Hastily, Jarl Gare slipped on the glasses and seized the light. "Where?" he asked.

"They are in a circle about the tree."

Jarl Gare swerved the light around the tree. A hundred yards away was the edge of the circle. The infra-red showed them—dark, hunched figures.

"They just seem to be waiting for something," Jarl Gare said.

"Us," Walth said laconically.

Jarl Gare went through the card-catalog of his brain. The Chameleon men, the Venusian natives, evolved from reptiles who walked upright, were intelligent but could converse with men only through thought pictures. They were the guardians of the pearl-beds.

Their vision in their fog world was as good if not better than Walth's. They needed no infra-red rays to penetrate the fog as the Earthmen did.

They had fought viciously against colonization by Earthmen. Despite punitive measures by Earth, they were not conquered and finally there had been an Earth-Venus treaty.

Earthmen were permitted access to the oil fields and were allowed to create The Hole. In token of the great pact, the Earth had given its largest, most perfect diamond to Venus. Venus, ruled by its hierarchy of the Guardian Priests, had given a pearl.

The pearl had touched off cupidity on Earth—and adventurers by the score had attempted to wrest others.

Earth at first had sought to halt the adventurers, but Venus had replied cryptically. "Let them come. If they can obtain a pearl, they have won it fairly."

Of the hundreds who had tried, only three had won through successfully. Only three had been strong enough to pass the test of weakness.

If an Earthman made it to the pearl-beds, he was given the test of weakness. If he passed it, he went free with a pearl of his choice. If he lost, he disappeared.

Only three ... and Jarl Gare chuckled. Soon there would be four. Jarl Gare.

The Venusians were sluggish moving and web-footed, perfectly at home on their spongy earth. But in the trees?

Jarl Gare spoke quietly to Walth. "We can escape them by traveling through the trees."

"I could," said Walth, "but you would be too slow. They would capture you."

Jarl Gare looked at Walth appraisingly. "On your back, I would not slow you too much."

Walth grinned widely, his moon face wrinkling. He laughed throatily. "You would not slow me at all. I had not thought of that."

Jarl Gare's ray gun swept the circle again. "I wish I could see them," he said. "I'd like to know what they looked like if I met them face to face."

Walth's eyes turned to one of the waiting figures. "They are as tall as you. Their heads are conical, set on sloping shoulders without much neck. Their bodies are mottled green and red and brown. They carry two-pronged spears. Their feet are webbed."

"I have seen pictures of them," Jarl Gare said. "But they weren't colored. I remember reading that they can change the colors of their skin to blend with surroundings."

"They blend well," Walth said. "It was difficult for me to see them at first after I had sensed them."

Waltk slung Jarl Gare on his back. A tensing of his mighty thews and one leap took them to a tree thirty feet away. Then they were swinging swiftly through the upper reaches of the forest, propelled by the Jovian's strength, made even more powerful by the lesser gravitational pull of Venus.

A mile away Waltk halted, while Jarl Gare swept the forest behind him with the infra-red ray. He laughed. "They're still sitting there, waiting for us."

"Good," said Waltk. "It is easier to travel in the trees."

He resumed the role of carrier, and went plunging on.

The hours of flight through the trees seemed hardly to touch the reserves of the Jovian's strength.

But suddenly, abruptly, he halted.

"We cannot go further through the trees," he said to a puzzled Jarl Gare.

"The end of the forest ahead?" Jarl Gare asked. "That means we're less than a hundred Earth miles from the beds."

"No," Waltk said. "Not the end of the forest. There is something I don't understand. I feel a pressure ahead of us ... as if some horrible fate awaits us."

Jarl Gare's first reaction was to brush away Waltk's fears as if merely caused by not understanding what lay ahead. It was like Waltk's fear of the water beasts. But then he remembered the intuitive sense the Jovians had.

"We'd better go down, then," Jarl Gare decided.

"No," said Waltk. "It is the same there."

"Then we'll go around it. Come on."

An ironic smile blossomed on Waltk's moon face.

"It is the same everywhere," he said. "To either side, above, below, ahead and behind us."

Jarl Gare, whose fierce desire for a Venusian pearl had lifted him above panic, felt only a twinge of exasperation.

"I feel nothing," he said, irritated. "Why can't we keep going?"

The Jovian shrugged. "I feel we can't."

"Hell," said Jarl Gare, "I'll go down and show you."

Jarl Gare's wiry, whip-scarred body slid down the limb on which they stood until it reached the crotch of the huge tree. He started down the trunk. Waltek watched him quietly.

Jarl Gare stopped suddenly. Then, slowly, he inched his way back up the trunk to the limb where the Jovian stood.

"I see what you mean," he said. "This was something I hadn't figured on." He sat down on the limb, letting his legs dangle.

Whatever had them hemmed in wasn't intangible. It was real. His foot had touched it. It had felt cold and gave slightly. Jarl Gare brought the foot up and looked at the toes. They looked unharmed, but seemed numb.

He pinched them and felt no more sensation than if they had grown numb from loss of circulation. They were cold to his touch.

Was that force thin-skinned like a balloon or solid as a plasticine ball?

"Waltek," he said, "Break me off a good-sized branch."

The Jovian slid farther out on the limb, snapped off a branch the thickness of his wrist and about three feet long and brought it to Jarl Gare.

"Watch it closely," he ordered Waltek.

He dropped the heavy branch. It fell about twenty feet, and stopped abruptly. Then slowly, like a ruptured duralloy canoe, it started downward again, but gaining speed. It struck the ground, but neither Waltek nor Jarl Gare could hear it strike.

Then the force wasn't solid.

He became aware that the foot which had touched the force was beginning to tingle. The power it released to numb was only temporary then.

Jarl Gare chuckled. Their bodies might be numbed for a while, but they would be free of the force.

Quickly, he slid down the branch again. At approximately the same spot where he'd stopped before, he halted again and reached out tentatively with his toes, touching the numbness.

He looked back at Walth. "Follow me," he ordered.

Then Jarl Gare jumped. It was like leaping into frigid water from a steaming shower bath. The shock wiped the consciousness from Jarl Gare, but not before he felt his body falling freely. He didn't feel the lesser shock as his body struck the spongy sward of the jungle.

Awareness that his face hurt came to Jarl Gare first. It was a recurring pain. First it stung, then the pain retreated. Then it stung again....

He realized that someone was methodically slapping his face. He opened his eyes. Walth stopped slapping him.

The big Jovian was grinning. "It is all above us now," he said.

Jarl Gare stood up, and almost fell down again, staggering, feeling no sensation in his legs.

Walth supported him. "It will leave. My body is tingling only pleasantly now."

Sensations came back quickly. Even Jarl's eyes began to tingle in harmony with the thousand prickles that coursed over his body.

Finally he could limp along and as the power returned to his muscles he began to step out briskly.

"What was it?" Walth asked.

Jarl Gare shrugged. "I don't know for sure, but it must have been some sort of thin force field—able to resist concerted pressure, but not quick, sharp shocks like our leaping bodies."

The tangled jungle finally dwindled away and the pair were striding across fields rich with vegetation.

"It is beautiful," Walth declared. "Such bright colors shining like jewels through this fog."

Jarl Gare glanced at Walth sharply, and then at the gray vegetation. He grinned. "I wish I had your eyes, Walth, or been raised on Jupiter where I'd have to develop such keen perception."

Walth shrugged his big shoulders. "You Earthmen have good eyes, too, but you do not need them as much as we do."

"Are we still heading right?" Jarl Gare asked.

Walth nodded. They plodded on.

That night they supped on a queer animal that Walth had run down and throttled with his bare hands. It tasted like beef-steak. Walth ate prodigiously, but Jarl Gare, who wanted to be sharp and quick on the morrow, ate sparingly.

During the night, Jarl awakened several times, his nerves on edge for the test he knew lay ahead, but Walth slept heavily.

When they awakened the Chameleon men were there.

When they awoke the Chameleon men were there.

Waltk was on his feet instantly, his great hands reaching out. Jarl came to his feet more slowly, wondering that the Chameleon men had not slain them while they slept.

The skins of the Chameleon men were a mottled gray, colored to match the gray background in which they lived, he observed. There were a dozen of them ranged around the big Jovian and the slight Earthman. Their barbed two-pronged spears were held lightly in their webbed hands, and their lidless eyes stared blankly at the naked pair.

Jarl Gare waited quietly, one hand on the powerful biceps of his companion.

Finally, he became aware of a picture growing in his mind. Of a vine and tree-latticed river spouting out of a jungle into a deep pool. All around the edges of the pool were stacked great piles of huge oyster shells.

The surface of the pool broke regularly, conical heads popped out and the mottled bodies swam toward shore, depositing the huge shells where they were taken by other Chameleon men, expertly split open and examined.

One out of three yielded a pulsating pearl.

Then into Jarl Gare's mind came another picture. He and Waltham leaping through the trees, then jumping through the force field, finally coming to the fields, leaving the jungle behind. Then a picture of the pearl beds again. Now a picture of strange men—wrestling with the Chameleon men, throwing great weights, leaping, diving into the pool, racing against the Chameleon men in their own element.

A great sigh lifted Jarl Gare's breast.

"Waltham," he cried. "We have passed all but the final test. One more, and the pearls are ours."

The Chameleon men nodded and turned, to march ahead of them across the fields.

Jarl Gare was exulting. "I will win a pearl—a glorious gray pearl pulsing with life and beauty. I have no weakness, Waltham. My quest is almost over."

Waltham said quietly, "You have a weakness, Jarl. Perhaps I can help you."

Jarl Gare drew his slight body taut. "I need no help now, Waltham. I used you when I needed you. I don't need you any longer. I will win out alone. With all your strength, you are weaker than I."

Waltham stared at him. "You do not like me? You have just used what I have to help yourself?"

"Yes, you big dumb ox," Jarl Gare gloated. "Your weakness is too obvious. You're strong, but the Venusians have tests for such strength, and even your mighty body will fail."

"And you have no weakness?" Waltham asked. "Suppose they give you the test of strength?"

"The Chameleon men don't do it that way. They read your mind, almost, and figure out a test that should not be impossible, if you are uniformly strong in body, mind and courage. The test is for all three, and you must have the brains to go with strength."

"I see," Walth said, and when he looked at Jarl Gare, there was almost a sense of pity in the glance.

At last they came to the pool. Out of the fog-shrouded lake came the Chameleon men, their bodies dripping, their webbed hands carrying the great shells.

The band of Chameleon men leading the Jovian and the Earthman halted. Two of them dived into the pool. After long minutes the pair reappeared, lugging between them a gigantic clam.

They set it down before Walth. They stared at Walth. Finally, Walth grinned and nodded. With their metal spears, four of the Chameleon men pried open the bi-valve, and held it open by standing on the shell edges.

Walth flexed his great muscles and clamped a huge hand on each shell edge.

Jarl Gare's yellow eyes widened. Walth's test was to hold open the clam, a prodigious feat. For how long? One of the Chameleon men glanced at Jarl Gare and he saw a picture of darkness descending on the pool. Why, that must be six hours.

The four Venusians stepped off the shell. The clam's writhing muscles and the great writhing muscles of the Jovian's back tensed together.

The Chameleon men stared blankly at the striving pair. Jarl Gare watched passively. If the dumb ox couldn't figure out that all he had to do was to shove the clam open still further instead of bracing against closure, he would lose the test.

The moments dripped by, became minutes marked by the jumping back and shoulder muscles of the Jovian.

An hour passed sluggishly.... Walth's usually white face became suffused with red. His chest was laboring.

At the end of two hours, Walth glanced appealingly over his shoulder at Jarl Gare. The Earthman laughed. With a convulsive effort, Walth pushed back the shells six inches either way.

If he had done that at first, he could have won, Jarl Gare thought, but not now. Walth's strength had been drained too greatly.

The great shells quivered, moving back. Walth strained, but the Jovian's great muscles could hold no longer. The Jovian's huge body quivered, the skin grew almost black with his great effort.

The clam had the leverage now. Its white muscles pulsed. The Jovian grunted with pain. There was a deep *thucking* sound. Walth whimpered.

Then the Jovian stood up. He stared at the blood pulsing from the stumps of his wrists. The clam had sheared off his hands.

"Sorry," Jarl Gare said. And laughed.

The Jovian's face convulsed with fury. Then he relaxed. His moon face was smiling as he looked at Jarl Gare.

"Your turn now," he said.

The Venusians gathered around Walth. One of them took a pouch from beneath his breech clout. His webbed fingers dug in and came out with a salve that he smeared on the spurting wrist stumps. The blood ceased spurting.

Then the Venusians turned to Jarl Gare.

They circled him, but broke the circle a little to let a wizened Venusian through. He was carrying a Venusian pearl. Jarl Gare gasped at the size of the pearl. He reached out for it, but the old wizened Venusian drew back and a picture grew in Gare's mind.

"You're going to hide it in an oyster shell, and throw that shell in with a pile of others?"

The conical wrinkled head bowed. The wizened oldster reached into a pouch inside his breech clout and pulled out a handful of gray powder. The

Venusians moved toward the pool, forcing Jarl Gare to move along with them.

At the pool's edge, the old Venusian dipped in a wrinkled hand and drew out a handful of water. He mixed the water with the powder until it became the consistency of paste. Jarl Gare watched as the old Venusian smeared the oyster shell one of the other Chameleon men handed him with the grayish paste.

Then Jarl Gare saw the great, gray pearl handed to the old man. He placed the pearl in the shell. Then the other Venusians turned Jarl Gare away from the oldster, one of them placing his cold webbed fingers across the Earthman's eyes.

Jarl Gare heard the rattle of the old shells, other rustling motions behind him as he waited. What test was this the Chameleon men were planning?

Finally, the hands dropped from his eyes. He turned around. The oldster was pointing at a huge pile of the oyster shells.

A picture was in Jarl Gare's mind again. So they wanted him to find the shell? That was a fine test! All the shells were gray, and the pile to which the elder pointed was approximately twenty feet high. How could he find one gray shell among so many other gray ones?

He looked up and saw Waltek grinning at him, the stumps of his arms folded.

"How can I find it?" he asked Waltek. "One gray one among so many others?"

"Gray?" asked Waltek. "It is not gray. It sticks out of that pile like a torch. The shell is smeared with red."

"Red?" asked Jarl Gare curiously. "Red? I see no red."

"That's right," Waltek said, and there was laughter in his voice. "You're color-blind, Earthman. I knew it when you first told me the vegetation was gray—that the pearls were gray. The Chameleon men knew it, too. You said they almost could read your mind."

Waltk threw back his head and roared with laughter.

Jarl Gare spun his eyes to the Chameleon men who were watching. A picture grew in his mind. He had until sunset to find the shell—the *red* shell.

And he was color-blind....

If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
