Taxonomy and Distribution of Some American Shrews

by James S. Findley

Sorex cinereus ohionensis Bole and Moulthrop.—In their description of this subspecies from Ohio, Bole and Moulthrop (1942:89-95) made no mention of specimens in the United States Biological Surveys Collection from Ellsworth and Milford Center, Ohio, which stand in the literature (see Jackson, 1928:49) as *Sorex cinereus cinereus*. These two localities lie south of the geographic range ascribed to *S. c. ohionensis* by Bole and Moulthrop. Examination of the two specimens, United States Biological Surveys Collection, Catalogue No. 70566, and United States National Museum, No. 19434, respectively, both of which are alcoholics, reveals that they are referable to the subspecies *ohionensis* rather than to *S. c. cinereus*. This reference is made on the basis of small size, short tail (33 and 31 millimeters, respectively), and fourth upper unicuspid as large as third (the specimen from Milford Center lacks the skull). The occurrence at Milford Center provides a southward extension of known range for *S. c. ohionensis* of approximately 70 miles. *S. c. cinereus* seems not to occur in Ohio.

Cryptotis micrura (Tomes).—Davis (1944:376) assigned a *Cryptotis* from Boca del Río, Veracruz, to *Cryptotis parva berlandieri* (Baird). Comparison of this specimen, Texas Cooperative Wildlife Collections, No. 2765, with 8 specimens of *C. micrura* from various parts of northern Veracruz and with 9 *C. parva* from southern Tamaulipas reveals that the shrew from Boca del Río is referable to *Cryptotis micrura*. The series of 8 specimens in the University of Kansas Museum of Natural History from Altamira, Tamaulipas, provides the southernmost known record of *Cryptotis parva berlandieri*. These 8 specimens are typical of *C. p. berlandieri* and show no approach to *C. micrura*. Average and extreme cranial measurements of 7 specimens from 1 mi. S Altamira are: condylobasal length, 15.6 (15.2-16.1); palatal length, 6.6 (6.4-6.7); maxillary tooth-row, 5.7 (5.4-5.8); cranial breadth, 7.6 (7.4-8.0); least interorbital breadth, 3.5 (3.4-3.7); maxillary

breadth, 5.0 (4.8-5.2). Cranial measurements of 8 specimens of *C. micrura* from various localities in northern Veracruz (1 km. E Mecayucan, 1; 7 km. NNW Cerro Gordo, 3; Teocelo, 2; 7 km. W El Brinco, 1; 5 km. N Jalapa, 1) are: condylobasal length, 17.1 (16.6-17.4); palatal length, 7.1 (6.9-7.4); maxillary tooth-row, 6.2 (5.9-6.4); cranial breadth, 8.5 (8.3-8.6); least interorbital breadth, 3.7 (3.6-4.1); maxillary breadth, 5.3 (5.1-5.6). *C. parva* and *C. micrura* may intergrade but a distance of 140 miles separates the geographic ranges as now known of the two kinds and every specimen examined by me is clearly referable to one or the other of the two named kinds and shows no evidence of intergradation.

Notiosorex crawfordi crawfordi Baird.—A specimen in the Museum of Natural History from Jaumave, and one from Palmillas, Tamaulipas, collected by Gerd Heinrich, provide records of the easternmost margin of the range of this species in Mexico. Assignment is made to the subspecies *crawfordi* on geographic grounds. The two specimens differ from a male from 13 mi. S and 15 mi. W Guadalajara, Jalisco, referred (Twente and Baker, 1951:121) to *N. c. evotis* (Coues) in slightly larger size; however two skulls from owl pellets from 21 mi. SW Guadalajara, also referred to *evotis* (*loc. cit.*), seem to me to differ in no important way from skulls of the Tamaulipan specimens. Measurements of the Tamaulipan specimens, both females, 54932 KU and 54933 KU, are respectively: condylobasal length, —, 16.7; palatal length, —, 7.2; maxillary tooth-row, 6.6, 6.1; cranial breadth, 8.3, 8.1; least interorbital breadth, —, 3.5; maxillary breadth, —, 5.1; total length, 90, 90; tail, 28, 30; hind foot, 11.0, 11.5; ear, 8, 8.

The only other eastern Mexican record of *N. crawfordi* is based on two skulls from owl pellets collected 3 mi. NW Cuatro Cienegas, Coahuila (Baker, 1953:253).

Sorex oreopolus emarginatus Jackson.—A first-year female *Sorex*, KU 54346, obtained by Rollin H. Baker from 7 mi. SW Las Adjuntas, 8900 ft., Durango, seems closest, among Mexican shrews that I have examined, to two specimens of *S. emarginatus* from Plateado, 7600 to 8500 ft., Zacatecas. Measurements of the Las Adjuntas specimen are: total length, 88; tail, 39; hind foot, 13; palatal length, 7.2; maxillary tooth-row, 6.4; maxillary breadth, 4.9; least interorbital breadth, 3.6.

Sorex emarginatus previously was known only from Plateado and the type locality, Bolanos, Jalisco. Comparison of these three specimens with specimens of other species of Mexican shrews of the *S. saussurei* group leads me to conclude that the group contains two species rather than four as was previously thought. *Sorex emarginatus*, *S. ventralis*, and *S. oreopolus* seem to me to be conspecific. All three nominal species are relatively small, short-tailed shrews. The skulls of the three kinds resemble one another in relatively short rostrum and in dental details. Slight differences in cranial proportions differentiate the three and they should, until more specimens of each are obtained and studied, retain subspecific rank. The specific name, *Sorex oreopolus* Merriam 1892, should apply to the three kinds since it antedates the names *ventralis* and *emarginatus*. The two names last given, therefore, should stand as *Sorex oreopolus ventralis* Merriam and *Sorex oreopolus emarginatus* Jackson. The two species, the large *S. saussurei*, and the small *S. oreopolus*, as the latter is here understood, occur together over an extensive region in southern Mexico. In other parts of North America a large and a small species of *Sorex* often occur together in a given area.

The Las Adjuntas specimen was taken only 10 miles southwest of El Salto, Durango, the type locality of *S. durangae* Jackson. Jackson (1928:101) placed *durangae* in the *Sorex vagrans-obscurus* species group, but the two specimens available to him were second year adults with the teeth so much worn that diagnostic characters are not visible on them. I have examined these two specimens (United States Biological Surveys Collection 94539 and 94540) and find that in bodily and cranial proportions they resemble *Sorex s. saussurei*, and I so assign them.

Sorex milleri Jackson.—Koestner (1941:10) reported 5 *Sorex* from Cerro Potosí, near La Jolla, Municipio de Galeana, Nuevo Leon, as *Sorex emarginatus*. Comparison of 4 of these specimens (Chicago Museum of Natural History, 48227, 48228, 48229, 48230) with two *S. emarginatus* from Plateado, Zacatecas, and specimens of other species of *Sorex* indicates that the Cerro Potosí shrews differ in many features from *emarginatus*, but closely resemble, in size and cranial characters, a specimen (F. W. Miller, No. 20) of *S. milleri* from Sierra del Carmen, Coahuila, and seems to be referable to that species which was not named when Koestner (*loc. cit.*) recorded his specimen. The range of *S. milleri* is therefore extended southwestward to western central Nuevo Leon.

Comparison of *S. milleri* with specimens of other species of North American *Sorex* leads me to conclude that *S. milleri* is most closely related to *S. cinereus* Kerr, and should be included in the *S. cinereus* group rather than in the *S. vagrans-obscurus* group. *Sorex cinereus* and *S. milleri* are alike, and both differ from even the smallest *S. vagrans* in relatively long and narrow rostrum, narrow teeth, smaller skull, and in having the third upper unicuspid more often equal to or smaller than, rather than larger than, the fourth unicuspid.

I judge *S. milleri* to be a relict population of *S. cinereus*, isolated in the mountains of northeastern Mexico, probably in the late Pleistocene. *Sorex cinereus* reported from Pleistocene deposits in San Josecito Cave, Nuevo Leon (Findley, 1953:635), probably represents a population ancestral to the modern *S. milleri*. *Sorex milleri* should retain specific status because of constant cranial differences from *S. cinereus*, particularly relatively broader rostrum.

1.F.

1.F.1. Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
