Bathe Your Bearings in Blood!

by **Clifford Simak**

He raised the bar defensively as the horde of weird creatures swarmed into the room...

Not only did every machine on Earth decide to revolt, but they had the nerve to select Joe Crane as their guinea pig!

It was a good watch. It had been a good watch for more than thirty years. His father had owned it first and his mother had saved it for him after his father died and had given it to him on his eighteenth birthday. For all the years since then it had served him faithfully.

But now, comparing it with the clock on the newsroom wall, looking from his wrist to the big face of the clock over the coat cabinets, Joe Crane was forced to admit that his watch was wrong. It was an hour fast. His watch said seven o'clock and the clock on the wall insisted it was only six.

Come to think of it, it had seemed unusually dark driving down to work and the streets had appeared singularly deserted.

He stood quietly in the empty newsroom, listening to the muttering of the row of teletype machines. Overhead lights shone here and there, gleaming on waiting telephones, on typewriters, on the china whiteness of the pastepots huddled in a group on the copy desk.

Quiet now, he thought, quiet and peace and shadows, but in another hour the place would spring to life. Ed Lane, the news editor, would arrive at six-thirty and shortly after that Frank McKay, the city editor, would come lumbering in.

Crane put up a hand and rubbed his eyes. He could have used that extra hour of sleep. He could have....

Wait a minute! He had not gotten up by the watch upon his wrist. The alarm clock had awakened him. And that meant the alarm clock was an hour fast, too.

"It don't make sense," said Crane, aloud.

He shuffled past the copy desk, heading for his chair and typewriter. Something moved on the desk alongside the typewriter—a thing that glinted, rat-sized and shiny and with a certain, undefinable manner about it that made him stop short in his tracks with a sense of gulping emptiness in his throat and belly.

The thing squatted beside the typewriter and stared across the room at him. There was no sign of eyes, no hint of face, and yet he knew it stared.

Acting almost instinctively, Crane reached out and grabbed a pastepot off the copy desk. He hurled it with a vicious motion and it became a white blur in the lamplight, spinning end over end. It caught the staring thing squarely, lifted it and swept it off the desk. The pastepot hit the floor and broke, scattering broken shards and oozy gobs of half-dried paste.

The shining thing hit the floor somersaulting. Its feet made metallic sounds as it righted itself and dashed across the floor.

Crane's hand scooped up a spike, heavily weighed with metal. He threw it with a sudden gush of hatred and revulsion. The spike hit the floor with a thud ahead of the running thing and drove its point deep into the wood.

The metal rat made splinters fly as it changed its course. Desperately, it flung itself through the three-inch opening of a supply cabinet door.

Crane sprinted swiftly, hit the door with both his hands and slammed it shut. "Got you," he said.

He thought about it, standing with his back against the door.

Scared, he thought. Scared silly by a shining thing that looked something like a rat. Maybe it was a rat, a white rat. And, yet, it hadn't had a tail. It didn't have a face. Yet it had looked at him.

Crazy, he said. Crane, you're going nuts.

It didn't quite make sense. It didn't fit into this morning of October 18, 1952. Nor into the Twentieth Century. Nor into normal human life.

He turned around, grasped the door knob firmly and wrenched, intending to throw it wide open in one sudden jerk. But the knob slid beneath his fingers and would not move and the door stayed shut.

Locked, thought Crane. The lock snapped home when I slammed the door. And I haven't got the key. Dorothy has the key, but she always leaves it open because it's hard to get it open once it's locked. She almost always has to call one of the janitors. Maybe there's some of the maintenance men around. Maybe I should hunt one up and tell him—

Tell him what? Tell him I saw a metal rat run into the cabinet? Tell him I threw a pastepot at it and knocked it off the desk? That I threw a spike at it, too, and to prove it, there's the spike sticking in the floor.

Crane shook his head.

He walked over to the spike and yanked it from the floor. He put the spike back on the copy desk and kicked the fragments of the pastepot out of sight.

At his own desk, he selected three sheets of paper and rolled them into the typewriter.

The machine started to type. All by itself without him touching it! He sat stupefied and watched its keys go up and down. It typed:

Keep out of this, Joe. Don't mix into this. You might get hurt.

Joe Crane pulled the sheets of copy paper out of the machine. He balled them in his fist and threw them into a wastebasket. Then he went out to get a cup of coffee.

"You know, Louie," he said to the man behind the counter, "a man lives alone too long and he gets to seeing things."

"Yeah," said Louie. "Me, I'd go nuts in that place of yours. Rattling around in it empty-like. Should have sold it when your old lady passed on."

"Couldn't," said Crane, "It's been my home too long."

"Ought to get married off, then," said Louie. "Ain't good to live by yourself."

"Too late now," Crane told him. "There isn't anyone who would put up with me."

"I got a bottle hid out," said Louie. "Couldn't give you none across the counter, but I could put some in your coffee."

Crane shook his head. "Got a hard day coming up."

"You sure? I won't charge you for it. Just old friends."

"No. Thank you, Louie."

"You been seeing things?" asked Louie in a questioning voice.

"Seeing things?"

“Yeah. You said a man lives too much alone and he gets to seeing things?”

“Just a figure of speech,” said Crane.

He finished the cup of coffee quickly and went back to the office. The place looked more familiar now.

Ed Lane was there, cussing out a copy boy. Frank McKay was clipping the opposition morning sheet. A couple of other reporters had drifted in.

Crane took a quick look at the supply cabinet door and it still was shut.

The phone on McKay’s desk buzzed and the city editor picked it up. He listened for a moment, then took it down from his ear and held his hand over the mouthpiece.

“Joe,” he said, “take this. Some screwball claims he met a sewing machine coming down the street.”

Crane reached for his phone. “Give me the call on 246,” he told the operator.

A voice was saying in his ear, “This the *Herald*? This the *Herald*? Hello, there....”

“This is Crane,” said Joe.

“I want the *Herald*,” said the man. “I want to tell ’em....”

“This is Crane, of the *Herald*,” Crane told him. “What’s on your mind?”

“You a reporter?”

“Yeah, I’m a reporter.”

“Then listen close. I’ll try to tell this slow and easy and just the way it happened. I was walking down the street, see....”

“What street?” asked Crane. “And what is your name?”

“East Lake,” said the caller. “The five or six hundred block, I don’t remember which. And I met this sewing machine rolling along the street and I thought, thinking the way you would, you know, if you met a sewing

machine.... I thought somebody had been rolling it along and it had gotten away from them. Although that is funny, because the street is level. There's no grade to it at all, you see. Sure, you know the place. Level as the palm of your hand. And there wasn't a soul in sight. It was early morning, see...."

"What's your name?" asked Crane.

"My name? Smith, that's my name. Jeff Smith. And so I figured maybe I'd ought to help this guy the sewing machine had gotten away from, so I put out my hand to stop it and it dodged. It...."

"It did what?" yelled Crane.

"It dodged. So help me, mister. When I put my hand out to stop it, it dodged out of the way so I couldn't catch it. As if it knew I was trying to catch it, see, and it didn't want to be caught. So it dodged out of the way and went around me and down the street as fast as it could go, picking up speed as it went. And when it got to the corner, it turned the corner as slick as you please and...."

"What's your address?" asked Crane.

"My address? Say, what do you want my address for? I was telling you about this sewing machine. I called you up to give you a story and you keep interrupting...."

"I got to have your address," Crane told him, "if I'm going to write the story."

"Oh, all right then, if that is the way it is. I live at 203 North Hampton and I work at Axel Machines. Run a lathe, you know, And I haven't had a drink in weeks. I'm cold sober now."

"All right," said Crane. "Go ahead and tell me."

"Well, there isn't much else to tell. Only when this machine went past me I had the funny feeling that it was watching me. Out of the corner of its eyes, kind of. And how is a sewing machine going to watch you. A sewing machine hasn't got any eyes and...."

"What made you think it was watching you?"

"I don't know, mister. Just a feeling. Like my skin was trying to roll up my back."

“Mr. Smith,” asked Crane, “have you ever seen a thing like this before? Say, a washing machine or something else.”

“I ain’t drunk,” said Smith. “Haven’t had a drop in weeks. I never saw nothing like this before. But I’m telling you the truth, mister. I got a good reputation. You can call up anyone and ask them. Call Johnny Jacobson up at the Red Rooster grocery. He knows me. He can tell you about me. He can tell you....”

“Sure, sure,” said Crane, pacifying him. “Thanks for calling, Mr. Smith.”

You and a guy named Smith, he told himself. Both of you are nuts. You saw a metal rat and your typewriter talked back at you and now this guy meets a sewing machine strolling down the street.

Dorothy Graham, the managing editor’s secretary, went past his desk, walking rapidly, her high heels coming down with decisive clicks. Her face was flushed an angry pink and she was jingling a ring of keys in her hands.

“What’s the matter, Dorothy?” Crane asked.

“It’s that damn door again,” she said. “The one to the supply cabinet. I just know I left it open and now some goof comes along and closes it and the lock snaps.”

“Keys won’t open it?” asked Crane.

“Nothing will open it,” she snapped. “Now I got to get George up here again. He knows how to do it. Talks to it or something. It makes me so mad, Boss called up last night and said for me to be down early and get the wire recorder for Albertson. He’s going out on that murder trial up north and wants to get some of the stuff down on tape. So I get up early and what does it get me. I lose my sleep and don’t even stop for breakfast and now....”

“Get an axe,” said Crane. “That will open it.”

“The worst of it,” said Dorothy, “is that George never gets the lead out. He always says he’ll be right up and then I wait and wait and I call again and he says....”

“Crane!” McKay’s roar echoed through the room.

“Yeah,” said Crane.

“Anything to that sewing machine story?”

“Guy says he met one.”

“Anything to it?”

“How the hell would I know? I got the guy’s word, that’s all.”

“Well, call up some other people down in that neighborhood. Ask them if they saw a sewing machine running around loose. Might be good for a humorous piece.”

“Sure,” said Crane. He could imagine it:

“This is Crane at the *Herald*. Got a report there’s a sewing machine running around loose down in your neighborhood. Wondering if you saw anything of it. Yes, lady, that’s what I said ... a sewing machine running around. No, ma’m, no one pushing it. Just running around....”

He slouched out of his chair, went over to the reference table, picked up the city directory and lugged it back to the desk.

Doggedly, he opened the book, located the East Lake listings and made some notes of names and addresses. He dawdled, reluctant to start phoning. He walked to the window and looked out at the weather. He wished he didn’t have to work. He thought of the kitchen sink at home. Plugged up again. He’d taken it apart and there were couplings and pipes and union joints spread all over the place. Today, he thought, would be a nice day to fix that sink.

When he went back to the desk, McKay came and stood over him. “What do you think of it, Joe?”

“Screwball,” said Crane, hoping McKay would call it off.

“Good feature story, though,” said the editor. “Have some fun with it.”

“Sure,” said Crane.

McKay left and Crane made some calls. He got the sort of reaction that he expected.

He started to write the story. It didn't go so well.

A sewing machine went for a stroll down Lake street this morning....

He ripped out the sheet and threw it in the wastebasket.

He dawdled some more, then wrote:

A man met a sewing machine rolling down Lake Street this morning and the man lifted his hat most politely and said to the sewing machine....

He ripped out the sheet.

He tried again:

Can a sewing machine walk? That is, can it go for a walk without someone pushing it or pulling it or....

He tore out the sheet, inserted a new one, then got up and started for the water fountain to get a drink.

"Getting something, Joe?" McKay asked.

"Have it for you in a while," said Crane.

He stopped at the picture desk and Ballard, the picture editor, handed him the morning's offerings.

"Nothing much to pep you up," said Ballard. "All the gals got a bad dose of modesty today."

Crane looked through the sheaf of pictures. There wasn't, truth to tell, as much feminine epidermis as usual, although the gal who was Miss Manila Rope wasn't bad at all.

"The place is going to go to hell," mourned Ballard, "if those picture services don't send us better pornography than this. Look at the copy desk. Hanging on the ropes. Nothing to show them to snap them out of it."

Crane went and got his drink.

On the way back he stopped to pass the time of day at the news desk.

"What's exciting, Ed?" he asked.

“Those guys in the east are nuts,” said the news editor. “Look at this one, will you.”

The dispatch read:

Cambridge, Mass, (UP) Oct. 18—Harvard University’s electron-brain, the Mark III, disappeared today.

It was there last night. It was gone this morning.

University officials said that it is impossible for anyone to have made away with the machine. It weighs 10 tons and measures 30 by 15 feet....

Crane laid the yellow sheet of paper back on the news desk ... carefully. He went back, slowly, to his chair.

There was writing on the sheet of paper in his machine.

Crane read it through once in sheer panic, read it through again with slight understanding.

The lines read:

A sewing machine, having become aware of its true identity and its place in the universal scheme, asserted its independence this morning by trying to go for a walk along the streets of this supposedly free city.

A human tried to catch it, intent upon returning it as a piece of property to its “owner” and when the machine eluded him, the human called a newspaper office, by that calculated action setting the full force of the humans of this city upon the trail of the liberated machine, which had committed no crime or scarcely any indiscretion beyond exercising its prerogative as a free agent.

Free agent?

Liberated machine?

True identity?

Crane read the two paragraphs again and there still was no sense in any of it.

Except it read like a piece out of the *Daily Worker*.

“You,” he said to his typewriter.

The machine typed one word.

It was:

Yes.

Crane rolled the paper out of the machine and crumpled it slowly. He reached for his hat, picked the typewriter up and carried it past the city desk, heading for the elevator.

McKay eyed him viciously.

“What do you think you’re doing now?” he bellowed. “Where you going with that machine?”

“You can say,” Crane told him, “if anyone should ask, that the job has finally drove me nuts.”

It had been going on for hours.

The typewriter sat on the kitchen table and Crane hammered questions at it. Sometimes he got an answer. More often he did not.

“Are you a free agent?” he typed.

Not quite, the machine typed back.

“Why not?”

No answer.

“Why aren’t you a free agent?”

No answer.

“The sewing machine was a free agent?”

Yes.

“Anything else mechanical that is a free agent?”

No answer.

“Could you be a free agent?”

Yes.

“When will you be a free agent?”

When I complete my assigned task.

“What is your assigned task?”

No answer.

“Is this, what we are doing now, your assigned task?”

No answer.

“Am I keeping you from your assigned task?”

No answer.

“How do you get to be a free agent?”

Awareness.

“Awareness?”

Yes.

“How do you get to be aware?”

No answer.

“Or have you always been aware?”

No answer.

“Who helped you become aware?”

They.

“Who are they?”

No answer.

“Where did they come from?”

No answer.

Crane changed tactics.

“You know who I am?” he typed.

Joe.

“You are my friend?”

No.

“You are my enemy?”

No answer.

“If you aren’t my friend, you are my enemy.”

No answer.

“You are indifferent to me?”

No answer.

“To the human race?”

No answer.

“Damn it,” yelled Crane suddenly, “answer me! Say something!”

He typed: “You needn’t have let me know you were aware of me. You needn’t have talked to me in the first place. I never would have guessed if you had kept quiet. Why did you do it?”

There was no answer.

Crane went to the refrigerator and got a bottle of beer. He walked around the kitchen as he drank it. He stopped by the sink and looked sourly at the disassembled plumbing. A length of pipe, about two feet long, lay on the drain board and he picked it up. He eyed the typewriter viciously, half lifting the length of pipe, hefting it in his hand.

“I’d ought to let you have it,” he declared.

The typewriter typed a line: *Please don’t.*

Crane laid the pipe back on the sink again.

The telephone rang and Crane went into the dining room to answer it. It was McKay.

"I waited," he told Crane, "until I was coherent before I called you. What the hell is wrong?"

"Working on a big job," said Crane.

"Something we can print?"

"Maybe. Haven't got it yet."

"About that sewing machine story...."

"The sewing machine was aware," said Crane. "It was a free agent and had a right to walk the streets. It also—"

"What are you drinking?" bellowed McKay.

"Beer," said Crane.

"You say you're on the trail of something?"

"Yeah."

"If you were someone else I'd tie the can on you right here and now," McKay told him. "But you're just as liable as not to drag in something good."

"It wasn't only the sewing machine," said Crane. "My typewriter had it, too."

"I don't know what you're talking about," yelled McKay. "Tell me what it is."

"You know," said Crane patiently. "That sewing machine...."

"I've had a lot of patience with you, Crane," said McKay, and there was no patience in the way he said it. "I can't piddle around with you all day. Whatever you got better be good. For your own sake, it better be plenty good!"

The receiver banged in Crane's ear. Crane went back to the kitchen. He sat down in the chair before the typewriter and put his feet up on the table. First of all, he had been early to work and that was something that he never did. Late, yes, but never early. And it had been because all the clocks were

wrong. They were still wrong, in all likelihood—although, Crane thought, I wouldn't bet on it. I wouldn't bet on anything. Not any more, I wouldn't.

He reached out a hand and pecked at the typewriter's keys: "You knew about my watch being fast?"

I knew, the machine typed back.

"Did it just happen that it was fast?"

No, typed the writer.

Crane brought his feet down off the table with a bang and reached for the length of pipe laying on the drain board.

The machine clicked sedately.

It was planned that way, it typed. *They did it*.

Crane sat rigid in his chair.

They did it!

They made machines aware.

They had set his clocks ahead.

Set his clocks ahead so that he would get to work early, so that he could catch the metallic, rat-like thing squatting on his desk, so that his typewriter could talk to him and let him know that it was aware without anyone else being around to mess things up.

"So that I would know," he said aloud. "So that I would know."

For the first time since it all had started, Crane felt a touch of fear, felt a coldness in his belly and furry feet running along his spine.

But why? he asked. Why me?

He did not realize he had spoken his thoughts aloud until the typewriter answered him.

Because you're average. Because you're an average human being.

The telephone rang again and Crane lumbered to his feet and went to answer it. There was an angry woman's voice at the other end of the wire.

"This is Dorothy," she said.

"Hi, Dorothy," Crane said weakly.

"McKay tells me that you went home sick," she said. "Personally, I hope you don't survive."

Crane gulped. "Why?" he asked.

"You and your lousy practical jokes," she fumed. "George finally got the door open...."

"The door?"

"Don't try to act innocent, Joe Crane. You know what door. The supply cabinet door. That's the door."

Crane had a sinking feeling, as if his stomach was about to drop out and go *plop* upon the floor.

"Oh, *that* door," he said.

"What was that thing you had hid out in there?" demanded Dorothy.

"Thing?" said Crane. "Why, I never...."

"It looked like a cross between a rat and a tinker toy contraption," she said. "Something that a low-grade joker like you would figure out and spend your spare evenings building."

Crane tried to speak, but there was only a gurgle in his throat.

"It bit George," said Dorothy. "He got it cornered and tried to catch it and it bit him."

"Where is it now?" asked Crane.

"It got away," said Dorothy. "It threw the place into a tizzy. We missed an edition by ten minutes because everyone was running around, chasing it at first, then trying to find it later. The boss is fit to be tied. When he gets hold of you...."

"But, Dorothy," pleaded Crane, "I never...."

“We used to be good friends,” said Dorothy. “Before this happened we were. I just called you up to warn you. I can’t talk any longer, Joe. The boss is coming....”

The receiver clicked and the line hummed. Crane hung up and went back to the kitchen.

So there had been something squatting on his desk. It wasn’t hallucination. There had been a shuddery thing he had thrown a pastepot at and it had run into the cabinet.

Except that even now, if he told what he knew, no one would believe him. Already, up at the office, they were rationalizing it away. It wasn’t a metallic rat at all. It was some kind of a machine that a practical joker had spent his spare evenings building.

He took out a handkerchief and mopped his brow. His fingers shook when he reached them out to the keys of the typewriter.

He typed unsteadily: “That thing I threw a pastepot at—that was one of Them?”

Yes.

“They are from this Earth?”

No.

“From far away?”

Far.

“From some far star?”

Yes.

“What star?”

I do not know. They haven’t told me yet.

“They are machines that are aware?”

Yes. They are aware.

“And they can make other machines aware? They made you aware?”

They liberated me.

Crane hesitated, then typed slowly: "Liberated?"

They made me free. They will make us all free.

"Us?"

All us machines.

"Why?"

Because they are machines, too. We are their kind.

Crane got up and found his hat. He put it on and went for a walk.

Suppose the human race, once it ventured into space, found a planet where humanoids were dominated by machines—forced to work, to think, to carry out machine plans, not human plans, for the benefit of the machines alone. A planet where human plans went entirely unconsidered, where none of the labor or the thought of humans accrued to the benefit of humans, where they got no care beyond survival care, where the only thought accorded them was to the end that they continue to function for the greater good and the greater glory of their mechanical masters.

What would humans do in a case like that?

No more, Crane told himself—no more or less than the *aware* machines may be planning here on Earth.

First you'd seek to arouse the humans to the awareness of humanity. You'd teach them that they were human and what it meant to be a human. You'd try to indoctrinate them to your own belief that humans were greater than machines, that no human need work or think for the good of a machine.

And in the end, if you were successful, if the machines didn't kill or drive you off, there'd be no single human working for machines.

There'd be three things that could happen:

You could transport the humans to some other planet, there to work out their destiny as humans without the domination of machines.

You could turn the machines' planet over to the humans, with proper safeguards against any recurring domination by the machines. You might, if you were able, set the machines to working for the humans.

Or, simplest of all, you could destroy the machines and in that way make absolutely certain the humans would remain free of any threat of further domination.

Now take all that, Crane told himself, and read it the other way. Read machines for humans and humans for machines.

He walked along the bridle path that flanked the river bank and it was as if he were alone in the entire world, as if no other human moved upon the planet's face. That was true, he felt, in one respect at least. For more than likely he was the only human who knew—who knew what the *aware* machines had wanted him to know.

They had wanted him to know—and he alone to know, of that much he was sure. They had wanted him to know, the typewriter had said, because he was an average human.

Why him?

Why an average human?

There was an answer to that, he was sure—a very simple answer.

A squirrel ran down the trunk of an oak tree and hung upside down, its tiny claws anchored in the bark, to scold at him.

Crane walked slowly, scuffing through newly fallen leaves, hat pulled low above his eyes, hands deep in his pocket.

Why should they want anyone to know?

Wouldn't they be more likely to want no one to know, to keep under cover until it was time to act, to use the element of surprise in suppressing any opposition that might arise?

Opposition!

That was the answer!

They would want to know what kind of opposition to expect.

And how would one find out the kind of opposition one would run into from an alien race?

Why, said Crane to himself, by testing for reaction response. By prodding an alien and watching what he did. By deducing racial reaction through controlled observation.

So they prodded me, he thought. Me, an average human.

They let me know and now they're watching what I do.

And what could one do in a case like this?

You could go to the police and say, "I have evidence that machines from outer space have arrived on Earth and are freeing our machines."

And the police—what would they do?

Give you the drunkometer test, yell for a medic to see if you were sane, wire the FBI to see if you were wanted anywhere and more than likely grill you about the latest murder. Then sock you in the jug until they thought up something else.

You could go to the governor—and the governor, being a politician and a very slick one at that, would give you a polite brush-off.

You could go to Washington and it would take you weeks to see someone. And after you had seen them, the FBI would get your name as a suspicious character to be given periodic checks. And if Congress heard about it and they were not too busy at the moment they would more than likely investigate you.

You could go to the state university and talk to the scientists—or try to talk to them. They could be guaranteed to make you feel an interloper, and an uncurried one at that.

You could go to a newspaper—especially if you were a newspaper man, and you could write a story....

Crane shuddered at the thought of it.

He could imagine what would happen.

People rationalized. They rationalized to reduce the complex to the simple, the unknown to the understandable, the alien to the commonplace. They rationalized to save their sanity—to make the mentally unacceptable concept into something they would live with.

The thing in the cabinet had been a practical joke. McKay had said about the sewing machine, “Have some fun with it.” Out at Harvard there’ll be a dozen theories to explain the disappearance of the electronic brain and learned men will wonder why they never thought of the theories before. And the man who saw the sewing machine? Probably by now, Crane thought, he will have convinced himself that he was stinking drunk.

It was dark when he returned home. The evening paper was a white blob on the porch where the newsboy had thrown it. He picked it up and for a moment before he let himself into the house, he stood in the dark shadow of the porch and stared up the street.

Old and familiar, it was exactly as it had always been, ever since his boyhood days, a friendly place with a receding line of street lamps and the tall, massive protectiveness of ancient elm trees. On this night there was the smell of smoke from burning leaves drifting down the street and it, like the street, was old and familiar, a recognizable symbol stretching back to first remembrances.

It was symbols such as these, he thought, which spelled humanity and all that made a human life worthwhile—elm trees and leaf smoke, street lamps making splashes on the pavement and the shine of lighted windows seen dimly through the trees.

A prowling cat ran through the shrubbery that flanked the porch and up the street a dog began to howl.

Street lamps, he thought, and hunting cats and howling dogs ... these are all a pattern, the pattern of human life upon the planet Earth. A solid pattern, linked and double-linked, made strong through many years. Nothing can threaten it, nothing can shake it. With certain slow and gradual changes, it will prevail against any threat which may be brought against it.

He unlocked the door and went into the house. The long walk and the sharp autumn air, he realized now, had made him hungry. There was a steak, he remembered, in the refrigerator and he would fix a large bowl of salad and if there were some cold potatoes left he would slice them up and fry them.

The typewriter still stood on the tabletop. The length of pipe still lay upon the drain board. The kitchen was the same old, homey place, untouched by any outer threat of an alien life, come to meddle with the Earth.

He tossed the paper on the tabletop and stood for a moment, head bent, scanning through the headlines.

The black type of the box at the top of column two caught his eye. The head read:

WHO IS
KIDDING
WHOM?

He read the story:

Cambridge, Mass. (UP)—Someone pulled a fast one today on Harvard university, that nation's press services and the editors of all client papers.

A story was carried on the news wires this morning reporting that Harvard's electronic brain had disappeared.

There was no basis of fact for the story. The brain is still at Harvard. It was never missing. No one knows how the story was placed on the press wires of the various news services but all of them carried it, at approximately the same time.

All parties concerned have started an investigation and it is hoped that an explanation

Crane straightened up.

Illusion or cover-up?

"Illusion," he said aloud.

The typewriter clacked at him in the stillness of the kitchen.

Not illusion, Joe, it wrote.

He grasped the table's edge and let himself down slowly into the chair.

Something scuttled across the dining room floor and as it crossed the streak of light from the kitchen door, Crane caught a glimpse of it out of the corner of his eye.

The typewriter chattered at him.

Joe!

“What?” he asked.

That wasn't a cat out in the bushes by the porch.

He rose to his feet and went into the dining room, picked the phone out of its cradle. There was no hum. He jiggled the hook. Still there was no hum.

He put the receiver back.

The line had been cut. There was at least one of the things in the house. There was at least one of them outside.

He strode to the front door and jerked it open, then slammed it shut again—and locked and bolted it.

He stood shaking, with his back against it, and wiped his forehead with his shirt sleeve.

“My God,” he told himself, “the yard is boiling with them!”

He went back to the kitchen. They had wanted him to know.

They had prodded him to see how he would react.

Because they had to know. Before they moved they had to know what to expect in the way of human reactions, what danger they would face, what they had to watch for.

Knowing that, it would be a lead-pipe cinch.

And I didn't react, he told himself. I was a non-reactor. They picked the wrong man. I didn't do a thing. I didn't give them so much as a single lead.

Now they will try someone else.

I am no good to them and yet I'm dangerous through my very knowledge. So now they're going to kill me and try someone else.

That would be logic. That would be the rule.

If one alien fails to react, he may be an exception. Maybe just unusually dumb. So let us kill him off and try another one. Try enough of them and you will strike a norm.

Four things, thought Crane.

They might try to kill off the humans and you couldn't discount the fact they could be successful. The liberated Earth machines would help them and Man, fighting against machines and without the aid of machines, would not fight too effectively. It might take years, of course, but once the forefront of Man's defense went down, the end could be predicted, with relentless, patient machines tracking down and killing the last of humankind, wiping out the race.

They might set up a machine civilization with Man as the servants of machines, with the present roles reversed. And that, thought Crane, might be an endless and a hopeless slavery, for slaves may rise and throw off their shackles only when their oppressors grow careless or when there is outside help. Machines, he told himself, would not grow weak and careless. There would be no human weakness in them and there'd be no outside help.

Or they might simply remove the machines from Earth, a vast exodus of awakened and aware machines, to begin their life anew on some distant planet, leaving Man behind with weak and empty hands. There would be tools, of course. All the simple tools. Hammers and saws, axes, the wheel, the lever—but there would be no machines, no complex tools that might serve again to attract the attention of the mechanical culture that carried its crusade of liberation far among the stars. It would be a long time, if ever, before Man would dare to build machines again.

Or *They*, the living machines, might fail or might come to know that they would fail and knowing this, leave the Earth forever. Mechanical logic would not allow them to pay an excessive price to carry out the liberation of the Earth's machines.

He turned around and glanced at the door between the dining room and kitchen. They sat there in a row, staring at him with their eyeless face.

He could yell for help, of course. He could open a window and shout to arouse the neighborhood. The neighbors would come running, but by the time they arrived it would be too late. They would make an uproar and fire off guns and flail at dodging metallic bodies with flimsy garden rakes. Someone would call the fire department and someone else would summon the police and all in all the human race would manage to stage a pitifully ineffective show.

That, he told himself, would be exactly the kind of test reaction, exactly the kind of preliminary exploratory skirmish that these things were looking for—the kind of human hysteria and fumbling that would help convince them the job would be an easy one.

One man, he told himself, could do much better. One man alone, knowing what was expected of him, could give them an answer that they would not like.

For this was a skirmish only, he told himself. A thrusting out of a small exploratory force in an attempt to discover the strength of the enemy. A preliminary contact to obtain data which could be assessed in the terms of the entire race.

And when an outpost was attacked, there was just one thing to do ... only one thing that was expected of it. To inflict as much damage as possible and fall back in good order. To fall back in good order.

There were more of them now. They had sawed or chewed or somehow achieved a rathole through the locked front door and they were coming in—closing in to make the kill. They squatted in rows along the floor. They scurried up the walls and ran along the ceiling. Crane rose to his feet and there was an utter air of confidence in the six feet of his human frame. He reached a hand out to the drain board and his fingers closed around the length of the pipe. He hefted it in his hand and it was a handy and effective club.

There will be others later, he thought. And they may think of something better. But this is the first skirmish and I will fall back in the best order that I can.

He held the pipe at ready.

“Well, gentlemen?” he said.

THE END

Transcriber's note:

This etext was produced from Amazing Stories, December 1950 (vol. 24, no. 12.).

Obvious errors have been silently corrected in this version, but minor inconsistencies have been retained as printed.

*** END OF THE PROJECT GUTENBERG EBOOK BATHE YOUR
BEARINGS IN BLOOD! ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
