Crash Beam

By JOHN BARRET

**Dan Kearns, sick and shaking, could
already hear them talk: "Yeah, come in on
the Kearns beam—it's a new way to die!"**

**[Transcriber's Note: This etext was produced from
Planet Stories Fall 1947.**

**Extensive research did not uncover any evidence that
the U.S. copyright on this publication was renewed.]**

It happened so fast that for a minute he just stood there absolutely incapable of taking it in. One instant the big Earth-Venus rocket freighter was sizzling through the fog to a perfect landing on the field below. Then suddenly she dipped, undershot the field and vanished in a flash and a thundering explosion that shook the observation tower.

In the dream-like quiet that followed, Dan Kearns heard the faint yells of the landing crew. He saw the big searchlights switch on, cutting wide swaths of light through the boiling fog. Tiny white-coated medics crossed the patches of light, running frantically. Dan sat down in the chair feeling sick and very tired. Then the door of the tower room opened and Rawlins, the supervisor, stepped in.

"All right, Kearns," he said curtly, "you're through. And if anyone asks me about your ability as an electronics engineer, I'll write out the blackest recommendation I can think of."

Dan got up slowly. "How many were killed?"

"Two!" Rawlins glared. "Two of my best pilots!"

Dan's shoulders stiffened. "Listen, Rawlins, I'm just as interested as you in breaking Roehm's monopoly on Earth-Venus rockets."

"Get out!"

"I can't get out. Don't forget you have another rocket due in twenty minutes—a passenger rocket."

Rawlins' face went pale. "My God! I'd forgotten." He threw up his hands. "Turn 'em back," he shrieked. "Send 'em back to earth! It's suicide to land on that guide beam."

"I can't send them back to Earth," Dan said quietly. "They haven't enough fuel."

"Then send 'em to one of Roehm's fields. It's an admission of complete defeat, but we can't kill 'em."

Dan swallowed. "You're forgetting that Roehm uses invisible light for landing—not ultra short waves. Anyway, do you think Roehm would miss

such a chance to crash one of our rockets?"

Rawlins sat down with a groan. "Where in thunder did I ever get the idea we could bring in a ship through that magnetic murk on ultra short waves?"

Dan lifted his head. "There's nothing the matter with my guide beam. It brought in the experimental rocket yesterday and magnetic conditions were even worse."

"I see." The smile on Rawlins' lined face was cynical. "In other words you're trying to pass the buck to Stevens, your control-room operator."

The door of the observation room swung open and a wild-eyed mechanic burst in.

"Mr. Rawlins, the control-room is still locked. Stevens is sitting in front of the table and he won't answer us."

Dan tore down the stairs and across the catwalk two steps ahead of Rawlins. He hammered on the door. Through the thick glass he could see Stevens hunched over the lighted control table.

"Stevens! Stevens!" He turned to Rawlins. "We'll have to cut the lock. Get a torch—and get a doctor!"

It took a minute with a high torch before they crashed into the room.

"He's been dead several minutes," the doctor said as he took his hand from Steven's forehead.

"I'm sorry, Kearns," Rawlins said. He looked at the doctor. "Well, I guess that explains everything. He must have lost control just as she was coming in. What was it? Heart attack?"

The doctor shook his head. "Some sort of convulsion. Muscles violently contracted. Funny he didn't fall to the floor. Must have affected the whole nervous system. Even the eye pupils are down to pin points." He looked around at Rawlins. "I may be sticking my neck out, sir, but off hand I'd say Stevens was killed."

"Killed?" Rawlins blinked at the form in the chair. "But that's impossible. The door was locked. The room hasn't been disturbed and there aren't any holes in the glass. Nothing could get in here except light."

Dan walked to the big windows. He examined the ledge and the joints. He came back to the control table and tested the switches. Suddenly he leaned over Stevens' huddled body and pulled the log book from under his stiff fingers.

"Look at this!"

Scrawled across the pad in big jerky letters were the words "*Purple light bea....*" The pencil had torn through the sheet in a violent final contraction.

Rawlins rubbed his chin. "We don't use any purple beams. It doesn't make sense."

"Maybe it does," Dan said. He turned to the doctor. "Wasn't there some experiments made by a Dr. Aren Linden several years ago on the injurious effect of certain kinds of light on the nervous system?"

The doctor frowned. "Yes, I think there was, but the experiments were never completed."

"That's right. The foundation refused to up his salary, so he went to work for Roehm." Dan swung around to Rawlins. "It was Linden who helped work out the invisible light landing system that Roehm uses on his Venus rocket ports."

"Seems to me you're jumping to some pretty wild conclusions, Kearns," Rawlins said slowly.

Dan looked at him. "Suppose Linden has found the exact wave-length of the most potent ray. It would be simple for anyone to climb the framework of one of the buildings and shine that light in here."

Rawlins straightened up. "I'll search every tower on the field."

"But you haven't time. That passenger rocket will be here in five minutes."

The supervisor sucked in his breath. "What's your idea?"

"I'll sit at the control table myself. You can do the preliminary locating in the observation tower." He ran to the door. "Where's the welder that cut the

lock?"

The doctor and a medic were carrying out Stevens when he came back a few seconds later. Dan was slipping on the welder's helmet.

"Keep everyone away from the control-room level," he said to Rawlins. "And you better have the crash trucks and the flame quenchers standing by on the field."

Rawlins stared at him. "And what happens to you?"

Dan licked his lips. "I—I don't know. I'm going to try something."

Rawlins smiled. He reached out his hand. "Good luck, Dan," he said. He clapped him on the shoulder.

When they were gone, Dan dropped the helmet over his face. He walked slowly across the room with his hands in front of him like a blind man. Finally he lifted up across the room with his hands in front of the helmet and knocked out the dark glass in the eye slot. Then he slipped it back on. From one of the drawers in a small desk beside the control table he lifted out a small rectangular object and slipped it in his pocket. He seated himself before the control table.

The dials on the edge of the table glowed dimly. In the center of the flat top was a large circular graph with white lines that pulsed like a network of capillaries. He looked across the table through the big window. Everything except one nearby tower was hidden in swirling mists.

The speaker at his side clicked on. He heard Rawlins' voice. "I picked 'em up Dan. They're coming in at minimum speed—seventy point two nine five degrees. I didn't mention the freighter."

Dan flicked a small switch on the table edge. A straight white line of light shot out across the graph, then swung slowly back and forth through an arc of ten degrees like a searching feeler. Suddenly it steadied and an orange bead appeared at its terminus. Dan watched the bead travel down the line, across the pulsing capillaries. He reached out and grasped a small lever sticking out of the table top. As he pressed the lever to one side, the line

moved around the graph like a pointer, carrying the orange bead with it. He watched it till the bead reached the center of the graph, and then glanced up through the window. Above the far end of the field he could discern the dim orange glow of a rocket's keel jets.

Suddenly he jerked back his head. A beam of purple light was playing back and forth across the table. It swept over his gloved hands, across his arms and chest, and moved upward toward his face. He jumped up, keeping hold of the lever and studied the angle of the small beam. The reflection on the dark cloth of his jacket was making him dizzy. He reached into his pocket....

Suddenly ... a beam of purple light!

From the observation tower Rawlins watched the rocket sweep toward the field with keel jets blazing. As it reached the strip it seemed to falter and dip. Rawlins clenched his hands and swore. Then it steadied and slid in to a perfect landing.

The intercommunication telaudio flashed on. He saw Dan Kearns' haggard face under the uplifted welder's helmet.

"Rawlins. The roof on tower three. Check it right away. I think...." Kearns' body abruptly went rigid; he fell across the control-room table.

Dan Kearns came to on the floor of the control-room with the doctor working over him.

"How do you feel?" the doctor asked.

"Like I've been sitting in an electric chair."

"You'll be all right," the doctor said. "Compared to Stevens you got a mild dose."

Dan looked around him. He saw Rawlins' boots and glanced upward. "Did you check the tower?"

"Yep, we found him—dead. Just like Stevens. He was one of Roehm's men all right. He had a flashlight. We tried it on one of the doc's white rats." Rawlins shook his head. "Stevens must have gone through hell." Suddenly he stared down at Dan. "But how...?"

Dan smiled. He lifted up his gloved hand. In it was a small rectangular signaling mirror.

"I reflected it right back at him."

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
