Death Between the Stars

by **Marion Zimmer Bradley**

We've had many requests for a sequel to Marion Zimmer Bradley's warmly human, unforgettably appealing little story JACKIE SEES A STAR. We'll have to admit that she is keeping us in a state of bitter frustration in that respect. But as if to salve our hurt she has come up with a story as appealing in a somewhat different vein, and we're delightfully convinced it will entrance you.

Sympathy may or may not be an invention of the human mind. But in the gulfs between the stars it is likely to work a miracle.

They asked me about it, of course, before I boarded the starship. All through the Western sector of the Galaxy, few rules are stricter than the one dividing human from nonhuman, and the little Captain of the *Vesta*—he was Terran, too, and proud in the black leather of the Empire’s merchantman forces—hemmed and hawed about it, as much as was consistent with a spaceman’s dignity.

“You see, Miss Vargas,” he explained, not once but as often as I would listen to him, “this is not, strictly speaking, a passenger ship at all. Our charter is only to carry cargo. But, under the terms of our franchise, we are required to transport an occasional passenger, from the more isolated planets where there is no regular passenger service. Our rules simply don’t permit us to discriminate, and the Theradin reserved a place on this ship for our last voyage.”

He paused, and re-emphasized, “We have only the one passenger cabin, you see. We’re a cargo ship and we are not allowed to make any discrimination between our passengers.”

He looked angry about it. Unfortunately, I’d run up against that attitude before. Some Terrans won’t travel on the same ship with nonhumans even when they’re isolated in separate ends of the ship.

I understood his predicament, better than he thought. The Theradin seldom travel in space. No one could have foreseen that Haalvordhen, the Theradin from Samarra, who had lived on the forsaken planet of Deneb for eighteen of its cycles, would have chosen this particular flight to go back to its own world.

At the same time, I had no choice. I had to get back to an Empire planet—*any* planet—where I could take a starship for Terra. With war about to explode in the Procyon sector, I had to get home before communications were knocked out altogether. Otherwise—well, a Galactic war can last up to eight hundred years. By the time regular transport service was re-established, I wouldn’t be worrying about getting home.

The *Vesta* could take me well out of the dangerous sector, and all the way to Samarra—Sirius Seven—which was, figuratively speaking, just across the street from the Solar System and Terra. Still, it was a questionable solution.

The rules about segregation are strict, the anti-discriminatory laws are stricter, and the Theradin had made a prior reservation.

The captain of the *Vesta* couldn't have refused him transportation, even if fifty human, Terran women had been left stranded on Deneb IV. And sharing a cabin with the Theradin was ethically, morally and socially out of the question. Haalvordhen was a nonhuman telepath; and no human in his right senses will get any closer than necessary even to a human telepath. As for a nonhuman one—

And yet, what other way was there?

The captain said tentatively, “We *might* be able to squeeze you into the crewmen's quarters—” he paused uneasily, and glanced up at me.

I bit my lip, frowning. That was worse yet. “I understand,” I said slowly, “that this Theradin—Haalvordhen—has offered to allow me to share *its* quarters.”

“That's right. But, Miss Vargas—”

I made up my mind in a rush. “I'll do it,” I said. “It's the best way, all around.”

At the sight of his scandalized face, I almost regretted my decision. It was going to cause an interplanetary scandal, I thought wryly. A human woman—and a Terran citizen—spending forty days in space and sharing a cabin with a nonhuman!

The Theradin, although male in form, had no single attribute which one could remotely refer to as sex. But of course that wasn't the problem. The nonhuman were specifically prohibited from mingling with the human races. Terran custom and taboo were binding, and I faced, resolutely, the knowledge that by the time I got to Terra, the planet might be made too hot to hold me.

Still, I told myself defiantly, it was a big Galaxy. And conditions weren't normal just now and that made a big difference. I signed a substantial check for my transportation, and made arrangements for the shipping and stowing of what few possessions I could safely trans-ship across space.

But I still felt uneasy when I went aboard the next day—so uneasy that I tried to bolster up my flagging spirits with all sorts of minor comforts.

Fortunately the Theradin were oxygen-breathers, so I knew there would be no trouble about atmosphere-mixtures, or the air pressure to be maintained in the cabin. And the Theradin were Type Two nonhumans, which meant that the acceleration of a hyperspeed ship would knock my shipmate into complete prostration without special drugs. In fact, he would probably stay drugged in his skyhook during most of the trip.

The single cabin was far up toward the nose of the starship. It was a queer little spherical cubbyhole, a nest. The walls were foam-padded all around the sphere, for passengers never develop a spaceman's skill at maneuvering their bodies in free-fall, and cabins had to be designed so that an occupant, moving unguardedly, would not dash out his or her brains against an unpadded surface. Spaced at random on the inside of the sphere were three skyhooks—nested cradles on swinging pivots—into which the passenger was snuggled during blastoff in shock-absorbing foam and a complicated Garsen pressure-apparatus and was thus enabled to sleep secure without floating away.

A few screw-down doors were marked LUGGAGE. I immediately unscrewed one door and stowed my personal belongings in the bin. Then I screwed the top down securely and carefully fastened the padding over it. Finally, I climbed around the small cubbyhole, seeking to familiarize myself with it before my unusual roommate arrived.

It was about fourteen feet in diameter. A sphincter lock opened from the narrow corridor to cargo bays and crewmen's quarters, while a second led into the cabin's functional equivalent of a bathroom. Planetbound men and women are always surprised and a little shocked when they see the sanitary arrangements on a spaceship. But once they've tried to perform normal bodily functions in free-fall, they understand the peculiar equipment very well.

I've made six trips across the Galaxy in as many cycles. I'm practically an old hand, and can even wash my face in free-fall without drowning. The trick is to use a sponge and suction. But, by and large, I understand perfectly why spacemen, between planets, usually look a bit unkempt.

I stretched out on the padding of the main cabin, and waited with growing uneasiness for the nonhuman to show up. Fortunately, it wasn't long before

the diaphragm on the outer sphincter-lock expanded, and a curious, peaked face peered through.

“Vargas Miss Hel-len?” said the Theradin in a sibilant whisper.

“That’s my name,” I replied instantly. I pulled myself upward, and added, quite unnecessarily, “You are Haalvordhen, of course.”

“Such is my identification,” confirmed the alien, and the long, lean, oddly-muscled body squirmed through after the peaked head. “It is kind, Vargas Miss, to share accom-modation under this necesssity.”

“It’s kind of you,” I said vigorously. “We’ve all got to get home before this war breaks out!”

“That war may be prevented, I have all hope,” the nonhuman said. He spoke comprehensibly in Galactic Standard, but expressionlessly, for the vocal chords of the Theradins are located in an auxiliary pair of inner lips, and their voices seem reedy and lacking in resonance to human ears.

“Yet know you, Vargas Miss, they would have hurled me from this ship to make room for an Empire citizen, had you not been heart-kind to share.”

“Good heavens!” I exclaimed, shocked, “I didn’t know that!”

I stared at him, disbelieving. The captain couldn’t have legally done such a thing—or even seriously have entertained the thought. Had he been trying to intimidate the Theradin into giving up his reserved place?

“I—I was meaning to thank *you*,” I said, to cover my confusion.

“Let us thank we-other, then, and be in accord,” the reedy voice mouthed.

I looked the nonhuman over, unable to hide completely my curiosity. In form the Theradin was vaguely humanoid—but only vaguely—for, the squat arms terminated in mittened “hands” and the long sharp face was elfin, and perpetually grimacing.

The Theradin have no facial muscles to speak of, and no change of expression or of vocal inflection is possible to them. Of course, being telepathic, such subtleties of visible or auditory expression would be superfluous on the face of it.

I felt—as yet—none of the revulsion which the mere presence of the Theradin was *supposed* to inspire. It was not much different from being in the presence of a large humanoid animal. There was nothing inherently fearful about the alien. Yet he was a telepath—and of a nonhuman breed my species had feared for a thousand years.

Could he read my mind?

“Yes,” said the Theradin from across the cabin. “You must forgive me. I try to put up barrier, but it is hard. You broadcast your thought so strong it is impossible to shut it out.” The alien paused. “Try not to be embar-rass. It bother me too.”

Before I could think of anything to say to that a crew member in black leather thrust his head, unannounced, through the sphincter, and said with an air of authority, “In skyhooks, please.” He moved confidently into the cabin. “Miss Vargas, can I help you strap down?” he asked.

“Thanks, but I can manage,” I told him.

Hastily I clambered into the skyhook, buckling the inner straps, and fastening the suction tubes of the complicated Garsen apparatus across my chest and stomach. The nonhuman was awkwardly drawing his hands from their protective mittens and struggling with the Garsens.

Unhappily the Theradin have a double thumb, and handling the small-size Terran equipment is an almost impossibly delicate task. It is made more difficult by the fact that the flesh of their “hands” is mostly thin mucus membrane which tears easily on contact with leather and raw metal.

“Give Haalvordhen a hand,” I urged the crewman. “I’ve done this dozens of times!”

I might as well have saved my breath. The crewman came and assured himself that *my* straps and tubes and cushions were meticulously tightened. He took what seemed to me a long time, and used his hands somewhat excessively. I lay under the heavy Garsen equipment, too inwardly furious to even give him the satisfaction of protest.

It was far too long before he finally straightened and moved toward Haalvordhen’s skyhook. He gave the alien’s outer straps only a perfunctory

tug or two, and then turned his head to grin at me with a totally uncalled-for familiarity.

“Blastoff in ninety seconds,” he said, and wriggled himself rapidly out through the lock.

Haalvordhen exploded in a flood of Samarran which I could not follow. The vehemence of his voice, however, was better than a dictionary. For some strange reason I found myself sharing his fury. The unfairness of the whole procedure was shameful. The Theradin had paid passage money, and deserved in any case the prescribed minimum of decent attention.

I said forthrightly, “Never mind the fool, Haalvordhen. Are you strapped down all right?”

“I don’t know,” he replied despairfully. “The equipment is unfamiliar—”

“Look—” I hesitated, but in common decency I had to make the gesture. “If I examine carefully my own Garensens, can you read my mind and see how they should be adjusted?” He mouthed, “I’ll try,” and immediately I fixed my gaze steadily on the apparatus. After a moment, I felt a curious sensation. It was something like the faint, sickening feeling of being touched and pushed about, against my will, by a distasteful stranger.

I tried to control the surge of almost physical revulsion. No wonder that humans kept as far as possible from the telepathic races....

And then I saw—did I see, I wondered, or was it a direct telepathic interference with my perceptions?—a second image superimpose itself on the Garensens into which I was strapped. And the realization was so disturbing that I forgot the discomfort of the mental rapport completely. “You aren’t nearly fastened in,” I warned. “You haven’t begun to fasten the suction tubes—oh, *damn* the man. He must have seen in common humanity —” I broke off abruptly, and fumbled in grim desperation with my own straps. “I think there’s just time—”

But there wasn’t. With appalling suddenness a violent clamor—the final warning—hit my ears. I clenched my teeth and urged frantically: “Hang on! Here we go!”

And then the blast hit us! Under the sudden sickening pressure I felt my lungs collapse, and struggled to remain upright, choking for breath. I heard

a queer, gagging grunt from the alien, and it was far more disturbing than a human scream would have been. Then the second shockwave struck with such violence that I screamed aloud in completely human terror. Screamed—and blacked out.

I wasn't unconscious very long. I'd never collapsed during takeoff before, and my first fuzzy emotion when I felt the touch of familiar things around me again was one of embarrassment. What had happened? Then, almost simultaneously, I became reassuringly aware that we were in free fall and that the crewman who had warned us to alert ourselves was stretched out on the empty air near my skyhook. He looked worried.

"Are you all right, Miss Vargas?" he asked, solicitously. "The blastoff wasn't any rougher than usual."

"I'm all right," I assured him woozily. My shoulders jerked and the Garensens shrieked as I pressed upward, undoing the apparatus with tremulous fingers. "What about the Theradin?" I asked urgently. "His Garensens weren't fastened. You barely glanced at them." The crewman spoke slowly and steadily, with a deliberation I could not mistake. "Just a minute, Miss Vargas," he said. "Have you forgotten? I spent *every moment* of the time I was in here fastening the Theradin's belts and pressure equipment."

He gave me a hand to assist me up, but I shook it off so fiercely that I flung myself against the padding on the opposite side of the cabin. I caught apprehensively at a handhold, and looked down at the Theradin.

Haalvordhen lay flattened beneath the complex apparatus. His peaked pixie face was shrunken and ghastly, and his mouth looked badly bruised. I bent closer, then jerked upright with a violence that sent me cascading back across the cabin, almost into the arms of the crewman.

"You must have fixed those belts *just now*," I said accusingly. "They *were not* fastened before blastoff! It's malicious criminal negligence, and if Haalvordhen dies—"

The crewman gave me a slow, contemptuous smile. "It's my word against yours, sister," he reminded me.

"In common decency, in common humanity—" I found that my voice was hoarse and shaking, and could not go on.

The crewman said humorlessly, “I should think you’d be glad if the geek died in blastoff. You’re awfully concerned about the geek—and you know how *that* sounds?” I caught the frame of the skyhook and anchored myself against it. I was almost too faint to speak. “What were you trying to do?” I brought out at last. “*Murder* the Theradin?”

The crewman’s baleful gaze did not shift from my face. “Suppose you close your mouth,” he said, without malice, but with an even inflection that was far more frightening. “If you don’t, we may have to close it for you. I don’t think much of humans who fraternize with geeks.”

I opened and shut my mouth several times before I could force myself to reply. All I finally said was, “You know, of course, that I intend to speak to the captain?”

“Suit yourself.” He turned and strode contemptuously toward the door. “We’d have been doing you a favor if the geek had died in blastoff. But, as I say, suit yourself. I think your geek’s alive, anyhow. They’re hard to kill.”

I clutched the skyhook, unable to move, while he dragged his body through the sphincter lock and it contracted behind him.

Well, I thought bleakly, I had known what I would be letting myself in for when I’d made the arrangement. And since I was already committed, I might as well see if Haalvordhen were alive or dead. Resolutely I bent over his skyhook, angling sharply to brace myself in free-fall.

He wasn’t dead. While I looked I saw the bruised and bleeding “hands” flutter spasmodically. Then, abruptly, the alien made a queer, rasping noise. I felt helpless and for some reason I was stirred to compassion.

I bent and laid a hesitant hand on the Garensen apparatus which was now neatly and expertly fastened. I was bitter about the fact that for the first time in my life I had lost consciousness! Had I not done so the crewman could not have so adroitly covered his negligence. But it was important to remember that the circumstance would not have helped Haalvordhen much either.

“Your feelings do you nothing but credit!” The reedy flat voice was almost a whisper. “If I may trespass once more on your kindness—can you unfasten these instruments again?”

I bent to comply, asking helplessly as I did so, “Are you sure you’re all right?”

“Very far from all right,” the alien mouthed, slowly and without expression.

I had the feeling that he resented being compelled to speak aloud, but I didn’t think I could stand that telepath touch again. The alien’s flat, slitted eyes watched me while I carefully unfastened the suction tubes and cushioning devices.

At this distance I could see that the eyes had lost their color, and that the raw “hands” were flaccid and limp. There were also heavily discolored patches about the alien’s throat and head. He pronounced, with a terribly thick effort. “I should have—been drugged. Now it’s too late. *Argha maci*—” the words trailed off into blurred Samarran but the discolored patch in his neck still throbbed sharply, and the hands twitched in an agony which, being dumb, seemed the more fearful.

I clung to the skyhook, dismayed at the intensity of my own emotion. I thought that Haalvordhen had spoken again when the sharp jolt of command sounded, clear and imperative, in my brain.

“*Procalamine!*” For an instant the shock was all I could feel—the shock, and the overwhelming revulsion at the telepathic touch. There was no hesitation or apology in it now, for the Theradin was fighting for his life. Again the sharp, furious command came: “*Give me procalamine!*”

And with a start of dismay I realized that most nonhumans needed the drug, which was kept on all spaceships to enable them to live in free-fall.

Few nonhuman races have the stubbornly persistent heart of the Terrans, which beats by muscular contraction alone. The circulation of the Theradin, and similar races, is dependent on gravity to keep the vital fluid pulsing. Procalamine gives their main blood organ just enough artificial muscular spasm to keep the blood moving and working.

Hastily I propelled myself into the “bathroom”—wriggled hastily through the diaphragm, and unscrewed the top of the bin marked FIRST AID. Neatly pigeonholed beneath transparent plastic were sterile bandages, antiseptics clearly marked HUMAN and—separately, for the three main types of nonhuman races, in one deep bin—the small plastic globules of vital stimulants.

I sorted out two purple fluorescent ones—little globes marked *procalamine*—and looked at the warning, in raised characters on the globule. It read: FOR ADMINISTRATION BY QUALIFIED SPACE PERSONNEL ONLY. A touch of panic made my diaphragm catch. Should I call the *Vesta's* captain, or one of the crew?

Then a cold certainty grew in me. If I did, Haalvordhen wouldn't get the stimulant he needed. I sorted out a fluorescent needle for nonhuman integument, pricked the globule and sucked the dose into the needle. Then, with its tip still enclosed in the plastic globe, I wriggled myself back to where the alien still lay loosely confined by one of the inner straps.

Panic touched me again, with the almost humorous knowledge that I didn't know where to inject the stimulant, and that a hypodermic injection, in space presents problems which only space-trained men are able to cope with. But I reached out notwithstanding and gingerly picked up one of the unmittened "hands." I didn't stop to think how I knew that this was the proper site for the injection. I was too overcome with strong physical loathing.

Instinct from man's remote past on Earth told me to drop the nonhuman flesh and cower, gibbering and howling as my simian antecedents would have done. The raw membrane was feverishly hot and unpleasantly slimy to touch. I fought rising queasiness as I tried to think how to steady him for the injection.

In free-fall there is no steadiness, no direction. The hypodermic needle, of course, worked by suction, but piercing the skin would be the big problem. Also, I was myself succumbing to the dizziness of no-gravity flight, and realized coldly that if I couldn't make the injection in the next few minutes I wouldn't be able to accomplish it at all.

For a minute I didn't care, a primitive part of myself reminding me that if the alien died I'd be rid of a detestable cabinmate, and have a decent trip between planets.

Then, stubbornly, I threw off the temptation. I steadied the needle in my hand, trying to conquer the disorientation which convinced me that I was looking both up and down at the Theradin.

My own center of gravity seemed to be located in the pit of my stomach, and I fought the familiar space voyaging instinct to curl up in the foetal position and float. I moved slightly closer to the Theradin. I knew that if I could get close enough, our two masses would establish a common center of gravity, and I would have at least a temporary orientation while I made the injection.

The maneuver was unpleasant, for the alien seemed unconscious, flaccid and still, and mere physical closeness to the creature was repellent. The feel of the thick wettish “hand” pulsing feebly in my own was almost sickeningly intimate. But at last I managed to maneuver myself close enough to establish a common center of gravity between us—an axis on which I seemed to hover briefly suspended.

I pulled Haalvordhen’s “hand” into this weight-center in the bare inches of space between us, braced the needle, and resolutely stabbed with it.

The movement disturbed the brief artificial gravity, and Haalvordhen floated and bounced a little weightlessly in his skyhook. The “hand” went sailing back, the needle recoiling harmlessly. I swore out loud, now quite foolishly angry, and my own jerky movement of annoyance flung me partially across the cabin.

Inching slowly back, I tried to grit my teeth, but only succeeded with a snap that jarred my skull. In terse anger, I seized Haalvordhen’s “hand,” which had almost stopped its feverish pulsing, and with a painfully slow effort—any quick or sudden movement would have thrown me, in recoil, across the cabin again—I wedged Haalvordhen’s “hand” under the strap and anchored it there. It twitched faintly—the Theradin was apparently still sensible to pain—and my stomach rose at that sick pulsing. But I hooked my feet under the skyhook’s frame, and flung my free arm down and across the alien, holding tight to the straps that confined him. Still holding him thus wedged down securely, I jabbed again with the needle. It touched, pricked—and then, in despair, I realized it could not penetrate the Theradin integument without weight and pressure behind it.

I was too absorbed now in what had to be done to care just how I did it. So I wrenched forward with a convulsive movement that threw me, full-length, across the alien’s body. Although I still had no weight, the momentum of

the movement drove the hypodermic needle deeply into the flesh of the “hand.”

I pressed the catch, then picked myself up slowly, and looked around to see the crewman who had jeered at me with his head thrust through the lock again, regarding me with the distaste he had displayed toward the Theradin from the first. To him I was lower than the Theradin, having degraded myself by close contact with a nonhuman.

Under that frigid, contemptuous stare, I was unable to speak. I could only silently withdraw the needle and hold it up. The rigid look of condemnation altered just a little, but not much. He remained silent, looking at me with something halfway between horror and accusation.

It seemed years, centuries, eternities that he clung there, just looking at me, his face an elongated ellipse above the tight collar of his black leathers. Then, without even speaking, he slowly withdrew his head and the lock contracted behind him, leaving me alone with my sickening feel of contamination and an almost hysterical guilt.

I hung the needle up on the air, curled myself into a ball, and, entirely unstrung, started sobbing like a fool.

It must have been a long time before I managed to pull myself together, because before I even looked to see whether Haalvordhen was still alive, I heard the slight buzzing noise which meant it was a meal-period and that food had been sent through the chute to our cabin. I pushed the padding listlessly aside, and withdrew the heatsealed containers—one set colorless, the other set nonhuman fluorescent.

Tardily conscious of what a fool I’d been making of myself, I hauled my rations over to the skyhook, and tucked them into a special slot, so that they wouldn’t float away. Then, with a glance at the figure stretched out motionless beneath the safety-strap of the other skyhook, I shrugged, pushed myself across the cabin again, and brought the fluorescent containers to Haalvordhen.

He made a weary, courteous noise which I took for acknowledgment. By now heartily sick of the whole business, I set them before him with a bare minimum of politeness and withdrew to my own skyhook, occupying myself with the always-ticklish problem of eating in free-fall.

At last I drew myself up to return the containers to the chute, knowing we wouldn't leave the cabin during the entire trip. Space, on a starship, is held to a rigid minimum. There is simply no room for untrained outsiders moving around in the cramped ship, perhaps getting dangerously close to critically delicate equipment, and the crew is far too busy to stop and keep an eye on rubbernecking tourists.

In an emergency, passengers can summon a crewman by pressing a call-button. Otherwise, as far as the crew was concerned, we were in another world.

I paused in midair next to Haalvordhen's skyhook. His containers were untouched and I felt moved to say, "Shouldn't you try to eat something?"

The flat voice had become even weaker and more rasping now, and the nonhuman's careful enunciation was slurred. Words of his native Samarran intermingled with queer turns of phrase which I expected were literally rendered from mental concepts. "Heart-kind of you, *thakkava* Vargas Miss, but late. Haalvordhen-I deep in grateful wishing—" A long spate of Samarran, thickly blurred followed, then as if to himself, "Theradin-we, die nowhere only on Samarra, and only a little time ago Haalvordhen-I knowing must die, and must returning to home planet. *Saata*. Knowing to return and die there where Theradin-we around dying—" The jumble of words blurred again, and the limp "hands" clutched spasmodically, in and out.

Then, in a queer, careful tone, the nonhuman said, "But I am not living to return where I can stop-die. Not so long Haalvorden-I be lasting, although Vargas-you Miss be helping most like *real* instead of alien. Sorry your people be most you unhelping—" he stopped again, and with a queer little grunting noise, continued, "Now Haalvordhen-I be giving Vargas-you stop-gift of heritage, be needful it is."

The flaccid form of the nonhuman suddenly stiffened, went rigid. The drooping lids over the Theradin's eyes seemed to unhood themselves, and in a spasm of fright I tried to fling myself backward. But I did not succeed. I remained motionless, held in a dumb fascination.

I felt a sudden, icy cold, and the sharp physical nausea crawled over me again at the harsh and sickening touch of the alien on my mind, not in

words this time, but in a rapport even closer—a hateful touch so intimate that I felt my body go limp in helpless fits and spasms of convulsive shuddering under the deep, hypnotic contact.

Then a wave of darkness almost palpable surged up in my brain. I tried to scream, “*Stop it, stop it!*” And a panicky terror flitted in my last conscious thought through my head. *This is why, this is the reason humans and telepaths don’t mix—*

And then a great dark door opened under my senses and I plunged again into unconsciousness.

It was not more than a few seconds, I suppose, before the blackness swayed and lifted and I found myself floating, curled helplessly in midair, and seeing, with a curious detachment, the Theradin’s skyhook below me. Something in the horrid limpness of that form stirred me wide awake.

With a tight band constricting my breathing, I arrowed downward. I had never seen a dead Theradin before, but I needed no one to tell me that I saw one now. The constricting band still squeezed my throat in dry gasps, and in a frenzy of hysteria I threw myself wildly across the cabin, beating and battering on the emergency button, shrieking and sobbing and screaming....

They kept me drugged all the rest of the trip. Twice I remember waking and shrieking out things I did not understand myself, before the stab of needles in my arm sent me down into comforting dreams again. Near the end of the flight, while my brain was still fuzzy, they made me sign a paper, something to do with witnessing that the crew held no responsibility for the Theradin’s death.

It didn’t matter. There was something clear and cold and shrewd in my mind, behind the surface fuzziness, which told me I must do exactly what they wanted, or I would find myself in serious trouble with the Terran authorities. At the time I didn’t even care about that, and supposed it was the drugs. Now, of course, I know the truth.

When the ship made planetfall at Samarra, I had to leave the *Vesta* and trans-ship for Terra. The *Vesta*’s little captain shook me by the hand and

carefully avoided my eyes, without mentioning the dead Theradin. I had the feeling—strange, how clear it was to my perceptions—that he regarded me in the same way he would regard a loaded time bomb that might explode at any moment.

I knew he was anxious to hurry me aboard a ship for Terra. He offered me special reservations on a linocruiser at a nominal price, with the obvious lie that he owned a part interest in it. Detachedly I listened to his floundering lies, ignored the hand he offered again, and told a lie or two of my own. He was angry. I knew he didn't want me to linger on Samarra.

Even so, he was glad to be rid of me.

Descending at last from the eternal formalities of the Terran landing zone, I struck out quickly across the port city and hailed a Theradin ground-car. The Theradin driving it looked at me curiously, and in a buzzing voice informed me that I could find a human conveyance at the opposite corner. Surprised at myself, I stopped to wonder what I was doing. And then—

And then I identified myself in a way the Theradin could not mistake. He was nearly as surprised as I was. I clambered into the car, and he drove me to the queer, block-shaped building which my eyes had never seen before, but which I now knew as intimately as the blue sky of Terra.

Twice, as I crossed the twisting ramp, I was challenged. Twice, with the same shock of internal surprise, I answered the challenge correctly.

At last I came before a Theradin whose challenge crossed mine like a sure, sharp lance, and the result was startling. The Theradin Haalvamphrenan leaned backward twice in acknowledgment, and said not in words —“Haalvordhen!”

I answered in the same fashion. “Yes. Due to certain blunders, I could not return to our home planet, and was forced to use the body of this alien. Having made the transfer unwillingly, under necessity, I now see certain advantages. Once within this body, it does not seem at all repulsive, and the host is highly intelligent and sympathetic.

“I regret the feeling that I am distasteful to you, dear friend. But, consider. I can now contribute my services as messenger and courier, without discrimination by these mind-blind Terrans. The law which prevents Theradin from dying on any other planet should now be changed.”

“Yes, yes,” the other acquiesced, quickly grasping my meaning. “But now to personal matters, my dear Haalvordhen. Of course your possessions are held intact for you.”

I became aware that I possessed five fine residences upon the planet, a private lake, a grove of Theirry-trees, and four hattel-boats. Inheritance among the Theradin, of course, is dependent upon continuity of the mental personality, regardless of the source of the young. When any Theradin died, transferring his mind into a new and younger host, the new host at once possessed all of those things which had belonged to the former personality. Two Theradin, unsatisfied with their individual wealth, sometimes pooled their personalities into a single host-body, thus accumulating modest fortunes.

Continuity of memory, of course, was perfect. As Helen Vargas, I had certain rights and privileges as a Terran citizen, certain possessions, certain family rights, certain Empire privileges. And as Haalvordhen, I was made free of Samarra as well.

In a sense of strict justice, I “told” Haalvamphrenan how the original host had died. I gave him the captain’s name. I didn’t envy him, when the *Vesta* docked again at Samarra. “On second thought,” Haalvamphrenan *said* reflectively, “I shall merely commit suicide in his presence.”

Evidently Helen-Haalvordhen-I had a very long and interesting life ahead of me.

So did all the other Theradin.

Transcriber's Note:

This etext was produced from Fantastic Universe, March 1956 (Vol. 5, No. 2). Extensive research did not uncover any evidence that the U.S. copyright on this publication was renewed.

Obvious errors have been silently corrected in this version, while minor inconsistencies have been kept as is.

*** END OF THE PROJECT GUTENBERG EBOOK DEATH BETWEEN
THE STARS ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
