MECHANISM ***

ESCAPE MECHANISM

BY CHARLES E. FRITCH

*Being a world unto one's self
is lonely. Even the poor amoeba
creature from Venus knew that....*

**[Transcriber's Note: This etext was produced from
Worlds of If Science Fiction, April 1955.

She found herself floating again in that strange half-familiar world of murky fluid where only she existed. The liquid was all around her, pressing gently on all sides with a force that cushioned but did not restrain. It was a pleasant sensation, a calming one; the cares of the outside world were non-existent and therefore meaningless.

She drifted, unhampered by the fluid. There seemed to be no direction but outward. Her thoughts went out and they returned with impressions.

This was her world and she was the center of it. It pleased her to think this. It was an alien pleasure that was mental and without physical counterpart.

There was quiet, stillness, a peace she had never known. The fluid flowed about her like a great silent sea that held no sound, no movement.

It seemed natural that she should be here.

She was content.

At the accustomed time, the autohypnotics in Miss Abby Martin's body forced her to the threshold of consciousness and cleared her brain of the fog of sleep. Slowly, she opened her eyes to the morning brightness of her bedroom and stared at the vacant skylight and the blue expanse of sky beyond it, not quite comprehending where she was. The cloudfoam cushions of her bed gave credence to the floating sensation she had had during her dream, and for a few seconds she lacked orientation.

Then her eyes wandered about the room, to the closed door of the raybath stall, the retracted dressing table, the chronometer label that told her it was March 14, 2123 at thirty seconds past 0700 hours. The subtle intonation of her favorite music, Czerdon's "Maze of Crystal" murmured softly from the walls.

Awareness came then, and she lay back on the bed and tried to follow the intricate crystal melodies. But a frown ridged her brow, and she wondered at the strange dream instead. She had found it pleasant enough, for she

rather enjoyed the languid floating sensation, the feeling of being self-sufficient, a world unto herself. Yet the very fact of the dream's existence in a world where such things were manufactured disturbed her, for she had taken no dream-pills the night before, nor at any of the other times the dream had come. The incident made her almost wish that witchdoctor psychiatrics had not been outlawed twenty years ago, so she might get some inkling of the dream's meaning; but psychiatrists had been pulled forcibly from the web of society when mental derangements were put under the jurisdiction of the Somaticists.

Overhead, a rocket thundered, shaking the house with a gentle hand, and Abby turned her attention to the sound, momentarily forgetting the dream. Through the one-way skylight, she saw a speck of light accelerate beyond vision. She shook her head impatiently.

Rush, rush, rush—that was all people seemed to think about these days. Go to the Moon, go to Mars, go to Venus. In time they might go to the outer planets and perhaps even try to reach the stars. As though they didn't have enough trouble right here on Earth! All they did, it seemed, was hunt down poor beasts from the various planets and bring them back to Earth to put in cages and tanks on display, ostensibly to "learn more of the planets by studying their inhabitants." To Abby, it seemed cruel and unnecessary.

Like that poor amoeba creature from Venus, she thought, remembering the day last week when she and her niece Linda had visited the zoo to see this latest acquisition. It was a creature captured from the giant oceans of the second planet, a giant amoeba encased in a large transparent tank of murky fluid for paying visitors to see. The creature was supposed to be primitively telepathic, but it seemed harmless enough. Abby found herself sympathizing with it, and it seemed to her at the time that the creature felt this sympathy and was grateful for it. For a brief moment she even had fancied that the Venusian's mind had reached out to her, probing with gentle fingers of thought.

She shook her head at that. Here in the calm clear light of day diffused through the one-way skylight, the anthropomorphic notion was ridiculous; and she mentally chided herself for contemplating such things.

"I must be getting old," she told herself aloud.

In the next thought, she reminded herself that thirty-nine years was not old at all, and in the thought that followed, scolded herself for bothering to defend a statement so obviously rhetorical.

The chronometer ticked silently to 0701, and sighing, Abby rose from the bed and slipped from the translucent one-piece pajamas to stand nude in the center of the bedroom. At a sudden thought she glanced quickly about the

room, for she had the strange uncomfortable feeling that someone was watching her. It was impossible, of course, but she felt ill-at-ease just the same, and a blush of embarrassment stole over her at the thought. The feeling of shameful nakedness persisted even in the raybath stall, and it was a relief to dress and hurry downstairs, routing the unaccountable ideas from her mind.

As usual, Gretchen had busily cleaned the house during the night, silently raying germs and dirt out of existence, and had a warm steaming breakfast-for-two ready by the time Abby had descended the escalator to the dining room.

"Good morning, Gretchen," Abby said.

"Good morning, Ma'm," Gretchen's mechanical voice agreed tonelessly. The robot-maid continued monotonously, "The day will be clear and sunny, with a high of 79 degrees Fahrenheit by 1300 hours—"

"That will be all, Gretchen," Abby interrupted sternly, not interested in facts of temperature and humidity given so mercilessly.

"Yes, Ma'm," Gretchen said obligingly. She turned and went to her closet until she would be needed again.

Abby watched her disappear around a corner and frowned. Sometimes, she thought, the mechanical age could be too mechanical. A simple good morning—

"Good morning, Aunt Abby," Linda said, bounding into sight.

"Good morning, Linda," Abby replied, smiling at the girl's energy. It reminded her of when she was seventeen. "Don't rush your breakfast, dear, you've plenty of time to get to school."

"Yes, Aunt Abby," Linda said, rushing her breakfast. "We're going on a field trip today," she volunteered between gulps of milk. "To the zoo to see the amoebaman from Venus."

Abby smiled. "Amoebaman?" she questioned. "Couldn't it just as easily be an amoebawoman?"

"Amoebas don't have sex differences," Linda said matter-of-factly. "We just call it an amoebaman as a sort of classification because it seems

intelligent."

She finished her meal and dashed across the room. "See you later, Aunt Abby." The door whirled open and shut.

Abby went to the window to watch her, sorry she had brought up the subject of sex classification; yet the question had started out harmlessly enough.... Waiting outside, a boy stood on an island among moving metal sidewalks. Abby recognized him as one who had 'vised Linda very often on questions of homework. At Linda's approach his eyes took new life, and he laughed a greeting. Together, they stepped onto a sidewalk and slowly wound from sight, their hands interlocked. Abby shook her head disapprovingly; this would have to be discouraged. Linda was much too young to have boyfriends. She shook her head. The younger generation never seemed to move slowly—they rushed their lives away.

That afternoon, Abby sat at the broad one-way windows and watched the cars and aircabs zooming overhead like frightened hornets. Suddenly, she wondered where Dr. Gower was these days. Generally he televised her once in a while or dropped in to chat occasionally, and it pleased her that he did. He was her only male companion these days.

That's the way with men, she thought bitterly, nodding to herself, as you grow old, they lose interest in you. Love cannot be founded on a physical basis.

The thought of physical intimacy disturbed her, and she thrust it aside. One thing was certain, above all else: she was determined to protect Linda to the best of her ability, even as she had protected herself.

"Thank goodness for Linda," she thought. "If it weren't for her...."

She let the thought hang un contemplated, for she *did* have Linda; and she had no wish to dwell upon the memory of her brother's accidental death in an aircab crash which had brought Linda into her custody.

She returned her attention to the world outside her window and found nothing there to interest her. Restlessly, she played with the button-controls on the chair's underarm, causing the walls to spring into the simulated life of a three-dimensional telecast. A program called "Old-Time Commercial" was in progress. Abby, like most people, enjoyed this one, laughing at the exaggerated claims and the tuneless melodies which had been foisted upon her ancestors during the years before commercials had been outlawed, and she was disappointed to see it fade for channel identification. It was followed by a program of the latest fashions, some of which were much too brazen for Abby to contemplate without squirming, so she changed stations again with a flick of her forefinger beneath the armrest.

"... direct from the oceans of Venus," a man's voice announced enthusiastically, and Abby found herself staring at the amoeba-like creature she had seen a week earlier at the zoo.

"... believed to be directly related to our own Earth amoeba," the man continued, "except, of course, this one is far from microscopic, being larger than a man. For communication purposes, these Venusian creatures seem to use a form of telepathy...."

Abby mused upon what Linda had said concerning the amoeba's sex, or rather lack of it. She knew that the creatures reproduced by dividing themselves, but she wondered if reproduction came instinctively or by determination. Either way, the method was to be admired, she felt. It was a pity humans were so complicated. An image stirred deep within her, a fragment of some forgotten memory, but Abby did not notice it.

The creature from Venus moved restlessly across the three dimensional screen, extending itself. It seemed to be regarding her with an intense sort of curiosity, as though it were reaching out, enveloping her....

Sunlight spilling through the window, spread a warm languorous pool about her, and she felt pleasantly drowsy. She closed her eyes. After awhile, her head tilted, and the rushing world faded as though it had never been.

She floated, placidly content. She seemed, suddenly, to possess a million eyes that probed about in all directions at once. Her body stretched, elongating itself, and moved forward through a translucent fluid to an

invisible wall, beyond which stood shadowy figures. She focused her mind upon these figures, and they became clear.

There was a little boy gazing at her in awe, his nose pressed against the glass in fascination, not certain if he should be frightened or not. Mentally, she smiled to herself and directed her thoughts to the boy, telling him not to be afraid. There were several children there, and Abby turned her attention to another.

It was Linda! Linda staring with wide, curious eyes. And next to her a man. Dr. Gower. Her heart leaped—

And she awoke with the warm sunlight streaming in upon her, her heart pounding unaccountably. She looked around. She was still in her front room before the windows. The television was going, presenting the newscast that followed the zoo program.

It was just a dream, but it had seemed so real that it still disturbed her minutes after she was fully awake. For awhile, she was not even certain that the dream had not been real and that this now was not really a dream, that reality and dreaming had not somehow suddenly changed places.

Abby was still sitting at the window when Linda came home from school. She watched as Linda and the boy came down the moving sidewalk and stepped off on the island before the house. They stood talking for a moment, then Linda rushed up the walk. The door whirled open and shut, and Linda instead of looking for Abby as was her habit, went straight to the escalator.

Abby called, "Linda!"

The girl paused. "I—I'll be back down."

"I'd like to see you right now, please," Abby's tone, though not hostile, was unrefusable.

Linda appeared hesitantly in the doorway, hands behind her.

Abby smiled pleasantly. "Who was that boy, dear? I don't think I know him."

"Jimmy Stone," Linda said, excitement creeping into her voice. "He lives over in Sector Five, and he's in my history class at school."

Abby recognized the symptoms and frowned mentally at the diagnosis. "He's probably a very nice young man, but—"

"He is, he's very nice," Linda agreed quickly. "He's going to be an astronautical engineer. Look what he made me in plastics class."

She drew her hands from behind her and held a scarlet rose cupped in them. It looked soft, as smooth as though it had been just plucked, as though it held a fragrance that was not artificial.

"It's very nice," Abby admitted, but she wondered how in this age of intense specialization a future astronautical engineer had managed to enroll in a plastics class to waste his time making pseudo-roses. Despite her wish to the contrary, she found herself briefly admiring the youngster, then told herself it was a case of puppy love that had inspired the frivolity. "But don't you think you're a little young to be thinking about boys?"

"No," Linda said defensively, pouting. "I like Jimmy and he likes me. I don't see why we shouldn't see each other."

"You're in the same class," Abby pointed out; "that should be enough. After all, you're only seventeen."

"Yes," Linda flared in annoyance, and rushed on in a sudden torrent, "then I'll be eighteen and then nineteen and then twenty and then thirty. If I wait long enough maybe I'll let life pass me by, like—" She paused, eyes wide and regretful at what she was about to say.

Abby smiled gently, but a cold chill gripped her. "Like me?" she said. "You're afraid of being an old maid like me, is that it?"

She hated to use the expression "old maid," but she knew that was what many people called her. She minded the name more than she admitted even to herself, for the words held an unpleasantness, a loneliness she didn't feel—very often anyway. But then she had Linda for company.

Linda's features softened. "I'm sorry, Aunt Abby," she said quietly.

"That's all right, child, I understand how you feel," Abby said. "Now, you go along up and take a shower and get yourself ready for supper, and maybe we'll talk about it later."

Linda nodded soberly and turned away.

Abby sat in the silence of the room, listening to the soft whisper of the escalator. It hurt her to think that Linda wasn't going to show her the plastic rose at first. You had to be firm in these matters, though, to prevent worse trouble. If care weren't taken, Linda might rush off and be married before she was ready. This was a difficult time for the poor thing, that was certain, but she'd get over it. The little things in a child's life always seemed more important than they really were; that's why there were older people to guide them.

Her own mother had been very strict, and Abby saw no reason to regret it. If it hadn't been for that, she might have married the first boy she'd met. She tried to recall him, but somehow she couldn't, and only a vague image came to mind. It disturbed her to have that blank spot in her memory, but Somatic drugs had consistently failed to fill it in.

Linda came in a few minutes later, freshly scrubbed but not convinced.

"All ready, dear?" Abby said pleasantly.

She got up and put a consoling arm about the young girl. Together they went into the dining room, where Gretchen had silently placed the appropriate food a few minutes before.

They ate in silence, with only the sounds of eating and an occasional whir from the robot-maid as she appeared and disappeared with dishes. Linda was moody, thoughtful.

"How was the field trip, dear?" Abby wondered.

"All right," Linda answered. "The Venusian amoeba is very much like our own, the man said. It even reproduces itself by division."

"Isn't that nice," Abby said, just a bit hesitantly, uncertain that reproduction by any means should be discussed. However, if they taught it in school—

"I feel sorry for it," Linda said.

Abby stared at her.

"Having no one to love," Linda went on, a faraway look on her face, "no one to love it. If it has any feelings, it must be very lonely."

Abby made an irritable stab at a piece of synthetic potato on her plate. "Nonsense," she snapped. "You're talking like a silly schoolgirl."

On second thought, she decided that Linda *was* a silly schoolgirl and would naturally talk like one; she was still a little girl, dependent for protection upon her Aunt Abby. That thought gave her some measure of comfort.

"I feel like an amoeba sometimes," Linda said, poking restlessly at a piece of meat on her plate.

"Sometimes I wish you were, dear," Abby said, feeling strangely annoyed by the statement. "Now, eat your steak before it gets cold."

"Don't you ever get lonely, Aunt Abby," Linda asked. "Suppose Dr. Gower went away, wouldn't you be lonely?"

"Dr. Gower is not going away," Abby pointed out.

"He might," Linda insisted. "You haven't seen him for three days now. He might be gone already."

Despite herself, Abby felt sudden panic. "He's probably busy. Doctors are busy these days."

"He could have called."

"Linda, eat your supper," Abby said sternly, "and stop this nonsense. Besides, what difference would it make. One person doesn't make the world begin or end. Dr. Gower and I are good friends, but we must adjust to these things. If he is gone away, he's gone, and that's all there is to it!"

She tried to make her voice sound calm, but there was a sinking feeling in her stomach, and a small questioning voice in the back of her mind kept asking did he? did he? did he? Furiously, she thrust the thought aside.

"I saw him at the zoo today," Linda said.

"You did?" Abby said, relieved, and then she thought of her dream of the zoo and of Linda standing there and Dr. Gower beside the girl. Could she be psychic? No, there was a simpler explanation. "I saw you both there," she went on, smiling, "on television this afternoon."

Linda frowned. "But Dr. Gower didn't arrive until the program was over, Aunt Abby."

"I saw you," Abby insisted.

"But I'm certain of it."

"You must be mistaken, dear," Abby said in a tone of finality. And that settled that.

The doorbuzzer sounded, and Gretchen whirled to answer it. Abby pressed a button beneath the table, and the image of Dr. Gower appeared on a small screen set invisibly in the opposite wall. She could feel her blood accelerate at the sight of him, but she wondered why he looked disturbed.

She rose. "I'm going in to see Dr. Gower, dear," she told Linda. "Now, don't rush your food."

Linda nodded abstractedly. She wasn't in a rushing mood.

"Abby, how are you?" Dr. Gower said warmly, at her approach.

"Very well, thank you, Tom," Abby said. "I thought I might have to get sick to see you."

"I was busy," he explained. "The colonization of space brings up a great many new medical problems. How's Linda?"

"Fine. I'm afraid, she's beginning to have a slight case of puppy love; I'm sure it can be discouraged in time, though."

Dr. Gower hesitated. Then he said, "Linda's a normal young girl, Abby. You can't stifle her natural desires forever."

"I not only can, but I will." To cushion the harshness of the statement, she added, "At least until she's mature enough to decide these things for herself. She's still a child."

"A great many women get married at eighteen," Dr. Gower pointed out. "Physically, it's a good age for marriage, and a psychology going against the physical grain isn't going to help."

"There are such things in life, Dr. Gower," Abby said a bit coldly, "as moral considerations. We're not animals, you know."

"It might help sometimes," Dr. Gower mused, "if there were a little more animal in us and a little less so-called human."

Abby found her enthusiasm for seeing Dr. Gower ebbing, being replaced by what she considered a justified annoyance. Dr. Gower knew her feeling about Linda. Something seemed to have changed his tactics. She did not like the change.

"If you don't mind," she said, "I'd like to bring up Linda in my own way. The courts made me legal guardian of Linda until she's twenty-one, and I intend to protect her until then to the best of my ability."

"By that time, you'll have her so confused about the world she'll be defenseless against it. I never said anything before, Abby—"

"And now is a poor time to start!" Abby's voice was like ice. "I'm sorry, Dr. Gower, but if you persist in talking this way, I'll have to ask you to leave. Linda is in my charge, and I won't stand for interference, even from you."

The doctor's shoulders slumped dejectedly. "Do you know why you were chosen guardian, Abby," he said slowly.

"Of course. I was the nearest relative. Why bring that up?"

Dr. Gower shook his head. "Nothing," he said, after awhile. "Nothing at all. I came around to say goodbye, Abby."

Abby wavered, the ice in her melting. "Goodbye?"

"I'm leaving for Venus," he said, "the day after tomorrow. They need doctors up there, and I can probably do more good there than here. Besides, I'd like to investigate these amoeba creatures; I suspect they have more intelligence than we give them credit for."

"I—I'll be sorry to see you leave, Tom."

"I came to ask you to go with me. You know how I feel about you, Abby; I thought I'd try just once more."

"I couldn't leave Linda," Abby said.

"The standard excuse," he reminded her, his voice more weary than bitter. "What Linda has needed all these years was a father, Abby. You're giving her a warped viewpoint."

"The Somaticists don't think so," Abby flung at him.

He crimsoned. "Somatics aren't the answer. Our era has become so mechanical that people have come to think that pressing a button is going to cure the evils of the world. Pills and pushbuttons are fine in their place, Abby, but they're not the answer, not the complete one anyway. At one time, they thought psychiatry was the answer; they were wrong there, too. The answer's probably a combination of the two."

"I'm not looking for the answer to anything," Abby said wearily. "I just want to be let alone."

Dr. Gower nodded and turned to go.

"Have a nice trip," Abby said, trying to sound cheerful, "I'm sorry we had to argue like this." The thought of his leaving brought a sinking sensation which she tried to thrust off and couldn't. But there was Linda to think of; the girl couldn't go to Venus.

At the door, Dr. Gower hesitated. "I don't know if I should tell you this; it might help, and it might not." He paused again uncertainly and then went on in a decisive tone. "Linda's your own child, Abby."

She looked at him, puzzled. "Of course. The courts—"

Dr. Gower shook his head impatiently. "I don't mean that. I mean Linda was actually born to you."

The words sank in, but Abby found them meaningless. Two and two did not make five no matter how many times you added them. There was a tense silence, but she didn't know what to say to fill it.

"That's what happened in your blank spot, Abby," Dr. Gower went on. "You ran away from home when you were twenty-one, because your mother was

too strict, because she acted just like you're acting with Linda. Before she could find you again, someone else had. You were pregnant."

Abby's brow furrowed. "You mean—" the thought completed itself, and a look of horror replaced the frown. "That's a horrible thing to say, even in a lie."

"I wish I were lying," Dr. Gower said earnestly. "You didn't remember anything that had happened, and were still dazed for nearly a year afterward. Your subconscious used amnesia as an escape mechanism, and you forgot the incident, repressed it without realizing it. An escape is sometimes possible only in the mind, where Somaticists are often helpless. I didn't say anything before, but now I'm afraid Linda may be made to suffer if I don't."

Abby stared at him in shocked silence. She said, after awhile. "It's not true, it can't be."

Dr. Gower shrugged. "I'm sorry, Abby, it is. It's not Linda you're worried about, it's yourself; you're afraid to face reality."

"Get out," Abby said slowly, hating him for that. Her voice rose the least bit. "I won't listen to these lies."

"I thought it might help. Say goodbye to Linda for me." The door closed behind him with a click.

Abby stared at the closed door, a small portion of her was calm, the rest chaotic. The calm portion wondered why she should be so disturbed by something so obviously impossible. All these years she'd been wrong about Dr. Gower, trusting him as a friend. For what he said was untrue, of course. It had to be. And yet why couldn't she remember things? It was only eighteen years ago and important things had happened in that year, but somehow her memory bypassed their happening. It was like reading a book with several pages blank; you knew from later pages what had happened, but the actual experience of the events was lost. Could it be—the thought came despite her—could it be that she'd had amnesia, that Dr. Gower had really told her the truth, that someone had actually—

"No. He was lying," she told the room.

"He never lied before," Linda said quietly from the doorway.

"You—heard?"

Linda nodded.

Abby tried to smile. "I'm afraid, dear, that Dr. Gower is like all men. When he couldn't have what he wanted—" her face clouded at the thought—"he tried to shock me, to hurt me, to make me ashamed...."

"Would it make you ashamed to have me for a daughter?"

Abby's heart beat quickly. "Of course not, Linda. But the circumstances—"

"I see," Linda said slowly. "They have a name for children like me; that's what you're ashamed of. Or maybe, as Dr. Gower said, you're afraid for yourself!"

"But it's not true, Linda, don't you see?" Abby insisted.

She put her arm on the girl's shoulder. Linda shook it off; tears welling in her eyes.

"You don't even want to know," the girl accused. "You don't even care." And she turned and ran from the room.

The escalator whispered, and Abby stood in the center of the room looking at the empty doorway. She stood on the brink of a great precipice, balancing precariously, and for a brief moment she found herself believing what Dr. Gower had said. He was a fine man, and good, and he would not lie to her. Things her brother had said came to mind, once-harmless statements that seemed to take on new significance, as though he'd said them to prepare her for this moment. And suddenly, very suddenly, the world was tottering; dazedly, she made her way to a chair and sat limply in it.

Dr. Gower was gone now, and she would never see him again. She knew that, and she knew that despite the things she'd said, that it did matter that he was going. But then she had Linda to think of. Or was it really Linda that concerned her? She could take the girl along, certainly; that would even clear up the problem of Jimmy Stone. Was it really the marriage she feared, a fear based upon some secret mental block in her mind? The doubt returned then, and she wasn't sure. She wasn't sure of anything anymore. Abby had to think. She had to quiet her nerves and the frantic jumbled thoughts that had begun to race through her mind.

She felt dizzy and held a hand to one of the walls to steady herself as she walked to her bedroom. From the dressing table drawer she took a bottle of dream pills. The label was fuzzy to her eyes, but the word *Danger* stood out in bold letters. Abby swallowed three of the pills, which was two more than the safe dosage, and lay across the bed, eyes closed. The door to the room closed automatically.

"It's not true," she told herself again, a desperate urgency to her voice. "I've got to get away from these thoughts. Got to get away. Got—to—escape."

She felt drowsy, but the thought of what Dr. Gower had said persisted. It couldn't be true. It couldn't. And yet it might be; it was the possibility that disturbed her. That blank spot. Eighteen years ago. Eighteen years...

She drifted into a restless sleep. Mentally, she traveled across the familiar plains of her past to that strange dark canyon she couldn't recall. Her mind hovered frightened above the depths, failing to see through its darkness; then she passed to the other side, to her childhood, to when she was a young girl and her mother was alive.

The scene burst upon her with vivid clarity, and she found herself reliving it. It was there, all of it. The home life, protecting and yet restraining. Her dissatisfaction. The secret determination. The running away in the dead of night. It was all there, just as Dr. Gower had said.

"But it's a dream," she murmured, "just a dream."

Yet it seemed a reality. She could feel the cool night press upon her as she made her way slowly through the strange-familiar darkness and descended into the depths of the canyon. The feeling of having been here before was with her, and it brought terror with it. She walked on, looking to either side, listening fearfully. And then she stopped, her blood becoming ice.

There was a man before her. She could see only his eyes, but they were cruel eyes, savage and lustful.

Knowledge came then, bursting over her in a raging tide. She screamed and ran, her footsteps echoing frantically as she hurried through the darkness,

looking for an opening for a protecting light. But no opening appeared, no light came. She ran until she was exhausted, and then she sank to the ground panting trying to still her spasms of breath. There was a small sound, as of the scraping of a shoe and she looked into the eyes again.

She screamed again and again and again not knowing where screams ended and echoes began. She put her hands over her ears and screamed into the darkness. She could feel hands reaching out for her and she shrank away from them.

Her mind was a playground for terror. She had to escape. She had to.

(But sometimes the only escape is in the mind!)

The hands reached out. She was suddenly falling, down, down, down. Calmness came, and a grateful thought appeared: she had escaped. Nothing else mattered; only that....

She stopped falling. The mist grew thick, thicker; it became dense; it became liquid. She could not feel the beating of her heart, but her mind was calm and it looked about with a detachment that was intellectual.

She was floating again, floating silently through a world of murky fluid. The liquid was pressing with a force so gentle it almost did not exist. It enveloped her like a protecting shield.

She drifted. There seemed to be no direction but outward. Her thoughts went out and they returned with impressions. This was her world and she was the center of it. There were no problems here, no encroachments on existence or security. It was like a return to the womb. Womb? she thought. She turned the word over in her mind and found the concept alien. She regarded it intellectually, at leisure.

Time passed silently, without incident, without measurement. It had no meaning, no referent.

Curious after awhile, she went forward, her mind impinging upon shadowy figures behind the transparent barrier. She focussed her attention upon them, and the image cleared.

There was a man there, and a woman, and a girl. She could hear them as they spoke.

"I don't know why you wanted to come here, Abby," the man was saying. "You'll see enough of these creatures on Venus."

"This one is special," the woman said slowly, tasting the words like some unfamiliar food. "It's what made me change my mind about—things. It must be very lonely."

"Bosh," the man scoffed gently. "Intelligent or not, an amoeba doesn't have feelings of loneliness."

"Doesn't it?" the woman wondered. "Perhaps not at first. But being able to probe the minds of humans and sympathize with them yet not contact them can...."

"We'll be late for the rocket, Mother," the girl said. "Jimmy promised he'd be down to see me off and let me know if he can go to the Venus Academy next year."

"All right, Linda, we're going now."

At the door, the woman turned for a last look; her thoughts were thoughts of sorrow, of pity, of—regret, perhaps.

"You'll learn much of the world this way," the thoughts came, "and you'll have time to readjust. Knowledge will pyramid gently, and with it will come wisdom. After awhile, escape won't be necessary. You'll want to return then and be a part of your world. Meanwhile, I must help my own people; this is the best way for both of us to escape."

The woman linked arms with the man and the girl then, and the three of them went out.

Silence returned, bringing with it a troubled wonderment. Then the murky fluid flowed past all vision, and the world returned, safe and familiar. The thoughts returned briefly, as echoes, but they were unfamiliar this time and meaningless.

But it was not always so, and it would not always be, for contemplation bred curiosity, and curiosity bred knowledge, and knowledge bred desire, and desire the ways and means of accomplishment.

Meanwhile, there was quiet, stillness, a peace she had never known. The fluid flowed about her in a silence that held no sound, no movement. It was

womb-like, protective.

It seemed natural that she should be here.

For the moment, she was content.

*** END OF THE PROJECT GUTENBERG EBOOK ESCAPE
MECHANISM ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
