DRUG THEMES IN SCIENCE FICTION

by

Robert Silverberg

November 1974

National Institute on Drug Abuse
11400 Rockville Pike
Rockville, Maryland 20852

This volume, part of a Research Issues Series, was prepared for the National Institute on Drug Abuse by Documentation Associates, Box 25892, Los Angeles, California, under Contract Number HSM-42-73-222.

DHEW Publication No. (ADM) 75-190
Printed 1975

FOREWORD

The issues of drug use and abuse have generated many volumes of words, all written in an attempt to explain the “problem” and suggest the “solution.” Data have been generated by researchers from many disciplines, each looking at a particular aspect of an issue. The present booklet is one of a new series intended to aid researchers who find it difficult to find the time to scan, let alone read all the information which exists and which continues to be published daily in their area of interest. An attempt has been made to focus predominantly on empirical research findings and major theoretical approaches.

Included in volumes 1 through 7 of the series are summaries of the major research findings of the last 15 years, formulated and detailed to provide the reader with the purpose, methodology, findings and conclusions of previous studies done in the topic area. Each topic was chosen because it represented a challenging issue of current interest to the research community. As additional issues are identified, the relevant research will be published as part of this series.

Several of the volumes in the series represent a departure from the above description. These also represent challenging issues, and issues of current interest; they are, however, virtually unexplored areas which have received little attention from the research world. For example, the subjects of drugs and the visual arts, science fiction, and fiction—aspects of contemporary life which impact on all of us—are explored here by writers who have been deeply involved in those fields. Their content is perhaps provocative, and certainly stimulating.

The Research Issues series is a group project of staff members of the National Institute on Drug Abuse, Division of Research, Behavioral and Social Sciences Branch. Special thanks are due to the continued guidance and support of Dr. Louise Richards and Dr. Norman Krasnegor. Selection of articles for inclusion was greatly aided by the suggestions of a peer review group, researchers themselves, each of whom reviewed a topic of particular interest. It is my pleasure to acknowledge their contribution to the project here.

Dan J. Lettieri, Ph. D.
Project Officer
National Institute on Drug Abuse

Robert Silverberg is the author of many science-fiction novels, including *The Masks of Time*, *Son of Man*, *A Time of Changes*, *Dying Inside*, and others, as well as numerous short stories. He has won two Hugo Awards and three Nebulas for novel and short story. He is a past president of the Science Fiction Writers of America.

Mr. Silverberg has also written several non-fiction books on historical and archaeological subjects, including *The Pueblo Revolt*, *Mound Builders of Ancient America*, *The Challenge of Climate*, and *The Realm of Prester John*. Born and educated in New York City, Mr. Silverberg now lives in Oakland, California.

PREFACE

The explosive upsurge in the use of mind-altering drugs by middle-class Americans in the past decade has been a conspicuous and much-discussed phenomenon of our times. Beginning in the mid-1960's and peaking, perhaps, about 1970, the use of marijuana, LSD, and even heroin has taken on the character of an epidemic, not only among the young but among many citizens of mature years. Though at present the spread of heroin addiction appears to be once more confining itself to low-income groups and LSD has become less fashionable among the experimental-minded, certainly marijuana has established itself as an almost universal drug used regularly by millions of Americans, and use of more potent mind-alterers remains heavy if no longer greatly accelerating.

During the period of social dislocation—marked by radical changes in styles of clothing and dress, assassinations of political leaders, disruption of the governmental processes as a response to a war commonly seen as immoral, rampant inflation, and other traumas and upheavals—that corresponds to the spread of drug use in the United States, science fiction has become one of the most popular specialized subgenres of literature. Once the obscure amusement of a few thousand cultists, science fiction is now read by millions; such novelists as Kurt Vonnegut, Vladimir Nabokov, Michael Crichton, and others have reached the best-seller lists with works of science fiction; motion pictures such as *2001* have won wide audiences and science fiction has been conspicuous in the theater and in the themes of popular music. While this increase in the popularity of science fiction is in part a response to the wide publicity accorded the space explorations of the United States and the Soviet Union, I think it is much more to be ascribed to some of the same forces that have stimulated so much interest in drug-taking. That is, in a period of social upheaval such as we have experienced since the death of John F. Kennedy and the escalation of the Vietnamese war, conventional modes of behavior lose their appeal, and fascination with the bizarre, the alien, the unfamiliar, the strange, with all sorts of stimulation that provide escape from the realities of the moment, increases at a great rate. Science fiction not only offers those values in abundance but also, in its facet as satirical commentary on the here-and-now world,

provides a perspective on our rapid social changes that has great appeal to readers, especially the young.

Surveys have shown that the audience for science fiction is primarily adolescent and above-average in intelligence; most of the readers are between 15 and 25 years of age (though of course some remain addicts of the genre throughout their lives). Therefore, there is great correspondence between the main drug-using and science-fiction-reading segments of the population, and it is worthwhile to examine science fiction for insights into the use of mind-altering drugs and for views of what drug use may lie in the future.

For the present research project I have compiled a group of English-language short stories and novels which deal with the use of mind-altering drugs, all written since 1900 and falling within the literary category of science fiction. I have avoided inclusion of that large body of stories dealing with drugs whose effects are primarily on the body rather than the mind: immortality serums, for example. Some of these stories date from the earliest years of the science-fiction genre, notably from the 1920's and 1930's when mass-market science-fiction magazines first began publication. Not surprisingly, however, the majority of the stories within the study date from the post-1965 period, when the use of drugs first pervaded the national life to its present extent. For reasons explained in the accompanying introductory essay, science fiction is more often a reflection of existing societal trends than a prediction of trends to come. The upsurge in drug use is precisely mirrored by the upsurge in the use of such themes in science fiction.

Science fiction is as much a guide to where we are as it is a vision of where we are going. A literature so popular with the young, commanding so intense and devoted a following, can be of significant value in revealing the patterns contemporary society is taking and will take in the years just ahead.

OVERVIEW OF DRUG THEMES IN SCIENCE FICTION

Defining science fiction is no easy task. Some of the definitions that have been proposed are so loose that they would qualify a book like Sinclair Lewis' *Arrowsmith* as science fiction—it surely is “fiction about science”—and others are drawn so narrowly that they would exclude much of what is published today in science-fiction magazines and books. With that caveat in mind, therefore, I offer one of the more flexible definitions, one which I think does cover the greater part of what I understand to be science fiction:

Science fiction is that branch of fantasy which engages in imaginative speculation about the impact of technology on human society.

By classing science fiction as a branch of fantasy, I make it a subdivision of that vast literary genre that includes Homer's *Odyssey*, Milton's *Paradise Lost*, the Norse sagas, *Alice in Wonderland*, much of Poe, and so forth. Placing the emphasis on technology, however, requires science fiction to have a certain systematic content, an underlying rationale of theme. A story about a vampire is pure fantasy; a story that rationalizes vampirism in terms of metabolic phenomena is science fiction. It is the attempt at inducing a willing suspension of disbelief by supplying a plausible scaffolding for the implausible that gives science fiction its identity within the greater realm of fantasy.

But because science fiction is a form of fantasy, it is ideally suited for the exploration of drug-related phenomena. A drug is a kind of magic wand; but it is a chemist's magic wand, a laboratory product, carrying with it the cachet of science. By offering his characters a vial of green pills or a flask of mysterious blue fluid the author is able to work wonders as easily as a sorcerer; and by rigorously examining the *consequences* of his act of magic, he performs the exploration of speculative ideas which is the essence of science fiction.

So in the nineteenth century Robert Louis Stevenson produced *Dr. Jekyll and Mr. Hyde*, Mary Wollstonecraft Shelley devised an elixir of immortality in *The Mortal Immortal*, and H. G. Wells created a whole shelf of drug-related stories, speeding up human motion in “The New Accelerator,” turning beasts into men in *The Island of Dr. Moreau*, depicting an unseeable phantom in *The Invisible Man*. And in the present

century the use of mind-altering or mind-controlling drugs has become one of the prime vehicles for the speculations of science-fictionists.

In preparing this study of drug themes in science fiction, I have employed the following categorical designations:

Drugs as Euphorics: Drugs that give pleasure in simple unstructured ways, through release from depression and tension, much as alcohol does in our society (though alcohol is not strictly speaking a euphoric, of course).

Drugs as Mind Expanders: Drugs that provide “psychedelic” visions of other times or places or that offer a sensation of oneness with the cosmos as a whole; analogous to LSD in our society.

Drugs as Panaceas: Drugs which, through tranquilizing or neutralizing effects, calm the mind without necessarily inducing euphoria.

Drugs as Mind Controllers: Drugs that enable one entity to limit or direct the activities or desires of another; analogous to brainwashing, and generally associated with totalitarian activities.

Drugs as Intelligence-Enhancers: Drugs which have the specific property of extending or amplifying the rational processes of the mind.

Drugs as Sensation-Enhancers: Drugs whose effects are achieved through amplified or extended bodily sensation-response, perhaps analogous to marijuana in our society.

Drugs as Reality-Testers: Drugs which permit the user to penetrate the “real” realities beyond the surface manifestations of daily life.

Drugs as Mind-Injurers: Drugs used as weapons in biochemical warfare, aimed at the mind.

Drugs as Means of Communication: Drugs that have the specific property of opening hitherto unknown channels of communication between minds.

Two distinct attitudes toward the use of mind-related drugs have manifested themselves in science fiction. One is cautionary: that any extraordinary indulgence in extraordinary drugs is likely to rot the moral fiber of the user, leading to lassitude and general decay of the individual or of society, and ultimately, perhaps, aiding the establishment of a totalitarian

order. The other is visionary and utopian: that through the employment of drugs mankind can attain spiritual or psychological powers not ordinarily available, and by so doing can enter into a new and higher phase of existence.

This latter attitude has become far more widespread since 1965, when middle-class use of hallucinogenic and euphoric drugs in western industrial civilization first began to take on the aspect of a major cultural shift. The cultural assumptions of science fiction as a whole can clearly be seen to follow, rather than to lead, public opinion: most science fiction published in the twentieth century has been mass-market commercial fiction which, however daring its departures from everyday reality, has generally tended to adopt the conventional moral dogmas of middle-class society, as does most commercial fiction. Science fiction of the 1920's and 1930's reveals a remarkable degree of racism no longer acceptable to general readers in what they read (though they may cling to prejudices in daily life). Science fiction of the 1940's and 1950's is marked by casual sexism likewise no longer officially acceptable. And science fiction in general has shown a strong, if implicit, bias in favor of capitalism, the work ethic, Puritan sexual morality, and other pillars of western industrial society. Drug-users in science-fiction stories until quite recently were analogous to heavy users of alcohol in mainstream fiction: their reliance on a consciousness-altering substance was seen as a sign of weakness of character. In the past decade there has been a major cultural shift in our society toward hedonistic behavior, at first furtively, now openly; and this, after the customary lag, has been translated into a shift in the direction of permissiveness in the conventional moral attitudes expressed by popular entertainment. (The private behavior of individuals is almost always far more scandalous than the standards of behavior the public demands in entertainment or from elected officials, but as taboos dissolve in private life they weaken, to a lesser extent, in official public morality.)

Science-fiction writers tend to be no more radical as a group than any other randomly selected cross-section of middle-class educated contemporary citizenry, so far as my extensive personal acquaintance with them has shown; however forward-looking their fictional visions may be, they are, in the main, far from atypical in daily life style. Not only do they conform to prevailing cultural beliefs more than outsiders are likely to

suspect, but, as is true of most who depend for their livelihoods on mass-audience acceptance, they quite readily espouse a surprising conservatism of philosophy in their work. In the past, therefore, professional science-fictionists almost automatically chose a cautionary position for stories embodying drug-related themes, the drugs being symbolic of decay rather than growth, and it is only in the last few years that some writers have felt free to depict the use of certain mind drugs in a positive—even evangelical—light.

The extent of the shift may best be illustrated from the work of a writer who, although he wrote science fiction, cannot be considered a professional science-fictionist nor an advocate of conventional morality, and whose career was conducted almost entirely outside the taboo-ridden assumptions of mass-market publishing: Aldous Huxley.

Huxley's *Brave New World* (1932) is a bitter satiric novel that, as its sardonic title indicates, depicts a utopian world of the future in which children are born in bottles at a State Hatchery and Conditioning Center, designed by the benevolent world state to fit a particular economic niche, and, as adults, kept in line by a generous bread-and-circuses policy. Restlessness is cured by a wondrous drug called *soma*: "... if ever by some unlucky chance such a crevice of time should yawn in the solid substance of their distractions," Huxley tells us, "there is always *soma*, delicious *soma*, half a gramme for a half-holiday, a gramme for a weekend, two grammes for a trip to the gorgeous East, three for a dark eternity on the moon; returning whence they find themselves on the other side of the crevice, safe on the solid ground of daily labor and distraction...."^[1] Those malcontents and nonconformists who cannot accept the soft mechanical pleasures of Huxley's brave new world are exiled to remote islands.

^[1] Huxley, Aldous. *Brave New World*. New York: Harper and Brothers Publishers, 1946. p. 67.

Soma, in *Brave New World*, is implicitly condemned as an opiate, a mind-luller, an instrument of repression. Huxley's negative outlook toward the drug is not, though, an expression of work-oriented Puritan morality so much as a classic liberal-humanitarian distrust of technology: the Huxley of 1932 plainly believed that mankind coddled by drugs was something less than what mankind could be. The young Huxley felt contempt for those who needed mechanical aids or who depended on anything other than the

force of their own intellects. Many years later, however, a very different Huxley experienced the psychedelic marvels of mescaline and LSD, which kindled in him strong esthetic delight and something akin to spiritual ecstasy. When he next attempted the fictional construction of a utopian commonwealth, in *Island* (1962), his outlook on mind-altering drugs was far more sympathetic. In this ideal state of the future one uses not the soporific *soma* but the ecstasy-invoking *moksha*, a mind-expanding hallucinogen. Concerning *moksha* one character says, “Having had the misfortune to be brought up in Europe, Murugan calls it dope and feels about it all the disapproval that, by conditioned reflex, the dirty word evokes. We, on the contrary, give the stuff good names—the *moksha*-medicine, the reality-revealer, the truth-and-beauty pill. And we know, by direct experience, that the good names are deserved.”^[2] Huxley is really talking about LSD, and his tone is that of the acid-evangelist.

[2] Huxley, Aldous. *Island*. New York: Harper and Row, Publishers, 1962. p. 157.

Drug as contemptible anodyne, drug as gateway to higher reality—those are the poles bounding the handling of drugs in science fiction. The older science fiction was preponderantly negative, as, for example, James Gunn’s *The Joy Makers*, published in 1961 but written half a decade earlier, in which a repressive government sustains itself through mandatory use of euphorics. The same theme can be found in Hartley’s *Facial Justice* (1960), and in other works. Even when not used as an instrument of totalitarianism, drugs are often seen as dangerous self-indulgence, as in Wellman’s *Dream-Dust from Mars* (1938), Smith’s *Hellflower* (1953), or Pohl’s *What to Do Until the Analyst Comes* (1956). The prototypes for the imaginary drugs described in these stories are alcohol and heroin—drugs which blur the mind and lower the consciousness.

Much recent science fiction, however, taking cognizance of such newly popular drugs as LSD, marijuana, and mescaline, show society transformed, enhanced, and raised up by drug use. Silverberg’s *A Time of Changes* (1971) portrays a dour, self-hating culture into which comes a drug that stimulates direct telepathic contact between human minds and brings into being a subculture of love and openness. This creates a great convulsion in the society, but the implication is that the change the drug

brings is beneficial. Similarly, in Panshin's *How Can We Sink When We Can Fly?* (1971), a drug called *tempus* that induces travel in time is part of the educational process of a future society. In *The Peacock King* by McCombs and White (1965) LSD is used as a training device to prepare astronauts for the rigors of interstellar travel, and in H. H. Hollis' *Stoned Counsel* (1972) hallucinogenic drugs have become routine aspects of courtroom work. Another view of a society transformed but not necessarily injured by mass drug use is Wyman Guin's *Beyond Bedlam*, dating from 1951, in which schizophrenia is desired and encouraged and is induced by drugs. In Silverberg's *Downward to the Earth* (1971) hallucinogens play a part in ecstatic religion on another world.

A variant of the mind-expanding drug is the intelligence-enhancing drug, long a common theme in science fiction. Some recent exponents of the theme are Brunner's *The Stone That Never Came Down* (1973), Dickson's *The R-Master* (1973), and Disch's *Camp Concentration* (1968).

Not all depiction of drugs in recent science fiction is sympathetic, of course. Aldiss' *Barefoot in the Head* (1970) shows all of Europe thrown into confusion by the "acid-head war," in which an Arab power doses the whole continent with psychedelic weapons. (Aldiss does indicate at least peripherally that the new tripped-out culture emerging in war-wrecked Europe is not entirely inferior to its predecessor.) Chester Anderson's lighthearted *The Butterfly Kid* (1967) depicts hallucinogenic drugs as weapons employed by aliens, whether mind-expanding, mind-contracting, or mind-controlling. In the horrendously overpopulated future of Harry Harrison's *Make Room! Make Room!* (1966), LSD and marijuana are the best available escapes from the daily nightmare that is life; in a similarly crowded world imagined by Doris Pitkin Buck in *Come Where My Love Lies Dreaming* (1964) the drug of choice is nothing we have today, but rather one that gives the user the vicarious experience of existence as a dinosaur! However different the details, though, the stories say the same thing: that fortitude is not enough, that chemical assistance will be needed.

The stories in the sample chosen for this project illustrate the whole range of drug themes in science fiction, from the plausible to the fantastic, from the horrifying to the ecstasy-inducing. In a world where man and his technological marvels must coexist along an uneasy interface, science

fiction indicates some of the possible impact areas in the decades and centuries ahead.

ANNOTATED BIBLIOGRAPHY

The science-fiction works selected for this bibliography are arranged chronologically within the categories described below.

Primitive Period circa 1900–1935. Science fiction was then, at least in the specialist magazines, a crude and artless form, and the stories tend to be skeletal and formula-ridden. Typically, a scientist working in secret (often a mad scientist) devises a drug whose effects operate on the mind in some extreme fashion, and through secret experiments demonstrates the perils of this drug. Examples: Barnes, Binder, Fearn, Gatter, Hall, etc.

Predictive Period circa 1935–1965. As the genre matured, authors began to seek greater complexity of style and structure in their fiction, and to achieve greater thematic perception. The stories of this period characteristically attempted to consider the most wide-ranging consequences of drug use; the authors themselves typically had had no experience with drugs other than alcohol, and based their ideas partly on imaginative projection and partly on the reports of such early experimenters with drugs as Baudelaire and deQuincy. Examples: Guin, Pohl, Collins, Huxley (1932), MacDonald, Hartley, Gunn.

Contemporary Period circa 1965 to date. With drug use now a matter for the news media as well as for solitary experimenters and literateurs, experience with mind-altering phenomena grows; many authors now sample marijuana and LSD and use their experiences as a basis for projections of trends. The changes in society are presumed to be permanent and become fixtures in stories, so that characters in a story set in 1999 use drugs like marijuana and LSD as casually as characters in a futuristic story written in 1950 would use cigarettes and alcohol. Drug use is taken for granted in the future, and new uses are postulated as an outgrowth of a richness of drug experience not available to earlier science-fiction writers, who had neither the personal experience nor the wealth of published data that present-day writers may draw upon. Examples: Aldiss, Spinrad, Silverberg, Dick, Anderson, Disch, Moorcock, Brunner.

**ANNOTATED BIBLIOGRAPHY
PRIMITIVE PERIOD
(1900–1935)**

Author: Pratt, Fletcher and Lester, Irvin
Title: The Roger Bacon formula
Journal: *Amazing Stories*, Vol. 3, No. 10, 940–948
Publisher: Experimenter Publishing Company, New York
Date: January 1929
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Medievalist rediscovers lost manuscript in which Roger Bacon provides the formula for *mandragordeum*, a drug that induces “transportation of the mind.” Taking it, the experimenter finds himself freed from his body and journeying to Venus; a vivid vision of life on the second planet ends only when the drug wears off. Fearing addiction, he never tries the drug again, though he admits a temptation to more tripping.

Author: Harris, Clare Winger
Title: The diabolical drug
Journal: *Amazing Stories*, Vol. 4, No. 2, 156–161
Publisher: Experimenter Publishing Company, New York
Date: May 1929
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: Scientist develops a chemical which, by retarding the voltage of the brain’s electrical activity, halts the aging process. An experiment on a human is performed, the subject being the scientist’s beloved, who is six years older than he is; he intends to hold her at the same age until he has caught up. She sinks into a kind of stasis. Unable to perfect an antidote, he injects himself also, and the two of them enter a strange suspended animation in which extreme psychological effects of the metabolic slowdown manifest themselves.

Author: Huxley, Aldous
Title: Brave New World

Publisher: Chatto & Windus, London, England
Pages: 214 pp.
Date: 1932
Format: Novel
Descriptor: Drugs as panaceas
Annotation: In mechanized, standardized utopian world of the future, where human beings are synthetically produced in incubators and conditioned for optimum social stability, a drug called *soma* serves as the utopiate of the masses, distracting and tranquilizing those who might otherwise become restless in their too-comfortable lives.

Author: Keller, David H.
Title: The literary corkscrew
Journal: *Wonder Stories*, Vol. 5, No. 8, 867–873
Publisher: Continental Publications, New York
Date: March 1934
Format: Short story
Descriptor: Drugs as intelligence enhancers
Annotation: Satiric story. A professional writer discovers he can write only when in physical pain, and requires his wife to drive a corkscrew into his back to get him started. But the pain of the corkscrew is impossible to sustain for long, and they seek medical help. The doctor they consult discovers that it isn't the pain itself but rather certain hormones secreted as a response to the pain that encourages literary production, and synthesizes a drug that makes writing easier. Doctor takes his own drug and writes a best-seller.

Author: Fearn, John Russell
Title: He never slept
Journal: *Astounding Stories*, Vol. 13, No. 4, 56–67
Publisher: Street & Smith, New York
Date: June 1934
Format: Short story
Descriptor: Drugs as intelligence-enhancers

Annotation: Scientist concocts a protein-based drug that frees the subject from all need to sleep. Narrator takes the drug and enters into a condition of enhanced perceptivity in which he is capable of penetrating the visionary recesses of his own mind and visiting the dream-creating processes. The experience eventually exhausts him, but unable to give up use of the drug, he looks forward to death as the only release from its effects.

Author: Herbert, Benson

Title: The control drug

Journal: *Wonder Stories*, Vol. 6, No. 6, 669–675

Publisher: Continental Publications, New York

Date: November 1934

Format: Short story

Descriptor: Drugs as euphorics

Annotation: Scientist invents a xenon-derived drug that seems to offer a “paradise” effect—brief glimpses of the Divine, freedom from the material body, etc. But further research shows its dread long-term effects: “The stuff doesn’t exalt you or energize you.... What it does is to release the emotions from a lifetime of civilized control and suppression. It takes the bonds off secret desires. Its subtle physiological action leaves you with no control whatever.” Naturally he destroys the drug and takes his own life.

Author: Hamilton, Edmond

Title: The truth gas

Journal: *Wonder Stories*, Vol. 6, No. 5, 1060–1071

Publisher: Continental Publications, New York

Date: February 1935

Format: Short story

Descriptor: Drugs as mind-controllers

Annotation: A scientist who believes that all sin and crime stem from deceptiveness perfects and releases into the atmosphere a drug that “causes a short-circuit between the brain’s thought-centers and its

motor-centers of speech” so that lying becomes impossible. The resulting compulsive honesty leads to impossible social situations as the whole veneer of tact and diplomacy vanishes; it becomes necessary to devise and release an antidote.

Author: Bartel, Philip J.
Title: The elixir of progress
Journal: *Wonder Stories*, Vol. 6, No. 11, 1286–1304
Publisher: Continental Publications, New York
Date: April 1935
Format: Short story
Descriptor: Drugs as euphorics
Annotation: Satiric story of the quest in the year 3903 for rediscovery
of the lost ancient drug that provided stimulation and
energy and delight to early man—coffee.

**ANNOTATED BIBLIOGRAPHY
PREDICTIVE PERIOD
(1935–1965)**

Author: Smith, Clark Ashton
Title: The Plutonian drug
Journal: *Amazing Stories*, Vol. 9, No. 5, 41–48
Publisher: Teck Publications, New York
Date: September 1934
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Among the many drugs brought back to Earth by space explorers is *Plutonium*, a powder from Pluto that produces a hashish-like derangement of time-perception, permitting the user to transform time into space and go on psychedelic voyages. The subject penetrates five or six hours into the past, an ineffable experience that ends with a vision of his own death soon fulfilled in reality.

Author: Barnes, Arthur K.
Title: Emotion solution
Journal: *Wonder Stories*, Vol. 7, No. 8, 955–963
Publisher: Continental Publications, New York
Date: April 1936
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: A scientist who feels that emotions are a hindrance to the full development of intelligence perfects a solution that destroys the “emotional centers” of the brain; he infiltrates it into the Southern California water system. The resulting emotionless society is lifeless and without energy, not at all what the scientist envisioned, and he feels guilt for having transformed millions of people into dull robots.

Author: Gatter, George F.
Title: Emotion gas
Journal: *Wonder Stories*, Vol. 7, No. 8, 967–971
Publisher: Continental Publications, New York
Date: April 1936

Format: Short story

Descriptors: Drugs as mind-controllers; Drugs as euphorics

Annotation: Unscrupulous theatrical producers enhance the box-office appeal of their comedy by surreptitiously dosing the audience with a gas that induces euphoria; they leave convinced they have seen an extraordinarily funny show, and business booms, until one night an overdose is given that amplifies not only happy feelings but passing moments of depression, causing everybody to leave in a black despondent mood that kills the show.

Author: Coblenz, Stanton A.

Title: The glowworm flower

Journal: *Astounding Stories*, Vol. 17, No. 4, 22–29

Publisher: Street & Smith Publications, New York

Date: June 1936

Format: Short story

Descriptor: Drugs as euphorics

Annotation: A pioneering space exploration voyage brings back, by accident, spores of an extraterrestrial plant that sprouts on Earth. The flower of this plant gives off a fragrance that induces intoxication, coma, and opium-like visions. Tripping on glowworm-flower fragrance becomes addictive for many of Earth's finest minds, though lesser folk are relatively immune. The plant is eradicated everywhere, possession of it is made illegal, and all space missions are banned lest spaceships again be contaminated with the sinister spores.

Author: Binder, Eando

Title: The hormone menace

Journal: *Thrilling Wonder Stories*, Vol. 8, No. 1, 34–47

Publisher: Beacon Magazines, Inc., New York

Date: August 1936

Format: Short story

Descriptor: Drugs as mind-controllers

Annotation: Villainous scientist, using extracts derived from endocrine secretions, transforms human beings into mindless puppets of abnormal strength and stature or of extraordinary mental abilities (i.e., photographic memories). Heroic underground agent penetrates his remote laboratory and puts an end to the research.

Author: Wellman, Manly Wade
Title: Dream-dust from Mars
Journal: *Thrilling Wonder Stories*, Vol. 11, No. 1, 14–28
Publisher: Better Publications, Inc., New York
Date: February 1938
Format: Short story
Descriptor: Drugs as panaceas
Annotation: The spores of a Martian lichen are an agreeable stimulant to Martians of the 28th century but throw Earthmen into deep trances in which they experience prolonged ecstatic dreams. The *dream-dust* becomes immensely popular on Earth and is outlawed when everyone seems headed for the oblivion it provides.

Author: Hall, Charles F.
Title: The time drug
Journal: *Tales of Wonder*, Vol. 1, No. 5, 62–73
Publisher: The World's Work, Surrey, England
Date: Winter 1938
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Scientist perfects a drug, mixing together cactus alkaloids and kava root, which creates powerful psychedelic effects and allows the experimenter to float backward in time. Backward explorations continue until the researcher reaches the creation of the universe, with grave consequences for him.

Author: Kyle, David A.
Title: Golden nemesis
Journal: *Stirring Science Stories*, Vol. 1, No. 1, 28–34
Publisher: Albing Publications, New York
Date: February 1941
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Aware that most of the capacity of the human brain remains unused, an experimenter devises a drug that will raise him to superhuman intelligence by giving him access to his entire brain. He is transformed into a genius by the drug, but only for a brief, intense “trip,” which after a few days so exhausts him that, “nerves on fire,” he dies of heart failure. The story is a remarkable anticipation of extreme LSD effects.

Author: Pohl, Frederik
Title: What to do until the analyst comes
In: *Alternating Currents*
Publisher: Ballantine Books, New York
Pages: 143–154
Date: 1956
Format: Short story
Descriptor: Drugs as panaceas
Annotation: Narrator is an advertising man who tells how, after a cigarettes-and-lung-cancer scare, researchers discover a cheap, allegedly harmless and non-addictive euphoric drug, and it goes on the market in chewing-gum form as a replacement for cigarettes. Soon everyone is chewing *Cheery-Gum* except the narrator, who is allergic to it; and though the drug is theoretically non-addictive, it makes everyone so high that no one wants to give it up—leading to a dazed and tranquilized society in which everyone is euphoric and indolent and everyone maintains that he could kick the *Cheery-Gum* habit on a moment’s notice, if he had any reason to do so—which he doesn’t.

Author: Slesar, Henry
Title: I remember oblivion
Journal: *Fantasy and Science Fiction*, Vol. 30, No. 3, 36–43
Publisher: Mercury Press, New York
Date: March 1966
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: A technique has been devised for literal brainwashing of criminals, i.e., the total eradication through chemotherapy of memory, and the reconstruction, using drugs and “narco-hypnosis,” of a new non-criminal personality within the existing body. The narrative cuts from the conversation of two scientists using the technique to the stream-of-consciousness of a rehabilitated criminal who, breaking through his conditioning, regains access to his memories and commits suicide in his guilt.

Author: Keller, David H.
Title: The abyss
In: *The Solitary Hunters and the Abyss*
Publisher: New Era Publishers, Philadelphia
Pages: 108–265
Date: 1948
Format: Novel
Descriptor: Drugs as mind-controllers
Annotation: A scientist isolates XYZ, a chemical present in the minds of psychotics, and, purely as an experiment, doses all of New York City with it by distributing it in the form of chewing gum. Mass psychosis results; civilization collapses and the eight million guinea pigs revert to a sort of Roman culture, with barbaric gladiatorial games, an emperor, mass brutality, new religions. After thirty days the drug wears off and the victims fall into coma and awaken unharmed.

Author: MacDonald, John D.
Title: Trojan horse laugh

Journal: *Astounding Science Fiction*, Vol. 43, No. 6, 73–111
Publisher: Street & Smith Publications, New York
Date: August 1949
Format: Short novel
Descriptor: Drugs as mind controllers
Annotation: An endocrinologist has charted a monthly human cycle of emotional peaks and depressions, and, for the sake of greater efficiency and harmony in society, has developed a drug that will control and adjust the cycle so that everyone treated will peak or drop at the same time. This works well during the high part of the cycle, but once the lows set in, mass hysteria develops among the inoculated populace, there is a wave of suicides, and a chain reaction of interlocking depressions virtually destroys society.

Author: Williams, Robert Moore
Title: The elixir of peace
Journal: *Amazing Stories*, Vol. 23, No. 12, 124–131
Publisher: Ziff-Davis Publishing Company, Chicago
Date: December 1949
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: Comic story of a tranquilizing drug devised to make animals such as lions tame enough to use in movies. The demonstration leads to complications, and a furious movie director is “tamed” as well by surreptitious use of the drug.

Author: Heinlein, Robert A.
Title: *The Puppet Masters*
Publisher: Doubleday & Co., New York
Pages: 219 pp.
Date: 1951
Format: Novel
Descriptor: Drugs as mind-expanders

Annotation: The Earth has been invaded by slug-like parasitic beings that attach themselves to men's backs and dominate their minds and bodies. The protagonists, Sam Nivin and Mary, are members of a secret security agency fighting the invaders. In the middle of the struggle they decide to get married; but because they can only spare 24 hours for their honeymoon, they inject themselves with *tempus*, a drug analogous to speed, which stretches subjective time for them so that they feel they are experiencing a month-long honeymoon.

Author: Morrison, William (Pseud. for Joseph Samachson)

Title: The addicts

Journal: *Galaxy Science Fiction*, Vol. 3, No. 4, 122–131

Publisher: Galaxy Publishing Corporation, New York

Date: January 1952

Format: Short story

Descriptor: Drugs as euphorics

Annotation: Husband and wife are lighthouse-keepers on a lonely asteroid between Earth and Mars. Husband has become addicted to *marak*, a euphoric drug that keeps him in a constant state of good nature and well-being. This makes meaningful conversation between him and wife impossible, since he is so agreeable that all discussions trail off immediately, and she is growing irritable for lack of stimulating company. Husband therefore decides secretly to give his wife addictive dose of drug.

Author: Smith, George O.

Title: *Hellflower*

Publisher: Abelard Press, New York

Pages: 264 pp.

Date: 1953

Format: Novel

Descriptor: Drugs as sensation-enhancers

Annotation: On Ganymede, moon of Jupiter, grows the gardenia-like plant from which *hellflower*, also known as *love lotus*, is

extracted—a narcotic which heightens sensations and other sensory stimuli and creates psychological addiction through enhancement of pleasure—with women the chief victims. Story concerns the traffic in this and related drugs and the attempts of a government agent of the future to intercept it.

Author: Devaux, Pierre and Viot, H. G.
Title: The stolen minute
Journal: *Science Fiction Plus*, Vol. 1, Nos. 4 and 5, 44–61, 42–62
Publisher: Gernsback Publications, Inc., New York
Date: June and August 1953
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: A French molecular physicist develops a drug known as *hexostyromolybdenum*, HSM, which has the property of vastly increasing the human metabolism. Motion, body speed, the rate of living, and other functions are accelerated 100,000 times. Protagonists make use of HSM to achieve desired political goals.

Author: Phillips, Rog (Pseud. for Roger Philip Graham)
Title: The yellow pill
Journal: *Astounding Science Fiction*, Vol. 62, No. 2, 51–61
Publisher: Street & Smith Publications, New York
Date: October 1958
Format: Short story
Descriptor: Drugs as reality-testers
Annotation: Psychiatrist encounters a patient who has committed murder and who has the delusion that he was on board a spaceship, defending himself against lizard-men from Venus, at the time of the killing. Patient totally denies the reality of actual world, and tells psychiatrist to take a *yellow pill* that will awaken him to the true reality of the spaceship-world. Psychiatrist is amused by concept of a yellow pill that can bring one out of a delusion; but then he finds a bottle of yellow pills in his locker and the story becomes an exploration of ambiguous levels of

reality, with the pills serving as conduits between one “real” world and the other.

Author: Hartley, L. P.

Title: *Facial Justice*

Publisher: Doubleday & Company, New York

Pages: 263 pp.

Date: 1960

Format: Novel

Descriptor: Drugs as mind-controllers

Annotation: The scene is the not very distant future, after the Third World War. Nine tenths of the human race has been destroyed and the survivors are ruled by a benevolent dictator who reduces conflict situations by imposing an enforced equality: personalities are standardized, numbers are used for names, women undergo plastic surgery so that none will seem too beautiful or too ugly. This dreary homogenized state is kept under control by dosing the citizens daily with a sedative-like bromide to which most people have become addicted; it lowers vitality and reduces nonconformity.

Author: Gunn, James

Title: *The Joy Makers*

Publisher: Bantam Books, New York

Pages: 160 pp.

Date: 1961

Format: Novel

Descriptor: Drugs as euphorics

Annotation: Under the 26th Amendment to the Constitution, ratified in 2003, hedonism is the law of the land. The function of government, it has been decided, is “the preservation and promotion of the temporary happiness of its citizens.” Gloom is outlawed and happiness is mandatory. It is attained through mental disciplines, through mechanical regulation of the metabolism, and through the free use of drugs—notably mescaline, “neo-heroin,” various alkaloids, and certain futuristic euphorics.

Author: Huxley, Aldous
Title: *Island*
Publisher: Harper & Row, New York
Pages: 295 pp.
Date: 1962
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: This Utopian novel, written thirty years after Huxley's anti-drug *Brave New World* and after his own experiments with LSD and mescaline, depicts another ideal commonwealth centering on the use of drugs: but in place of *Brave New World*'s mind-deadening *soma*, the citizens of *Island* use *moksha*, a hallucinogen very similar in effect to LSD, which induces mystical visions and intensifies religious experience.

Author: Burgess, Anthony
Title: *A Clockwork Orange*
Publisher: W. W. Norton, New York
Pages: 160 pp.
Date: 1963
Format: Novel
Descriptors: Drugs as mind-controllers; Drugs as mind-expanders
Annotation: Alex is a juvenile delinquent of the near future, who routinely uses such drugs as *synthemesc* or *drencom* that are sold in neighborhood "milk bars" for hallucinogenic boosts. After committing a particularly atrocious assault, Alex is arrested and sentenced to a kind of brainwash reconditioning. With the aid of drugs and hypnotherapy he is conditioned against violence and turned loose to become a useful citizen.

Author: Buck, Doris Pitkin
Title: Come where my love lies dreaming
Journal: *Fantasy and Science Fiction*, Vol. 26, No. 2, 113–126

Publisher: Mercury Press, New York
Date: February 1964
Format: Short story
Descriptor: Drugs as panaceas
Annotation: The quickest refuge from the horrors of life in 21st century Washington, D. C., is the use of *detenser* pills. The latest brand is Protoceratops Tabs, which mentally transport the user to the Mesozoic Era and create the illusion that he or she is a dinosaur. The story, gently comic in tone, follows the adventures of a woman who takes the dinosaur trip and comes face-to-face not only with prehistoric beasts but with her own inner problems.

Author: Purdom, Tom
Title: Greenplace
Journal: *Fantasy and Science Fiction*, Vol. 27, No. 5, 5–16
Publisher: Mercury Press, New York
Date: November 1964
Format: Short story
Descriptor: Drugs as intelligence enhancers
Annotation: Protagonist is a psychologist doing political field-testing on behalf of a Congressman running for re-election c. 1980. As he prepares to enter a suburban district controlled by his candidate's powerful opponent, he doses himself with *MST*, a newly invented psychic energizer that "multiplied the powers of observation and the rate and quality of thought by a factor somewhere between three and seven." Under the influence of *MST* he is able to detect the frightening psychological techniques by which the suburb is held in control.

Author: McCombs, Larry and White, Ted
Title: The peacock king
Journal: *Fantasy and Science Fiction*, Vol. 29, No. 5, 23–36
Publisher: Mercury Press, New York
Date: November 1965
Format: Short story

Descriptor: Drugs as mind-expanders

Annotation: The United States is planning its first expedition into interstellar space, using a radical space-drive that permits faster-than-light travel. Preliminary experiments have shown that a faster-than-light trip will have grave psychological impact on the crew, and therefore LSD is used as part of the training discipline for the crew (a man and a woman). Through acid experiences they make themselves capable of handling the interstellar jump through hyperspace.

**ANNOTATED BIBLIOGRAPHY
CONTEMPORARY PERIOD
(1965–Present)**

Author: Guin, Wyman
Title: Beyond bedlam
In: *Living Way Out*
Publisher: Avon Books, New York
Pages: 155–208
Date: 1967 (1951 First Issue)
Format: Short novel
Descriptor: Drugs as panaceas
Annotation: During the late 20th century drugs were developed to aid schizophrenics by permitting their warring inner personalities to live side by side, controlling the body alternately. By the following century the element of schizophrenia is recognized in all persons and it becomes mandatory to use the drugs, giving everyone a prime ego and an alternate ego, in fact separate persons, who undergo drug-induced shifts of dominance every five days. The author explores the concept of ego-shift by following the fortunes of a number of protagonists whose doubled personalities engage in complex interactions.

Author: Collins, Hunt (Pseud. of Evan Hunter)
Title: *Tomorrow and Tomorrow*
Publisher: Pyramid Books, New York
Pages: 190 pp.
Date: 1956
Format: Novel
Descriptor: Drugs as reality-testers
Annotation: The novel, set in a near-future Earth dominated by advertising and television, describes the conflict between two groups of differing social philosophies: the Vikes, who advocate vicarious pleasure and indulge in heroin-like narcotics to escape from reality, and the Rees, or Realists, an austere Puritan movement hostile to all mind-altering substances.

Author: Dick, Philip K.

Title: We can remember it for you wholesale
Journal: *Fantasy and Science Fiction*, Vol. 30, No. 4, 3–16
Publisher: Mercury Press, Inc., New York
Date: April 1966
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: A technique is developed by which, using a hypnotic drug called *narkidrine*, false memories can be implanted in a human brain. The memory-implant technique can be used to provide the vicarious illusion of pleasurable experience, but also—as the story unfolds—we see that it can be used for purposes of political intrigue.

Author: Dick, Philip K.
Title: *The Three Stigmata of Palmer Eldritch*
Publisher: Doubleday & Company, New York
Pages: 278 pp.
Date: 1965
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: An illegal hallucinogen, *Can-D*, allows Earth colonists on Mars, Venus, and other nearby worlds to stave off the crushing boredom of daily life by permitting them to enter a highly schematicized common fantasy world where they share in the adventures of two imaginary lovers who are larger-than-life Hollywood dream-figures. Complications ensue when a competitive reality-destroying drug, *Chew-Z*, is introduced surreptitiously by beings from another solar system.

Author: Dick, Philip K.
Title: *Now Wait for Last Year*
Publisher: Doubleday & Company, New York
Pages: 214 pp.
Date: 1966
Format: Novel
Descriptor: Drugs as mind-expanders

Annotation: In the war-torn world of the 21st century, Americans escape from the horrors of their time by addictive use of *JJ-180*, a drug that allows the consciousness to detach from present time and return to earlier eras, or even to travel forward in time. The protagonist, initially attempting only to deal with his wife's addiction to the time-travel drug, eventually becomes entangled in global politics and the progress of the interstellar war as he himself, under the influence of *JJ-180*, oscillates backward and forward in time.

Author: Harrison, Harry

Title: *Make Room! Make Room!*

Publisher: Doubleday & Company, New York

Pages: 213 pp.

Date: 1966

Format: Novel

Descriptor: Drugs as euphorics

Annotation: The year is 1999 and the population of New York City is 35 million. In this hideously overcrowded society marijuana and LSD are the chief means of escape from stress, and their use is far more pervasive than it is today. Filmed as *Soylent Green*.

Author: Aldiss, Brian W.

Title: The night that all time broke loose

In: *Dangerous Visions* (Edited by Harlan Ellison)

Publisher: Doubleday & Company, New York

Pages: 151–160

Date: 1967

Format: Short story

Descriptor: Drugs as mind-expanders

Annotation: Comic story about *time gas*, piped through mains to suburban houses the way heating gas is distributed. Using *time gas*, subscribers can dial themselves back to any period in their lives they prefer to re-experience. Story concerns a break in the gas main that floods the region with *time gas* and touches off a great gusher that carries

mankind back into prehistoric times, with dinosaurs imminent as the time-effects grow more powerful.

Author: Anderson, Chester
Title: *The Butterfly Kid*
Publisher: Pyramid Books, New York
Pages: 190 pp.
Date: 1967
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: In this comic novel, set among the drug-using counter-culturists of Greenwich Village, trouble starts when *Reality Pills* become available—a “projective hallucinogen” that creates hallucinations visible not only to the user but to those around him. It develops that *Reality Pills* have been invented and distributed by blue lobster-like beings from another planet in order to facilitate their conquest of Earth—a conquest ultimately thwarted by the dedication of a fearless band of hippies.

Author: Dick, Philip K. and Nelson, Ray
Title: *The Ganymede Takeover*
Publisher: Ace Books, New York
Pages: 157 pp.
Date: 1967
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: In this satiric novel intelligent worm-like beings from Ganymede, moon of Jupiter, conquer the Earth despite the best efforts of such individuals as Rudolph Balkani, Chief of the Bureau of Psychedelic Research, who has been working on a mind-blocking weapon. The world that Ganymede conquered is in fact devoted on all levels to the use of psychedelics, and the novel raises questions about the nature of “reality” as the action unfolds.

Author: Lupoff, Richard A.
Title: *One Million Centuries*
Publisher: Lancer Books, New York
Pages: 352 pp.
Date: 1967
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: A man of the twentieth century is thrust forward in time to the world of the unimaginably distant future. As he explores the civilization he finds himself among, he learns that the people of the era habitually chew *samra*, a hallucinogenic drug, and a woman he meets takes him on a *samra* trip. It is a soaring visionary experience in which he perceives the birth and death of the solar system.

Author: Spinrad, Norman
Title: Carcinoma angels
In: *Dangerous Visions* (Edited by Harlan Ellison)
Publisher: Doubleday & Company, New York
Pages: 489–497
Date: 1967
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Protagonist suffering from terminal cancer seeks remission of disease. With the aid of massive doses of various hallucinogenic agents he reaches an ostensible mental state in which he is capable of entering his own body to do psychic battle with the cancer cells. In series of metaphorical contests he destroys the invaders, but is unable to return to real-world consciousness and is remanded to mental institution, trapped within his own body.

Author: Wilson, Colin
Title: *The Mind Parasites*

Publisher: Arkham House, Sauk City, Wisconsin
Pages: 222 pp.
Date: 1967
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: A research project involving heavy doses of mescaline and LSD leads to perceptions revealing the existence of invisible "mind parasites," alien invaders who have long controlled and influenced human life. With the aid of the drug, experimenters unleash mental powers with which to combat the invaders.

Author: Disch, Thomas
Title: *Camp Concentration*
Publisher: Doubleday & Company, New York
Pages: 184 pp.
Date: 1968
Format: Novel
Descriptor: Drugs as intelligence-enhancers
Annotation: The novel is the journal of a U.S. political prisoner of the near future who is assigned to observe and record the progress of an experiment in which volunteer prisoners at a secret internment camp are treated with *Pallidine*, an intelligence-enhancing drug derived from the organism that causes syphilis. In the course of nine months the drug turns the prisoners into supermen of extraordinary mental capacity while destroying their bodies with disease.

Author: Herbert, Frank
Title: *The Santaroga Barrier*
Publisher: Berkley Books, New York
Pages: 255 pp.
Date: 1968
Format: Novel
Descriptor: Drugs as mind-expanders

Annotation: An outsider penetrates a remote California valley inhabited by reclusive farmers who discourage all contact with strangers. He discovers that they have built a society based on consumption of *Jaspers*—a psychedelic drug going far beyond acid in its effects, fostering a sense of community through its ability to allow takers to perceive the ultimate relationships linking all aspects of the universe. He is drawn into the valley society and becomes part of it.

Author: Moorcock, Michael

Title: *The Final Programme*

Publisher: Avon Books, New York

Pages: 191 pp.

Date: 1968

Format: Novel

Descriptor: Drugs as mind-expanders

Annotation: Satiric comic novel of near future, in which hallucinogenic drugs are used in a variety of ways—as, for example, *LSD gas*, employed as a protective device and discharged to muddle the minds of burglars breaking into a mansion. More conventional use of drugs (i.e., as euphorics and hallucinogens) is common in the book.

Author: Silverberg, Robert

Title: How it was when the past went away

In: *Earth's Other Shadow* (By Robert Silverberg)

Publisher: New American Library, New York

Pages: 66–127

Date: 1973 (First Issue 1969)

Format: Short novel

Descriptor: Drugs as mind-injurers

Annotation: One day in 2003 an unknown malcontent dumps an amnesia-producing drug into the water system of San Francisco. Within a few hours virtually everyone in the city has lost his memory, and the effects of the memory drug linger for several days, causing great complications. Story follows the reactions of several characters to the

varied effects of sudden amnesia. As story ends things are returning to normal for most people, but one unstable individual has obtained a supply of the drug and is preaching its use in a new cult of oblivion.

Author: Spinrad, Norman

Title: *Bug Jack Barron*

Publisher: Walker Books, New York

Pages: 327 pp.

Date: 1969

Format: Novel

Descriptor: Drugs as mind-expanders

Annotation: In the closing years of the 20th century the work of a foundation for life-extension research becomes the center of fierce political controversy. The tensions growing out of the search for immortality are depicted against the background of a near-future world in which marijuana and the psychedelic drugs are legal and widely consumed.

Author: Aldiss, Brian W.

Title: *Barefoot in the Head*

Publisher: Doubleday & Company, New York

Pages: 281 pp.

Date: 1970

Format: Novel

Descriptor: Drugs as mind-injurers

Annotation: In Europe of the near future, political tensions have led to the bombing of the entire continent by the Arab state of Kuwait with psychedelic weapons—odorless, tasteless, and enormously potent. In the aftermath of the war all of Europe finds itself on a perpetual LSD trip, since the drug's aftereffects prove ineradicable. Industrial society breaks down, reason becomes extinct, and the novel itself dissolves into a Joycean verbal phantasmagoria as the old society gives way to one in which insanity is the norm.

Author: Silverberg, Robert
Title: Sundance
In: *The Cube Root of Uncertainty* (By Robert Silverberg)
Publisher: Collier Books, New York
Pages: 219–239
Date: 1970
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Protagonist is part of a team of Earth men annihilating a semi-intelligent alien race on an extrasolar world prior to colonization of the planet. Protagonist is emotionally disturbed—his American Indian ancestry makes him bitter about the genocide he feels is taking place—and his sympathies toward the aliens lead him to take part in their rites and to consume a hallucinogenic plant, used by them, that induces synesthesia and a sense of racial communion.

Author: Vonnegut, Kurt
Title: Welcome to the monkey house
In: *Welcome to the Monkey House* (By Kurt Vonnegut)
Publisher: Delacorte Press, New York
Pages: 28–47
Date: 1970
Format: Short story
Descriptor: Drugs as mind-controllers
Annotation: At a time when the world's population is 17 billion, compulsory ethical birth control comes into effect. On pain of fine, everyone must take birth control pills three times a day. The pills do not interfere with reproduction, but, by making people numb from the waist down, “take every bit of pleasure out of sex.”

Author: Benford, James
Title: Pulse
Journal: *Fantastic Science Fiction*, Vol. 20, No. 6, 22–25
Publisher: Ultimate Publishing Company, New York

Date: August 1971
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Young woman describes her LSD trip to her
psychotherapist: a vision of another world (she thinks it is
the moon) marked by strange geological formations and flora. He listens
patiently to her descriptions of this obviously illusory experience, but she
maintains the drug actually transported her, and as she goes on talking he is
drawn into the illusion and finds himself mysteriously transported (without
the aid of the drug) to the world of her narrative.

Author: Lafferty, R. A.
Title: Sky
In: *New Dimensions One*, (Edited by Robert Silverberg)
Publisher: Doubleday and Co., New York
Pages: 149–161
Date: 1971
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Protagonists in future civilization make use of *Sky*, a drug
derived from an amanita mushroom. Stated powers of this
drug are to provide sensations of mastery and union-with-cosmos,
especially during parachute drops. Protagonists attain successively more
ecstatic states in series of *Sky*-enhanced parachute drops, until, seeking the
perfect high, they deliberately fail to use their parachutes on one *Sky* trip
and, after a descent marked by moments of stunning ecstasy, perish as they
hit the ground.

Author: Panshin, Alexei
Title: How can we sink when we can fly?
In: *Four Futures*, a science-fiction anthology
Publisher: Hawthorn Books, New York
Pages: 94–130
Date: 1971

Format: Short novel
Descriptor: Drugs as mind-expanders
Annotation: At some period in the future a drug called *tempus* is developed which enables people to travel backward in time, literally or perhaps in mind alone. Young people are required to take *tempus* journeys as part of the educational process. Story takes place in contemporary United States, c. 1970, and analyzes current problems by confronting the protagonist with a *tempus*-using visitor from the future.

Author: Sheckley, Robert
Title: Down the digestive tract
In: *Can You Feel Anything When I Do This?* (By Robert Silverberg)
Publisher: Doubleday and Co., New York
Pages: 145–147
Date: 1971
Format: Short story
Descriptor: Drugs as reality-testers
Annotation: An underground chemist gives a friend a mixture of hallucinogenic drugs guaranteed to send him into a true trip. Friend waits impatiently for the hallucinations to hit. Chemist and friend are actually not human but alien insecto-reptilian creatures, and it turns out that the hallucination the friend has is that of being a human being in our contemporary world.

Author: Silverberg, Robert
Title: *Downward to the Earth*
Publisher: New American Library, New York
Pages: 176 pp.
Date: 1971
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: The venom of a serpent found on an alien planet that has been colonized by Earthmen proves to have medicinal

value, serving as a catalyst in limb-regeneration work; but when used in a different dosage it has psychological effects, evoking in Earthmen the illusion that they have been transformed into the elephant-like intelligent species that is the dominant native life-form of the planet. Illicit use of the drug for this purpose is common among the Earthmen stationed there. Protagonist, expiating old guilts, goes among the elephant-beings and eventually is admitted into ecstatic communion with them through use of the drug.

Author: Silverberg, Robert
Title: *A Time of Changes*
Publisher: New American Library, New York
Pages: 220 pp.
Date: 1971
Format: Novel

Descriptors: Drugs as mind-expanders, drugs as a means of communication

Annotation: Scene is a planet of the future dominated by stern culture that makes a fetish of privacy and personal reticence.

Narrator obtains from a “primitive” culture on another continent a drug which attacks the basics of his native culture by making possible direct telepathic contact between minds. He attempts to found a subculture of love and openness based on use of the drug, but, although he is a prince of the realm, he is proscribed and hunted down.

Author: Silverberg, Robert
Title: *The World Inside*
Publisher: Doubleday and Co., New York
Pages: 201 pp.
Date: 1971
Format: Novel

Descriptors: Drugs as mind-expanders, drugs as a means of communication

Annotation: In world of 24th century, most of mankind lives in thousand-story apartment buildings each of which has a population of more than 800,000. Chapter three of the novel follows the

adventures of a musician who, after performing at a concert, drugs himself with a *multiplexer*, a mind-expanding drug that temporarily induces a telepathic contact simultaneously with all 800,000 residents of his building, so that he perceives their lives and thoughts in one vast intricate construct.

Author: Davis, Grania
Title: My head's in a different place now
In: *Universe Two*, (Edited by Terry Carr)
Publisher: Ace Books, New York
Pages: 151–172
Date: 1972
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Young American married couple, weary of life on welfare in a large city, travel into Central American jungle in search of a drug-using primitive tribe of which they have heard. Eventually they find an Eden-like place where the natives, though dominated by fears of supernatural beings, seem whole and happy. The Americans discover hallucinogenic mushrooms near the village, begin using them, and settle into an amiable life of tripping and telepathic contact with animals, insects, and plants. As story ends they are planning to turn on the unsuspecting villagers.

Author: Hollis, H. H.
Title: Stoned counsel
In: *Again, Dangerous Visions*, (Edited by Harlan Ellison)
Publisher: Doubleday and Co., New York
Pages: 270–281
Date: 1972
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: In world of near future hallucinogenic drugs have become a routine part of the legal process. Lawyers examine evidence that is fed to them in direct association with LSD and other drugs,

and trials are conducted with prosecutors and defense attorneys both in a drug-enhanced mental state. Approach of the story is sympathetic and detached; drug-enhancement is depicted as a new phase, not necessarily negative in implication, in courtroom procedure.

Author: Jones, Langdon
Title: The eye of the lens
In: *The Eye of the Lens* (By Langdon Jones)
Publisher: Collier Books, New York
Date: 1972
Pages: 53–90
Format: Short novel
Descriptor: Drugs as mind-expanders
Annotation: Avant-garde story without summarizable plot: it attempts to depict various cinematic and psychedelic modes of perception and includes (p. 84) an explicitly psychedelic scene within a British cathedral of the near future where hallucinatory religious rituals take place.

Author: Nelson, Ray
Title: Time travel for pedestrians
In: *Again, Dangerous Visions*, (Edited by Harlan Ellison)
Publisher: Doubleday and Co., New York
Date: 1972
Pages: 140–159
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Protagonist, using crushed “flower seeds” plus auto-hypnotic techniques, embarks on a trip in which his consciousness perceives past existences. He travels mentally to medieval northern Europe, to Egypt shortly after the time of Jesus, to medieval southern France, and other eras.

Author: Niven, Larry
Title: The fourth profession
In: *Best Science Fiction of the Year*, Vol. I, (Edited by Terry Carr)
Publisher: Ballantine Books, New York
Pages: 293–340
Date: 1972
Format: Short novel
Descriptor: Drugs as mind-expanders
Annotation: Alien beings known as Monks come to Earth and, to serve purposes of their own, distribute a variety of strange pills. One of these drugs is an intelligence-enhancer, another is a memory-destroyer, another induces instantaneous transport from one place to another. Story explores the effects of these and other alien-given drugs and the motivations of the aliens who distribute them.

Author: Silverberg, Robert
Title: *Dying Inside*
Publisher: Charles Scribner's and Sons, New York
Pages: 245 pp.
Date: 1972
Format: Novel
Descriptor: Drugs as means of communication
Annotation: Story takes place in 1976. Narrator is middle-aged New York intellectual who has had the power of telepathy since childhood and now is losing it. The power has embittered him by rendering him a freak, and he has taken pains to conceal knowledge of it from others. He tells how, in 1968, a close love relationship of his was terminated when he and his woman friend took LSD together; the trip had the unexpected effect of opening a two-way telepathic channel between them, so that not only could he read her mind as usual but she briefly had access to his, giving her a bad trip and causing her to recoil from him.

Author: Spinrad, Norman
Title: No direction home

In: *Best Science Fiction of the Year*, Vol. I, (Edited by Terry Carr)
Publisher: Ballantine Books, New York
Pages: 227–244
Date: 1972
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: Scene is United States of the near future in which
psychedelic drugs of all kinds, including many not yet
known, are legal and widely used on all levels of society. Story speculates
in detail on the nature of a commercialized legal psychedelics industry and
on the forms future drugs may take.

Author: Bradley, Marion Zimmer
Title: *Darkover Landfall*
Publisher: Daw Books, New York
Pages: 160 pp.
Date: 1973
Format: Novel
Descriptor: Drugs as mind-expanders
Annotation: Story describes the arrival on the extrasolar planet of
Darkover of a shipload of colonists from Earth, and
explores the impact on the Earthmen of the Ghost Wind, a native
meteorological phenomenon that has psychedelic effects, caused by pollen,
dust, or virus, which liberate ESP powers in their minds. The settlers,
bombarded by hitherto unfamiliar sensory data, are plunged into conflict
that transforms the group.

Author: Brunner, John
Title: *The Stone That Never Came Down*
Publisher: Doubleday and Co., New York
Pages: 206 pp.
Date: 1973
Format: Novel
Descriptor: Drugs as mind-expanders

Annotation: Scene is London, 1980's: a time of chaos with World War III imminent. Chemists discover drug called VC—*viral coefficient*—which has the property of greatly intensifying sensory perception and amplifying intelligence and memory. Drug has ability to multiply in proper environment like living organism. When an unemployed teacher who has had an experimental dose of VC donates blood to central bloodbank, he unwittingly spreads VC widely to the world at large, causing an epidemic of sanity in which world leaders, now greatly more intelligent, take steps to abolish warfare and establish an ideally rational society.

Author: Dickson, Gordon R.

Title: *The R-Master*

Publisher: Lippincott, Philadelphia

Pages: 216 pp.

Date: 1973

Format: Novel

Descriptor: Drugs as mind-expanders

Annotation: In the middle of the 21st century an intelligence-enhancing drug called *Reninase-47* has come into wide use. Though normally it simply stimulates the thought process, *R-47* occasionally does massive damage to the mind, and in a few cases creates a supergenius, an *R-master*. Protagonist's brother takes *R-47* and suffers brain damage. In order to help him, protagonist also takes the drug and unexpectedly emerges from treatment as an *R-master*, a member of an extraordinary elite group, and from another *R-master* he learns of the need for a vast reorganization of governmental policies. He becomes a revolutionary leader and works toward a transformation of society.

Author: Free, Colin

Title: *The Soft Kill*

Publisher: Berkley Books, New York

Pages: 159 pp.

Date: 1973

Format: Novel

Descriptor: Drugs as mind-controllers

Annotation: Protagonist is a scientist stationed aboard an orbiting research station of the far future. Needing a holiday, he is transferred to a place called HighTown—an overpopulated city where a totalitarian government maintains control by dosing the citizens with a variety of tranquilizing and euphoric drugs. Novel explores the effect of government-by-chemistry.

Author: Pumilia, Joseph F.

Title: As dreams are made on

Journal: *Fantastic Science Fiction*, Vol. 22, No. 3, 18–29

Publisher: Ultimate Publishing Co., New York

Date: 1973

Format: Short story

Descriptor: Drugs as mind-expanders

Annotation: Teenage boy obtains a supply of *metamorphium*, a drug that induces fantasy-gratification dreams. Not only are his dreams richly satisfying, but he discovers that his girlfriend, whom he sees in the dreams, is aware of the visions as if the drug has induced some telepathic link between them. He has a vision of a time when everyone is linked through shared *metamorphium* dreams—“one big dream, one big mind asleep and dreaming all the time,” even though individual dreamers will wake from the big dream.

Author: Rotsler, William

Title: Gods of Zar

Journal: *Amazing Stories*, Vol. 47, No. 3, 20–40

Publisher: Ultimate Publishing Co., New York

Date: 1973

Format: Short story

Descriptor: Drugs as euphorics

Annotation: An Earthman stranded on an alien planet becomes god of the local native race. When his people are attacked by a hostile tribe he defeats the enemy soldiers by dosing them with *tazeel*, a

euphoric drug of the planet that destroys their discipline and converts them instantly from Spartan ferocity to self-indulgence.

Author: Scortia, Thomas N.
Title: The weariest river
In: *Future City*, (Edited by Roger Elwood)
Publisher: Trident Press, New York
Pages: 108–148
Date: 1973
Format: Short story
Descriptor: Drugs as euphorics
Annotation: The scene is about 350 years from now. An immortality treatment has been perfected and the world has become a savagely overcrowded, polluted urban sprawl in which people live forever. Drugs are the main refuge from boredom among the immortals. The protagonist is the inventor of the immortality serum, whose life is spent in an endless search for illegal drugs to palliate his guilt and spiritual malaise.

Author: Spinrad, Norman
Title: The weed of time
Journal: *Vertex*, Vol. 1, No. 3
Publisher: Mankind Publishing Co., Los Angeles
Pages: 58, 92–93
Date: 1973
Format: Short story
Descriptor: Drugs as mind-expanders
Annotation: An exploratory mission to the fifth planet of the star Tau Ceti in 2048 discovers a plant that is given the name of *Tempis ceti*, seeds and leaves of which have a psychedelic property: they destroy the linear perception of time and enable the subject to view all moments along his lifespan simultaneously. Seeds of the plant prove to be fertile on Earth and the drug comes into common use. Protagonist is a time-drug user whose simultaneous perception of his 110-year lifespan sends him to a mental hospital.

*** END OF THE PROJECT GUTENBERG EBOOK DRUG THEMES
IN SCIENCE FICTION ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
