---

Stefanie was still white and weak, but the worry on her face had nothing to do with her recent sickness as she rushed about the small, crudely furnished apartment, trying to appear normal. Johann Volcek studied his young wife, worrying more about her than the meeting for the moment.

If the child had only lived....

Then he smiled a bit ironically, before letting his mind come up with the old palliatives. There'd be other children for him and Stefanie—and for this half of the world. The other half would simply have to suffer painlessly through a generation, for the good of the whole world.

"But the Director, Johann...." Stefanie's voice was on the thinnest edge of hysteria. "Johann, to our place! If I'd known, I could have made curtains, at least. And can you be sure...."

"It isn't suspicion, *radost moya*," he assured her quickly. "I told you the Director trusts me—he has to. And he simply wants to see you. You know he's a family man himself."

But he let her work, fussing about the place, refilling his coffee, brushing an imaginary speck of dust off his coat. The doctor had told him that work was best for her—anything to get her mind off the lost child until there could be others. And the Director may have been a better distraction than any of the others, aside from the flattery of it.

Then the telephone on the wall rang sharply, and he answered it, smiling back at her. "Volcek."

"Good, Johann." It was the Director's Secretary of Science, Jean Petrecci and Volcek's sponsor. "We shall be there soon—and it's a beautiful day for the test, not so?"

Johann agreed quickly, though he had not yet had time to look through the windows even, with Stefanie's worry over the visit of the Director. But as he looked out now, he saw that it was a good day, clear, with only thin wisps of cloud in the sky.

Then, in the street below, there was a stirring, first of big cars, and then the shouts of the people. It was silenced, and the creaking elevator began to

thump upwards. Stefanie made a last frantic dash into the bedroom, brushing nervously at her hair, and came out just as the knock sounded.

Johann had been right—the Director must have trusted him, since the big man had come up with only three of his guards, and now came thrusting his broad shoulders in, his greyed head not even darting about the room, his eyes leading him toward the Volceks.

Quick admiration filled his eyes at sight of Stefanie, and his gruff voice was soft, the voice the radio brought them when he was the Father of the State, or when he was telling them of the new plans for more food and better living.

"Sit—I'm only one of you, you know. Ah, Johann, this is the little Stefanie. I've wanted to meet you, to see the one Johann has spoken of so often." His language was perfect, but with the queer stilted effect it always had when he was not reading a prepared speech.

Watching Stefanie stammer over the honor of the Director's presence, and then relax gradually as the spell of the man took over, Johann began to smile more naturally. The Director was talking of his own beginnings—in much less than this—and the moving they would soon be doing, into a newer apartment, a fine new suburb. And surprisingly, he was talking of his own wife and children, and Stefanie was answering.

---

Remembering stories of the Director, Johann found it hard to recognize this as reality. The man had come up from the lowest ranks, an iron hand leading him up the ladder of Centralia's autocratic bureaucracy. But now the hand was sheathed, and even Stefanie began to smile.

Then it was over, and the Director was rising. Johann kissed his wife quickly, embarrassed slightly at the Director's approving smile, and they were out in the elevator, heading toward the big, waiting cars.

"Now I trust you, Johann Volcek," the Director told him. "Now I can go with you to this test. With such a wife waiting you, there can be no trickery against the State. No—don't say it! It is not you I could distrust—it is everyone I must distrust. But not now. What does the doctor say?"

"Another year." For a time they had been afraid that Stefanie could never have children again, but the new treatments had apparently been effective. Centralia's progress in all phases of gynecology had been spectacular.

The Director nodded. "Good. The State needs such children as you will have. And a man has need of little ones. But tell me—you still feel sure of this test?"

Then the talk became technical. Johann was sure. There had been smaller tests, during the two years the project had been going on, and all of them had been effective.

Then cold fingers ran over him, tingling at the ends of his nerves, as he realized the trick semantics was playing on him.

Test? It had been the name they had given it, and in time it had come to be no more than that in his mind—a test of his theories. But this was *not* just a test. This was the feat itself, the step that would bring an end to half the world, the culmination of the hopes of Centralia, and the final, positive proof of the ideas of Volcek.

He had been almost unaware of the power that had grown from his idea, but now it hit him. It wasn't easy to do that to half a world, even in these days. But it had to be done.

Thirty years before, there had been a sprawling group of small nations and several large powers. But with the beginning of the atomic age, that had shaken itself down until now there were actually only the two hemispheres. Centralia had most of the world's population, but the West had achieved equality by its head-start in the sciences and in industry. For thirty years, little nation had accreted to big nation, until now there were the two of them. Nominally, the little nations still existed; but it was a polite fiction, like the fiction of bland softness the Director had adopted before Stefanie.

And this was not a world where two powers could exist. They had somehow achieved it, while the accretion of control over the neighboring states went on. There had been fracas piled onto struggle, but never outright war. Now, though, things had reached a stage where each side knew that sooner or later the hydrogen-bombs must fall, and where those bombs were of a size and efficiency that might even end the world. There were even rumors of solar-phoenix bombs which could turn the world into a flaming, lesser sun.

Volcek sighed. This was better than that. Better that half the world should slow down and come to a gradual halt than that the rain of hell should descend from the heavens, perhaps igniting the world itself.

---

They were at the laboratories, now, and Volcek got out of the car behind the Director, vaguely conscious that taking second place was a mark of honor. Inside the building, one of the rooms had been cleared, leaving a few seats, a stand, and a single board of levers against the wall. Already, the seats were taken, and men were rising to salute the Director.

Ki Fong, Tsamatsu, Bhandaputra, Simonolov, Schwartzkopf, Jordssen—all of the big names of government and science—were there. Some were scowling intently as they tried to digest the printed formulae on the big blackboard which gave part of the theory behind Volcek's work; others were smiling, assured only that this was the day when Centralia would come into its own. And some, as always, were estimating Volcek, wondering how his importance would conflict with their own.

The Director smiled thinly, dropping an arm over Volcek's shoulder. "After this day, Johann, you'll need bodyguards. I have seen to that. And Petrecci ... well, we shall see...."

Johann caught himself before he could wince. He'd liked Petrecci, had no desire to replace him. But if the implication of the Director's words was what he thought ... still, it would be good for Stefanie. She had had too much trouble, and it was time life smiled on her a little. It would be good for their children, too, to grow up with comfort, even a little luxury, tutored perhaps with the children of the Director, himself. As Secretary of Science, Johann Volcek could give his family a great deal. He caught Petrecci's eyes on him, and turned his head quickly back to the other men.

At the Director's nod, he began outlining the facts to them. Some already knew of what was being done here, but all were listening as if the Director himself were speaking.

He could only give the barest facts. He'd been experimenting with a means of controlling fission for some power application, working on the problem

of getting hydrogen to fission at temperatures below the millions of degrees where it normally began, and in tiny amounts. And by sheer accident, he had stumbled on a process where nitrogen fissioned, instead—two atoms of nitrogen combining into one, straining the nucleus that now held fourteen protons and fourteen neutrons, distorting it until some of the binding force of the nucleus released energy, and it broke up into simpler atoms again—as if both fission and fusion were going on.

It had not been successful, from a commercial angle, but it had produced an unexpected result. The mice which had been kept to test out danger of radiation had not been killed—but they had been sterile, as events proved, from then on. The release of radiation was not quite normal gamma rays; it was subtler than that—some queerly polarized radiation that struck at the fertility of animals and ended it.

"But you were not sterilized," Ki Fong interrupted him.

"I was lucky—I had been using a shield that was heavy enough to turn aside the radiation—the four-foot walls of the oven where the experiment was conducted. It only leaked out through the panel we later found had a crack in it—but that was toward the mice."

Three years had been spent in testing it on mice, before the reports had found Petrecci, and brought him to the little laboratory of Johann Volcek. By then, Volcek had developed a complete control of the process, and had learned to fuse and fission oxygen as well as nitrogen, but without the production of sterilizing radiation this time.

After that, there had been no more mice. Volcek shuddered, trying to conceal it, as he remembered the prisoners who had stood before the portal of the oven, and gone away, sterile. And there had been tests in the big, deserted wastes near the Gobi, where balls of fire had leaped from his tiny little devices, and cracked themselves into flaming energy that grew and spread before vanishing. More sterility had followed.

"It requires very little apparatus," Volcek said, finally. He pulled a small tube from a drawer near the wall, and held it out to them. "This is the source. A small battery, these coils, tubes, this little crucible—nothing more. Once we knew why it started the fusion, it was easy to simplify."

And it was simple. A man could carry one of the devices with him in a small bag, and it was meaningless in appearance. It could be built into a radio, as if it were part of the tuning device. It could slip past customs, harmless in its looks, and be spread wherever wanted.

And now....

---

The Director took over, then, telling them what had already been done. In every city and hamlet, from coast to coast and from polar cap to polar cap, the West was covered with these tiny little devices, each equipped with a little crystal delicately attuned to one here, so that they would all function at once.

There would be no war. Centralia had labored to avoid war in spite of the hatred and lusts of the West. Now, they would be even more agreeable, even more meek. They would take the insults; they would not fight. Because, once the nitrogen of the air had done its job, there would be only a generation of patience, while no more children were born to the West. And some day, there would be only one Power—Centralia.

Schwartzkopf asked the question that was bothering the others, though he already knew the answer. "But these balls of fissioning or fusioning nitrogen—when they go off over the West, they are too much like atomic bombs. Won't the West feel it is attacked and retaliate with their genuine bombs?"

"We, too, shall be attacked!" It was Volcek's other process, of course. Simultaneously, there would be released similar "bombs" over all of the territory of Centralia. The heat and power would do a minor amount of damage, of course—but this process produced no sterilizing radiation. "Only New Zealand will be free."

New Zealand had somehow held out of the two coalitions, by its hardest efforts and with the help of its location. It was weakly allied to the West, but too remote.

The Director smiled again, the tight smile that was reserved for private meetings. "We shall, of course, accuse the West—but within the hour, when word of their trouble comes, we shall ask for a truce to find the culprit. Simple, is it not?"

The clock on the wall indicated five minutes before zero hour, and Volcek wiped his hands surreptitiously against his coat. It was simple enough, this use to which they had put his discoveries. And, he told himself again, it was better than any rain of real atomics. The West would not be hurt seriously—it would simply die out slowly, as no more children were born. It was really the most merciful solution to the politics of this world.

He could picture some of the panic, of course, when the little tubes did their work. First a tiny spark would form in the tube, with a spitting and hissing. Then it would grow, breaking out of the tube and through walls or anything in its way, growing and rising, spreading erratically horizontally, moving with a strange random motion, as it climbed upwards and grew larger and larger. It would reach the size of a normal atomic bomb, in a few minutes. And some would be killed by its heat, as some buildings would catch fire from it.

But mostly, there would be the terror as the people in the cities saw it spread its visible radiation and heard the familiar crackling thunder of its detonation. The terror would kill some of them, in their panic-flight, even while the thing itself drifted upwards until it found a layer of air too thin for it to go on, and it came to an automatic end.

But they would mostly escape, except for bad cases of "sunburn" and the results of their own panic. Dry material flamed quickly before its peculiar radiation, but men were not made of dry material, and it was almost harmless. They would simply have no children. And that was better than most of them could expect in a day when each morning marked the beginning of a new fear of hydrogen-bombs or worse.

One more minute.

Volcek had expected the Director to move to the panel where the big switch would cut on the surprisingly small oscillator that would trigger the little crystals in the tube projectors. But the Director was stepping back, motioning him forward. "You, Johann—it is an honor I have reserved for you."

---

There was silence in the laboratory room as Volcek moved slowly toward the board. He straightened, his eyes going down to his coat, where a bit of lint clung to it. Stefanie would have spotted it at once and rushed to brush it off. Stefanie who knew nothing of what his great work was, but who was awed by having a husband who could receive a visit from the Director. Stefanie who could have other children, after all, in this world that would have ultimate peace in spite of all the war threats, because of the work her husband was now about to do.

Suddenly, he wondered how many Stefanies there might be in the West. How many women would wait for the children they wanted, and never find them? How many would curse him, when they finally realized the truth, without ever knowing that he was the man they were cursing?

He cut off the thought, savagely. There would be others in the long centuries to come, who would know his name and would then bless him, as their children grew up without the threat of war and extinction. His children would be proud of him—his and Stefanie's.

He touched the switch that was to set off the harmless, fake "bombs" over their own world first. The Director was at his side, his face no longer smiling, but narrowed to that of a wolf.

Then the Director chuckled, and the edge of his lips curled up. "*Let there be light*," he quoted, and his eyes showed that he knew the original usage of the term in the Book he was quoting.

*And there was light*, as Johann's finger hit the switch. A tiny, spitting, hissing thing lifted from the nearby city, going up and forward in weird, erratic movements, growing larger, and spreading out, now beginning the muttered, staccato thunder that was not unlike a plutonium bomb.

The Director reached over and pressed the other switch that would send the sterilizing bombs up over the West—but he did not depress it fully. He stopped, and nodded to Volcek, and again Johann's hand went out, pushing the lever of the switch.

He should have brought Stefanie—if only she could have known nothing of the results. She would have been proud of him then, as the Director solemnly shook the hand that had done its work, and the other men began to cluster around him.

Then they moved toward the windows, hesitantly at first, not quite sure that this fire in the heavens over the city beyond was really the safe kind. But the Director lead them, together with Volcek, and they stood gazing out.

It was a huge ball of blazing fire in the sky now, partially softened by the filters that had sprung shut over the windows automatically, and the mutter of its detonation reached them as they stood there.

There was some damage, of course, even here. Some of the older wooden buildings near where it had first appeared were bursting into flames, and the distant figures of people had gone into a panic—they had to believe it was real, just as the West must believe for a time that both powers had received the same treatment.

Stefanie? But Volcek had taken care of that, with a drug in her coffee. She would be asleep, unaware of the tumult, and not one of the mob trying frantically to escape what could never harm them.

---

Now the ball of fire was rising upwards more steadily, its own heat driving it up as a blast of hot air is carried up over a fire. The brightness began to fade as they watched, moving up and turning smaller, shrinking, and finally going away.

Volcek sighed, and the Director echoed it, a satisfied sigh, and a somewhat regretful one. "It is hard to see even a few of my people hurting themselves," the Director said slowly. "But it is best. And—it is done."

He turned to Volcek, and Johann straightened, reminding himself that whatever the Director said must be remembered. He would have to tell Stefanie—and someday, he could tell his children, and his grandchildren. He must remember it.

But the Director's words were never spoken. There was a shout from the windows, and they swung back, to see another tiny flame leaping up, this time nearer, growing and spitting.

There was something wrong with it. The other had grown more slowly. This raged out, savagely, growing more sure of itself as it leaped toward them, then darted sidewise.

Volcek turned suddenly to the instruments packed in the drawers. The spectrovisor and the diffractograph came out in his shaking hands, and he slapped them down onto the wooden sill of the window, already beginning to smoke faintly.

Then his hands steadied as he adjusted the instruments.

One look was enough. This was the nitrogen-fusion, not the harmless oxygen reaction.

His eyes met the Director's, and he nodded, but the nod was unnecessary. The Director had already guessed.

They moved toward him, a harsh mob sound coming from them, but the Director was before them.

"No! Stop!" The voice that had been trained to command a power greater than men had ever held before stopped them. "No, if the West has scientists too, that is no fault of Johann Volcek. Johann, you did not fail; you will not suffer."

Volcek heard him, and saw them fall back. He thought again of the lint on his coat, and looked down at it. He picked it off, while the others drew back, and the Director was assuring him that all would be well with him.

Stefanie would have no children now. There would be no grandchildren to hear the Director's senseless words, telling him he would not suffer.

You don't suffer when you've killed a race.

\*\*\* END OF THE PROJECT GUTENBERG EBOOK AND THERE WAS  
LIGHT \*\*\*

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

# THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at [www.gutenberg.org/license](http://www.gutenberg.org/license).

## **Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works**

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at [www.gutenberg.org](http://www.gutenberg.org). If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website ([www.gutenberg.org](http://www.gutenberg.org)), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project

Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

## 1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to

you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

## **Section 2. Information about the Mission of Project Gutenberg**

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at [www.gutenberg.org](http://www.gutenberg.org).

### **Section 3. Information about the Project Gutenberg Literary Archive Foundation**

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at [www.gutenberg.org/contact](http://www.gutenberg.org/contact)

### **Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation**

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: [www.gutenberg.org/donate](http://www.gutenberg.org/donate).

## **Section 5. General Information About Project Gutenberg electronic works**

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:  
[www.gutenberg.org](http://www.gutenberg.org).

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
