Art Work by Robert Nelson

INTRODUCTION TO THE NEW EDITION

History, with all of its ramifications, is a complex subject. Often, students pursue it with only the written word in hand, in an attempt to gain a deeper, and more meaningful understanding of it. This is usually the case because other means of historical relation are not available, or completely nonexistent. The strict narration of facts is not a sufficient means alone for broadening one's knowledge of the past.

Whenever the written word can be complemented with other media, for example, worthwhile actual photographs, a more complete understanding of the past is experienced. Literally, a picture is worth a thousand words, and the student can gain, for himself, a more penetrating insight into his subject which words alone cannot always provide him.

In publishing *Michigan's Copper Country In Early Photos*, a pictorial account of the Copper Country around 1900, the Black Letter Press has made a more complete understanding of the region possible by supplementing its written histories with the varied collection of photographs. The area's setting, its people, and their work are portrayed. Originally, the book was published as, *Souvenir of the Copper Country Upper Peninsula of Michigan*. Copies of this original work are extremely scarce today.

In his introduction to the original publication, B.E. Tyler, the publisher, states that the Copper Country is a place of natural beauty, with the mining of copper from the bowels of the earth as the district's major industry. This was written in 1903, and the pictures presented in the volume's pages offer supportive evidence to his words. However, time has moved on, and much has both changed and remained the same in the Copper Country.

Tyler mentions a picture of the Cliff Mining Camp, and relates that the work has been abandoned, but, "almost every house that was ever erected there is standing." This is no longer true. All structures have been dismantled, and all

that remains of the once proud and fabulous Cliff mine are a few poor rock piles.

The many gabled, and uniquely constructed Quincy Rock House was to be found in Hancock, and it was reputed to be the most photographed mine structure of its kind in the country. It was destroyed by fire in 1956.

The Douglas House, a famous meeting place, and hotel, in Houghton still remains, although its appearance has been altered, and its surroundings have changed.

The Kerredge Theater, in Hancock, was completed in 1902, with some seats costing as much as forty dollars for a single performance. Popular shows, Shakespearian plays, and operas, were presented on its stage.

Copper mining no longer remains the major industry of the area. Once ii where many shafts were sunk deep into the earth, and their rockhouses lined the horizon, only a few remain today as reminders of a bygone era, standing as ever vigilant sentinels, guarding what may be left of their once rich copper deposits. Gone are the giant hoisting machines used to bring copper ore to the surface. Gone are the miners, who labored hard by candlelight with simple hand tools, replaced by today's modern miner using his battery operated head lamp, and power machinery when work is available. Only exploratory and experimental work is presently being conducted in the Copper Country.

One aspect of the Copper Country which remains relatively unchanged is its rugged natural beauty. The sparkling clear deep blue waters of chilling Lake Superior still crash upon its rocky tree lined shores. A green mantle of dense forests covers much of the land, which in places is wild and mountainous. Water still rushes over spectacular falls as it flows onward toward the world's largest fresh water lake. Past and present residents, and many visitors, have witnessed the scenic panorama, with some insisting that the climate of the Copper Country has an exhilarating, and refreshing therapeutic affect upon them.

Suggested reading material on the Copper Country might include the following titles that are considered to be of more than passing interest: *Red*

Metal, by C. Harry Benedict, *Prehistoric Copper Mining in the Lake Superior Region*, edited by Roy W. Drier, and Octave J. DuTemple, *Boom Copper*, by Angus Murdock, and *The Cliff*, by Donald Chaput. Also of worthwhile reading are such historical novels on the region as, *Where Copper Is King*, by James Wright, published in 1905, and, *The Long Winter Ends*, by Newton G. Thomas.

Another beneficial book is, *A True Description of the Lake Superior Country*, written by John St. John, and originally published in 1846. It was republished by the Black Letter Press in 1976, and it provides its readers with a rare and invaluable first hand account of early Copper Country settings. Of particular interest are the author's descriptions of the region's geologic development, and of the early copper mines.

Michigan's Copper Country In Early Photos adds a new dimension to the historiography of the Copper Country, providing in pictures what the student may not grasp from the written word.

Richard A. Cebelak
Grand Rapids, Michigan
March, 1977

The simple beauty of the Copper Country of Michigan,  the vastness of its enterprises and the activity of its marts are impressive in their very nature. Their pictures are more pleasing when left unmarred by wordy descriptions. Scenes may be absorbed and grasped by the eye which no language can describe.

This book is a simple collection of pictures, characteristic of scenes which are familiar to those acquainted with the Copper Country. The effort has been put forth to make it as comprehensive as possible.

The winning of the copper from the earth constitutes the dominant industry of the district, and is deserving of first place in a representation of the Copper Country. All features of the industry are shown—in the depths of the mine; on the surface, where the world's most massive machinery furnishes power to actuate the air drills and operate the hoisting cables; in the mills

and smelters, where the metal is refined into copper bullion; along the wharves, where ships are laden with the product, to carry it to lower lake ports, whence it is distributed throughout the world.

Historic points of interest are given. There is a picture of the old Cliff Mining Camp, one of the earliest, and, in its day, one of the most populous and prosperous communities in the Upper Peninsula. To-day almost every house that was ever erected there is standing, most of them dating back nearly half a century, but the place is deserted—hundreds of houses with bare walls staring out through bleak windows, and scarcely a dozen souls to inhabit them. The old mine workings are abandoned for more profitable deposits of mineral.

Pictures are given which show the natural beauty of the Copper Country. Pleasing views are so bountifully bestowed by nature that it is a difficult task to choose the most impressive. But enough are given to create a taste for more—a taste that can be gratified to its fullest only by rambling among the vales and hills, through the forests and along the banks of the quiet streams and the shores of the mighty Unsalted Sea.

The new South Range is thoroughly pictured. This is the young giant which in the last five years has forged forward and wrought from the ground which was the rooting place for an unbroken forest a group of copper mining camps that stand to-day close rivals to the older camps which have been half a century in the making.

Such pictures constitute within themselves a story of beauty, power and pathos which no words can enhance. Those responsible for the book have drawn from its preparation a wealth of pleasure. Courtesies have been extended from all sources, in recompense for which the sincerest expression of appreciation is now extended. May those into whose hands the book shall come glean from it all the subtle meaning and all the stirring thoughts which its pictures are capable of inspiring. It will then be an epic, indeed—a poem, a song, a burst of harmony beyond the power of words to utter.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including obsolete, old, middle-aged and new computers. It exists because of the

efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
