Always mention "THE BAY STATE OOLOGIST" when answering Advertisements.

"THE AUK"

A Quarterly Journal of Ornithology. \$3 a year. 75 cents a single number. Published for *The American Ornithologists' Union*.

The "AUK" will present, as heretofore, timely and interesting papers on the subject to which it relates, and its readers may feel sure of being kept abreast of the advances in the science. The "AUK" is primarily intended as a communication between ornithologists. While necessarily to some degree technical, it contains a fair proportion of matter of a popular character. Its notices of recent literature cover the whole field of North American Ornithology and with the department of "General Notes" and "Notes and

News" render the journal indispensable to those wishing the latest and fullest intelligence of the subject.

L. S FOSTER, Publisher, 35 Pine St., New York.

The BAY STATE OOLOGIST.

VOL. 1. PITTSFIELD. MASS., APRIL, 1888. NO. 4.

Notes on Some Birds of Texas.

BY J. A. SINGLEY, ESQ.

(continued from page 11.)

No. 36. *Lophophanes bicolor* (Linn.). Tufted Titmouse.

They are not very particular about a nesting place—provided it's a hollow—and will indifferently occupy a natural cavity in a tree, an old woodpecker's nest or a martin box. The nest is composed of dead leaves and moss and very often cast-off snake-skin, invariably lined with some sort of animals' hair.

The bird will not leave the nest after incubation commences, but will sit close while the entrance to the nest is being enlarged, and when a hand is inserted in the cavity will puff itself up, make a hissing noise and peck at the intruder. It has to be lifted off the nest before the eggs can be taken, thus making identification positive.

The number of eggs in a set varies from four to eight, usually six or seven, and varying from a blunt oval to elongated, almost equal-ended: white, spotted with reddish-brown, thickest at the larger end, where are also found some obscure lilac shell markings. Sometimes the brown is very pale and the spots few and small. Eggs like this resemble those of the Plain Titmouse. A series of fifteen eggs average .75×.36 inches. Two or more broods are raised, fresh eggs being found from the 1st of April to the last of May.

No. 42. *Parus carolinensis* (Aud.,) Carolina Chickadee.

Like the last, this is called "Tomtit" by the natives. It shares most of the habits of the Titmouse but I don't think it is a nest robber.

This species is very like the Black-capped Chickadee of the Eastern States, replacing that species in the South Atlantic and Gulf States. The chin, throat and top of head to nape, black, sides of head, whitish; rest of

upper parts brownish-ash; under parts dingy white and slightly brownish on the sides. Wings and tail like the upper parts. A specimen before me measures—length, 4.53 in.; extent, 7.02 in.; wing, 2.46; tail, 2.24. It is very close to *P. atricapillus* and should really be listed as a variety of that species.

This Chickadee is resident here, and is found chiefly in the timbered uplands, where its merry “Chick-a-dee-dee” is heard all the year round.

It commences nesting in March, and fresh eggs can be found until June (thus indicating that two or three broods are raised in a season.) It is a little more choice in its location for a nest than the Titmouse. A deserted Woodpecker’s nest is often used, but the majority of the nests I find are in rotten black-jack stubs and excavated by the birds themselves. A few of them nest in boxes that I’ve nailed up in the woods. The nests vary but little being built of moss, cotton (when obtainable) a few feathers and generally lined with rabbit fur, sometimes with the hair or fur of other animals. The bird sets close when the nest is disturbed and it is necessary to lift it off to see what it is trying to conceal.

The eggs vary in number from five to seven, never more with me; oval in shape, white, thickly spotted with reddish-brown. The spots are sometimes confluent, forming blotches, occasionally covering the larger end of the egg. Sometimes the eggs are finely speckled with small pale-brown spots, and one specimen before me has these specks forming a wreath about the smaller end. A series of eleven eggs (two sets,) average .63×.52 inches. I have also found several sets where the eggs were sub-globular, like those of some owls.

SPECIAL NOTICE.—Next issue will be enlarged to 12 pages and will be filled with interesting and instructive original reading matter, from the pens of numerous well-known writers on the subjects of which we treat. We would advise you to subscribe at once, as we offer special inducements to new subscribers in our prize offers. If you cannot afford a year’s or half-year’s subscription, send 5 cts. in stamps and we will mail you a copy of the enlarged May number when published. We shall be obliged to refuse stamps in payment for subscriptions, as we have a supply on hand.

The Nashville Warbler.

BY WM. L. KELLS, LISTOWEL, ONTARIO, CANADA.

The life-history of this bird is yet, to a great extent, wrapped in obscurity. Sometimes it is numerous in the Spring migration; again it is comparatively rare. It can only yet be regarded as a migrant in the south and central parts of Ontario, as no certain record has yet been made of its nesting, or making its summer home in this locality; though it is very probable that more of this genus of birds may remain during the summer, and nest in the deep, swampy woods of this Province, than is now generally known.

In my early days, while rambling in the forest, or at work in the woods in the summer time, I have seen nests of little birds, never since discovered by me, and almost every year since I began to form my Oological collection, I have taken one or more nests of Warblers previously unknown to me, and as I occasionally catch glimpses of others in my hunting excursions in the summer season, I am led to believe, that as time progresses and more attention is given to the subject, more nests of these birds will be discovered and described by our rising Ornithologists, and among others that of the Nashville Warbler. This is the more probable in the case of this species, from the fact that its general habitat is in deep, swampy places, where few persons interested in Ornithology care to penetrate, and also from the fact that specimens of this species are occasionally observed on the margins of swampy woods, in the summer season.

It is said that this species nests upon the ground in the moss that grows in damp places, and to form the same with dry leaves, fibres of bark, pine needles, fine, dry grass and hay. The eggs, four or five, are white, speckled with lilac or reddish-brown.

This is one of those wanderers of the Mississippi Valley which appear to enter Ontario from the south-west. It is between four or five inches in length, and on the upper parts the plumage is of an olive-green, brighter on the rump; but ashy on the head. Below it is bright yellow, paler towards the lower parts, with olive shading on the sides. Crown with a chestnut patch, and pale ring round the eyes.

Instructions for Collecting and Preserving Birds and Eggs.

BY PROF. J. A. SINGLEY, GIDDINGS, TEXAS.

(continued from page 21.)

Each of the three eggs should be marked No. 10. By this method, the first number always representing the number of the set, the second the number of the species and the third the number of eggs in the set, mistakes are almost impossible. If he saw the bird he should write "seen" after the last item. If the bird was caught or shot, he can mention it instead of "seen." The last two items explain themselves, and all these items except the first, must enter into the data of the set. It is not necessary to give materials of nest, except in the case of rare species. I follow the above method of authenticating, to save time; but the collector who has plenty of that commodity to spare, can of course write out full particulars of each set in the field. Never trust to memory in these matters, have it in black and white.

The collector, having returned home and being ready to prepare his eggs, let him take them out of his box where he has placed them well wrapped in cotton, as taken, and unwrapping them, place each set by itself on the "dryer" described elsewhere (he will now begin to appreciate that useful article,) now getting his tools, not forgetting a glass of water to use in rinsing the eggs, he is ready to go to work.

The points of the drills, as bought, are always dull, and it is recommended to start the hole in the egg with a pin or needle. These useful articles are small, likely to get lost while working with, and make one more article to look after. You can dispense with them by carefully filing the point of your drill to a needle-like point. Select the least showy part of the egg, and holding it (the egg) in your left hand (the right if you are left-handed) put the point of the drill against this "least showy part," and twirl it (the drill) between the thumb and forefinger. Don't bear on the drill, as if you were drilling in iron, if you do you'll have a hole clear through both sides of the egg, something you don't want. The hole, being drilled until the largest

circumference of the burr passes inside of the egg, don't try to pull it out, as a broken egg will be the result if you do. There is an internal pellicle lining the egg: if this is not cut out where the hole is drilled, it will interfere with blowing the egg. By bringing the burr of the drill up against this pellicle, as if you were going to remove it from the egg, and giving the same twirling motion that you did when drilling, the pellicle will be cut all around the edges of the hole, and the drill will come out. Now take your blow-pipe, and putting the point of it close to the hole, blow gently and the contents will come out. When incubation is more or less advanced, a larger hole must be drilled, and the embryo removed with the hook and scissors, a tedious operation and not always successful even with the greatest of care. Better let incubated eggs remain in the nest. A little experience will teach you how to differentiate fresh eggs from those that are too far advanced to save.

Never put the point of the blow-pipe inside of the egg, as a bursted egg will be the result, especially so, if your lungs are well developed. Having emptied the egg of its contents, the next step is to take a mouthful of water and inject it through the blow-pipe into the egg, rinsing it thoroughly. Large eggs should be filled half full of water and well shaken. Eggs treated in this manner are perfectly clean inside and offer no inducements to insects to harbor within, a thing that they will surely do in eggs prepared in a slovenly manner. Having blown all the water out of the egg, take a soft cloth and wipe it dry, removing any foreign matter that may be adhering to it, taking care, however, not to rub off the number you put on it when collected, and also notice that you do not rub off any of the markings on it. On some eggs the pigment is only loosely applied on the outside. Now place the egg, hole downwards, directly over one of the holes on your dryer, and it will drain and dry in a few hours; continue in this way until you clean all your eggs, keeping each set to itself and adding another memorandum in your note-book opposite each set, as to the state of incubation of that set. When the eggs are dry, fill out a data for each set. These particulars are taken from your note-book. Suppose he (the collector) takes the first set, that of the Red-headed Woodpecker. He will fill out a blank as follows:

No. 375. Name, Red-headed Woodpecker.

Collector, John Smith.

Locality, Boston, Mass.

Date, June 3d, 1887.

Set mark, 1/4.

Number of eggs in set, 4. Identity, bird seen.

Nest, excavated in an elm tree, 20 feet up; eggs laid on chips on bottom of cavity.

The collector will of course substitute his own name, locality and date, for those given above, and if this should prove to be the second, third or fourth set of that species taken during the season, he would mark the set as 2-4, 3-4, 4-4 and so on.

(TO BE CONTINUED.)

Editorial.

So few exchange notices were received in time to be published in this issue that we have decided to hold them for the next.

Persons receiving sample copies of this issue, will oblige us greatly by acknowledging the receipt of same. We received so many replies from those complying with the above request, last month, that we thought it best to try it again. If you cannot subscribe, we like to know that you received the copy sent you, and what you think of our magazine.

The May "Hoosier Naturalist" published by R. B. Trouslot & Co., Valparaiso, Ind., will contain much matter of interest to all Ornithologists and Oologists. A sample copy will be mailed free to all applying to the publishers. We can furnish you with a year's subscription each to the "Hoosier Naturalist" and the "B. S. O." for 50 cents, the regular price of the latter.

The April number of the "Hawkeye Ornithologist and Oologist" reached us just before going to press. We are sorry to see that the editors as well as Mr. Oliver Davie are laboring under a wrong impression. In the February issue when we published that notice regarding "Davies' Key," we meant exactly what we said, as Mr. Davie, in a letter dated Jan. 26, '88, said: "I can furnish you copies of my Key in quantities at —— per copy." This notice was inserted simply to allay a wrong impression, which would likely arise after reading the notice in the Jan "H. O. & O.," and not as a "hit." As

regards not having purchased any copies of Mr. Davie, we would say we had a number of copies on hand we wished to dispose of, and we were greatly surprised to see Mr. Davies' letter, after having written him explaining the reasons of our not ordering copies from him.

The Pileated Woodpecker.

BY J. W. JACOBS, WAYNESBURG, PA.

On April 24th, I was passing through a large patch of woods, taking note of all the bird life I could see, when I noticed a large hole near the top of a "snag." I went a little closer, and then I saw that the hole was too large for a Red-head (*M. erythrocephalus*) or a Flicker (*C. auratus*).

I went up to the tree; there was a great pile of chips on the ground; I hammered on the tree, and a Pileated Woodpecker (*Hylotomus pileatus*) flew out, I climbed up, but owing to the tree being high, smooth bark and no limbs at all, I could not stick, so I resolved to call again, better prepared for an attack on the tree.

On the 28th, I started out to procure the set of eggs, if there proved to be any in the nest. Everything went well until I reached the tree, and there I could see that the hand of destruction had visited *H. pileatus*, for the tree was stretched out upon the ground.

Two wood-choppers had been in the woods the day before, making rails; they saw the old bird fly from her nest, and of course, through curiosity, they cut the tree down to see what the eggs looked like. I found the pieces of three or four egg-shells, and probably there were more. I did not find out how many they broke.

The hole was thirty-five feet from the ground, and such a fall as that would have broken a thousand eggs, had that number been in the cavity.

About two months later, I was in the vicinity of this tree, and saw in a neighboring tree a large hole resembling the first. I did not climb to the hole, for from all appearance, the brood had hatched and were gone. I think this hole was excavated by the same pair of birds.

On May 21st, I was collecting in a large strip of woods, about a quarter of a mile from town, when I saw in a live maple an excavation of *H. pileatus*. I climbed up and found the nest contained four young birds and

one nearly fresh egg. This is a beautiful egg, glossy white, and measures 1.25×.95 inches.

During the time I was in the tree, both old birds were perched not far off, and every now and then would utter their harsh cackle.

Later in the season I found another nest of this bird; it was in a live maple, twenty feet from the ground. The young birds had flown.

A Day's Collecting.

BY H. C. COOK, POTSDAM, N. Y.

On the 23d of May, last season, my chum and myself started out for a good solid day's work in the field. We took our climbing irons, egg-boxes and a big lunch, for it has been our experience that it makes a fellow awful hungry to walk eight or ten miles and shin up as many trees before dinner.

About a mile from the village we came to a small grove of high timber. Just before we reached it, a crow flew out to meet us, circled over our heads and returned again, a sure sign of a nest. We had, however, considerable difficulty in finding it, as it was remarkably well concealed for so large a nest, in a beech about thirty-five feet from the ground. It contained five highly incubated eggs of nearly uniform size, but differing considerably in the ground color and markings. The average measurement was 1.60×1.12. Three of the eggs were dark green, marked with darker blotches, and the other two a much lighter green in ground color with the same colored blotches.

After leaving this grove, we passed through several orchards without finding anything until we came to the last one, where my chum spied a nest in a low apple tree. Approaching it carefully, we obtained a good view of the bird, which I at once knew to be a Black-billed Cuckoo (*Coccygus erythrophthalmus*.) The nest contained three dull green eggs, very peculiar in regard to size, as one was small, the next larger and the last measured nearly twice the size of the first. One was fresh and the other two in different stages of incubation.

We stopped here to blow our eggs and eat our dinner, as it was about noon. After we had accomplished this last most important duty, we continued our search looking here and there, but seeing no desirable nest, until it began to get rather discouraging, when, while hunting for the nests of the White-rumped Shrike (*Lanius ludovicianus excubitorides*) in a large field of thorn apple trees, skirted by a swampy woods, I made the great find of the day. I was passing by an old dead stump, when, from between the roots and almost under my feet, a brownish colored bird started up and flew

away, making a peculiar whistling noise as it went. Looking down, I saw a fine set of four eggs of the American Woodcock (*Philohela minor*.) They were of unusual size, the largest measuring 1.85×1.10 in.

This ended our day's collecting, and we went home well satisfied with the fruits of our labor.

HERE IS YOUR CHANCE

To enlarge your collection without cash. In order to increase the circulation of our magazine, we have decided to give to the persons sending us the 5 greatest number of paid yearly subscribers for the B. S. O. before June 1st, 1888, the following prizes:

First.—A fine set of 5 eggs of the Roseate Spoonbill.

Second.—A " " " 4 " " " " "

Third.—A " " " 4 " " " Am. Long-eared Owl.

Fourth and Fifth each a set of 6 eggs of the Purple Gallinule or a copy of Davies' "Key" third edition.

ANOTHER CHANCE.

To the first person answering the above offer by sending in their subscription and stating plainly that you wish to try for a prize, we will give a fine set of four eggs of the Prothonotary Warbler, or a set of four of the Black Snow-bird. To the fifth person, we will give a set of four eggs of the Blue Yellow-backed Warbler. To the tenth person, we will give a set of 2 eggs of the Red-tailed Hawk; to the fifteenth, twentieth and twenty-fifth each a copy of Davies' "Key" 3d edition. We will also send every person wishing to try for a prize, and stating so in their letter, a few extra copies to use as samples.

CONDITIONS UNDER WHICH PRIZES ARE GIVEN.

To be entitled to any of the first five prizes, you must (if not already a subscriber) send in your subscription with your first list. Subscriptions

mailed from your office May 31st, will count, but not later. The names of the winners will be published in the June B. S. O. and prizes forwarded June 4th.

Should two or more parties send the same number of subscribers, the highest prize will be awarded to the party whose list was sent earliest. We can give Cash in place of prizes if desired. Commence work at once and secure a prize. Address, plainly,

*** END OF THE PROJECT GUTENBERG EBOOK THE BAY STATE
OOLOGIST, VOL. 1 NO. 4, APRIL 1888 ***

Updated editions will replace the previous one—the old editions will be renamed.

Creating the works from print editions not protected by U.S. copyright law means that no one owns a United States copyright in these works, so the Foundation (and you!) can copy and distribute it in the United States without permission and without paying copyright royalties. Special rules, set forth in the General Terms of Use part of this license, apply to copying and distributing Project Gutenberg™ electronic works to protect the PROJECT GUTENBERG™ concept and trademark. Project Gutenberg is a registered trademark, and may not be used if you charge for an eBook, except by following the terms of the trademark license, including paying royalties for use of the Project Gutenberg trademark. If you do not charge anything for copies of this eBook, complying with the trademark license is very easy. You may use this eBook for nearly any purpose such as creation of derivative works, reports, performances and research. Project Gutenberg eBooks may be modified and printed and given away—you may do practically ANYTHING in the United States with eBooks not protected by U.S. copyright law. Redistribution is subject to the trademark license, especially commercial redistribution.

START: FULL LICENSE

THE FULL PROJECT GUTENBERG™ LICENSE

PLEASE READ THIS BEFORE YOU DISTRIBUTE OR USE THIS WORK

To protect the Project Gutenberg™ mission of promoting the free distribution of electronic works, by using or distributing this work (or any other work associated in any way with the phrase “Project Gutenberg”), you agree to comply with all the terms of the Full Project Gutenberg License available with this file or online at www.gutenberg.org/license.

Section 1. General Terms of Use and Redistributing Project Gutenberg electronic works

1.A. By reading or using any part of this Project Gutenberg electronic work, you indicate that you have read, understand, agree to and accept all the terms of this license and intellectual property (trademark/copyright) agreement. If you do not agree to abide by all the terms of this agreement, you must cease using and return or destroy all copies of Project Gutenberg electronic works in your possession. If you paid a fee for obtaining a copy of or access to a Project Gutenberg electronic work and you do not agree to be bound by the terms of this agreement, you may obtain a refund from the person or entity to whom you paid the fee as set forth in paragraph 1.E.8.

1.B. “Project Gutenberg” is a registered trademark. It may only be used on or associated in any way with an electronic work by people who agree to be bound by the terms of this agreement. There are a few things that you can do with most Project Gutenberg electronic works even without complying with the full terms of this agreement. See paragraph 1.C below. There are a lot of things you can do with Project Gutenberg electronic works if you follow the terms of this agreement and help preserve free future access to Project Gutenberg electronic works. See paragraph 1.E below.

1.C. The Project Gutenberg Literary Archive Foundation (“the Foundation” or PGLAF), owns a compilation copyright in the collection of Project Gutenberg electronic works. Nearly all the individual works in the collection are in the public domain in the United States. If an individual work is unprotected by copyright law in the United States and you are

located in the United States, we do not claim a right to prevent you from copying, distributing, performing, displaying or creating derivative works based on the work as long as all references to Project Gutenberg are removed. Of course, we hope that you will support the Project Gutenberg mission of promoting free access to electronic works by freely sharing Project Gutenberg works in compliance with the terms of this agreement for keeping the Project Gutenberg name associated with the work. You can easily comply with the terms of this agreement by keeping this work in the same format with its attached full Project Gutenberg License when you share it without charge with others.

1.D. The copyright laws of the place where you are located also govern what you can do with this work. Copyright laws in most countries are in a constant state of change. If you are outside the United States, check the laws of your country in addition to the terms of this agreement before downloading, copying, displaying, performing, distributing or creating derivative works based on this work or any other Project Gutenberg work. The Foundation makes no representations concerning the copyright status of any work in any country other than the United States.

1.E. Unless you have removed all references to Project Gutenberg:

1.E.1. The following sentence, with active links to, or other immediate access to, the full Project Gutenberg License must appear prominently whenever any copy of a Project Gutenberg work (any work on which the phrase “Project Gutenberg” appears, or with which the phrase “Project Gutenberg” is associated) is accessed, displayed, performed, viewed, copied or distributed:

This eBook is for the use of anyone anywhere in the United States and most other parts of the world at no cost and with almost no restrictions whatsoever. You may copy it, give it away or re-use it under the terms of the Project Gutenberg™ License included with this eBook or online at www.gutenberg.org. If you are not located in the United States, you will have to check the laws of the country where you are located before using this eBook.

1.E.2. If an individual Project Gutenberg electronic work is derived from texts not protected by U.S. copyright law (does not contain a notice indicating that it is posted with permission of the copyright holder), the work can be copied and distributed to anyone in the United States without paying any fees or charges. If you are redistributing or providing access to a work with the phrase “Project Gutenberg” associated with or appearing on the work, you must comply either with the requirements of paragraphs 1.E.1 through 1.E.7 or obtain permission for the use of the work and the Project Gutenberg trademark as set forth in paragraphs 1.E.8 or 1.E.9.

1.E.3. If an individual Project Gutenberg electronic work is posted with the permission of the copyright holder, your use and distribution must comply with both paragraphs 1.E.1 through 1.E.7 and any additional terms imposed by the copyright holder. Additional terms will be linked to the Project Gutenberg License for all works posted with the permission of the copyright holder found at the beginning of this work.

1.E.4. Do not unlink or detach or remove the full Project Gutenberg License terms from this work, or any files containing a part of this work or any other work associated with Project Gutenberg.

1.E.5. Do not copy, display, perform, distribute or redistribute this electronic work, or any part of this electronic work, without prominently displaying the sentence set forth in paragraph 1.E.1 with active links or immediate access to the full terms of the Project Gutenberg License.

1.E.6. You may convert to and distribute this work in any binary, compressed, marked up, nonproprietary or proprietary form, including any word processing or hypertext form. However, if you provide access to or distribute copies of a Project Gutenberg work in a format other than “Plain Vanilla ASCII” or other format used in the official version posted on the official Project Gutenberg website (www.gutenberg.org), you must, at no additional cost, fee or expense to the user, provide a copy, a means of exporting a copy, or a means of obtaining a copy upon request, of the work in its original “Plain Vanilla ASCII” or other form. Any alternate format must include the full Project Gutenberg License as specified in paragraph 1.E.1.

1.E.7. Do not charge a fee for access to, viewing, displaying, performing, copying or distributing any Project Gutenberg works unless you comply with paragraph 1.E.8 or 1.E.9.

1.E.8. You may charge a reasonable fee for copies of or providing access to or distributing Project Gutenberg electronic works provided that:

- You pay a royalty fee of 20% of the gross profits you derive from the use of Project Gutenberg works calculated using the method you already use to calculate your applicable taxes. The fee is owed to the owner of the Project Gutenberg trademark, but he has agreed to donate royalties under this paragraph to the Project Gutenberg Literary Archive Foundation. Royalty payments must be paid within 60 days following each date on which you prepare (or are legally required to prepare) your periodic tax returns. Royalty payments should be clearly marked as such and sent to the Project Gutenberg Literary Archive Foundation at the address specified in Section 4, "Information about donations to the Project Gutenberg Literary Archive Foundation."
- You provide a full refund of any money paid by a user who notifies you in writing (or by e-mail) within 30 days of receipt that s/he does not agree to the terms of the full Project Gutenberg™ License. You must require such a user to return or destroy all copies of the works possessed in a physical medium and discontinue all use of and all access to other copies of Project Gutenberg™ works.
- You provide, in accordance with paragraph 1.F.3, a full refund of any money paid for a work or a replacement copy, if a defect in the electronic work is discovered and reported to you within 90 days of receipt of the work.
- You comply with all other terms of this agreement for free distribution of Project Gutenberg™ works.

1.E.9. If you wish to charge a fee or distribute a Project Gutenberg™ electronic work or group of works on different terms than are set forth in

this agreement, you must obtain permission in writing from the Project Gutenberg Literary Archive Foundation, the manager of the Project Gutenberg™ trademark. Contact the Foundation as set forth in Section 3 below.

1.F.

1.F.1. Project Gutenberg volunteers and employees expend considerable effort to identify, do copyright research on, transcribe and proofread works not protected by U.S. copyright law in creating the Project Gutenberg™ collection. Despite these efforts, Project Gutenberg™ electronic works, and the medium on which they may be stored, may contain “Defects,” such as, but not limited to, incomplete, inaccurate or corrupt data, transcription errors, a copyright or other intellectual property infringement, a defective or damaged disk or other medium, a computer virus, or computer codes that damage or cannot be read by your equipment.

1.F.2. LIMITED WARRANTY, DISCLAIMER OF DAMAGES - Except for the “Right of Replacement or Refund” described in paragraph 1.F.3, the Project Gutenberg Literary Archive Foundation, the owner of the Project Gutenberg™ trademark, and any other party distributing a Project Gutenberg™ electronic work under this agreement, disclaim all liability to you for damages, costs and expenses, including legal fees. YOU AGREE THAT YOU HAVE NO REMEDIES FOR NEGLIGENCE, STRICT LIABILITY, BREACH OF WARRANTY OR BREACH OF CONTRACT EXCEPT THOSE PROVIDED IN PARAGRAPH 1.F.3. YOU AGREE THAT THE FOUNDATION, THE TRADEMARK OWNER, AND ANY DISTRIBUTOR UNDER THIS AGREEMENT WILL NOT BE LIABLE TO YOU FOR ACTUAL, DIRECT, INDIRECT, CONSEQUENTIAL, PUNITIVE OR INCIDENTAL DAMAGES EVEN IF YOU GIVE NOTICE OF THE POSSIBILITY OF SUCH DAMAGE.

1.F.3. LIMITED RIGHT OF REPLACEMENT OR REFUND - If you discover a defect in this electronic work within 90 days of receiving it, you can receive a refund of the money (if any) you paid for it by sending a written explanation to the person you received the work from. If you received the work on a physical medium, you must return the medium with your written explanation. The person or entity that provided you with the

defective work may elect to provide a replacement copy in lieu of a refund. If you received the work electronically, the person or entity providing it to you may choose to give you a second opportunity to receive the work electronically in lieu of a refund. If the second copy is also defective, you may demand a refund in writing without further opportunities to fix the problem.

1.F.4. Except for the limited right of replacement or refund set forth in paragraph 1.F.3, this work is provided to you 'AS-IS', WITH NO OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PURPOSE.

1.F.5. Some states do not allow disclaimers of certain implied warranties or the exclusion or limitation of certain types of damages. If any disclaimer or limitation set forth in this agreement violates the law of the state applicable to this agreement, the agreement shall be interpreted to make the maximum disclaimer or limitation permitted by the applicable state law. The invalidity or unenforceability of any provision of this agreement shall not void the remaining provisions.

1.F.6. INDEMNITY - You agree to indemnify and hold the Foundation, the trademark owner, any agent or employee of the Foundation, anyone providing copies of Project Gutenberg™ electronic works in accordance with this agreement, and any volunteers associated with the production, promotion and distribution of Project Gutenberg™ electronic works, harmless from all liability, costs and expenses, including legal fees, that arise directly or indirectly from any of the following which you do or cause to occur: (a) distribution of this or any Project Gutenberg work, (b) alteration, modification, or additions or deletions to any Project Gutenberg work, and (c) any Defect you cause.

Section 2. Information about the Mission of Project Gutenberg

Project Gutenberg is synonymous with the free distribution of electronic works in formats readable by the widest variety of computers including

obsolete, old, middle-aged and new computers. It exists because of the efforts of hundreds of volunteers and donations from people in all walks of life.

Volunteers and financial support to provide volunteers with the assistance they need are critical to reaching Project Gutenberg's goals and ensuring that the Project Gutenberg collection will remain freely available for generations to come. In 2001, the Project Gutenberg Literary Archive Foundation was created to provide a secure and permanent future for Project Gutenberg and future generations. To learn more about the Project Gutenberg Literary Archive Foundation and how your efforts and donations can help, see Sections 3 and 4 and the Foundation information page at www.gutenberg.org.

Section 3. Information about the Project Gutenberg Literary Archive Foundation

The Project Gutenberg Literary Archive Foundation is a non-profit 501(c)(3) educational corporation organized under the laws of the state of Mississippi and granted tax exempt status by the Internal Revenue Service. The Foundation's EIN or federal tax identification number is 64-6221541. Contributions to the Project Gutenberg Literary Archive Foundation are tax deductible to the full extent permitted by U.S. federal laws and your state's laws.

The Foundation's business office is located at 41 Watchung Plaza #516, Montclair NJ 07042, USA, +1 (862) 621-9288. Email contact links and up to date contact information can be found at the Foundation's website and official page at www.gutenberg.org/contact

Section 4. Information about Donations to the Project Gutenberg Literary Archive Foundation

Project Gutenberg™ depends upon and cannot survive without widespread public support and donations to carry out its mission of increasing the number of public domain and licensed works that can be freely distributed in machine-readable form accessible by the widest array of equipment

including outdated equipment. Many small donations (\$1 to \$5,000) are particularly important to maintaining tax exempt status with the IRS.

The Foundation is committed to complying with the laws regulating charities and charitable donations in all 50 states of the United States. Compliance requirements are not uniform and it takes a considerable effort, much paperwork and many fees to meet and keep up with these requirements. We do not solicit donations in locations where we have not received written confirmation of compliance. To SEND DONATIONS or determine the status of compliance for any particular state visit www.gutenberg.org/donate.

While we cannot and do not solicit contributions from states where we have not met the solicitation requirements, we know of no prohibition against accepting unsolicited donations from donors in such states who approach us with offers to donate.

International donations are gratefully accepted, but we cannot make any statements concerning tax treatment of donations received from outside the United States. U.S. laws alone swamp our small staff.

Please check the Project Gutenberg web pages for current donation methods and addresses. Donations are accepted in a number of other ways including checks, online payments and credit card donations. To donate, please visit: www.gutenberg.org/donate.

Section 5. General Information About Project Gutenberg electronic works

Professor Michael S. Hart was the originator of the Project Gutenberg concept of a library of electronic works that could be freely shared with anyone. For forty years, he produced and distributed Project Gutenberg eBooks with only a loose network of volunteer support.

Project Gutenberg eBooks are often created from several printed editions, all of which are confirmed as not protected by copyright in the U.S. unless a

copyright notice is included. Thus, we do not necessarily keep eBooks in compliance with any particular paper edition.

Most people start at our website which has the main PG search facility:
www.gutenberg.org.

This website includes information about Project Gutenberg, including how to make donations to the Project Gutenberg Literary Archive Foundation, how to help produce our new eBooks, and how to subscribe to our email newsletter to hear about new eBooks.
